Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of supervision. Credit does not duplicate that in NV-1717-0025 (3/92).

NV-1717-0024

Leader Development NAVLEAD Instructor

Course Number: A-012-0045.

Location: Amphibious School, Little Creek, Norfolk, VA.

Length: 7-8 weeks (280-320 hours).

Exhibit Dates: 4/90–Present.

Learning Outcomes: Before 4/90 see NV-1717-0021. Upon completion of the course, the student will be able to use group process techniques to teach skills for supervision in the work setting.

Instruction: Lectures, demonstrations, media presentations, group learning, and writing are used to develop the discipline of supervision as it addresses psychological safety, adult learning, learning styles, stages of skill acquisition, experiential learning, goal setting, and behavior change through a competency-based approach. Note: resource reference material is dated.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in instructional strategies and teaching methods (3/92).

NV-1717-0025

Leader Development Program (NAVLEAD) for Leading Petty Officers

Course Number: A-500-0034.

Location: Various locations, Worldwide.

Length: 1 week (40 hours).

Exhibit Dates: 10/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the components which characterize motivation, supervisory and leadership skills, and personal skills which will increase effectiveness as a unit leader.

Instruction: Course includes lectures, class discussions, simulations, case studies, and daily logs to reinforce experiential learning which can be applied to a management setting. The course does not reinforce learning through written evaluation. Stress management and ethics capstone this course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of supervision. Credit does not duplicate that in NV-1717-0023 (3/92).

NV-1717-0026

Chief Warrant Officer/Limited Duty Officer (CWO/LDO) Leadership

(Basic Officer Leadership)

Course Number: P-1B-0007.

Location: Aviation Schools Command, Pensacola, FL.

Length: 2 weeks (61-79 hours).

Exhibit Dates: 6/97–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership including the use oral and written communication in professional relationships; the role of motivation, empowerment, and counseling in development of subordinate; and ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lectures, discussions, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-7C-0007, P-1B-0004, P-1B-0005, and P-1B-0006 (8/97).

NV-1717-0027

First Class Petty Officer Leadership

Course Number: P-500-0020.

Location: Aviation Schools Command, Pensacola, FL; Submarine Training Center Pacific, Yokosuka, Japan; Leader Training Unit, Rota, Spain; Trident Training Facility, Kings Bay, GA; Fleet Training Center, Mayport, FL; Leader Training Unit, Coronado, CA; Leader Training Unit, Little Creek, VA; Trident Training Facility, Bangor, Bremerton, WA; Service School Command, Great Lakes, IL; Submarine School, New London, Groton, CT.

Length: 2 weeks (62-78 hours).

Exhibit Dates: 6/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership including the use oral and written communication in professional relationships; the role of motivation, empowerment, and counseling in subordinate development; ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lectures, discussions, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-500-0021, and P-500-0025 (8/97).

NV-1717-0028

Chief Petty Officer Leadership

Course Number: P-500-0021.

Location: Aviation Schools Command, Pensacola, FL; Submarine Training Center Pacific, Yokosuka, Japan; Trident Training Facility, Kings Bay, GA; Fleet Training Center, Mayport, FL; Leader Training Unit, Coronado, CA; Leader Training Unit, Little Creek, VA; Trident Training Facility, Bangor, Bremerton, WA; Leader Training Unit, Rota, Spain; Service School Command, Great Lakes, IL; Submarine School, New London, Groton, CT.

Length: 2 weeks (76 hours).

Exhibit Dates: 6/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership including the use oral and written communication in professional relationships; the role of motivation, empowerment, and counseling in development of subordinates; and ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lectures, discussions, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-500-0020, and P-500-0025 (8/97).

NV-1717-0029

Second Class Petty Officer Leadership

Course Number: P-500-0025.

Location: Aviation Schools Command, Pensacola, FL; Submarine Training Center Pacific, Yokosuka, Japan; Trident Training Facility, Kings Bay, GA; Fleet Training Center, Mayport, FL; Leader Training Unit, Coronado, CA; Leader Training Unit, Little Creek, VA; Trident Training Facility, Bangor, Bremerton, WA; Leader Training Unit, Rota, Spain; Service School Command, Great Lakes, IL; Submarine School, New London, Groton, CT.

Length: 2 weeks (65-72 hours).

Exhibit Dates: 7/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership including the use oral and written communication in professional relationships; the role of motivation, empowerment, and counseling in development of subordinate; and ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lectures, discussions, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-500-0020, and P-500-0021 (8/97).

NV-1717-0030

Intermediate Officer Leadership

Course Number: P-7C-0023.

Location: Leader Training Unit, Coronado, CA; Leader Training Unit, Little Creek, VA; Submarine School, New London, Groton, CT; Surface Warfare Officer School, Newport, RI; Supply Corps School, Athens, GA.

Length: 2 weeks (77-78 hours).

Exhibit Dates: 9/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership, including the use oral and written communication, in professional relationships; the role of motivation, empowerment, and counseling in subordinate development; ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lecture, discussion, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-1B-0004, P-1B-0005, P-1B-0006, and P-7C-0039 (1/98).

NV-1717-0031

Basic Officer Leadership

Course Number: P-7C-0039.

Location: Naval Education and Training Center, Newport, RI; Leader Training Unit, Coronado, CA; Leader Training Unit, Little Creek, VA; Surface Warfare Officer School, Newport, RI; Supply Corps School, Athens, GA.

Length: 2 weeks (75-76 hours).

Exhibit Dates: 9/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership, including the use oral and written communication, in professional relationships; the role of motivation, empowerment, and counseling in subordinate development; ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lecture, discussion, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-7C-0023, P-1B-0004, P-1B-0005, and P-1B-0006 (1/98).

NV-1717-0032

Advanced Officer Leadership (XO)

Course Number: P-1B-0005.

Location: Command Leadership School, Newport, TI.

Length: 2 weeks (75 hours).

Exhibit Dates: 4/97–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership including the use oral and written communication in professional relationships; the role of motivation, empowerment, and counseling in development of subordinate; and ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lectures, discussions, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-7C-0039, P-1B-0004, P-1B-0005, and P-7C-0023 (1/98).

NV-1717-0033

Advanced Officer Leadership (Non-XO)

Course Number: P-1B-0006.

Location: Leader Training Unit, Little Creek, VA; Leader Training Unit, Coronado, CA.

Length: 2 weeks (75-76 hours).

Exhibit Dates: 4/97–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership including the use oral and written communication in professional relationships; the role of motivation, empowerment, and counseling in development of subordinate; and ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lectures, discussions, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in

P-1B-0004, P-1B-0005, P-7C-0022, and P-7C-0039 (1/98).

NV-1717-0034

Command Leadership

Course Number: P-1B-0004.

Location: Command Leadership School, Newport, TI.

Length: 2 weeks (75-76 hours).

Exhibit Dates: 4/97–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic principles of leadership, including the use oral and written communication, in professional relationships; the role of motivation, empowerment, and counseling in subordinate development; ways to manage human resources, teams, and stress to create a quality organizational climate.

Instruction: Lecture, discussion, exercises, interrogatories and questionnaires, and case studies and responses are used to cover the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision or 1 in leadership and 1 in business and professional communication. Credit duplicates that in P-1B-0005, P-1B-0006, P-7C-0039, and P-7C-0023 (1/98).

NV-1720-0003

Advanced Cryogenics Equipment Technician

Course Number: J-750-0485.

Location: Fleet Training Center Cryogenics School, Portsmouth, VA.

Length: 8-9 weeks (320 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to produce liquid nitrogen and liquid oxygen and handle, store, operate, repair, and maintain cryogenic systems.

Instruction: Classroom and practical exercises cover cryogenic equipment and systems.

Credit Recommendation: In the vocational certificate category, 5 semester hours in cryogenic refrigeration systems (3/89); in the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in cryogenic mechanical systems (3/89).

NV-1720-0004

A/M26U 16000 Hour Maintenance

Course Number: C-750-3213.

Location: Air Maintenance Training Group, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/91–Present.

Learning Outcomes: Upon completion of the course, the student will be able to complete selected scheduled maintenance on an expeditionary oxygen/nitrogen system at the intermediate maintenance level.

Instruction: Course covers micrometers, compressor maintenance, and liquefier maintenance. Methodology includes classroom lectures and practical exercises.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/94).

NV-1720-0005

A/M26U-5 Expeditionary Oxygen/Nitrogen System (EONS) Intermediate Maintenance Activity

Course Number: C-750-3212.

Location: Air Maintenance Training Group, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 2/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe basic cryogenics and operate, troubleshoot, and maintain an expeditionary oxygen/nitrogen system at the intermediate level.

Instruction: Course covers basic cryogenics, cryogenics hazards and safety precautions, first aid and fire fighting, and introduction to the expeditionary oxygen/nitrogen system. Methodology includes classroom lectures and practical exercises.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/94).

NV-1720-0006

Cryogenic Equipment Technician

Course Number: J-750-0015.

Location: Fleet Training Center, Norfolk, VA.

Length: 17 weeks (645 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to produce liquid nitrogen and liquid oxygen and handle, store, operate, repair, and maintain cryogenic systems.

Instruction: Methods of instruction include lectures and hands-on exercise. Topics covered include cryogenic science, high- and low-pressure air compressors, oxygen and nitrogen storage and distribution systems, quality assurance, oxygen cleaning systems, refrigeration systems, oxygen/nitrogen generating plants, basic thermodynamic definitions and principles, and basic electrical safety.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical safety and 3 in mechanical maintenance of pneumatic systems (11/95); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic physics and 3 in cryogenic mechanical systems (11/95).

NV-1721-0001

Remote Sensor System for Physical Security, Class C1

Course Number: A-198-0030.

Location: Service School Command, Great Lakes, IL.

Length: 7 weeks (252 hours).

Exhibit Dates: 1/90–1/91.

Objectives: After 1/91 see NV-1721-0013. To train selected students to maintain the remote sensor system for physical security at all times and in all conditions.

Instruction: Lectures and practical exercises cover the operation, theory, and block-diagram analysis of three types of remote sensor security systems. Basic digital theory is covered as background information to repair the multiplexer and video monitor to the component level.

Credit Recommendation: In the vocational certificate category, 3 semester hours in security system maintenance (1/86).

NV-1721-0003

Noise and Vibration Measurement

Course Number: A-210-0013.

Location: Fleet Submarine Training Facility, Pearl Harbor, HI; Submarine Training Center, San Diego; Submarine Training Center, Charleston, SC.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/90–10/94.

Objectives: To train enlisted personnel to operate sound- and vibration-monitoring equipment.

Learning Outcomes: Upon successful completion of this course, the student will apply basic knowledge of submarine noise reduction, mechanical vibration, and measurement to the use of sound measurement equipment, analysis of frequency spectrum, dynamic balancing, and vibration isolation of noise-critical machinery. The course is presented through lectures and laboratory instruction in sound, vibration fundamentals, structure-borne noise equipment, and vibration isolation devices. Hands-on instruction covers dynamic balancing and mechanical overhaul of noise critical motors. Instruments studies include general radio sound analysis system, electronic strobotac, and sound level meter.

Credit Recommendation: In the vocational certificate category, 2 semester hours in vibration reduction and analysis (11/85).

NV-1721-0006

A-7A/B Attitude Heading and Reference System Intermediate Maintenance

Course Number: C-102-3793.

Location: Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Lemoore, CA.

Length: 2 weeks (60-80 hours).

Exhibit Dates: 1/90–3/92.

Objectives: To train personnel in the operation and maintenance of a specific attitude, heading, and reference system.

Instruction: Lectures and practical exercises cover an attitude, heading, and reference system (ASN-50), including introduction to the system and review of gyroscopic fundamentals; theory of the displacement gyro, amplifier power supply, compass adapter compensator, compass controller and switching rate gyro; attitude indicator coupler and attitude director indicator; and intermediate maintenance and test procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in instrument maintenance (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in control systems maintenance (3/82).

NV-1721-0007

Opticalmen, Class A

Course Number: A-670-0018.

Location: Service School Command, Great Lakes, IL.

Length: Self-paced, 24 weeks (871 hours).

Exhibit Dates: 1/90–12/91.

Objectives: After 12/91 see NV-1721-0017. To train nonrated personnel as opticalmen in units of the fleet or in shore activities.

Instruction: Lectures and practical exercises cover the duties of opticalmen, including basic mathematics, hand tools and measuring instruments, drills and drilling machines, grinders, basic lathe operation, basic milling machine operation, maintenance and material management, fundamentals of optics, optical instrument components, optical instrument repair, lens cementing and painting, primary telescopes, and navigation instruments. Course includes basic electricity and blueprint reading.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 2 in physical optics, 1 in basic mathematics, 1 in basic circuit theory, and 1 in basic circuit laboratory (1/86).

NV-1721-0011

Noise Reduction/Structure Borne Monitoring (Noise and Vibration Monitoring System (NVMS))

Course Number: A-210-0019.

Location: Submarine Training Center, New London, Groton, CT; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine Training Center, Charleston, SC; Submarine Training Facility, Charleston, SC; Submarine Training Facility, San Diego, CA.

Length: 2 weeks (79 hours).

Exhibit Dates: 1/90–3/93.

Learning Outcomes: Upon successful completion of the course, the student will apply basic knowledge of submarine noise reduction, mechanical vibration, and measurement to the use of sound measurement equipment, analysis of frequency spectrum, in-place dynamic balancing, and vibration isolation of noise critical machinery.

Instruction: The course is presented through lectures and laboratory instruction in sound, vibration fundamentals, structure-borne noise equipment, and vibration isolation devices. Hands-on instruction covers dynamic balancing and mechanical overhaul of noise critical motors. Instruments studied include general radio sound analysis system, electronic strobotac, and sound level meter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to acoustics (7/87).

NV-1721-0012

1. Meteorological Equipment Maintenance, Class C1
2. Meteorological Equipment Maintenance, Class C1 USN

Course Number: *Version 1:* C-198-3899; C-198-2010. *Version 2:* C-198-2010.

Location: *Version 1:* Technical Training Unit, Keesler AFB, MS. *Version 2:* Naval Detachment, Chanute AFB, IL.

Length: *Version 1:* 12-13 weeks (491-492 hours). *Version 2:* 16-17 weeks (576 hours).

Exhibit Dates: *Version 1:* 10/93–Present. *Version 2:* 1/90–9/93.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to operate and maintain selected meteorological and oceanographic equipment with minimal supervision aboard ship and at naval shore activities. *Version 2:* Upon completion of the course, the student will be able to operate and maintain selected meteorological and oceanographic equipment with minimal supervision aboard ship and at naval shore activities.

Instruction: *Version 1:* Lectures and practical exercises cover logic circuits, the maintenance and repair of facsimile receivers, surface observation equipment, runway visibility equipment, weather radars, soldering, weather satellites, and weather data recorders. *Version 2:* Lectures and practical exercises cover logic circuits, the maintenance and repair of facsimile receivers, surface observation equipment, runway visibility equipment, weather radars, soldering, weather satellites, and weather data recorders.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, for Navy personnel only, 3 semester hours in electronic systems troubleshooting and maintenance and 3 in computer systems troubleshooting and maintenance; for Marine Corps personnel only, 2 semester hours in electronic systems troubleshooting and maintenance and 2 in computer systems troubleshooting and maintenance (4/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in electronic systems troubleshooting and maintenance and 4 in computer systems troubleshooting and maintenance (3/91).

NV-1721-0013

Electronic Security Systems Maintenance (ESSM), Class C

Course Number: A-101-0030; A-198-0030.

Location: Service School Command, Great Lakes, IL.

Length: 9 weeks (360 hours).

Exhibit Dates: 2/91–Present.

Learning Outcomes: Before 2/91 see NV-1721-0001. Upon completion of the course, the student will be able to operate, maintain, and troubleshoot electronic intrusion alarm security systems commonly used by the Navy to protect valuable resources.

Instruction: Lectures and performance exercises use meters and oscilloscopes in diagnosing mechanical trip sensors, ultrasonic motion detectors, magnetic sensors, capacitive sensors, microwave detection circuits, video systems, microprocessor-based intrusion detection systems, and private exchange telephone systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in security systems maintenance (9/97).

NV-1721-0014

KA-99A Camera and Camera Test Set Intermediate Level Maintenance

Course Number: C-670-3896.

Location: Air Maintenance Training Group, Miramar, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 5/90–Present.

Learning Outcomes: Upon completion of the course the students will be able to explain basic photographic principles and terms; disassemble, clean, inspect, relubricate, and assemble an electronically-controlled camera; and troubleshoot and repair to the module level.

Instruction: Course methods include small lecture groups with supervised laboratory. Emphasis is placed on troubleshooting based on symptom diagnosis and module replacement.

Credit Recommendation: In the vocational certificate category, 3 semester hours in camera repair (12/92); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic photographic principles and 1 in electronic systems troubleshooting and maintenance (12/92).

NV-1721-0015

KS-87D Camera Set Intermediate Maintenance

Course Number: C-198-3834.

Location: Air Maintenance Training Group, Miramar, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 12/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to test, disassemble, troubleshoot (component level), and reassemble an electronically-controlled camera; student will also demonstrate knowledge of circuit theory.

Instruction: Small study groups with supervised laboratory on actual equipment are the methods of instruction. Emphasis is on troubleshooting using standard test equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in camera repair (12/92); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (12/92).

NV-1721-0016

KS-153A Camera Intermediate Maintenance

Course Number: C-198-3836.

Location: Air Maintenance Training Group, Miramar, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to test, disassemble, troubleshoot, repair, and reassemble an electronically-controlled camera at the module level.

Instruction: Small group lectures and supervised laboratories are the methods of instruction. Emphasis is on troubleshooting by symptom diagnosis.

Credit Recommendation: In the vocational certificate category, 2 semester hours in camera repair (12/92); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (12/92).

NV-1721-0017

Opticalman, Class A

Course Number: A-670-0018.

Location: Technical Training Center, Corry Station, Pensacola, FL.

Length: 22 weeks (733 hours).

Exhibit Dates: 1/92–Present.

Learning Outcomes: Before 1/92 see NV-1721-0007. Upon completion of the course, the student will be able to perform organizational and intermediate level maintenance, under supervision, on small navigation instruments and binoculars and will be familiar with submarine periscope externals and hull packing.

Instruction: Lectures, demonstration, and hands-on laboratory exercises cover basic blueprint reading; basic mathematics; the care, use, setup, and operation of hand and machine tools; optical theory, including nomenclature, ray tracing, and lenses; and basic electric circuit theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operation, 2 in physical optics, 1 in basic health, 1 in basic electric circuits, and 1 in basic circuit laboratory (1/98).

NV-1721-0018

Instrumentman, Class A

Course Number: *Version 1:* A-670-0011. *Version 2:* A-670-0010.

Location: Technical Training Center, Corry Station, Pensacola, FL.

Length: *Version 1:* 17-18 weeks (696 hours). *Version 2:* 17-18 weeks (580 hours).

Exhibit Dates: *Version 1:* 10/97–Present. *Version 2:* 1/90–9/97.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to perform organizational and intermediate level maintenance, under supervision, on instruments that measure pressure, temperature, speed, and torque. *Version 2:* Upon completion of the course, the student will be able to perform organizational and intermediate level maintenance, under supervision, on instruments that measure pressure, temperature, speed, and torque.

Instruction: *Version 1:* Lectures, demonstrations, and hands-on laboratory exercises cover the care and use of basic hand tools; basic mathematics; the basic theory of pressure-operated measuring equipment (Bourdon tubes, diaphragms, bellows, and piston), temperature-operated measuring equipment (bimetallic, PRT, and Bourdon tube), and mechanically-operated measuring equipment (centrifugal, photo cell, and torque); basic electric circuit theory; soldering methods; and procedures for handling mercury and combustible gases. *Version 2:* Lectures, demonstrations and hands-on laboratory exercises cover the care and use of basic hand tools; basic mathematics; the basic theory of pressure-operated measuring equipment (Bourdon tubes, diaphragms, bellows, and piston), temperature operated measuring equipment (bimetallic, PRT, and Bourdon tube), and mechanically operated measuring equipment (centrifugal, photo cell, and torque); basic electric circuit theory; soldering methods; and procedures for handling mercury and combustible gases.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic physics, 1 in basic arithmetic, 1 in basic electric circuits, 1 in basic circuit laboratory, and 2 in basic instrumentation (2/98). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic arithmetic, 1 in basic electric circuits, 1 in basic circuit laboratory, and 2 in basic instrumentation (1/93).

NV-1722-0008

Officer of the Deck-Basic
(Prospective Officer of the Deck)

Course Number: K-2E-2103.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (87-92 hours).

Exhibit Dates: 1/90–1/93.

Objectives: To provide basic preparation for the duties of an officer of the deck in port or underway.

Instruction: Lectures, problem solving, and laboratory experiences cover seamanship, navigation, and tactics including ground tackle; heavy weather seamanship; use of magnetic compass, buoys, and other navigation aids; navigation publications; use of maneuvering board; and voice radio procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic navigation and seamanship (1/83).

NV-1722-0011

Barge Ferry Pilot

Course Number: K-062-0012.

Location: Amphibious School, San Diego, CA.

Length: 2 weeks (125 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe all aspects of operation of the causeway section powered/side loadable warping tug barge ferry; assemble and disassemble a barge ferry; maneuver, beach, and moor the ferry; and conduct loading and unloading operations.

Instruction: Lectures using audio-visuals and practical applications cover the areas described above. Student must successfully complete a pretest, a progress test, and a final test to pass the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic piloting (3/92).

NV-1722-0012

Barge Ferry Coxswain

Course Number: K-063-0011.

Location: Amphibious School, San Diego, CA.

Length: 2 weeks (121 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the barge ferry and its communications equipment, direct all maintenance on the barge ferry system, and identify all aspects of barge ferry ancillary equipment.

Instruction: Classroom lectures and practical exercises cover the general theory of the barge ferry, its operation, and its subsystems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic piloting (3/92).

NV-1722-0013

Landing Craft Air Cushion Navigator

Course Number: K-193-0436.

Location: Amphibious School, San Diego, CA.

Length: 11 weeks (398 hours).

Exhibit Dates: 11/90–10/96.

Learning Outcomes: Upon completion of the course, the student will be able to describe the operation of the craft, interpret the rules of the road, operate the craft under normal and special situations, and follow emergency procedures.

Instruction: Lectures and laboratories using visual aids and practical applications cover the general description of the craft, rules of the road, checklists, and craft operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in power boat operations (3/92).

NV-1722-0014

Landing Craft Air Cushion Operator

Course Number: K-062-0100.

Location: Amphibious School, San Diego, CA.

Length: 12 weeks (473 hours).

Exhibit Dates: 11/90–10/96.

Learning Outcomes: Upon completion of the course, the student will be able to describe the operation of the craft, interpret the rules of the road, operate the craft under normal and special situations, and follow emergency procedures.

Instruction: Lectures and laboratories using visual aids and practical applications cover the general description of the craft, rules of the road, checklists, and craft operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in power boat operations (3/92).

NV-1722-0015

Assault Boat Coxswain

Course Number: K-062-0010.

Location: Amphibious School, Little Creek, Norfolk, VA; Mobile training, as required; Amphibious School, San Diego, CA.

Length: 2 weeks (112 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate all types of landing craft in a wide variety of surf conditions.

Instruction: Lectures and laboratories using films, models, and on-board training cover line handling, beach signals, rules of the road, aids to navigation, gyrocompass, vessel description and handling, dangers of surging surf, and beach and surf characteristics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in power boat operations (3/92).

NV-1722-0016

Landing Craft Air Cushion Engineer/
Assistant Operator

Course Number: K-652-0312.

Location: Amphibious School, San Diego, CA.

Length: 12 weeks (473 hours).

Exhibit Dates: 11/90–10/96.

Learning Outcomes: Upon completion of the course, the student will be able to describe the operation of the craft, interpret the rules of the road, operate the craft under normal and special situations, and follow emergency procedures.

Instruction: Lectures and laboratories using visual aids and practical applications cover the general description of the craft, rules of the road, checklists, and craft operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category-gory, 6 semester hours in power boat operations (3/92).

NV-1722-0017

International Hydrographic Management and Engineering

Course Number: S-8G-0500.

Location: Naval Oceanographic Office, Stennis Space Center, Bay St. Louis, MS.

Length: 26 weeks (600 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will apply fundamental skills to conduct a hydrographic survey (in the field) to collect data necessary for constructing (but not publishing) a nautical chart. The student will also have a conceptual grasp of the overall process of nautical charting and have acquired sufficient practical experience to lead the field party.

Instruction: The hydrographic training program of the naval oceanographic office is designed to give the student a working knowledge of hydrographic survey techniques and skills. The practical aspects of geodetic and hydrographic surveying, data reduction, processing, smooth-sheet and nautical chart production are taught in a real-time field laboratory setting. This is accomplished through use of a supervised student project that includes planning of a survey, documenting the plans by writing instructions, conducting the survey, processing the data, and producing a nautical chart.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in hydrographic surveying (6/96).

NV-1723-0002

Machinery Repairmen, Class A

Course Number: A-702-0019.

Location: Service School Command, San Diego, CA.

Length: 10-11 weeks (400 hours).

Exhibit Dates: 1/90–5/91.

Objectives: After 5/91 see NV-1723-0019. To train enlisted personnel to perform as machinery repairmen.

Instruction: Lectures and practical exercises in machinery repair, including use of hand tools and measuring instruments; principles and applications of blueprint reading; mathematics; portable equipment; machine shop procedures; bench work; disassembly, repair, assembly, and testing; basic, intermediate, and advanced operations on drilling, shaping, turning, milling, grinding, sawing, and engraving machines; the fabrication of parts and repair of valves, and maintenance management.

Credit Recommendation: In the vocational certificate category, 6 semester hours in machine trades or machinery repair (5/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine trades or machinery repair (5/82).

NV-1723-0010

Intermediate Level Maintenance Navigation Technician

(Navigation Technician Intermediate Level Maintenance)

Course Number: A-193-0311.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3 weeks (104-120 hours).

Exhibit Dates: 1/90–Present.

Objectives: To provide naval personnel with the skills and knowledge to perform intermediate level maintenance on navigation subsystems.

Instruction: Lectures and practical exercises cover the appropriate administrative procedures for maintenance duties including the correct soldering and wire wrapping techniques needed to maintain the navigation subsystem.

Credit Recommendation: In the vocational certificate category, 2 semester hours in soldering and wire wrapping techniques (6/89).

NV-1723-0013

Hull Technician, Class A, Phase I/II

Course Number: A-700-0010; A-495-0035.

Location: Damage Control Training Center, Philadelphia, PA; Technical Training Center, Treasure Island, San Francisco, CA.

Length: 11 weeks (440 hours).

Exhibit Dates: 1/90–11/91.

Objectives: To train enlisted personnel in damage control techniques and in ship fitting and hull maintenance.

Instruction: The first three weeks contain lectures and practical exercises in hull and hull systems, casualty control, fire fighting, hull and pipe patching, characteristics of nuclear bursts, classification and detection of biological and chemical agents, shipboard decontamination, and use and care of oxygen breathing equipment. The final 8 weeks is devoted to lectures and practical exercises in ship fitting and hull maintenance, including basic tools and materials, oxyacetylene welding, manual arc welding, sheet metal layout and fabrication, shipboard piping systems, and environmental pollution control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, for those students completing phase I, 2 semester hours in damage control and 1 in fire fighting. For those students completing phase II, 3 semester hours in welding processes and 1 in sheet metal fabrication (11/81).

NV-1723-0014

Underwater Hydraulic Tools

Course Number: A-433-0043.

Location: Mobile Diving Salvage School, Little Creek, VA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (75 hours).

Exhibit Dates: 1/90–1/97.

Objectives: To provide second class divers and above with advanced maintenance and tool techniques in the NAVSEA underwater hydraulic tool package.

Learning Outcomes: Upon successful completion of this course, the diver is prepared for assignment to ashore/afloat ship repair facilities to provide underwater ship repair. This includes in-depth study of the individual tools, their power sources, troubleshooting, and preventive maintenance actions. Hydraulic tools covered in the course include grinder, impact wrench, come-along, rope cutter, jack, and sump pump.

Credit Recommendation: In the vocational certificate category, 1 semester hour in mechanical laboratory (11/85).

NV-1723-0015

Machine Tool Operator

Course Number: A-702-0028.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Trident Training Facility, Kings Bay, GA; Submarine Training Facility, Charleston, SC; Submarine School, New London, Groton, CT.

Length: 3 weeks (119 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and maintain lathes and milling machines.

Instruction: Lectures and laboratories cover lathes and milling machine operation and maintenance, including measuring instruments, center drilling, rough turning, tool bit grinding, taper turning, threading, knurling, and milling.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in manufacturing or mechanical technology (lathe and milling machine operation) (10/89).

NV-1723-0016

Advanced Auxiliary Equipment Package

Course Number: A-652-0136.

Location: Submarine School, New London, Groton, CT.

Length: 13 weeks (513 hours).

Exhibit Dates: 1/90–6/91.

Learning Outcomes: Upon completion of the course, the student will be able to weld, braze, and repair air conditioning and refrigeration systems.

Instruction: This is a pipeline course consisting of A-701-0064, Fuel Gas Welding, Brazing, and Cutting; A-701-0053, Shielded Metal Arc Welding (NV-1710-0115); A-702-0028, Machine Tool Operator (NV-1723-0015), and A-720-0030, Air Conditioning and Refrigeration (NV-1730-0011). See the individual exhibits for further information.

Credit Recommendation: Please refer to the exhibits noted above for credit recommendation (10/89).

NV-1723-0017

1. Advanced Steelworker
2. Advanced Steelworker, Class C1

Course Number: *Version 1:* A-711-0018. *Version 2:* A-711-0018.

Location: *Version 1:* Construction Training Center, Gulfport, MS. *Version 2:* Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: *Version 1:* 13 weeks (512 hours). *Version 2:* 12 weeks (455 hours).

Exhibit Dates: *Version 1:* 3/94–Present. *Version 2:* 1/90–2/94.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to plan, estimate, and manage a project; perform advanced sheet metal layout and fabrication; bend and place reinforcing steel; splice wire rope and fiber line; erect pre-engineered building components; perform oxy-gas welding; perform shielded metal arc welding; and act as shop foreman. *Version 2:* Upon completion of the course, the student will be able to plan, estimate, and manage a project; perform advanced sheet metal layout and fabrication; bend and place reinforcing steel; splice wire rope and fiber line; erect pre-engineered building components; perform oxy-gas welding; perform shielded metal arc welding; and act as shop foreman.

Instruction: *Version 1:* Lectures, demonstrations, audiovisual, training aids, and practical experiences cover planning and estimating, metal fabrication, line splicing, reinforcement bending and placing, erection procedures, and welding operations. *Version 2:* Lectures, demonstrations, audiovisual, training aids, and practical experiences cover planning and estimating, metal fabrication, line splicing, reinforcement bending and placing, erection procedures, and welding operations.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in applied mathematics (4/97); in the lower-division baccalaureate/associate degree category, 4 semester hours in planning, estimating, and scheduling in steel/metal fabrication; 8 in advanced welding; and 1 in technical mathematics (4/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in steel/metal estimating, 3 in advanced sheet metal design/fabrication, 6 in advanced welding, and 2 in shop management (6/91).

NV-1723-0018

Steelworkers, Class A

Course Number: A-711-0015.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: 10-11 weeks (372-410 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to read blueprints, perform sheet metal layout and fabrication; place reinforcing steel; erect preengineered metal buildings; use and care for fiber line; and use oxy-MAPP equipment for cutting, brazing, welding, and arc welding mild steel plates.

Instruction: Lectures and practical exercises cover blueprint reading, sheet metal design and fabrication, reinforcing steel placement, steel erection, and welding.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 3 in sheet metal design and fabrication, and 6 in welding (7/96).

NV-1723-0019

Machinery Repairman, Class A

Course Number: A-702-0019.

Location: Service School Command, San Diego, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 6/91–Present.

Learning Outcomes: Before 6/91 see NV-1723-0002. Upon completion of the course, the student will be prepared to use basic machine shop equipment, including lathes, milling machines, drill presses, grinders, and other common machine tools.

Instruction: Lectures and extensive practical exercises cover typical repair, maintenance, and overhaul of surface ship components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic machine shop theory and practice (11/93).

NV-1723-0020

Molder Journeyman, Class J

Course Number: A-790-0014.

Location: Service School Command, San Diego, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 7/93–Present.

Learning Outcomes: Upon completion of the course, the student will be prepared for advanced molder operations in foundries at the journeyman level.

Instruction: Lectures and practical laboratory experiences cover molding techniques, metal identification, metallurgy, and heat treatment practice at the advanced level.

Credit Recommendation: In the vocational certificate category, 6 semester hours in advanced metal casting theory and practice (11/93).

NV-1723-0021

Patternmaker, Class J

Course Number: A-790-0013.

Location: Service School Command, San Diego, CA.

Length: 9-10 weeks (400 hours).

Exhibit Dates: 4/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform advanced patternmaking and manage a pattern and foundry shop.

Instruction: By use of lectures, audiovisuals, demonstrations, and extensive practical hand-on learning experiences, the topics covered include pattern reproduction processes, stave/lagged pattern construction, segmental pattern construction, advanced pattern/layout construction, and double-walled machine part pattern construction and casting manufacture.

Credit Recommendation: In the vocational certificate category, 12 semester hours in advanced patternmaking (12/93); in the lower-division baccalaureate/associate degree category, 3 semester hours in shop management (12/93).

NV-1723-0022

Patternmaker/Molder, Class J

Course Number: A-790-0011.

Location: Service School Command, San Diego, CA.

Length: 6-7 weeks (240-280 hours).

Exhibit Dates: 4/90–Present.

Learning Outcomes: Upon completion of the course, the student will be trained in both the patternmaker and molder rates.

Instruction: Lectures and practical laboratory experiences cover both molding and foundry practices and techniques, including safety, blueprint reading, casting, alloys, and metallurgy.

Credit Recommendation: In the vocational certificate category, 6 semester hours in advanced foundry theory and practice (11/93).

NV-1723-0023

Molder, Class A
(Molder, Class A1)

Course Number: A-790-0010.

Location: Service School Command, San Diego, CA.

Length: 15 weeks (600 hours).

Exhibit Dates: 3/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to use hand tools and equipment necessary to melt and mold metal castings.

Instruction: Lectures and laboratory experiences cover the materials, principles, and processes used in metals and alloy casting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in metal casting theory and processes and 9 in metal and alloy molding and casting laboratory (11/93).

NV-1723-0024

Patternmaker, Class A
(Patternmaker, Class A1)

Course Number: A-790-0012.

Location: Service School Command, San Diego, CA.

Length: 16 weeks (640 hours).

Exhibit Dates: 4/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to fabricate patterns for various machine parts and components and operate and maintain pattern shop equipment.

Instruction: By use of lectures, audiovisuals, demonstrations, and extensive hands-on practical exercises, the topics cover basic pattern construction, including use of hand and power tools (band saws, joiners, planers, etc.); types of fasteners; finishers; lumber and lumber measurement; parted pattern construction, including use of lathes, dowels, and carving tools; flanged fittings; and special pattern construction techniques, including lagged construction, concave sawing, segmental casting, and composite casting.

Credit Recommendation: In the vocational certificate category, 15 semester hours in patternmaking (11/93).

NV-1723-0025

Computer Numerically Controlled
Machinery, Class C

Course Number: A-702-0025.

Location: Service School Command, San Diego, CA.

Length: 8 weeks (300-320 hours).

Exhibit Dates: 12/92–Present.

Learning Outcomes: Upon completion of the course, the student will apply the basic principles of computer numerical control (CNC) and programming, including CNC lathes and milling machines, CAD/CAM software, and the production of precision repair parts.

Instruction: Lectures, demonstrations, and laboratory experience in CNC machines, programming, and personal computer-based software in CAD/CAM.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in machine tool CNC theory and programming and 4 in machine tool CNC advanced laboratory (11/93).

NV-1724-0001

Heat Treatment of Metals, Class C

Course Number: A-702-0021.

Location: Service School Command, San Diego, CA.

Length: 7 weeks (234-280 hours).

Exhibit Dates: 1/90–12/92.

Objectives: After 12/92 see NV-1724-0014. To train personnel as heat treatment specialists.

Instruction: Lectures and practical exercises cover the heat treatment of metals, including properties of metals, metal alloy systems, identification and classification of metals, corrosion, and surface treatment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in physical metallurgy and 3 in heat treating laboratory (5/82).

NV-1724-0003

NONDESTRUCTIVE TESTING OF METALS
ULTRASONIC THICKNESS INSPECTION,
CLASS C1

Course Number: A-701-0046.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To train naval personnel to be ultrasonic thickness and banding inspectors.

Instruction: Course includes instruction in the theory of ultrasonics, wave modes, equipment-transducers and flow detectors, documents and standards, thickness and bonding readings, and glass reinforced plastics.

Credit Recommendation: In the vocational certificate category, 1 semester hour in ultrasonic nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in ultrasonic quality control (5/82).

NV-1724-0004

NONDESTRUCTIVE TESTING OF METALS
ULTRASONIC SILVER BRAZE INSPECTION,
CLASS C1

Course Number: A-701-0034.

Location: Service School Command, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To train naval personnel in ultrasonic silver braze inspection.

Instruction: Classroom instruction and laboratory exercises cover the theory of ultrasonic wave technology to be used for nondestructive testing, including wave theory, equipment calibration, transducers, and flaw detection as applied to brazed joints.

Credit Recommendation: In the vocational certificate category, 2 semester hours in ultrasonic nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in ultrasonic quality control (5/82).

NV-1724-0005

NONDESTRUCTIVE TESTING OF METALS
ULTRASONIC SHEARWAVE INSPECTION,
CLASS C1

Course Number: A-701-0047.

Location: Service School Command, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To train personnel in the theory, application, and techniques required for ultrasonic shearwave inspection.

Instruction: Course covers theory of the generation, attenuation, and reflections of ultrasonic wave modes including the advantages and limitations of ultrasonic testing and operation of ultrasonic shearwave equipment to detect, evaluate, and record weld discontinuities in accordance with written procedures and acceptance standards.

Credit Recommendation: In the vocational certificate category, 2 semester hours in ultrasonic sheer wave nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in quality control ultrasonic shearwave inspection (5/82).

NV-1724-0006

NONDESTRUCTIVE TESTING OF METALS VISUAL,
MAGNETIC PARTICLE AND LIQUID
PENETRANTS OPERATOR/INSPECTOR

Course Number: A-701-0033.

Location: Service School Command, San Diego, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/90–12/92.

Objectives: After 12/92 see NV-1724-0011. To train naval personnel in the theory and application of nondestructive testing of materials.

Instruction: Course includes inspection of weld zones by visual, magnetic particle, and liquid penetrant methods. Also covers instruction in basic magnetic theory and welding techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in quality control in visual metals, magnetic particles, and liquid penetrants (5/82).

NV-1724-0008

NONDESTRUCTIVE TESTING OF METALS EDDY
CURRENT INSPECTION, CLASS C1

Course Number: A-701-0050.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (68 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To train personnel in the theory, application, and techniques required for eddy current inspection.

Instruction: Course includes electrical theory of the generation and distribution of eddy currents including the advantages and limitations of eddy current testing, operation of eddy current crack detection equipment on ferrous welds in accordance with written procedures and acceptance standards, and operation of eddy current equipment to detect and evaluate dealloying in bronze castings in accordance with written procedures and acceptance standards.

Credit Recommendation: In the vocational certificate category, 1 semester hour in nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in quality control (5/82).

NV-1724-0009

NONDESTRUCTIVE TESTING OF METALS
RADIOGRAPHIC OPERATOR

Course Number: A-701-0032.

Location: Service School Command, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To train personnel in the theory, application, and techniques required for radiographic inspection.

Instruction: Lectures and practical exercises cover the theory of the generation and exposure effects of X-rays and gamma-rays and film exposure and development techniques according to acceptable standards.

Credit Recommendation: In the vocational certificate category, 3 semester hours in radiographic nondestructive testing (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in radiographic quality control and 1 in photographic laboratory (5/82).

NV-1724-0010

RADIOGRAPHIC OPERATOR/INSPECTOR

Course Number: A-701-0057.

Location: Service School Command, San Diego, CA.

Length: 10 weeks (400 hours).

Exhibit Dates: 1/94–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform radiographic inspection of welded metal components and castings.

Instruction: Group-paced lessons include lectures, questions, and practical exercises. Written responses are required of all students.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radiographic testing of metal components (11/93).

NV-1724-0011

NONDESTRUCTIVE TESTING OF METALS, MAGNETIC
PARTICLES, AND LIQUID PENETRANTS
OPERATOR/INSPECTOR

Course Number: A-701-0033.

Location: Service School Command, San Diego, CA.

Length: 9 weeks (360 hours).

Exhibit Dates: 1/93–Present.

Learning Outcomes: Before 1/93 see NV-1724-0006. Upon completion of the course, the student will be able to perform visual, magnetic particle, and liquid penetrant inspections of welded materials and research inspection and qualification requirements of the above inspection techniques.

Instruction: By use of lectures, audiovisuals, demonstrations, and by extensive practical hands-on learning experiences, topics covered are introduction to nondestructive testing, visual inspection techniques, liquid penetrant inspection techniques, magnetic particle inspection techniques, inspection techniques, and qualification requirements.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in visual, magnetic particle, and liquid penetrant inspection by nondestructive methods (11/92).

NV-1724-0012

NONDESTRUCTIVE TESTING OF METALS
RADIOGRAPHIC INSPECTOR

Course Number: A-701-0035.

Location: Service School Command, San Diego, CA.

Length: 4-5 weeks (200 hours).

Exhibit Dates: 1/90–1/98.

Learning Outcomes: Upon completion of the course, the student will be able to perform radiographic inspections.

Instruction: By use of lectures, audiovisuals, demonstrations, and extensive practical hand-on learning experiences, topics covered include radiographic theory, function of X-ray equipment, characteristics of X-rays and gamma rays, processing of X-ray film, weld defects, qualification and inspection requirements, and file interpretation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in radiographic testing of metal welds (11/93).

NV-1724-0013

Ultrasonic/Eddy Current Inspector

Course Number: A-701-0058.

Location: Service School Command, San Diego, CA.

Length: 9 weeks (360 hours).

Exhibit Dates: 5/93–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply the principles of ultrasonic and eddy current inspection to welded ferrous metal components.

Instruction: Lectures and laboratory exercises cover basic principles, test methodology, ultrasonic wave theory, energy reflections, flaw detection, ultrasonic test equipment, eddy current theory and testing, and phase analysis testing equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in nondestructive testing of welded metal components (11/93).

NV-1724-0014

Heat Treatment of Metals

Course Number: A-702-0021.

Location: Service School Command, San Diego, CA.

Length: 7 weeks (250 hours).

Exhibit Dates: 1/93–Present.

Learning Outcomes: Before 1/93 see NV-1724-0001. Upon completion of the course, the student will be able to identify metals and mechanical properties of metals, test the properties of metals, and heat treat ferrous metals.

Instruction: Course covers heat treatment of metals, chemical metallurgy of ferrous metals, identification of metals, atomic and crystalline structure of metals, chemical metallurgy, corrosion and corrosion prevention, and heat treatment of ferrous and nonferrous metals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in physical metallurgy and 3 in heat treatment of metal components (10/93).

NV-1726-0001

Shipboard Barber

Course Number: A-840-0013.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply the basic principles of sanitation and hair cutting procedures.

Instruction: The course includes lectures, demonstrations, laboratories, and performance exercises in grooming, sanitation, skin conditions, customer relations, hair cutting, and basic shop management and operations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in barber/cosmetology (11/95).

NV-1728-0006

Aircraft Firefighting and Rescue, Class A1

Course Number: C-780-2010.

Location: Air Technical Training Center, Memphis, Millington, TN.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 1/90–9/95.

Objectives: To train enlisted personnel who have backgrounds in aviation fundamentals to perform as aviation crash crewmen.

Instruction: Lectures and practical exercises cover the functions of aviation crash crewmen, including theory of fire and fire extinguishing, aircraft familiarization, mobile fire fighting equipment, and crash rescue and fire fighting techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in fire fighting (9/89).

NV-1728-0009

Damage Controlman, Class A School

Course Number: A-495-2060.

Location: Technical Training Center, Treasure Island, San Francisco, CA.

Length: 8 weeks (300 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide training to promote effective shipboard team member participation in damage control activities.

Instruction: Lectures and laboratory exercises provide knowledge of shipboard systems, identification and communication of damage control conditions, and skill development in effective and safe damage control procedures including fire fighting and biological and chemical decontamination.

Credit Recommendation: In the vocational certificate category, 3 semester hours in decontamination technology (8/89); in the lower-division baccalaureate/associate degree category, 4 semester hours in fire technology and 2 in shipboard systems (8/89).

NV-1728-0011

Damage Control Assistant

Course Number: A-4G-0010; A-4G-0011.

Location: Control Training Center, Treasure Island, San Francisco, CA; Control Training Center, Philadelphia, PA.

Length: 6 weeks (220 hours).

Exhibit Dates: 1/90–1/97.

Objectives: To train officers to be damage control officers.

Instruction: Course includes lectures in fire prevention and fire fighting techniques, including extinguishing random fires, shipboard fire prevention, operation of oxygen breathing apparatus, and other fire fighting equipment; practical damage control, including underwater damage repair, plugging and patching, and damage control battle organization; and nuclear, biological, and chemical warfare defense operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in ship engineering and 1 in fire prevention (7/87).

NV-1728-0019

Aviation Boatswain's Mate Handling, Class A1 (Sea Track)

Course Number: C-822-2011.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 2-3 weeks (95 hours).

Exhibit Dates: 1/90–12/97.

Learning Outcomes: Upon completion of the course, the student will be able to assist in aircraft ground maneuvering and assist in fire fighting with direct supervision at sea.

Instruction: Course includes lectures and performance exercises in aircraft ground maneuvering and fire fighting techniques at sea.

Credit Recommendation: In the vocational certificate category, 1 semester hour in heavy equipment operation (fire fighting) (6/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft ground handling, 1 in fire fighting principles, and 1 in industrial safety (6/87).

NV-1728-0020

Aviation Boatswain's Mate Handling, Class A1

(Aviation Boatswain's Mate Aircraft Handling, Class A1)

Course Number: C-822-2010.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 5-6 weeks (224 hours).

Exhibit Dates: 1/90–7/93.

Learning Outcomes: After 7/93 see NV-1704-0417. Upon completion of the course, the student will be able to assist in aircraft ground maneuvering and assist in fire fighting with direct supervision on shore or at sea.

Instruction: Lectures and performance exercises cover aircraft ground maneuvering and fire fighting techniques.

Credit Recommendation: In the vocational certificate category, 1 semester hour in heavy equipment operation (fire fighting) (6/87); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft ground handling, 1 in fire fighting principles, and 1 in industrial safety (6/87).

NV-1728-0021

Navy Security Guard, Class C1

Course Number: A-830-0011.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (181 hours).

Exhibit Dates: 1/90–12/97.

Learning Outcomes: Upon completion of the course, the student will display knowledge of patrolling assigned sector; qualify in weapons, firearms, and self-defense techniques; conduct preliminary investigations; complete and file police reports; operate patrol vehicle; perform physical security, loss prevention, and crime prevention; respond to calls for police service; and become familiar with military code of justice.

Credit Recommendation: In the vocational certificate category, 1 semester hour in physical training and weaponry (8/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in patrol procedures (8/87).

NV-1728-0023

SENIOR ENLISTED DAMAGE CONTROL

Course Number: *Version 1:* A-495-2055. *Version 2:* A-495-2055.

Location: *Version 1:* Fleet Training Center, San Diego, CA. *Version 2:* Technical Training Center, Treasure Island, San Francisco, CA; Damage Control Training Center, Philadelphia, PA.

Length: *Version 1:* 6-7 weeks (264 hours). *Version 2:* 10 weeks (400 hours).

Exhibit Dates: *Version 1:* 10/94–Present. *Version 2:* 1/90–9/94.

Learning Outcomes: *Version 1:* This version is pending evaluation. *Version 2:* Upon completion of the course, the student will be able to operate and maintain all equipment in the areas of damage control; fire fighting; chemical, biological, and radiological (CBR) defense; nuclear weapons incidents; ship stability and buoyancy; and gas-free engineering. Course also includes planning, managing, conducting, and critiquing shipboard training programs in damage control.

Instruction: *Version 1:* This version is pending evaluation. *Version 2:* Lectures and laboratory exercises cover instructor training, damage control organization, stability and buoyance, CBR defense, nuclear weapons and accidents/incidents, fire fighting, emergency hull repair, practical damage control and damage control maintenance, and performing as fire marshal/gas-free engineer.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 2 semester hours in industrial safety (8/89); in the lower-division baccalaureate/associate degree category, 2 semester hours in advanced fire technology and 1 in instructional methods (8/89).

NV-1728-0024

RESERVE LEGALMAN, PHASE 1

Course Number: *Version 1:* S-512-0011. *Version 2:* S-512-0011.

Location: Naval Justice School, Newport, RI.

Length: *Version 1:* 2 weeks (68 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 5/96–Present. *Version 2:* 1/91–4/96.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to prepare and process litigation documents regarding offense and preliminary inquiries. *Version 2:* Upon completion of the course, the student will be able to process reports of offenses and preliminary inquiries.

Instruction: *Version 1:* Instruction consists of lectures, fact-finding situations, videotape, and classroom exercises in the field of litigation. *Version 2:* Methods include lectures, testing, fact-finding scenarios, and videotapes.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in litigation (7/97). *Version 2:* Credit is not recommended because of the military-specific nature of the course (12/91).

NV-1728-0025

RESERVE LEGALMAN, PHASE 2

Course Number: *Version 1:* S-512-0012. *Version 2:* S-512-0012.

Location: Naval Justice School, Newport, RI.

Length: *Version 1:* 2 weeks (68 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 8/96–Present. *Version 2:* 1/91–7/96.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to prepare legal documents in the area of litigation, including prehearing, hearing, and posthearing actions and use appropriate computer technology in such work. *Version 2:* Upon completion of the course, the student will be able to assist in preparing legal documents in the areas of summary courts-martial, posttrial review action and promulgation, and posttrial service record entries.

Instruction: *Version 1:* Instruction consists of lectures, fact-finding situations, videotapes, and computer training activities in the area of litigation. *Version 2:* Methods include lectures, testing, fact-finding scenarios, and videotapes.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in litigation and 2 in introduction to computers (7/97). *Version 2:* Credit is not recommended because of the military-specific nature of the course (12/91).

NV-1728-0026

RESERVE LEGALMAN, PHASE 3

Course Number: S-512-0013.

Location: Naval Justice School, Newport, RI.

Length: 2 weeks (68-80 hours).

Exhibit Dates: 1/91–Present.

Learning Outcomes: Upon completion of the course, the student will be able to use audio recording equipment and word processing software to prepare records of courts-martial.

Instruction: Methods include lectures, testing, dictation and transcription, and videotapes.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/97).

NV-1728-0027

1. LEGALMAN ACCESSION
2. LEGALMAN

Course Number: *Version 1:* S-512-0010. *Version 2:* S-512-0010.

Location: Naval Justice School, Newport, RI.

Length: *Version 1:* 9 weeks (310 hours). *Version 2:* 9 weeks (329 hours).

Exhibit Dates: *Version 1:* 10/96–Present. *Version 2:* 1/91–9/96.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to function as paralegal in a military setting. *Version 2:* Upon completion of the course, the student will be able to prepare and process nonjudicial punishment documents, convening orders, courts-martial, JAG investigations, line of duty/misconduct investigations, administrative discharges, and claims, using computer software, proper legal terminology, and legal research.

Instruction: *Version 1:* A combination of classroom instruction, practical exercises, examinations, and mock trials provides opportunities to prepare and process nonjudicial punishment documents, convening orders, courts-martial, JAG investigations, line of duty/misconduct investigations, administrative discharges, and claims. Student uses computer software, proper legal terminology, legal research, and English grammar and composition. *Version 2:* Lectures, videotapes, mock nonjudicial punishments, mock trials, and practical exercises cover preparation of legal documents and other paralegal duties.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in litigation, 2 in introduction to computers, 1 in introduction to paralegalism, 1 in legal research and writing, and 3 in English composition (7/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in legal research and writing; 1 in introduction to paralegalism; 1 in microcomputer applications; and 3 in legal ethics, interviewing, and investigation (12/91).

NV-1728-0028

LEGAL CLERK

Course Number: S-512-0009.

Location: Naval Justice School, Newport, RI.

Length: 2 weeks (68-70 hours).

Exhibit Dates: 1/91–Present.

Learning Outcomes: Upon completion of the course, the student will be able to prepare and process documents regarding nonjudicial punishments.

Instruction: Lectures and practical exercises cover unauthorized absence, premast forms, postmast forms, postmast entries laboratory, and summary courts-martial laboratory.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/97).

NV-1728-0029

Course Number: *Version 1:* S-5F-0014. *Version 2:* S-5F-0014.

Location: *Version 1:* Naval Justice School Detachment, Norfolk, VA; Naval Justice School Detachment, San Diego, CA; Naval Justice School, Newport, RI. *Version 2:* Naval Justice School, Newport, RI.

Length: *Version 1:* 4 weeks (120 hours). *Version 2:* 4 weeks (135 hours).

Exhibit Dates: *Version 1:* 1/97–Present. *Version 2:* 1/91–12/96.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to apply principles of administrative law, military rules of evidence, military law, and military court procedures and identify issues in a given factual situation. *Version 2:* Upon completion of the course, the student will be able to apply principles of military rules of evidence, military law, and military court procedures and identify issues in a given factual situation.

Instruction: *Version 1:* Course methods include a combination of classroom instruction, practical exercises and examinations. *Version 2:* Lectures, mock trials, and practical exercises cover the skills and duties of a professional paralegal. Course includes court procedures; an in-depth study of criminal, civil, and military law; prosecution and judgement services; and legal advising.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in administrative laws and procedures, 3 in criminal law and procedures, and 1 in the law of evidence (7/97). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in criminal law and 3 in laws of evidence and court procedures (12/91).

NV-1728-0030

Senior Legalman

Course Number: S-512-0014.

Location: Naval Justice School, Newport, RI.

Length: 3 weeks (102 hours).

Exhibit Dates: 1/91–Present.

Learning Outcomes: Upon completion of the course, the student will be able to leader, supervise, and manage a legal office by applying the principles of office management to budgeting, human resources, office systems, computer systems, and administrative services and operations.

Instruction: Lectures, videotapes, and seminar groups are the forms of instruction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in law office management and 1 in computer applications (12/91).

NV-1728-0031

Navy Master at Arms

Course Number: A-8-95C42-N; 8-95-C42-N; A-831-001.

Location: Navy Detachment, Military Police School, Ft. McClellan, AL.

Length: 10 weeks (332 hours).

Exhibit Dates: 1/90–7/90.

Objectives: After 7/90 see NV-1728-0033. To provide personnel assigned to master-at-arms rating with a working knowledge of duties and responsibilities of the position.

Instruction: Major areas of instruction include physical security, law enforcement activities, principles of confinement, law and evidence, crime prevention, drug control, information gathering, and maintaining order.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in criminal evidence, 3 in interviewing and interrogating, 3 in correctional procedures, and 2 in drug awareness (6/85); in the upper-division baccalaureate category, 3 semester hours in field experience/criminal justice internship (6/85).

NV-1728-0033

Navy Master at Arms, Class A

Course Number: 8-95-C42-N; A-830-0001.

Location: Construction Training Center Detachment, Ft. McClellan, AL.

Length: 7 weeks (200-275 hours).

Exhibit Dates: 8/90–Present.

Learning Outcomes: Before 8/90 see NV-1728-0031. Upon completion of the course, the student will be able to provide personnel assigned to the master-at-arms rating with a working knowledge of the duties and responsibilities of the position.

Instruction: Major lecture hours include physical security, crime scenes, drug abuse, legal evidence, interviewing, and maintaining order. Weapons proficiency is included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of investigation and 1 in physical security (6/92).

NV-1728-0034

Master at Arms, Class C

Course Number: A-830-0018.

Location: Construction Training Center Detachment, Ft. McClellan, AL.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to secure a crime scene, investigate a criminal incident, interview and interrogate witnesses and suspects, and complete physical security measures for both civilian and military areas.

Instruction: Lectures, demonstrations, and performance exercises cover physical security measures and administration, crime prevention program, and crime scene integrity.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in physical security and 2 in principles of investigation (6/92).

NV-1728-0035

Corrections Specialist
(Correctional Specialist)

Course Number: A-831-0001.

Location: Naval Institute of Correctional Administration, Ft. McClellan, AL.

Length: 5 weeks (192 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will have a working knowledge of the principles, theories, and practices required for the administration, operation, and supervision of US Navy brigs and will have a general understanding of military corrections.

Instruction: Lectures, media presentations, and exercises cover human behavior and communication skills required to control prisoners. Course includes study of physical security, legal cases, prisoner processing, report writing, substance abuse, contraband, special prisoners, and disciplinary measures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in correctional procedures and 3 in correctional supervision (6/92).

NV-1728-0036

Marine Air-Ground Task Force
Interrogation of Prisoners of War

Course Number: J-241-2015; OBS.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 5 weeks (243 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to conduct effective interrogations of prisoners of war in according the Geneva convention and the Law of Land Warfare.

Instruction: The course consists of lectures on interrogation techniques, processing information, and the Geneva Convention and Law of Land Warfare; practical training on interrogation techniques; and a field exercise.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in criminal justice. This does not duplicate credit recommended for NV-1728-0037 and NV-1728-0038 (9/94).

NV-1728-0037

Interrogation of Prisoners of War, Reserve,
Phase 1

Course Number: N46L92D; J-241-2016.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (78-79 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be skilled in the processes of questioning, map tracking, approaches, interrogation, and report writing.

Instruction: This course consists of lectures on tactical interrogation, interrogation duties, the Geneva convention, and Law of Land Warfare. There is a performance examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in criminal justice (9/94).

NV-1728-0038

Interrogation of Prisoners of War, Reserve,
Phase 2

Course Number: J-241-2017; L9E.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (91-92 hours).

Exhibit Dates: 6/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to conduct tactical interrogations, interrogate noncooperative sources, and write reports.

Instruction: Lectures cover tactical interrogation, report writing, and interrogation of noncooperative sources.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in criminal justice in addition to the credit granted for phase I (NV-1728-0037) (9/94).

NV-1728-0039

Marine Air-Ground Task Force
Counterintelligence, Reserve, Phase 1

Course Number: J-244-2961; HEV.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (89 hours).

Exhibit Dates: 2/94–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform activities in counterintelligence, terrorism, and noncombatant evacuation operations.

Instruction: Lectures and practical exercises cover counterintelligence, terrorism, photography, and noncombatant evacuation. Although this course emphasizes activities in a postexpeditionary period, it does contain some police/security techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in criminal justice (9/94).

NV-1728-0040

MARINE AIR-GROUND TASK FORCE COUNTERINTELLIGENCE, RESERVE, PHASE 2

Course Number: J-244-2962.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (71-72 hours).

Exhibit Dates: 6/94–Present.

Learning Outcomes: This is a continuation of Phase 1. Upon completion of the course, the student will be able to interview, interrogate, and conduct MIA investigation and debriefing.

Instruction: Lectures and performance exam cover planning counterintelligence activities, conducting investigations, interrogations, elucidation, debriefings, and interviews; preparation of reports; and a performance examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in criminal justice in addition to the credit recommendation for phase 1 (9/94).

NV-1728-0041

MARINE AIR-GROUND TASK FORCE COUNTERINTELLIGENCE, RESERVE, PHASE 3

Course Number: J-244-2963.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/94–Present.

Learning Outcomes: Upon completion of the course, the student will develop skills in HUMINT investigations and intelligence reports in an expeditionary and follow-on environment.

Instruction: The course has lectures on planning and conducting counterintelligence operations and monitoring, reviewing, and reporting counterintelligence information.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in criminal justice in addition to the credit recommended for phases 1 and 2 (9/94).

NV-1728-0042

COUNTERNARCOTICS BASIC INTELLIGENCE

Course Number: J-243-0996.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/91–10/92.

Learning Outcomes: Upon completion of the course, the student will be able to function with law enforcement officers and military personnel in counternarcotics intelligence activities; analyze data available from other agencies; and plan, development, coordinate, and disseminate information.

Instruction: Lectures, discussion, laboratories, and practical exercises cover geography and history of narcotics, drug threat, legal issues, national policy, information systems, detection, and monitoring. The student will be knowledgeable in narcotic production intelligence, security and operation, national drug policy, and legal constraints.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in drug interdiction (9/94).

NV-1728-0043

ACCESSION JUDGE ADVOCATE

Course Number: *Version 1:* S-5F-0013. *Version 2:* S-5F-0013.

Location: Naval Justice School, Newport, RI.

Length: *Version 1:* 9 weeks (310 hours). *Version 2:* 9 weeks (310 hours).

Exhibit Dates: *Version 1:* 4/95–Present. *Version 2:* 8/93–3/95.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be proficient in general and military areas of law through an introduction to law, advanced litigation, and trial advocacy; administrative law and procedures; criminal law and procedures; evidence; and public speaking. *Version 2:* Upon completion of the course, the student will be proficient in general and military areas of law through an introduction to law; advanced litigation and trial advocacy, administrative law and procedures, criminal law and procedures, evidence, and public speaking.

Instruction: *Version 1:* The learning outcomes will be accomplished through substantive lectures, seminars, demonstrations, and practical exercises with evaluation and testing of subject matter. The instruction covers an understanding of legal principles and application of constitutional law, common law, statutory law; and regulations; introduction to law, advanced litigation, and trial advocacy; administrative law and procedure; criminal law; and procedures and evidence. *Version 2:* The learning outcomes will be accomplished through substantive lectures, seminars, demonstrations, and practical exercises with evaluation and testing of subject matter. Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to law and 2 in public speaking (7/97); in the upper-division baccalaureate category, 3 semester hours in advanced litigation and trial advocacy, 3 in administrative law and procedure, 3 in criminal law and procedures, and 3 in the laws of evidence (7/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in public speaking (7/97); in the upper-division baccalaureate category, 3 semester hours in advanced litigation and trial advocacy, 3 in administrative law and procedure, 3 in criminal law and procedures, and 3 in the laws of evidence (7/97).

NV-1728-0044

MID-CAREER LEGALMAN

Course Number: S-512-0019.

Location: Naval Justice School Detachment, San Diego, CA; Naval Justice School Detachment, Norfolk, VA; Naval Justice School, Newport, RI.

Length: 2 weeks (68 hours).

Exhibit Dates: 9/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply advanced legal research skills.

Instruction: Course methods include a combination of classroom instruction, and practical exercises in legal research and writing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in legal research and writing (7/97).

NV-1728-0045

COAST GUARD LEGAL CLERK

Course Number: S-512-0008.

Location: Naval Justice School, Newport, RI.

Length: 2 weeks (68 hours).

Exhibit Dates: 9/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to function productively in a legal office, assisting attorneys and other legal officer personnel.

Instruction: A combination of classroom instruction, practical exercises and examinations. Topics include: criminal law, legal research, paralegal procedures, wills, Lexis/Nexis, evidence, and family advocacy.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to paralegalism (7/97).

NV-1728-0046

ARMY COURT REPORTING

Course Number: S-512-0010.

Location: Naval Justice School, Newport, RI.

Length: 5 weeks (170 hours).

Exhibit Dates: 10/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to accurately and timely transcribe verbatim/summarized transcripts of military justice proceedings.

Instruction: Course methods include a combination of classroom instruction, practical exercises, and examinations. The classroom instruction consists mainly of practicing verbatim transcription techniques.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/97).

NV-1728-0047

RESERVE ARMY COURT REPORTING

Course Number: S-512-0015.

Location: Naval Justice School, Newport, RI.

Length: 2 weeks (68 hours).

Exhibit Dates: 4/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to accurately and timely transcribe verbatim/summarized transcripts of military justice proceedings.

Instruction: Course methods include a combination of classroom instruction, practical exercises, and examinations. The classroom instruction consists mainly of practicing verbatim transcription techniques.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/97).

NV-1728-0048

COAST GUARD COURT REPORTING

Course Number: S-512-0016.

Location: Naval Justice School, Newport, RI.

Length: 5 weeks (170 hours).

Exhibit Dates: 10/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to accurately and timely transcribe verbatim/summarized transcripts of military justice proceedings.

Instruction: Course methods include a combination of classroom instruction, practical exercises, and examinations. The classroom instruction consists mainly of practicing verbatim transcription techniques.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/97).

NV-1729-0010

Submarine Food Service Watchstander

Course Number: F-000-0070.

Location: Submarine School, New London, Groton, CT; Service School Command, San Diego, CA.

Length: 2 weeks (77 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply the principles, rules, and concepts of issue, inventory, and product acceptability in a food service operation.

Instruction: Course includes preparing forms and procedures for receiving and storing food items and for inventory procedures; safety, operating, and cleaning procedures for food service equipment; sanitation and safety techniques; the basic four food groups and nutrition as they apply to menu planning; and basic supervision principles.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in food service operations (3/90).

NV-1729-0011

Mess Management Specialist, Class A

Course Number: A-800-0013.

Location: Service School Command, San Diego, CA.

Length: 7 weeks (205 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to prepare food items using standard recipes.

Instruction: Lectures and laboratory experiences emphasize basic cooking and baking skills, use of standard recipes, food service organization, recipe conversion, sanitation and safety rules, and table service.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in food preparation (2/90).

NV-1729-0012

Food Service Records and Returns

Course Number: *Version 1:* A-800-0020. *Version 2:* A-800-0020.

Location: *Version 1:* Fleet Training Center, San Diego, CA; Submarine School, New London, Groton, CT; Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA. *Version 2:* Fleet and Mine Warfare Training Center, Charleston, SC; Trident Training Facility, Kings Bay, GA; Fleet Training Command, Norfolk, VA; Submarine School, New London, Groton, CT; Trident Training Facility, Bangor, Bremerton, WA; Service School Command, San Diego, CA.

NV-1729-0013

1. Food Service Management Automated Recordskeeper
2. Food Service Management
(Food Service Management Automated Recordskeeper)

Course Number: *Version 1:* A-800-0027. *Version 2:* A-800-0027.

Location: *Version 1:* Submarine Base, New London, Groton, CT; Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA; Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA. *Version 2:* Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA; Service School Command, San Diego, CA.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 2/97–Present. *Version 2:* 1/90–1/97.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to operate a computerized food service record keeping system and solve associated problems. *Version 2:* Upon completion of the course, the student will be able to operate a computerized food service record keeping system and solve associated problems.

Instruction: *Version 1:* Lectures and performance exercises cover computers, including equipment setup and upkeep, loading software, computer operations, security requirements, and food service applications. *Version 2:* Lectures and performance exercises cover computers, including equipment setup and upkeep, loading software, computer operations, security requirements, and food service applications.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in food service computer applications (3/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in food service computer applications (11/95).

NV-1729-0014

Food Service Administration

Course Number: *Version 1:* A-800-0015. *Version 2:* A-800-0015.

Location: *Version 1:* Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA. *Version 2:* Supply Schools, Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: *Version 1:* 5 weeks (200 hours). *Version 2:* 6-7 weeks (264 hours).

Exhibit Dates: *Version 1:* 2/97–Present. *Version 2:* 1/90–1/97.

Learning Outcomes: *Version 1:* This version is pending evaluation. *Version 2:* Upon completion of the course, the student will have be able to manage and supervise food production and food service.

Instruction: *Version 1:* This version is pending evaluation. *Version 2:* Lectures and/or exercises cover sanitation, customer service, menu planning, executive (private) dining, employee cafeterias, and the overall administration of food and beverage service.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the upper-division baccalaureate category, 3 semester hours in food service administration (2/90).

NV-1729-0015

General Mess Operations

Course Number: A-800-0025.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/90–1/94.

Learning Outcomes: Upon completion of the course, the student will be able to operate a food service facility.

Instruction: The course consists of lectures and problem solving in the areas of food preparation, menu planning, food presentation, food service equipment, sanitation and safety, and food service management.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in food service operations (2/90).

NV-1729-0016

Private Mess Operations

Course Number: A-800-0026.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/90–1/94.

Learning Outcomes: Upon completion of the course, the student will be able to perform the advanced administrative, accounting, and managerial functions required to operate an executive dining room.

Instruction: Classroom lectures emphasize purchasing, receiving, and inventory procedures; accounting and auditing; protocol; and service and preparation techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in dining room management (2/90).

NV-1729-0017

Advanced Food Preparation

Course Number: A-800-0018.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (110-120 hours).

Exhibit Dates: 1/90–1/94.

Learning Outcomes: Upon completion of the course, the student will be able to apply the principles of advanced culinary arts in food preparation.

Instruction: Course consists of lectures and performance exercises in advanced cooking, baking, garnishing, and ice carving.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in advanced culinary arts (2/90).

NV-1730-0007

S-3A Environmental Control, Miscellaneous Utilities and Egress Systems Organizational Maintenance

Course Number: C-602-3679.

Location: Air Station, North Island, San Diego, CA; Air Station, Cecil Field, FL.

Length: 2 weeks (96 hours).

Exhibit Dates: 1/90–4/95.

Objectives: To provide enlisted personnel with the skills necessary to operate, test, and troubleshoot aircraft environmental control and egress systems.

Learning Outcomes: Upon completion of the course, the student will be able to understand and troubleshoot the oxygen, bleed air, refrigeration, cabin environmental control, ice protection, and egress systems and use proper test procedures and equipment for troubleshooting these systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in air conditioning/refrigeration systems (4/85).

NV-1730-0009

Ship's Stores Refrigeration System R-12 Combined Maintenance

Course Number: A-720-0027.

Location: Submarine Training Center, Norfolk, VA; Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine Training Center, Charleston, SC; Submarine School, New London, Groton, CT.

Length: 1-2 weeks (58 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the relationship of refrigeration systems to other mechanical systems and operate and maintain industrial refrigeration systems.

Instruction: Lectures and laboratories cover the operation and maintenance of industrial refrigeration systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester lecture and 1 semester hour laboratory in refrigeration systems (10/89).

NV-1730-0010

Lithium Bromide Maintenance, Class F1

Course Number: A-652-0224.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine Training Center, Charleston, SC; Submarine School, New London, Groton, CT.

Length: 2 weeks (77 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory and operation of absorption refrigeration systems.

Instruction: Lectures and laboratories cover the lithium bromide system and its characteristics, control systems, operation, and maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in refrigeration systems (10/89).

NV-1730-0011

Air Conditioning and Refrigeration

Course Number: A-720-0030.

Location: Submarine School, New London, Groton, CT.

Length: 6 weeks (234 hours).

Exhibit Dates: 1/90–12/92.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory and principles of operation of mechanical and absorption refrigeration systems.

Instruction: Lectures and laboratories cover mechanical and absorption refrigeration systems, including instruction in psychrometrics, electrical motor theory, compressor and heat exchanger construction, controls, load calculations, and comfort conditioning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours lecture and 2 semester hours laboratory in refrigeration systems (10/89).

NV-1731-0001

Trident Submarine Atmospheric Support System Maintenance

Course Number: A-652-0146.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 1 week (56 hours).

Exhibit Dates: 1/90–3/95.

Learning Outcomes: Upon completion of the course, the student will be able to perform all operational and documented fault isolation procedures on CO/H2 burner and carbon dioxide scrubber assemblies.

Instruction: Lecture and laboratory exercises cover the theory of operation and maintenance of CO/H2 burners and carbon dioxide scrubbers.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

NV-1731-0002

Outboard Motor Overhaul

Course Number: K-652-0237.

Location: Amphibious School, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to repair and maintain Johnson and Evinrude two-cycle motors.

Instruction: Lectures and laboratories cover the repair and maintenance of outboard motors. Included are topics on major motor components and fuel and electrical systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in automotive engine repair or outboard repair (3/92).

NV-1731-0003

Landing Craft, Air Cushion Propulsion and Lift Systems Maintenance

Course Number: K-652-0314.

Location: Amphibious School, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to set up and maintain gas turbine engines, propulsion and lift systems, and mechanical auxiliaries and inspect, troubleshoot, and operate test equipment related to the gear boxes, transmissions, propellers, auxiliary power units, bow thrusters, rudders, and propulsion systems.

Instruction: Lectures, laboratories, and shop exercises cover main and primary propulsion systems and auxiliary systems. Students must successfully complete a written test for completion of the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in marine propulsion systems (3/92).

NV-1731-0004

Cargo Offload and Discharge System/Container Offloading and Transfer Systems (COLD/COTS)

Course Number: K-652-0318.

Location: Expeditionary Warfare Training Group, Pacific, San Diego, CA; Amphibious School, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/91–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain the cargo and container offload, discharge, and transfer systems of a self-propelled barge ferry.

Instruction: Lectures and laboratories include topics on propulsion systems, electrical systems, and winch assembly components required to operate the offload and transfer equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical systems repair (3/97).

NV-1732-0001

Steam Generating Plant Inspector

Course Number: K-651-2151.

Location: Fleet Training Center, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To train enlisted personnel to perform as steam generating plant inspectors.

Instruction: Lectures and practical exercises cover steam generating plants, including salient design features of naval boilers, tube ruptures and renewal, casing and foundation, pressure parts not exposed to firesides, hydro tests, safety valves, boiler inspection, boiler chemistry, and steam generator performance during steady load.

Credit Recommendation: In the vocational certificate category, 4 semester hours in boiler inspection (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in steam generating plant technology (5/82).

NV-1732-0010

FFG-7 Class Ship Auxiliary Electrical System Technician

Course Number: A-662-0121.

Location: Service School Command, Great Lakes, IL.

Length: 19 weeks (760 hours).

Exhibit Dates: 1/90–10/93.

Objectives: To train personnel to operate and perform corrective and preventive maintenance on auxiliary electrical systems on an FFG-7 class ship.

Instruction: This is a pipeline course consisting of NV-1704-0262, NV-1714-0031, NV-1714-0029, and NV-1601-0026.

Credit Recommendation: Please refer to the exhibits noted above for credit recommendation (10/83).

NV-1732-0011

Prospective Nuclear Engineer Officer

Course Number: L-4H-0026.

Location: Submarine Training Facility, San Diego CA; Trident Training Facility, Bangor, Bremerton, WA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: (Self-paced), 8 weeks.

Exhibit Dates: 1/90–11/95.

Objectives: To assist nuclear engineer officers in preparation for the nuclear engineer officer examination.

Instruction: The course consists of a series of test questions on the maintenance of 58G reactor plants.

Credit Recommendation: Credit is not recommended because of the nature of the presentation of the course (11/85).

NV-1732-0013

Carbon Dioxide Scrubber and Carbon Monoxide/Hydrogen Burner Combined Maintenance

Course Number: A-652-0104.

Location: Submarine Training Facility, San Diego, CA; Submarine Training Center, Pacific, Pearl Harbor, HI; Norfolk, VA; Guided Missile School Detachment; Submarine Base, New London, Groton, CT; Submarine Training Facility, Charleston, SC.

Length: 1 week (42 hours).

Exhibit Dates: 1/90–7/96.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance, testing, troubleshooting, and overhaul of the major components of the CO2 scrubber and CO-H2 burner system.

Instruction: Instruction includes group-paced classroom and laboratory instruction on maintenance and repair of the CO2 scrubber and CO-H2 burner system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in introduction to mechanics (7/87).

NV-1732-0014

Senior Enlisted Propulsion Engineering

(Senior Enlisted Propulsion Engineering (Steam, Gas Turbine, Diesel))

Course Number: A-651-0110.

Location: Service School Command, Great Lakes, IL.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to supervise the routine operation of a power plant; carry out shipboard inspections, tests, and trials; provide for crew training and readiness; demonstrate knowledge of shipboard engineering systems; and evaluate operating conditions and components of a steam (169W) propulsion plant, a diesel (169X) propulsion plant, or a gas turbine (169V) propulsion plant.

Instruction: Lectures, laboratory training, and practical exercises cover inspection, maintenance, and management procedures; personnel duties and training; plant operation, and casualty control procedures for high-pressure steam power plant systems, including auxiliary, electrical, control, and plant safety systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in facilities management and 2 in steam laboratory (169W) or gas turbine laboratory (169V), or diesel laboratory (169X) (12/95).

NV-1732-0015

Nuclear Propulsion Plant Refresher Training

Course Number: A-661-0106.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA; Submarine School, Norfolk, VA; Submarine School, Pearl Harbor, HI; Submarine School, New London, Groton, CT.

Length: 5 weeks (91 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will have the theoretical background to qualify as engineering water supervisor.

Instruction: Lectures and self-paced study modules cover fundamental reactor plant concepts and principles (nuclear physics, chemistry, and material science), plant start-up, and operations at power.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in nuclear power plant technology (2/89).

NV-1732-0016

Trident Submarine Auxiliary Equipment Technician Replacement Level 1

Course Number: A-652-0140.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 6 weeks (209 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify various power plant components; operate power plant auxiliary equipment; and perform preventive and corrective maintenance on pumps, valves, and hydraulic, pneumatic, and refrigeration systems.

Instruction: Lectures and laboratory exercises cover the construction, operation, and maintenance of power plant auxiliary equipment such as pumps, valves, hydraulic and compressed air systems, and refrigeration systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in power plant technology or facilities engineering (2/89).

NV-1732-0017

Steam Generator Maintenance

Course Number: *Version 1:* A-651-0075. *Version 2:* A-651-0075.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 5 weeks (176 hours). *Version 2:* 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 6/95–Present. *Version 2:* 1/90–5/95.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to perform diagnosis, maintenance, and repair of steam generators; use manuals to locate appropriate repair procedures, part tolerances, and specifications; and perform periodic, preventive maintenance on steam generators. *Version 2:* Upon completion of the course the student will perform proper inspection, repair, and maintenance on high-pressure steam generators.

Instruction: *Version 1:* Lectures and laboratory experiences are used in the instruction of this course. Topics include inspection and maintenance of high-pressure boilers and boiler components, including refractories, drums, headers, tubes, firesides, uptakes, smoke indicators, burners, quick closing valves, soot blowers, blow down system, supports, air casings, safety valves, and liquid level indicators. *Version 2:* Classroom instruction and practical exercises cover the inspection and maintenance of high-pressure boilers and boiler components, including refractories, drums, headers, tubes, firesides, uptakes, smoke indicators, burners, quick closing valves, soot blowers, blow down system, supports, air casings, safety valves, and liquid level indicators.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in steam generator repair and maintenance (11/95). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in steam generator maintenance and repair (3/89).

NV-1732-0018

Valve Maintenance

(Valve and Steam Trap Maintenance)

Course Number: A-651-0065.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 1-2 weeks (42-54 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and corrective maintenance on all types of valves and orifice-type steam traps as found in steam power plants and their supporting systems.

Instruction: Performance-oriented instruction covers the above topics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in steam power systems laboratory (6/94).

NV-1732-0019

Nuclear Power Plant Welder Requalification

Course Number: A-701-0031.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA; Submarine Training Facility, Charleston, SC; Submarine School, New London, Groton, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/90–11/97.

Learning Outcomes: Upon completion of the course, the student will be able to perform basic welding functions and take intermediate and advanced welding or welding supervisor instruction to ASME pressure vessel and nuclear code standards.

Instruction: Course includes lectures on safety, welding and silver brazing processes, and nondestructive testing processes. Laboratory sessions are used to bring the student to a reasonable level of proficiency in welding (or brazing) pipe or plate. Repairs to welds and braze joints are also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours lecture and 3 semester hours laboratory in welding processes, brazing processes, and nondestructive testing processes. Note: this course duplicates A-701-0015. (NV-1710-0114). Credit should not be awarded for both (10/89).

NV-1732-0020

Utilitiesman, Class A

Course Number: *Version 1:* J3ABR3E431 003/004/005; A-720-0012. *Version 2:* A-720-0012.

Location: *Version 1:* Construction Training Center Detachment, Sheppard AFB, TX. *Version 2:* Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: *Version 1:* 13-14 weeks (534 hours). *Version 2:* 12 weeks (427 hours).

Exhibit Dates: *Version 1:* 10/95–Present. *Version 2:* 1/90–9/95.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to install and maintain basic plumbing, operate low- and medium-pressure boilers, operate and maintain air compressors and refrigeration equipment, conduct routine preventive maintenance, and troubleshoot electrical control devices. *Version 2:* Upon completion of the course, the student will be able to install and maintain basic plumbing, operate low- and medium-pressure boilers, operate and maintain air compressors and refrigeration equipment, conduct routine preventive maintenance, and troubleshoot electrical control devices.

Instruction: *Version 1:* Lectures and practical exercises cover utility operation, including plumbing, field sanitation, internal combustion engines, pumps, compressors, electricity, refrigeration, and boiler. *Version 2:* Lectures and practical exercises cover utility operation, including plumbing, field sanitation, internal combustion engines, pumps, compressors, electricity, refrigeration, and boiler.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electricity; 6 in plumbing; and 6 in heating, air conditioning, and refrigeration (4/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics, 6 in basic plumbing, and 2 in air conditioning and refrigeration (6/91).

NV-1732-0021

NC-8A/-1 Mobile Electric Power Plant Intermediate Maintenance

Course Number: *Version 1:* C-602-3223A. *Version 2:* C-602-3223.

Location: *Version 1:* Air Maintenance Training Group, Jacksonville, FL; Air Maintenance Training Group, North Island, CA. *Version 2:* Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 1/94–Present. *Version 2:* 1/90–12/93.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to operate, maintain, and repair a mobile electric power plant. This version is pending evaluation. *Version 2:* Upon completion of the course, the student will be able to operate, maintain, and repair a mobile electric power plant.

Instruction: *Version 1:* Lectures and practical exercises cover engine control and propulsion systems; output power systems; and major component theory, including fault indication board, AC/DC voltage module, AC/DC frequency module, and AC/DC voltage regulators. This version is pending evaluation. *Version 2:* Lectures and practical exercises cover engine control and propulsion systems; output power systems; and major component theory, including fault indication board, AC/DC voltage module, AC/DC frequency module, and AC/DC voltage regulators.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 2 semester hours in AC/DC generator repair (7/92).

NV-1732-0022

Introduction to Engineering Systems Maintenance and Management

Course Number: A-652-0152.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/91–10/93.

Learning Outcomes: Before 11/91 see NV-1704-0262. Upon completion of the course, students will be able to describe ship's propulsion and auxiliary systems at a level that allows them to monitor plant operations and interpret monitored information.

Instruction: Lectures and practical exercises cover monitoring the operation of a power plant. Included are the use of technical manuals; maintenance concepts of gas turbine systems, support systems, and diesel generator systems; power generation and conversion equipment; air conditioning and refrigeration systems; seawater-freshwater systems; fuel systems; compressed air systems; mechanical handling systems; and pollution control systems found on an FFG-7 (frigate).

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic power plant operation (10/93).

NV-1732-0023

FFG-7 Auxiliary Mechanical Systems Maintenance

Course Number: *Version 1:* A-652-0158. *Version 2:* A-652-0158.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 5 weeks (196 hours).

Exhibit Dates: *Version 1:* 1/94–Present. *Version 2:* 4/92–12/93.

Learning Outcomes: *Version 1:* Before 1/94 see NV-1715-1073. Upon completion of the course, the student will be able to operate and maintain auxiliary mechanical systems found aboard FFG-7 ships (frigates), including oil waste disposal systems, elevator/conveyer systems, and compressed air systems. *Version 2:* Upon completion of the course, the student will be able to operate and maintain auxiliary mechanical systems found aboard FFG-7 ships (frigates), including oil waste disposal systems, elevator/conveyer systems, compressed air systems, and an electrically-driven auxiliary propulsion unit (directional bow thruster).

Instruction: *Version 1:* Lectures and practical exercises cover the above equipment. *Version 2:* Lectures and practical exercises cover the above equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in power plant and auxiliary plant operations (7/95). *Version 2:* In the vocational certificate category, 5 semester hours in power plant and auxiliary plant operations (10/93).

NV-1732-0024

Engineman Six Year Obligor Advanced/ Maintenance (Main Propulsion Strand)

Course Number: A-652-0326.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/93–6/95.

Learning Outcomes: Upon completion of the course, the student will be able to operate and maintain auxiliary shipboard equipment, such as clutches and brakes, main reduction gears, shafting and bearings, controllable-pitch propellers, lube oil purifiers, and local control stations. Student will be able to perform watchstanding and casualty control procedures.

Instruction: Lectures, practical exercises, and demonstrations cover auxiliary equipment operation and maintenance. Systems include clutches, brakes, reduction gears, shafting and bearings, controllable-pitch propellers, lube oil purification, and local control stations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in power plant and auxiliary equipment operation and maintenance (10/93).

NV-1732-0025

Senior Enlisted Engineering Management

Course Number: K-651-2239.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (64-76 hours).

Exhibit Dates: 12/93–Present.

Learning Outcomes: Upon completion of the course, the student will be able to manage, operate, and maintain propulsion systems and programs with special emphasis on practical engineering management skills.

Instruction: The method of instruction is classroom lecture. Topics covered include engineering management; the operating conditions of designated systems (steam, diesel, gas turbine, and electrical); and using technical references and instructions in scenarios with plant logs, records, reports, system diagrams, and applicable technical references and procedures. Additional topics include time management, setting priorities, delegation, goal settings, technical report writing, quality assurance, training plans, casualty control, tag out procedures, potable water chemical treatment, safety, heat stress, and hazardous material handling and storage.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in engineering management (2/96).

NV-1732-0026

NAVAL NUCLEAR POWER SCHOOL, ENLISTED

Course Number: A-661-0010.

Location: Nuclear Power Training Command, Orlando, FL.

Length: 24 weeks (687 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will have a comprehensive understanding of a pressurized-water nuclear power plant, including reactor core nuclear principles, heat transfer and fluid systems, plant chemistry and materials, mechanical and electrical systems, and radiological control.

Instruction: Lectures, readings, discussions, mandatory self-instruction, and testing and evaluation cover the areas of mathematics, physics, heat transfer and fluid flow, fundamentals of nuclear reactor engineering, radiation protection technology, general chemistry and principles of materials, hydraulic systems, applied thermodynamics and heat transfer, power plant systems, and basic electricity/electronics. This understanding is based on a thorough grounding in algebra and trigonometry, with a subsequent in-depth physics course emphasizing electromagnetism, atomic, and nuclear physics. The student is fully prepared to undertake hands-on training experiences based on this extensive classroom preparation. Also the student is infused with the culture of a disciplined engineering operation with integral safety consciousness. All students will have the comprehensive understanding, but some specialization gives individual students more depth in either electrical or mechanical aspects of the plant.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in general physics, 3 in heat transfer and fluid flow, 3 in nuclear reactor engineering, 1 in atomic and nuclear physics, 1 in radiation protection technology, 3 in general chemistry and principles of materials, and 4 in technical mathematics. If rating held is Machinist's Mate, add 3 semester hours in applied thermodynamics and heat transfer, 3 in power plant systems, and 3 in basic electricity. If rating held is Electronics Technician or Electrician's Mate, add 2 semester hours in hydraulic systems, 2 in DC circuits, 2 in AC circuits, 2 in digital principles, and 2 in electric machines (7/97).

NV-1733-0004

JUMPMASTER NAVAL PARACHUTIST, CLASS C1

Course Number: C-602-2022.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/90–12/97.

Learning Outcomes: Upon completion of the course, the student will be able to perform jumpmaster duties, including accurate landing procedures, accurate direction of aircraft in flight, and organization of safe and efficient parachute operations.

Instruction: Course includes lecture and practical performance with a ratio of approximately 1:12. Physical fitness is stressed throughout course. Inspection and packing parachute equipment and control of parachute descent to reach a predetermined area without instructions from people on the ground are also covered. Student is trained to organize and conduct parachute operations including considering weather and aircraft performance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in physical education for advanced parachute procedures (6/87).

NV-1733-0005

ADVANCED NAVAL PARACHUTIST, CLASS C1

Course Number: C-602-2021.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/90–12/97.

Learning Outcomes: Upon completion of the course, the student will be able to perform free-fall parachute descents of not less than five seconds followed by manually deploying the parachute.

Instruction: Course includes lecture and practical performance with a ratio of approximately 1:9. Physical conditioning is stressed throughout the course. Specific areas of training include inspection and packing parachute and related equipment, parachute canopy control, aircraft exits, free-falling techniques and positions, use of supplemental oxygen for high altitude, and night and water landing considerations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in physical education (introduction to sky diving) (6/87).

NV-1736-0002

PRECISION GRINDING AND BALANCING, CLASS C1

Course Number: A-702-0022.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–7/92.

Objectives: After 7/92 see NV-1736-0005. To provide naval personnel with advanced machine training in sharpening, reclaiming, and restoring cutters for machine shop operations.

Instruction: Course includes lectures, demonstrations, and laboratory exercises in precision grinding, including safety, hand tools, abrasives, composition, marking and installing grinding wheels, surface and cylindrical grinders, tool and cutter grinders, and special grinders. The course also includes theory and application of hardness testing and analysis and balancing machine components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced machine shop (5/82).

NV-1736-0003

TURRET LATHES AND METAL BUILD-UP, CLASS C1

Course Number: A-702-0023.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–6/92.

Objectives: After 6/92 see NV-1736-0006. To train personnel in the theory and use of turret lathes, boring mills, and surface build-up equipment.

Instruction: Lectures and practical exercises cover the setup, operation, and maintenance of horizontal and vertical turret lathes and horizontal boring mills. Selection, operation, and maintenance of metal surfacing equipment including spray, torch, and electroplating are covered, as is repair and restoration of babbitt bearings.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in machine tool metalworking and 3 in machine shop laboratory (5/82).

NV-1736-0004

ADVANCED MILLING AND SHOP MANAGEMENT, CLASS C1

Course Number: A-702-0024.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–Present.

Objectives: To provide naval personnel with the advanced theory and application of gear manufacture and basic supervision skills.

Instruction: Course includes geometric and trigonometric computation development for setup and indexing, spur, helical, level, and worm gear manufacture as well as advanced use of the universal milling machine and attachments. Includes instruction in effective shop management techniques, personnel supervision, work load maintenance, and equipment coordination.

Credit Recommendation: In the vocational certificate category, 5 semester hours in advanced machine shop and 1 in supervision/management techniques (10/93); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced machine shop and 1 in trade mathematics (10/93).

NV-1736-0005

PRECISION GRINDING

Course Number: A-702-0022.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/92–Present.

Learning Outcomes: Before 8/92 see NV-1736-0002. Upon completion of the course, the student will be able to sharpen tools and operate grinding machines.

Instruction: Course includes lectures, demonstrations, and laboratory exercises in precision grinding, including safety, hand tools, abrasives, composition, marking and installing grinding wheels, surface and cylindrical grinders, tool and cutter grinders, and special grinders. The course also includes theory and application of hardness testing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool grinding operations laboratory (11/93).

NV-1736-0006

Heavy Machinery/Metal Build-Up
(Turret Lathes and Metal Build-Up, Class C1)

Course Number: A-702-0023.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 7/92–Present.

Learning Outcomes: Before 7/92 see NV-1736-0003. Upon completion of the course, the student will be able to describe the basic principles of tooling; set up and operate both horizontal and vertical turret lathes; use the horizontal boring mill; and describe the principles of metal buildup through both electroplating and metal spray processes.

Instruction: By the use of lectures, audiovisuals, and extensive hands-on learning experiences, topics covered include basic machine shop operations; operation and maintenance of horizontal and vertical turret lathes, horizontal boring machine, and metal surfacing equipment, including spray, torch, and electroplating types; and repair and restoration of babbitt bearings.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in machine tool metalworking and 2 in advanced machine tool laboratory (11/93).

NV-2201-0113

Gunnery Petty Officer

Course Number: J-041-0102.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 2-3 weeks (80 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train petty officers in the major administrative requirements, principles, and applications associated with gunnery science.

Instruction: Lectures cover gunnery administration, including operational reports, tactical weapon publications, and support activities. Discussions cover ordnance handling, characteristics of small arms, and introduction to ballistics theory using range tables, factors that effect accuracy, and error resolution. Practical exercises cover administrative procedures, ballistic calculations, and error analysis.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0014

Basic Military Training
(Recruit Training)

Course Number: X-777-7770.

Location: Recruit Training Command, Orlando, FL; Recruit Training Command, Great Lakes, IL; Recruit Training Command, San Diego, CA.

Length: 7-8 weeks (265-267 hours).

Exhibit Dates: 1/90–9/91.

Objectives: After 9/91 see NV-2202-0165. To assimilate recruits into the Navy way of life and to prepare them for further advanced training in specialized Navy occupations.

Instruction: Student receives indoctrination and physical conditioning to prepare for the rigors and unique demands of naval service. Observance of naval customs and traditions is taught in a manner to foster pride in the nation and in patriotic behavior, high standards of conduct, and respect for civilian and military authority.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in personal fitness/conditioning, 1 in personal/community health, and 2 in first aid and safety (10/79).

NV-2202-0033

Aviation Officer Candidate

Course Number: Q-9B-0021.

Location: Air Basic Training Command, Pensacola, FL.

Length: 14 weeks (375 hours).

Exhibit Dates: 1/90–3/95.

Objectives: To train military personnel to be aviation officers.

Instruction: Lectures cover naval history, orientation to naval careers, world affairs, physics and mathematics, engineering, aerodynamics, aviation physiology, navigation and seamanship, physical fitness and swimming, and applied leadership training.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in naval science, 2 in fundamentals of administration and operations, 2 in navigation, 2 in aerodynamics, and 2 in aviation science (11/86).

NV-2202-0054

Signalman, Class A
(Basic Signalman)

Course Number: K-201-2115; A-203-0001.

Location: Fleet Training Center, Pearl Harbor, HI; Fleet Training Center, Newport, RI; Fleet Training Center, San Diego, CA; Service School Command, Orlando, FL.

Length: 6 weeks (180 hours).

Exhibit Dates: 1/90–5/91.

Objectives: To train enlisted personnel as watchstanders.

Instruction: Lectures and practical exercises cover visual communication procedures, including international Morse code, flag identification and flaghoist signaling, publications, flashing light and semaphore drills and positions, and message construction and procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/83).

NV-2202-0104

Gun Mount 5"/54 Mk 42 Mod 9 and 10, Class C1

Course Number: A-113-0044.

Location: Service School Command, Great Lakes, IL.

Length: 21 weeks (840 hours).

Exhibit Dates: 1/90–1/92.

Objectives: To train personnel in the operation, adjustment, and maintenance of a 5"/54 gun mount.

Instruction: Lectures and practical exercises in gun loaders, hoists, ammunition carriers, and related equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-2202-0106

Mine Mk 60 Mod 0 Weapons Systems Technician
(Underwater Mine Mk 60 (CAPTOR))

Course Number: J-647-0036.

Location: Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 8 weeks (260 hours).

Exhibit Dates: 1/90–3/93.

Objectives: To train enlisted personnel to perform intermediate maintenance on a CAPTOR weapons system.

Instruction: Lectures and practical exercises in the maintenance of a weapons system and all associated support equipment. The tasks include weapons preparation as well as operation and authorized maintenance of test equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/83).

NV-2202-0107

Navigation Officer (Shipboard) and Celestial, Class C2

Course Number: J-2G-0618.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/90–9/93.

Objectives: To train officers in the principles and techniques of navigation.

Instruction: Lectures and practical exercises cover shipboard duties of the ship's navigator, including use and maintenance of charts and navigation publications, magnetic compass operation and adjustment, piloting, celestial navigation, and administration of navigation functions aboard ship.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation (9/83).

NV-2202-0108

Naval and Marine Electronic Warfare Officer

Course Number: C-2D-3810.

Location: Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (480 hours).

Exhibit Dates: 1/90–5/92.

Objectives: To provide background knowledge prerequisite to operational training in a squadron.

Learning Outcomes: Upon completion of the course, the student will be able to create an area order of battle from appropriate publications, determine the threats within a complex signal environment based upon the identification of systems/platforms through recognition of the signals, relay an assessment of the environment in accord with the communications plan, and adjust the order of battle to accomplish the basic ESM and/or ESM objectives.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-2202-0109

Naval Science Institute

Course Number: P-00-4307.

Location: Naval Education and Training Command, Newport, RI.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–7/94.

Objectives: To provide the student with the training equivalent to the basic course of Navy ROTC and to qualify the students for enrollment into the advanced course.

Instruction: This is a four-part course including introduction to naval science, ship systems (engineering), ships systems (weapons), and sea power and maritime affairs. Introduction to naval science includes an introduction to the naval profession and concepts of sea power; ship's systems (engineering) includes coverage of basic thermodynamics, steam plant systems, diesel engines, gas turbines, power plant auxiliaries, basic ships structure, stability, buoyancy, damage stability and damage control; ships systems (weapons) includes the basic principles of a naval weapons system such as sensor and detection equipment, tracking equipment, computational devices, and weapons delivery systems. The sea power section has a survey of US naval history from the American Revolution to the present including law of the sea, comparison of the US and Soviet naval strategies and merchant marine commerce. There is a physical education component that requires sailing competency upon completion of the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in naval science ship systems II (weapons), 3 in naval science orientation, 1 in personal physical fitness, 1 in basic sailing. In addition, 3 in one of the following areas: naval science ship systems I (engineering), basic marine engineering, or engineering elective; plus either 3 semester hours in sea power and maritime affairs or 2 in naval history since 1775 (7/84).

NV-2202-0110

Senior Enlisted Academy

Course Number: P-00-1300.

Location: Naval Education and Training Center, Newport, RI.

Length: 9 weeks (360 hours).

Exhibit Dates: 1/90–7/94.

Objectives: To prepare senior enlisted personnel to fulfill their leadership and management responsibilities.

Instruction: Lectures and practical exercises cover the areas of leadership and management, including group dynamics, motivation, and managerial theories; communications skills including writing exercises and oral presentations; national security affairs including the role of the US military in the world today; and Navy programs, including programming, budgeting, and planning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in management process and theory, 4 in human relations in supervision, 3 in operations management, 2 in business communications, 2 in effective speaking, and 1 in personal physical fitness (7/84); in the upper-division baccalaureate category, 3 semester hours in international relations (7/84).

NV-2202-0111

S-3A Armament Control and Delivery System Organizational Maintenance

Course Number: C-646-3676.

Location: Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/90–4/95.

Objectives: To train technicians to maintain a weapons delivery system.

Learning Outcomes: Upon completion of the course, the student will be able to perform general maintenance at the block-diagram level on the the search store system, the conventional weapons system, and the special weapons and rocket aiming sight system.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (4/85).

NV-2202-0113

Explosive Ordnance Disposal, Phase 1

Course Number: A-431-0069; 4E-91E/431-55D10/20.

Location: Explosive Ordnance Detachment, Eglin AFB, FL.

Length: 11 weeks (433 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform reconnaissance, identification, recovery, and disposal of non-nuclear explosive ordnance, both foreign and domestic.

Instruction: Training includes lectures and field exercises in explosives and explosive effects, applied mathematics, applied physics, chemical agents and compounds, biological materials, decontamination, chemical hazards, chemical agent detection kits, chemical/biological agent disposal, protective clothing, specialized explosive techniques, storage/handling/transport of explosives, tools and methods, and ordnance planning. NOTE: Army students take this course in conjunction with A-431-0012 (NV-2202-0154) under the Army course number listed above.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to science (explosives), which can be used to satisfy, in part, the science requirement of a non—science major or 6 semester hours in introduction to explosive devices in a police science program (7/91).

Related Occupations: 55D.

NV-2202-0114

CV Naval Tactical Data Systems (NTDS) Data Utilization

Course Number: K-2G-0092.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To provide officer and senior enlisted personnel with training in the operational procedures, capabilities, and limitations of the CV/CVN class ship tactical data system.

Instruction: Lectures and laboratory exercises provide the student with a basic understanding of the purpose and use of various controls, subsystems, and modes of operation; methods of data entry; duties of various coordinator/controller personnel; and practical application with system mock-up of target tracking equipment.

Credit Recommendation: Credit is not recommended because of the limited, technical nature of the course (6/86).

NV-2202-0115

Surface Electronic Warfare Officer
(Electronic Warfare Officer Surface)

Course Number: J-2G-0210.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Training Group, Pearl Harbor, HI; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 4-5 weeks (160 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train officers in the concepts and operational applications of electronic warfare.

Instruction: Lectures on a broad range of electronic warfare topics are given covering subjects such as target acquisition and analysis methods, countermeasures, Soviet naval warfare capabilities, free world weapon systems, and electronic warfare administration. Laboratory exercises on mission planning problems are included.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0116

Antisubmarine Warfare Operations Center (ASWOC) Watch Officer

Course Number: J-2G-0367.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 3-5 weeks (110-140 hours).

Exhibit Dates: 1/90–Present.

Objectives: To train officers in the capabilities and operation of a tactical data base management system and its use in a naval operations center.

Instruction: Classroom lectures, demonstrations, and laboratory work on function and operation of computer/system components and controls; preparation, receipt, and transmission of messages and data; briefing and debriefing flight crews; preparing, analyzing, and interpreting data; and making calculations.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/91).

NV-2202-0117

Naval Reserve Senior Officer Tactics

Course Number: J-2G-0380.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (73 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To provide senior reserve officers with an update in the varied aspects of naval warfare.

Instruction: Classroom exercises provide a knowledge of Soviet warfare capabilities and tactics; US antisubmarine, electronic, and anti-air warfare capabilities; and US and NATO surface capabilities. Students also engage in exercises which provide practical experiences.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0118

Track Supervisor/Tadil A Track Coordinator (Advanced)

Course Number: J-221-0308.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 1 week (40 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To provide selected enlisted personnel with the knowledge and skills required to function as a tactical data system target tracking supervisor in a multiship/service environment.

Instruction: Classroom lecture combined with laboratory work provides instruction in supervisor duties and responsibilities in accordance with current fleet directives. Also included is information on data input equipment, target tracking procedures, data linking, and related systems.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0119

CGN-38/DDG-993 (SM-2) Combat Systems Operator

Course Number: J-221-0309.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 3 weeks (105 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train personnel to operate the combat system and display consoles on board CGN-38 and DDG-993 class ships.

Instruction: Lecture and laboratory exercises cover the identification of weapon systems/subsystems and sensors and the purpose and operation of various subsystems, including tracking, identification and display, data entry, video processor, sonar and weapon control systems used in a combat environment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0120

Antisubmarine Air Control Naval Tactical Data System (NTDS)

Course Number: J-221-0323.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 4 weeks (140 hours).

Exhibit Dates: 1/90–11/92.

Objectives: To train selected personnel to perform the duties of an antisubmarine air controller including the ability to provide positive control to antisubmarine warfare craft.

Instruction: Classroom and laboratory exercises include instruction in air control, console operation, antisubmarine warfare search procedures, sensors, submarine classifications, sonobuoy patterns, weapons and attack procedures, antisubmarine warfare operations, and air traffic control procedures.

Credit Recommendation: In the vocational certificate category, credit in aircraft traffic control operation on the basis of institutional evaluation (6/86).

NV-2202-0121

Force/Ship Weapons Coordinator Tactical Training

Course Number: J-221-0324.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (75 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To provide watchstanders assigned to tactical data system equipped ships with comprehensive tactical training.

Instruction: Classroom lectures cover basic knowledge of the Soviet threat; US and NATO ships and their weapons; capabilities and limitations of US Navy fighter aircraft; warfare net radio procedures; capabilities, limitations, and use of USAF, USN, and NATO early warning aircraft; antiaircraft warfare equipment and use; and a thorough knowledge of composite warfare doctrine.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0122

Antisubmarine Warfare Operations Center (ASWOC) Operations Control Operator

(Antisubmarine Warfare (ASW) Centers Command and Control System Operator)

Course Number: J-221-0362.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 3-4 weeks (140 hours).

Exhibit Dates: 1/90–12/97.

Objectives: To train personnel in system capabilities, operation, and functions of antisubmarine warfare equipment.

Instruction: Course consists of lectures and practical work encompassing mission support operations, telecommunications procedures, console operation, data terminal operation, and simulated training missions with associated calculations.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (1/87).

NV-2202-0123

Tactical Action Officer

Course Number: K-2G-0033.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To provide experienced officers with the tactical and supervisory skills necessary to serve as a multithreat warfare tactician onboard surface ships and embarked tactical staff.

Instruction: Instruction consists of classroom lectures with a few hours of associated laboratory work. Major units of study include physical environment; naval forces command, control, communications, and intelligence; Soviet capabilities; ship and submarine weapons, sensors, and platforms; US naval air capabilities, counter assessment, and tactics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0124

Air Watch Officer

Course Number: J-2G-0322.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 1/90–6/96.

Learning Outcomes: Upon completion of the course, the student will be able to provide inexperienced officers and chief petty officers the training to qualify as a watch officer in a combat information center.

Instruction: Course provides an overview of the equipment, tactics, and duties of the personnel in a combat information center (CIC) on a ship, including plot and display boards, CIC communications and data link systems, maneuvering theory, surface formation maneuvers, anti-air and antisubmarine warfare theory, and duties of CIC officers.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0125

Combat Information Center (CIC) Officer

Course Number: J-2G-0325.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train officers in all operational phases of combat information centers.

Instruction: Instruction includes management, organization, electronic warfare, intelligence, and communications. Other topics include surface formation maneuvers, air control, and anti-air and antisubmarine warfare.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0126

Air Intercept Control Supervisor

Course Number: K-221-0015.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA; Fleet Combat Training Center, Pacific, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/90–12/90.

Objectives: To train qualified air intercept controllers to effectively supervise and instruct air intercept operations.

Instruction: Classroom and laboratory exercises include instruction in air control procedures; US and Soviet aircraft types, performance, and tactics; Soviet naval and air capabilities and warfare doctrine; antisubmarine warfare detection equipment, weapons, and tactics; weather considerations; intercept control communications and tactics, navigation aids, and IFF and radar capabilities; rules/regulations and publications related to aircraft operations; and supervisor training.

Credit Recommendation: In the vocational certificate category, credit in air traffic control operation on the basis of institutional evaluation (6/86).

NV-2202-0127

Naval Warfare Operations Specialist—Advanced

Course Number: K-221-0053.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA; Fleet Combat Training Center, Pacific, San Diego, CA.

Length: 10-14 weeks (40-560 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To provide the knowledge and skills required to qualify as combat information center watch supervisors and division leading petty officers.

Instruction: Classroom lectures, demonstrations, and laboratory exercises provide training in basic principles and tactical use of navigation systems; communications publications and equipment; surface tactical maneuvering; naval gun support; amphibious operations; antisubmarine, antiship, and anti-aircraft warfare; radar use; electronic warfare; and the naval tactical data system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/86).

NV-2202-0128

Antisubmarine Warfare (ASW) Module Watch Officer

Course Number: J-2G-0369.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 3-4 weeks (105 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train officers in the system capabilities and equipment operation of a data base management system and its use in a naval operations center.

Instruction: Classroom lectures, demonstrations, and laboratory work cover function and operation of various computer systems, components, and controls; preparation, receipt, and transmission of messages and data; briefing and debriefing flight crews; preparing, analyzing, and interpreting data; and making calculations.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0129

Enlisted Tactical Applications

Course Number: J-221-0025.

Location: Fleet and Mine Warfare Training Center, Charleston, SC; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (67-80 hours).

Exhibit Dates: 1/90–Present.

Objectives: To provide leading petty officers with a basic understanding of the interrelationships between weapon/sensor systems and other systems in the ship group in order to enable them to make better decisions regarding system employment in a multithreat environment.

Instruction: Classroom lectures include information on Soviet naval forces; US Navy command, control, and communications tactics; US and allied naval ships, weapons, and sensors; shipboard organization for warfare; and tactical gaming.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/93).

NV-2202-0130

Combat Information Center (CIC) Procedures Advanced

Course Number: J-221-0305.

Location: Fleet and Mine Warfare Training Center, Charleston, SC; Fleet Training Center, Mayport, FL; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train the junior operations specialist as a watchstander and the petty officer as a watch supervisor in a combat information center aboard ship.

Instruction: Course includes a review of sound-powered and radiotelephone procedures; antisubmarine, anti-aircraft, and antisurface ship warfare; and electronic warfare techniques. Course emphasizes plotting ship maneuvers for weapon engagement, scouting, tactics, fleet maneuvers, navigation calculations, and maintaining various records in proper format.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/86).

NV-2202-0131

Air Intercept Controller, Conventional Qualification

Course Number: K-221-0007.

Location: Fleet Combat Training Center, Pacific, San Diego, CA; Fleet Combat Training Center, Atlantic, Dam Neck, Virginia Beach, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–6/96.

Objectives: To train senior enlisted and junior officers with previous experience with the tactical data system in the duties, responsibilities, and skills required of air intercept controllers.

Instruction: Lectures and practical exercises cover air intercept control, including fleet anti-air warfare, threat intelligence, interceptor aircraft characteristics and air-to-air weapons systems, air navigation aids, communications equipment, intercept control communications procedures and vocabulary, radar indicator equipment, identification equipment, and preparation and procedures for NTDS control.

Credit Recommendation: In the vocational certificate category, credit in air traffic control operation on the basis of institutional evaluation (6/86).

NV-2202-0132

Joint Military Operations for College of Naval Warfare

Course Number: None.

Location: Naval War College, Newport, RI.

Length: 13 weeks (156 hours).

Exhibit Dates: 1/90–12/90.

Learning Outcomes: Upon completion of the course, the student will be able to assess and implement concepts of military management, planning, and analysis consistent with theoretical foundations of strategy and warfare.

Instruction: Instruction includes a blend of frequent seminar work, carefully selected readings, case studies, an independent research project, and written examinations. The course is divided into four components: strategy and operations; military warfare; planning and decision making; and gaming. Students are required to complete a final examination at the conclusion of each component.

Credit Recommendation: In the graduate degree category, 6 semester hours in either management or military science (9/87).

NV-2202-0133

Maritime Operations for College of Naval Command and Staff

Course Number: None.

Location: Naval War College, Newport, RI.

Length: 14 weeks (151 hours).

Exhibit Dates: 1/90–12/90.

Learning Outcomes: Upon completion of the course, the student will be able to assess and implement concepts of military management, planning, and analysis consistent with theoretical foundations of strategy and warfare.

Instruction: Instruction includes a blend of frequent seminar work, carefully selected readings, case studies, an independent research project, and written examinations. The course is divided into three components: strategy and operations; military warfare; and planning and decision making. Students are required to complete a final examination at the conclusion of each component.

Credit Recommendation: In the graduate degree category, 6 semester hours in either management or military science (9/87).

NV-2202-0134

Maritime Operations Employment of Naval Forces Nonresident Seminar

Course Number: None.

Location: White Oak, MD; Washington, D.C; Seattle, WA; San Francisco, CA; San Diego, CA; Pensacola, FL; Patuxent, MD; Norfolk, VA; Newport, RI; Dahlgren, VA; Corpus Christi, TX; Annapolis, MD.

Length: 36 weeks (90 hours).

Exhibit Dates: 1/90–12/90.

Learning Outcomes: Upon completion of the course, the student will be able to assess concepts of military management, planning, and analysis and be able to participate knowledgeably in the decision making and management of maritime operations.

Instruction: Methods include seminars and selected readings. Short papers and two written examinations are required. Major topics are strategic concepts, planning and decision making, and naval warfare tasks.

Credit Recommendation: In the graduate degree category, 3 semester hours in management or military science (3/88).

NV-2202-0135

Naval War Correspondence Course in Maritime Operations (Employment of Naval Forces)

Course Number: None.

Location: Naval War College, Off-Campus Program, Washington, D.C.

Length: Maximum, 52 weeks.

Exhibit Dates: 1/90–12/90.

Learning Outcomes: Upon completion of the course, the student will be able to assess concepts of military management, planning, and analysis and participate knowledgeably in the decision making and management of maritime operations.

Instruction: The course is organized by modules in strategic concepts, planning and decision making, and naval warfare tasks. Students complete readings in each module and write essays for all modules. The essays are reviewed by faculty and graded.

Credit Recommendation: In the graduate degree category, 1 semester hour in management or military science (3/88).

NV-2202-0136

Trident Sonar Advanced Operator

Course Number: A-130-0323.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/90–9/95.

Learning Outcomes: Upon completion of the course, the student will be able to operate the AN/BQQ-6 sonar set in all modes.

Instruction: Classroom and laboratory instruction cover sonar administration, sonar calculators, contact localization, and tactical security.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

NV-2202-0137

Trident Sonar Supervisor

Course Number: A-130-0187.

Location: Trident Training Facility, Bangor, Bremerton, WA; Trident Training Facility, Kings Bay, GA.

Length: 3 weeks (46 hours).

Exhibit Dates: 1/90–9/95.

Learning Outcomes: Upon completion of the course, the student will be able to perform as an advanced sonar supervisor.

Instruction: Classroom and laboratory instruction cover the supervisor's responsibilities, sonar subsystem operating conditions, air ASW systems, acoustics, and pseudo sound.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

NV-2202-0138

Strategic Weapon System Officer Trident I

Course Number: A-2F-4623.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3-4 weeks (144 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will direct operational procedures for a nuclear ballistic missile targeting system.

Instruction: Lectures and practical exercises cover operation of the missile system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0139

Strategic Weapons System Assistant
Weapons Officer (AWEPS) Trident I
Backfit

Course Number: A-2F-4622.

Location: Submarine Training Facility, Charleston, SC; Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4-5 weeks (178 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will function as a missile launch officer and nuclear weapons handling supervisor.

Instruction: Lectures and practical exercises cover operational procedures for a specific missile weapons system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0140

Terrier New Threat Upgrade (NTU)
Advanced Officer

Course Number: A-2F-4638.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will supervise system maintenance, administration, and employment of a guided missile fire control system.

Instruction: Lectures and practical exercises cover topics related to the specific missile fire control system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0141

Strategic Weapons System Officer Poseidon

Course Number: A-2F-4621.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3-4 weeks (144 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will direct operational procedures for a nuclear weapons system.

Instruction: Lectures and practical exercises cover system operation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0142

Strategic Weapons System Assistant
Weapons Officer Poseidon

Course Number: A-2F-4620.

Location: Submarine Base, New London, Groton, CT; Submarine Training Facility, Charleston, SC; Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4-5 weeks (176 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will function as a missile launch officer and a nuclear weapons handling supervisor.

Instruction: Lectures and practical exercises cover operational procedures for a missile officer.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0144

Trident Mk 4 Reentry System Tender
Transfer and Handling

Course Number: A-644-0023.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 2 weeks (62 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and perform preventive maintenance on missile warheads and warhead-handling equipment.

Instruction: Lectures and practical exercises cover the subject equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0145

Surface Acoustic Analysis Specialist

Course Number: J-130-0500.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA; Fleet Antisubmarine Warfare Training Center, Atlantic, Norfolk, VA.

Length: 24 weeks (960 hours).

Exhibit Dates: 1/90–7/93.

Learning Outcomes: Upon completion of the course, the student will be able to make basic calculations using algebra, trigonometry, and statistics and apply the concepts of underwater acoustics to sonar systems.

Instruction: This evaluation is based on the first five and one-half weeks of the course. The remainder is classified. Lectures and exercises cover algebra, trigonometry, statistics, and underwater acoustics, including sound propagation theory, environmental effects, acoustic signal processing, underwater sounds, and sonar theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in technical mathematics (6/89); in the upper-division baccalaureate category, 4 semester hours in physics of underwater acoustics (6/89).

NV-2202-0146

Intermediate Surface Acoustic Analysis

Course Number: K-130-1093.

Location: Fleet Antisubmarine Warfare Training Center, San Diego, CA; Fleet Antisubmarine Warfare Training Center, Atlantic, Norfolk, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–12/91.

Learning Outcomes: Upon completion of the course, the student will be able to identify ship types based on the passive sonar acoustic signals received.

Instruction: Lectures and practical exercises cover signal reception of passive sonar systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

NV-2202-0148

Basic Enlisted Submarine

Course Number: A-060-0011/C; A-060-0011/B; A-060-0011/A; A-060-0011.

Location: Submarine School, New London, Groton, CT.

Length: 5-6 weeks (174-228 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the function of components of shipboard mechanical systems.

Instruction: Lectures and practical instruction cover the basic function of shipboard mechanical systems including description of a submarine's air, drain, ballast, trim, hydraulic, ventilation, and power systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in general mechanical systems (5/96).

NV-2202-0149

ADVANCED SIGNALMAN

Course Number: J-203-0803.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/90–12/93.

Learning Outcomes: Upon completion of the course, the student will be able to describe communications procedures, honors, ceremonies, and advanced navigation techniques.

Instruction: Instruction consists of classroom discussion of the duties of a signalman, handling classified material, message formats, light and flag signal procedures, record keeping, radio procedures, proper display of flags, dress and full dress of ships, navigation, emergency procedures, international Morse code, and the US systems of buoys and navigational aids.

Credit Recommendation: In the vocational certificate category, 2 semester hours in international Morse code (6/94); in the lower-division baccalaureate/associate degree category, 2 semester hours in navigational rules (6/94).

NV-2202-0150

SENIOR QUARTERMASTER REFRESHER

Course Number: J-061-2207.

Location: Fleet Training Center, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide navigation expertise to shipboard personnel; select and use appropriate nautical charts; advise during unusual navigational conditions in accordance with fleet directives; extract and record maintenance data from navigation publications; compute positions, courses, and distances and navigate to and from a hypothetical point; determine ship's permanent allowance; correct and update ship's charts and publications; calculate error in magnetic and gyrocompass systems; navigate by dead reckoning; use all charted visual aids to navigation; plot lines of position; use tide and current data; select anchorages; use electronic navigation systems including SATNAV and Loran; use ship's weather monitoring systems; apply the rules of the road; and plan and plot navigation briefs.

Instruction: Lectures and laboratory exercises cover navigation instruments, charts, and aids to navigation. Topics include rules of the road, records and logs, gyro and magnetic compass systems, voyage planning and preparation, tides and currents, and dead reckoning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in navigation (12/89).

NV-2202-0151

DIVER EXPLOSIVE ORDNANCE DISPOSAL

Course Number: A-431-0083.

Location: Training Center, Panama City, FL.

Length: 10 weeks (360 hours).

Exhibit Dates: 3/90–8/96.

Learning Outcomes: After 8/96 see NV-0803-0011. Upon completion of the course, the student will be able to disable explosive devices in open-circuit scuba.

Instruction: Lectures, testing, physical conditioning, and underwater performance evaluation cover diving-related duties.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in scuba diving and 1 in physical education (physical fitness) (7/90).

NV-2202-0152

ADVANCED EXPLOSIVE ORDNANCE DISPOSAL

Course Number: A-431-0015.

Location: Explosive Ordnance School, Indian Head, MD.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to keep current in explosive ordnance disposal.

Instruction: Training is presented in a seminar format and through field trips. Topics include nuclear devices, access and disabling, chemical ordnance, conventional ordnance, underwater ordnance, and related topics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/91).

NV-2202-0153

ADVANCED ACCESS AND DISABLEMENT

Course Number: A-431-0065.

Location: Explosive Ordnance School, Indian Head, MD.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform advanced explosive ordnance disposal techniques on improvised explosive devices.

Instruction: Given the necessary tools and equipment, publications, situations, access exercises, dynamic exercises, and passive entry exercises, students perform procedures to access and disable improvised nuclear devices.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/91).

NV-2202-0154

EXPLOSIVE ORDNANCE DISPOSAL PHASE 2 (SURFACE) (C1)

Course Number: A-431-0012.

Location: Explosive Ordnance School, Indian Head, MD.

Length: 14-15 weeks (592 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify, recover, evaluate, and dispose of all conventional surface explosive ordnance and nuclear ordnance.

Instruction: Course includes lectures, practical exercises, and testing in ground ordnance, guided missiles, bombs and bomb fuses, and render safe and disposal procedures for nuclear ordnance. Protective clothing is also covered. NOTE: Army students will take this course in conjunction with A-431-0069 (NV-2202-0113) under the Army course number listed above.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in innovative explosive devices in a police science program (7/91).

NV-2202-0155

EXPLOSIVE ORDNANCE DISPOSAL SONAR SEARCH SYSTEM BASIC

(Sonar Scanner System Basic Operator)

Course Number: A-431-0074.

Location: Explosive Ordnance School, Indian Head, MD.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the sonar search system.

Instruction: Course includes introductory wave propagation theory, practical operations, exercises, and tests.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/91).

NV-2202-0156

1. DIVER EXPLOSIVE ORDNANCE DISPOSAL MK 16 UNDERWATER BREATHING APPARATUS (UBA) MIXED GAS
2. EXPLOSIVE ORDNANCE DISPOSAL MIXED GAS DIVING UNDERWATER BREATHING APPARATUS

Course Number: *Version 1:* A-431-0075. *Version 2:* A-431-0075.

Location: *Version 1:* Diving and Salvage Training Center, Panama City, FL. *Version 2:* Explosive Ordnance School, Indian Head, MD.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 1/96–Present. *Version 2:* 1/90–12/95.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to use a dry suit and mixed gas underwater breathing apparatus. *Version 2:* Upon completion of the course, the student will be able to use a dry suit and mixed gas underwater breathing apparatus.

Instruction: *Version 1:* Lectures, practical exercises, and written and underwater performance examinations cover the use of dry suit and mixed gas apparatus to dive to depths of 300 feet. *Version 2:* Lectures and practical exercises use dry suit and mixed gas apparatus to dive to depths of 300 feet.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in advanced scuba diving (8/97). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diving—mixed gas (7/91).

NV-2202-0157

EXPLOSIVE ORDNANCE DISPOSAL PHASE 2 (NAVY), CLASS C1

Course Number: A-431-0011.

Location: Explosive Ordnance School, Indian Head, MD.

Length: 28 weeks (1120 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify, recover, evaluate, and dispose of all conventional surface and underwater explosive ordnance and nuclear ordnance.

Instruction: Lectures, practical exercises, and testing cover ground ordnance, guided missiles, bombs and bomb fuses, and render safe and disposal procedures for nuclear and conventional ordnance. Also includes protective clothing, proficiency diving, knots and rigging, underwater towing techniques, and torpedoes and mines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in introduction to explosives in a police science program (7/91).

NV-2202-0158

5"/38 Caliber Gun Operation and Maintenance, Class C

Course Number: J-113-0100.

Location: Fleet Combat Training Center, Yorktown, VA.

Length: 8 weeks (233 hours).

Exhibit Dates: 1/91–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and describe the maintenance procedures for a 5"/38 caliber gun.

Instruction: Lectures and practical exercises cover gun operation and maintenance.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0159

Mk 38 Mod 0 25mm Machine Gun Operation and Maintenance

Course Number: K-041-2236.

Location: Fleet Training Center, San Diego, CA; Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 1-2 weeks (56 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the functional components and corrective maintenance procedures for a machine gun system.

Instruction: Lectures and practical exercises cover the machine gun system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0160

Vertical Launch Tomahawk Weapon Control System Operator

Course Number: J-121-0516.

Location: Fleet Training Center, San Diego, CA; Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the components of the weapon system and their function and describe the theory necessary to support system operation.

Instruction: Lectures and practical exercises cover system use, data base files, system capabilities, and system engagement.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0161

Antisubmarine Warfare (ASW) Scene of Action

Course Number: J-2G-0554.

Location: Fleet Antisubmarine Training Center, Norfolk, VA.

Length: 1-2 weeks (74 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe how to use various sound velocity data for range prediction; describe the mission of the carrier antisubmarine warfare (ASW) module; describe ASW platforms, sensors, and weapons; identify and use NATO ASW communications circuits; describe aircraft operating environments; and describe submarine tactics.

Instruction: Methods of instruction include lecture with visual aids, site visitation, discussion, and participation in actual work scenarios.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0162

Naval Control of Shipping

Course Number: J-8C-0523.

Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA.

Length: 2-3 weeks (66 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the requirements of the naval control of shipping organization, describe merchant vessel boarding procedures, describe port captain and marine safety officer duties, identify convoy formations and routing systems, plan convoy routes, describe communications procedures, and identify merchant ship reporting and control operation messages.

Instruction: Methods of instruction include lectures with slides and practical application. Performance is evaluated by written examination. Topics include security, history of convoys, shipping organization, boarding procedures, Coast Guard role in shipping, sailing folders, and communications.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0163

Convoy Commodore and Staff Officer

Course Number: J-1B-0526.

Location: Fleet Antisubmarine Training Center, Norfolk, VA.

Length: 2-3 weeks (72 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe naval control of shipping, convoy formation planning, civil direction of shipping, nontactical communications, Soviet surveillance systems, mine warfare, sortie and entry operations, submarine and air threat, and convoy sailing folder.

Instruction: Lectures, slides, and practical problems cover the above subject areas.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0164

Naval Control of Shipping Advanced

Course Number: J-1B-0528.

Location: Antisubmarine Training Center, Oakland, CA; Fleet Antisubmarine Training Center, Norfolk, VA.

Length: 2 weeks (73 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe Naval control of shipping procedures, analyze convoy training and pilot requirements, describe atmospheric and environmental convoy routing factors, and describe operational security.

Instruction: Lectures with slides cover relevant publications, tugs and pilots, civil direction of shipping, environmental routing, shipping responsibilities, and operational security.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/91).

NV-2202-0165

Recruit Training
(Basic Training)

Course Number: *Version 1:* X777-7770. *Version 2:* X-777-7770.

Location: *Version 1:* Recruit Training Command, Great Lakes, IL. *Version 2:* Recruit Training Command, Great Lakes, IL; Recruit Training Command, Orlando, FL; Recruit Training Command, San Diego, CA.

Length: *Version 1:* 8 weeks (169 hours). *Version 2:* 8-9 weeks (367-480 hours).

Exhibit Dates: *Version 1:* 1/95–Present. *Version 2:* 10/91–12/94.

Learning Outcomes: *Version 1:* Upon completion of the course, the recruit will demonstrate knowledge of general military and Navy protocol, first aid, personal health and safety, basic swimming, fire fighting and damage control, seamanship, and water survival skills and will meet prescribed standards for physical fitness. *Version 2:* Before 10/91 see NV-2202-0014. Upon completion of the course, the recruit will demonstrate knowledge of general military and Navy protocol, first aid, personal health, safety, basic swimming, fire fighting, and water survival skills and will meet prescribed standards for physical fitness.

Instruction: *Version 1:* Course includes lectures, demonstrations, and performance exercises in military protocol and drill, seamanship, fire fighting, first aid, safety, health, and physical conditioning. *Version 2:* Course includes lectures, demonstrations, and performance exercises in military protocol and drill, seamanship, fire fighting, first aid, safety, health, and physical conditioning.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in personal fitness/conditioning, 1 in personal/community health, and 1 in first aid and safety (5/95). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in personal fitness/conditioning, 1 in personal/community health, and 1 in first aid and safety (3/92).

NV-2202-0166

Naval and Marine Aviation Electronic Warfare Officer

Course Number: C-2D-3810.

Location: Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (393-394 hours).

Exhibit Dates: 6/92–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the stages of a basic receiver; describe the applications, advantages, and disadvantages of various ESM intercept equipment; correctly log and analyze intercept signals; and determine the threats within a complex signal environment.

Instruction: Laboratory assignments are used to reinforce material taught in the classroom. Topics covered are Soviet land-based, shipboard, and airborne systems; US electronic warfare systems; ESM operations; and free world electronic warfare systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/93).

NV-2202-0167

AV-88B 25mm Gun System Intermediate Maintenance

Course Number: C-646-3889.

Location: Air Maintenance Training Group, Cherry Point, NC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to service, repair, test, and troubleshoot a 25mm gun system.

Instruction: Course covers the theory of operation of 25mm gun system including basic gun operation and safety concerns during servicing and maintenance of ammunition-handling system. Methodology includes lectures and laboratories using demonstrations on mock-ups and live gun systems.

Credit Recommendation: Credit is not recommended because of military-specific nature of the course (7/94).

NV-2202-0168

Aviation Ordnance Munitions Technician Intermediate Maintenance

Course Number: C-646-4107.

Location: Air Maintenance Training Group, Cherry Point, NC; Air Maintenance Training Group, El Toro, CA.

Length: 3-4 weeks (152 hours).

Exhibit Dates: 5/94–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe airborne weapons, their components and functions and test, disassemble, inspect, and reassemble equipment on the intermediate maintenance level.

Instruction: Course covers aviation ordnance munitions, airborne weapons systems, ordnance safety, ammunition management, and explosive ordnance disposal. Methodology includes classroom lectures and practical exercises.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/94).

NV-2202-0170

Fire Support Man

Course Number: K-041-0014.

Location: Expeditionary Warfare Training Group, Pacific, San Diego, CA.

Length: 2 weeks (96 hours).

Exhibit Dates: 12/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform as a naval gunfire spotter.

Instruction: Lectures and practical exercises cover naval gunfire missions, targeting, fire control, battle assessment, and communications.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/97).

NV-2202-0171

Seaman Apprentice

Course Number: A-950-0070.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to become an active and participating member of the ships crew and demonstrate various skills and knowledge.

Instruction: Group paced lecture, laboratory demonstrations, and performance exercises on visual signaling, lookout watches, types of buoys, knots and splices, mooring lines, deck fittings and equipment, boat etiquette, and passenger safety.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/97).

NV-2202-0172

Mine Hunter Coastal Machinery/Ship Control System Operators

Course Number: A-651-0122.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/97–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the theory and associated documentation needed to support the performance and operation of a machinery/ship control system; support and understand the performance of casualty/degraded/abnormal operation without going into detailed mechanical breakdown of the machinery/ship control system.

Instruction: Review of knowledge and skills needed to operate shipboard propulsion engineering control consoles and automatic control systems on board the coastal mine sweeper class ships.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (10/97).

NV-2202-0173

Airman Apprentice

Course Number: A-950-0069.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (100 hours).

Exhibit Dates: 10/96–Present.

Learning Outcomes: Upon completion of the course, the student will be able to become an active and participating member of the ships crew and demonstrate various skills and knowledge.

Instruction: Group-paced lectures, laboratory demonstrations, and performance exercises on rating designations, duties, specialty marks, theory of flight, aircraft nomenclature, aircraft identification, types of aircraft carriers, responsibilites of flight deck personnel, and aircraft fuel types.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/97).

NV-2203-0143

Poseidon Mk 3 Reentry System Tender Transfer and Handling

Course Number: A-644-0018.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 3-4 weeks (144 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to handle and transfer missiles between a submarine and a submarine surface tender.

Instruction: Lectures and practical exercises cover the handing of the Poseidon missile.

Credit Recommendation: Credit is not recommended because of the limited, technical nature of the course (6/89).

NV-2204-0001

Officer Candidate

Course Number: P-9B-2000.

Location: Air Station, Pensacola, FL.

Length: 13 weeks (590 hours).

Exhibit Dates: 9/96–Present.

Learning Outcomes: Upon completion of the course, the student will possess a basic orientation to a naval career, including military training; knowledge of naval history and warfare; military law; navigation, seamanship, and damage control; engineering; applied naval leadership; personnel administration; and professional development and perform physical fitness, swimming, and water survival.

Instruction: Lectures, laboratory, practical exercises, written tests, and performance examinations cover the essential subjects for qualification as a naval officer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in physical education (physical fitness, swimming, and water survival), 3 in naval science, 2 in naval history (sea power), and 2 in navigation (8/97); in the upper-division baccalaureate category, 3 semester hours in leadership and personnel administration (8/97).

NV-2204-0002

Direct Commission Officer Indoctrination Class PC

Course Number: Q-9B-0024.

Location: Air Station, Pensacola, FL.

Length: 2 weeks (88-89 hours).

Exhibit Dates: 12/91–Present.

Learning Outcomes: Upon completion of the course, the new commissioned officer will demonstrate knowledge of naval customs; courtesies; paygrade structure; career paths, safety aboard ship; and all levels of leadership, naval history, naval strategy and operations, and security.

Instruction: Lecture, laboratory, and written examinations are used to evaluate performance.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/98).

NV-2205-0001

Electrostatically Supported Gyro Monitor (ESGM) Backfit Strategic Weapon

BEST COPY AVAILABLE

System Navigation Officer Replacement

Course Number: A-2G-0027.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply basic inertial navigation theory and direct the operation and maintenance of a ship's inertial navigation guidance system.

Instruction: Lectures and practical exercises cover inertial navigation and the subsystems which make up an inertial navigation system, including gyroscope principles, coordinate systems, torquing, azimuth alignment, and drift prediction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic navigation (6/89).

NV-2205-0002

Electrostatically Supported Gyro Monitor (ESGM) Backfit Navigation Subsystem

Course Number: A-193-0394.

Location: Guided Missiles School, Dam Neck, Virginia Beach, VA.

Length: 4-5 weeks (178 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the ESGM backfit navigation subsystem as well as maintain and calibrate the system.

Instruction: Instruction includes classroom and laboratory work on principles of navigation, operating principles of navigation equipment, and basic preventive maintenance of the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic navigation (6/89).

Navy Enlisted Ratings Exhibits

NER-AB-002

Aviation Boatswain's Mate, Master Chief
ABCM

Exhibit Dates: 1/90–Present.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

May progress from ABHCS, Senior Chief Aviation Boatswain's Mate, Aircraft Handling (E-8); ABFCS, Senior Chief Aviation Boatswain's Mate, Fuels (E-8); or ABECS, Senior Chief Aviation Boatswain's Mate, Launching and Recovery Equipment (E-8).

Description

Able to perform the duties required for ABECS, ABFCS, or ABHCS; formulates guidelines for use in safety inspections; monitors compliance with operational evaluation procedures; establishes and maintains liaison with allied support activities as well as lower and upper echelon; makes necessary modifications to safety procedures; establishes goals and priorities; reviews personnel, equipment, and material requirements; prepares staff studies; develops budgets, monitors expenditures, and develops forecasts of future requirements.

Recommendation

In the lower-division baccalaureate/associate degree category, if the individual progressed from ABECS, use the credit recommendation in exhibit NER-AB-001 (in the 1954-1989 Guide) or NER-ABE-002; if progressed from ABFCS, use the credit recommendation in exhibit NER-AB-001 (in the 1954-1989 Guide) or NER-ABF-002; if progressed from ABHCS, use the recommendation in exhibit NER-AB-001 (in the 1954-1989 Guide) or NER-ABH-002. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, 3 in operations management, and 3 in communication techniques for managers. (3/91).

ABEC
ABECS

Exhibit Dates: 1/90–8/96.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). ABE3: Aviation Boatswain's Mate, Launching and Recovery Equipment, Third Class (E-4). ABE2: Aviation Boatswain's Mate, Launching and Recovery Equipment, Second Class (E-5). ABE1: Aviation Boatswain's Mate, Launching and Recovery Equipment, First Class (E-6). ABEC: Chief Aviation Boatswain's Mate, Launching and Recovery Equipment (E-7). ABECS: Senior Chief Aviation Boatswain's Mate, Launching and Recovery Equipment (E-8). *ABCM:* Master Chief Aviation Boatswain's Mate (E-9).

Description

Summary: Operates and maintains hydraulic and steam catapults, barricades, and arresting gear; operates catapult launch, retract panels, consoles, firing panels, water brakes, chronographs, blast deflectors, and cooling panels; inspects and proof-loads cables, fittings, and wire rope socket. *ABE3:* Inspects and lubricates launch and recovery equipment; replaces packing and seals on catapults and arresting gear; rigs and install barricades; performs planned maintenance on arresting gear and arresting gear engines; operates and maintains jet blast deflectors; determines safe working loads for hoisting materials, wire rope, manila lines, nylon lines, and webbing; uses maintenance cards; completes maintenance records. *ABE2:* Able to perform the duties required for ABE3; inspects, tests, and adjusts catapults and related equipment; tests, adjusts, and calibrates arresting gear and barricades; supervises personnel on aircraft launch hookup; inventories equipment and spare parts; orders spare parts and special tools. *ABE1:* Able to perform the duties required for ABE2; disassembles, replaces defective parts, and reassembles catapult systems, arresting gear engines, and accessories; prepares data for equipment logs; supervises the use of maintenance publications; maintains custody records. *ABEC:* Able to perform the duties required for ABE1; supervises the use, filing, and maintenance of publications and records; screens defective components for repair; inspects and evaluates operation of repaired equipment; monitors quality assurance program; prepares quarterly schedules of preventive maintenance; supervises the inventory of spare parts and equipment. *ABECS:* Able to perform the duties required for ABEC; develops and implements preventive maintenance and quality assurance programs; administers long-range planned maintenance program; establishes and implements programs for personnel interviewing, evaluation, and assignment; evaluates safety and inspection programs; establishes and implements training programs.

Recommendation, ABE3

In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical fundamentals (3/91).

Recommendation, ABE2

In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical fundamentals, 3 in basic hydraulics, and 1 in personnel supervision (3/91).

Recommendation, ABE1

In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical fundamentals, 3 in basic hydraulics, 2 in maintenance management, 2 in personnel supervision, and 1 in records and information management (3/91).

Recommendation, ABEC

In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical fundamentals, 3 in basic hydraulics, 3 in maintenance management, 3 in personnel supervision, and 2 in records and information management (3/91).

Recommendation, ABECS

In the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical fundamentals, 3 in basic hydraulics, 3 in maintenance management, 3 in personnel supervision, and 2 in records and information management. AN: Airman (E-3). ABF3: Aviation Boatswain's Mate, Fuels, Third Class (E-4). ABF2: Aviation Boatswain's Mate, Fuels, Second Class (E-5). ABF1: Aviation Boatswain's Mate, Fuels, First Class (E-6). ABFC: Chief Aviation Boatswain's Mate, Fuels (E-7). ABFCS: Senior Chief Aviation Boatswain's Mate, Fuels (E-8). *ABCM:* Master Chief Aviation Boatswain's Mate (E-9).

Description

Summary: Operates, maintains, and repairs fueling and lubricating oil systems, including service stations, pump rooms, pumps, piping, valves, tanks, and protective piping systems; operates equipment associated with the fueling and defueling of aircraft aboard ship and ashore; operates motor-driven fueling equipment; maintains fuel quality; trains, directs, and supervises fire fighting crews and fire rescue teams; follows fuel-handling safety precautions. *ABF3:* Operates damage control and fire fighting equipment; serves as a member of an aviation fuel damage control repair party; performs maintenance record keeping; uses portable inertness analyzers; aligns valves in fuel piping systems for various operations; fuels and defuels aircraft; obtains samples of aviation fuels and tests for water and solid contaminants; knows the properties and hazards of aviation fuels; makes entries in pump room logs and records; uses maintenance record cards; operates crash fire fighting and mobile fueling and lubricating oil equipment; uses and maintains hand tools and portable power tools; completes forms; conducts inventories; uses blueprints, charts, drawings, and publications. *ABF2:* Able to perform the duties required for ABF3; replaces components of aviation fuel and lubricating oil systems; conducts tests on fuel filter elements; operates solid contamination detectors and water free detectors; inventories, orders, and accounts for spare repair parts; supervises crews in the fueling and defueling of aircraft. *ABF1:* Able to perform the duties required for ABF2; analyzes and instructs personnel in malfunctions of aviation fuel system test equipment, aviation fuel and lubricating oil systems, and the nitrogen distribution system and determines corrective action; maintains fuel and lubricating oil inventory records; calibrates, adjusts, tests, cleans, and flushes aviation fuel and lubricating oil systems; knows the principles and maintenance requirements of centrifugal purifiers; trains subordinates in the operation of fuel systems and test equipment; prepares weekly maintenance schedules; maintains inventory and supply records; supervises flight, hangar, and below decks fueling and system operations. *ABFC:* Able to perform the duties required for ABF1; supervises inspection, operation, maintenance, and repair of aviation fuel systems; monitors procedures for maintaining quality control; prepares quarterly maintenance schedules; responsible for materials and supplies for organizational unit; supervises inspection procedures to ensure that technical specifications and standards of workmanship are met; inspects and evaluates the operation of repaired or newly installed parts and components of aviation fuel systems and related equipment. *ABFCS:* Able to perform the duties required for ABFC; develops and implements preventive maintenance and quality assurance programs; implements and maintains aviation fuel quality assurance programs; implements and maintains aviation fuel quality control procedures; administers long range planning for interviewing, evaluating, and assigning personnel; organizes and schedules training programs; provides technical assistance as required; conducts general administrative duties, including reports, correspondence, directives, and instructions.

Recommendation, ABF3

In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation support operations (aircraft fuel and oil, storage systems, fire fighting, and aircraft servicing) (3/91).

Recommendation, ABF2

In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation support operations (aircraft fuel and oil, storage systems, fire fighting, and aircraft servicing) and1 in personnel supervision (3/91).

Recommendation, ABF1

In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation support operations (aircraft fuel and oil, storage systems, fire fighting, and aircraft servicing), 2 in personnel supervision, 2 in records and information management, and 2 in maintenance management (servicing and equipment) (3/91).

Recommendation, ABFC

In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation support operations (aircraft fueld and oil, storage systems, fire fighting, and aircraft servicing), 3 in personnel supervision, 3 in records and information management, and 3 in maintenance management (servicing and equipment). In the upper-division baccalaureate category, 2 semester hours in organizational management and 2 for field experience in management (3/91).

Recommendation, ABFCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation support operations (aircraft fuel and oil, storage systems, fire fighting, and aircraft servicing), 3 in personnel supervision, 3 in records and information management, and 3 in maintenance management (servicing and equipment). In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (3/91).

AN: Airman (E-3). *AC3:* Air Controlman, Third Class (E-4). *AC2:* Air Controlman, Second Class (E-5). *AC1:* Air Controlman, First Class (E-6). *ACC:* Chief Air Controlman (E-7). *ACCS:* Senior Chief Air Controlman (E-8). *ACCM:* Master Chief Air Controlman (E-9).

Description

Summary: Performs air traffic control duties in air control towers, radar air traffic control facilities, and air operations offices; directs aircraft under VFR and IFR conditions. *AC3:* Interprets FAA regulations pertaining to air traffic control; directs air traffic under visual flight rules; records instrument flight rule clearances and relays to aircraft; issues instructions to vehicular traffic on the airfield and to aircraft on the ground relative to taxiing, parking, and related airport information; issues instructions to fire, crash, and rescue equipment for emergency landings, crashes, and accidents; identifies airfield markings and lighting systems; effects radar handoff; carries out nonradar control of aircraft experiencing emergencies in flight; interprets effect of weather and topography on the operating capability of radar, IFF, and related equipment; maintains flight data and status boards; processes flight plans; controls aircraft using precision approach radar; drafts and processes air traffic control data by teletype/interphone; operates communications equipment and airfield lighting systems; obtains and relays weather information to aircraft and local weather facilities; checks calibration and adjusts radar indicators; identifies and monitors electronic aids to air navigation; uses standard aeronautical charts and publications for air navigation. *AC2:* Carries out radar control of aircraft experiencing emergencies in flight; assigns and evaluates IFF/SIF codes; controls aircraft using air surveillance radar; directs air traffic under instrument flight rules; locates, identifies, and tracks aircraft; interprets characteristics, purposes, and general operating procedures of landing approach systems; applies minimums applicable to IFR approaches and departures and special VFR operations; maintains air traffic operations logs and records; orders charts and publications. *AC1:* Supervises procedures used by control tower personnel; coordinates functions of radar air traffic control; applies holding pattern criteria; carries out training program for air traffic control facility personnel; maintains logs, publications, files, and records applicable to air traffic control facilities; inventories, requisitions, and accounts for air traffic control equipment. *ACC:* Supervises radar air traffic control operations; supervises ATC facility flight checks; conducts emergency drills for air traffic control personnel; supervises the air traffic control facility training program; prepares air traffic control facility reports; interprets and disseminates FAA regulations governing the operations of air traffic control facilities; supervises the use, filing, and maintenance of publications, logs, and records. *ACCS:* Serves as air traffic control facility watch officer; coordinates ATC facility flight checks; reviews and verifies facility compliance with standards for approach zone criteria, obstruction lighting, and field marking; organizes, schedules, and evaluates training program; establishes required inspection procedures; coordinates maintenance of air traffic control facility equipment; manages, coordinates, and evaluates safety programs and emergency drills; prepares local directives and instructions; prepares correspondence; interviews, assigns, and evaluates personnel; plans and organizes runway use and noise abatement programs; submits air traffic control facility reports. *ACCM:* Prepares and interprets letters of agreement, directives, and memoranda applicable to air traffic control; develops operating budgets and monitors expenditures; reviews personnel, equipment, and material requirements and forecasts future needs; establishes goals and sets priorities; plans, organizes, implements, and controls air traffic control activities.

Recommendation, AC3

In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control, 6 in air traffic management, and 3 in federal aviation regulations (2/77).

Recommendation, AC2

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, and 3 in federal aviation regulations (2/77).

Recommendation, AC1

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 1 in personnel supervision, and 1 in record keeping (2/77).

Recommendation, ACC

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 2 in aviation safety management, 2 in personnel supervision, and 2 in record keeping (2/77).

Recommendation, ACCS

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 3 in personnel supervision, 3 in aviation safety management, 2 in record keeping, 2 in aviation facility management, and 2 in technical report writing. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

Recommendation, ACCM

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 3 in personnel supervision, 3 in aviation safety management, 2 in record keeping, 2 in aviation facility management, and 2 in technical report writing. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in organization and planning, and 3 in management problems (2/77).

AN: Airman (E-3). *AC3:* Air Controlman, Third Class (E-4). *AC2:* Air Controlman, Second Class (E-5). *AC1:* Air Controlman, First Class (E-6). *ACC:* Chief Air Controlman (E-7). *ACCS:* Senior Chief Air Controlman (E-8). *ACCM:* Master Chief Air Controlman (E-9).

Description

Summary: Performs air traffic control duties in air control towers, radar air traffic control facilities, and air operations offices; directs aircraft under VFR and IFR conditions. *AC3:* Interprets FAA regulations pertaining to air traffic control; directs air traffic under visual flight rules; records instrument flight rules clearances and relays clearances to aircraft; issues instructions to vehicular traffic on the airfield and to aircraft on the ground relative to taxiing, parking, and related airport information; issues instructions to fire, crash, and rescue equipment for emergency landings, crashes, and accidents; identifies airfield markings and lighting systems; effects radar handoff; carries out nonradar control of aircraft experiencing emergencies in flight; interprets effect of weather and topography on the operating capability of radar, IFF, and related equipment; maintains flight data and status boards; processes flight plans; controls aircraft using precision approach radar; drafts and processes air traffic control data by teletype/interphone; operates communications equipment and airfield lighting systems; obtains and relays weather information to aircraft and local weather facilities; checks calibration and adjusts radar indicators; identifies and monitors electronic aids to air navigation; uses standard aeronautical charts and publications for air navigation. *AC2:* Able to perform the duties required for AC3; carries out radar control of aircraft experiencing emergencies in flight; assigns and evaluates IFF/SIF codes; controls aircraft using air surveillance radar; directs air traffic under instrument flight rules; locates, identifies, and tracks aircraft; interprets characteristics, purposes, and general operating procedures of landing approach systems; applies minimums applicable to IFR approaches and departures and special VFR operations; maintains air traffic operations logs and records; orders charts and publications. *AC1:* Able to perform the duties required for AC2; supervises procedures used by control tower personnel; coordinates functions of radar air traffic control; applies holding pattern criteria; carries out training program for air traffic control facility personnel; maintains logs, publications, files, and records applicable to air traffic control facilities; inventories, requisitions, and accounts for air traffic control equipment. *ACC:* Able to perform the duties required for AC1; supervises radar air traffic control operations; supervises ATC facility flight checks; conducts emergency drills for air traffic control personnel; supervises the air traffic control facility training program; prepares air traffic control facility reports; interprets and disseminates FAA regulations governing the operations of air traffic control facilities; supervises the use, filing, and maintenance of publications, logs and records. *ACCS:* Able to perform the duties required for ACC; serves as air traffic control facility watch officer; coordinates ATC facility flight checks; reviews and verifies facility compliance with standards for approach zone criteria, obstruction lighting, and field marking; organizes, schedules, and evaluates training program; establishes required inspection procedures; coordinates maintenance of air traffic control facility equipment; manages, coordinates, and evaluates safety programs and emergency drills; prepares local directives and instructions; prepares correspondence; interviews, assigns, and evaluates personnel; plans and organizes runway use and noise abatement programs; submits air traffic control facility reports. *ACCM:* Able to perform the duties required for ACCS; prepares and interprets letters of agreement, directives, and memoranda applicable to air traffic control; develops operating budgets and monitors expenditures; reviews personnel, equipment, and material requirements and forecasts future needs; establishes goals and sets priorities; plans, organizes, implements, and controls air traffic control activities.

Recommendation, AC3

In the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic control, 3 in air traffic management, and 3 in federal aviation regulations (3/91).

Recommendation, AC2

In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control, 6 in air traffic management, and 3 in federal aviation regulations (3/91).

Recommendation, AC1

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 1 in personnel supervision, and 1 in records and information management (3/91).

Recommendation, ACC

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 2 in personnel supervision, 2 in records and information management, and 2 in aviation safety (3/91).

Recommendation, ACCS

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 3 in personnel supervision, 2 in records and information management, 3 in aviation safety, 2 in technical writing, and 2 in aviation facility management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (3/91).

Recommendation, ACCM

In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control, 6 in air traffic management, 3 in federal aviation regulations, 3 in personnel supervision, 2 in records and information management, 3 in aviation safety, 2 in technical writing, and 2 in aviation facility management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in management problems, and 3 in human resource management (3/91).

NER-AD-002

Aviation Machinist's Mate, Senior Chief
ADCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress from either ADC, Chief Aviation Machinist's Mate, (E-7), or ADRC, Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic (E-7). *ADCS:* Senior Chief Aviation Machinist's Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

See exhibit NER-AD-003 for AD3, AD2, AD1, and ADC. Manages, supervises, and administers power plant work centers; plans safety program pertaining to aircraft power plants, related equipment, and work centers; interprets maintenance instructions and directives; ensures that established procedures are followed for conducting ground tests and inspections to maintain desired quality level; applies quality control concepts; evaluates repair requirements and requests technical assistance from contract representatives, as needed; determines capabilities, limitations, and reliability of aircraft power plants and related systems; administers long-range planned maintenance program; organizes, schedules, and evaluates training programs; prepares local directives and instructions; prepares correspondence.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in safety management and 3 in principles of administration; add the credit recommended for either ADC (Chief Aviation Machinist's Mate) in exhibit NER-AD-003, or ADRC (Chief Aviation Machinist's Mate, Reciprocating Engine Mechanic) in exhibit NER-ADR-001 (in the 1954-1989 Guide), as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, 3 in quality control, and 3 in human relations (5/79).

NER-AD-003

Aviation Machinist's Mate
AD3
AD2
AD1
ADC

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AD3:* Aviation Machinist's Mate, Third class (E-4). *AD2:* Aviation Machinist's Mate, Second Class (E-5). *AD1:* Aviation Machinist's Mate, First Class (E-6). *ADC:* Chief Aviation Machinist's Mate (E-7). *ADCS:* Senior Chief Aviation Machinist's Mate (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains aircraft engines and related systems, including the induction, cooling, fuel, oil, compression, combustion, turbine, airborne gas turbine compressors, and exhaust systems; conducts engine and related systems inspections. *AD3:* Replaces gaskets, packing, and seals in fuel and oil systems; performs fuel and oil pressure adjustments; adjusts idle mixture and idle speed; cleans helicopter transmissions, gearboxes, rotor heads, drive shafts, and related parts; removes, inspects, and installs external fuel tanks; removes and installs ignitor plugs, spark plugs, starting ignition units, and leads of ignition and starting systems; inspects aircraft fuel systems and fuel samples for contamination; removes, cleans, and replaces fuel and oil filters; uses technical publications; services aircraft on the flight line; performs operational checks of new or overhauled engines installed in aircraft; uses and maintains hand tools. *AD2:* Able to perform the duties required for AD3; installs, removes, and operates jet calibration test units; diagnoses defects in fuel and oil systems; rigs and adjusts power controls, fuel selectors, and shutoff valve controls; inspects, removes, and installs helicopter tail rotor transmissions and rotary wing heads and components; inspects compressors for proper axial and radial clearances; preserves and depreserves aircraft power plants and related systems; performs cylinder changes and valve clearance adjustments; installs and times magnetos; installs carburetors; installs and adjusts propeller controls; inspects, removes, and installs auxiliary power plant and components; performs periodic aircraft inspections; orders technical publications, directives, and manuals; is a first-line supervisor of a three to seven person work group. *AD1:* Able to perform the duties required for AD2; troubleshoots malfunctions in power plant systems; removes and installs bladder and self-sealing fuel cells; inspects, removes, and installs helicopter intermediate gearboxes, tail rotors, swash plates and pitch link rods; supervises use of ground support equipment peculiar to power plants and related systems; orders power plant parts, equipment, material, and tools maintains inventory records; supervises training of subordinates maintaining power plants and related systems; supervises aircraft inspections; inspects installation and evaluates operation of repaired or newly installed power plants and power plant system components; prepares weekly schedules of preventive maintenance; maintains shop files of technical publications, directives, and manuals; supervises medium-sized (10-30 persons) work centers. *ADC:* Able to perform the duties required for AD1; supervises use of engine service maintenance and test equipment; determines types of information to be recorded in each section of the aircraft log book and aeronautical equipment service record; recommends changes to maintenance instructions; analyzes reports of aircraft engine malfunctions and discrepancies and determines corrective action; analyzes inspection procedures to ensure that specifications and standards of workmanship are met; supervises scheduling of work at power plant work centers; determines feasibility of local repairs to components of power plants and related systems; prepares quarterly schedules of preventive maintenance; orders, inventories, and accounts for quick-engine-change kits and spare engines; disposes of engines removed from service; estimates power plant spare parts, equipment, supplies, and manpower requirements.

Recommendation, AD3

In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft engine maintenance and repair and 3 in aviation maintenance technology (5/79).

Recommendation, AD2

In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine maintenance and repair, 6 in aviation maintenance technology, and 2 personnel supervision (5/79).

Recommendation, AD1

In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, and 2 in maintenance management (5/79).

Recommendation, ADC

In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft engine maintenance and repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (5/79).

AECS

Exhibit Dates: 9/96–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AE3:* Aviation Electrician's Mate, Third Class (E-4). *AE2:* Aviation Electrician's Mate, Second Class (E-5). *AE1:* Aviation Electrician's Mate, First Class (E-6). *AEC:* Chief Aviation Electrician's Mate (E-7). *AECS:* Senior Chief Aviation Electrician's Mate (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs electrical, instrument, and power systems on aircraft, including power generation, conversion, and distribution systems; aircraft systems, including hydraulic, landing gear, flight control, utility, and power plant and related systems; instrument systems, including aircraft engine, flight, and other indicating and warning systems; automatic flight control and stabilization systems; aircraft compass systems; attitude reference systems; inertial navigation systems; uses computers in all aspects of work; uses limited pollution control concepts. Duty assignments are designated as either O-Level (troubleshooting and replacing modular systems on aircraft) or I-Level (disassembling, repairing, and benchtesting modules); persons assigned the AE rating receive equivalent training and must pass the same advancement examination, regardless of whether duty assignments have been O-Level, I-Level, or both. *AE3:* Troubleshoots and repairs electrical and instrument systems on aircraft; follows standard checkout procedures to locate and repair electrical malfunctions; reads schematics and block diagrams; uses volt-ohm-milliammeter and oscilloscope; repairs inertial navigation systems; measures voltage, current, and resistance; calibrates temperature sensing system; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AE2:* Able to perform the duties required for AE3; performs troubleshooting and repair tasks not covered in standard service manuals; uses oscilloscope, signal generators, and frequency counters; serves as crew leader, supervising two to four persons on a job; interprets technical directives; maintains technical library and inventory and training records; performs periodic aircraft inspections; uses personal computer. *AE1:* Able to perform the duties required for AE2; serves as shift supervisor, supervising eight-nine persons; diagnoses nonroutine malfunctions and demonstrates repair techniques; interprets electrical and electronic schematics and drawings and approves completed work assignments; prepares weekly schedules of preventive maintenance; supervises technical library; supervises and directs aircraft inspections; directs installation of aircraft electrical changes; writes technical reports and prepares personnel efficiency reports. *AEC:* Able to perform the duties required for AE1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; evaluates aircraft electrical systems and equipment test procedures and recommends improvements; prepares maintenance duty schedules; prepares periodic or recurring reports; supervises the use and file maintenance of publications, logs, and records; interprets technical publications pertaining to aircraft electrical systems and test equipment; prepares quarterly schedules of preventive maintenance; supervises quality control program; provides technical assistance in aircraft accident investigations. *AECS:* Able to perform the duties required for AEC; may oversee three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AE3

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 2 in AC/DC theory, 2 in electrical test instruments, 3 in electrical troubleshooting, 1 in electrical safety fundamentals, and 1 in pollution control (10/96).

Recommendation, AE2

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 3 in AC/DC theory, 2 in electrical test instruments, 3 in electrical troubleshooting, 1 in electrical safety fundamentals, 1 in pollution control, and 3 in computer applications (10/96).

Recommendation, AE1

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 3 in AC/DC theory, 2 in electrical test instruments, 3 in electrical troubleshooting, 1 in electrical safety fundamentals, 1 in pollution control, 3 in computer applications, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (10/96).

Recommendation, AEC

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 3 in AC/DC theory, 2 in electrical test instruments, 3 in electrical troubleshooting, 1 in electrical safety fundamentals, 1 in pollution control, 3 in computer applications, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management, 1 in shop management, and 2 for a management internship (10/96).

Recommendation, AECS

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 3 in AC/DC theory, 2 in electrical test instruments, 3 in electrical troubleshooting, 1 in electrical safety fundamentals, 1 in pollution control, 3 in computer applications, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in logistics management, and 2 for a management internship (10/96).

NER-AF-001

Aircraft Maintenanceman, Master Chief
AFCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress to AFCM, Master Chief Aircraft Maintenanceman (E-9), from either ADCS, Senior Chief Aviation Machinist's Mate (E-8) or AMCS, Senior Chief Aviation Structural Mechanic (E-8).

Description

Able to perform the duties required for either ADCS (Senior Chief Aviation Machinist's Mate) or AMCS (Senior Chief Aviation Structural Mechanic); assists in statistical analyses of aircraft accident reports; formulates guidelines for safety inspections and instructions; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; administers inventory, requisition, receipt, and transfer procedures for aircraft and components; monitors implementation of preventive maintenance program; serves as liaison with other Navy units; reviews and evaluates inspection records, quality control reports, and flight records to ensure that proper maintenance procedures are followed; prepares staff studies and reports; develops operating budgets and monitors expenditures.

Recommendation

In the lower-division baccalaureate/associate degree category, if the individual progressed from ADCS (Senior Chief Aviation Machinist's Mate), use the credit recommendation in exhibit NER-AD-001 (in the 1954—1989 Guide) or AMCS (Senior Chief Aviation Structural Mechanic) in exhibit NER-AM-001, as appropriate, and additional credit as follows: 3 semester hours in technical writing and 3 in management electives. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in management problems, 3 in human relations, and additional credit in quality control on the basis of institutional evaluation (2/77).

NER-AF-002

Aircraft Maintenanceman, Master Chief
AFCM

Exhibit Dates: 1/91–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress to AFCM, Master Chief Aircraft Maintenanceman (E-9), from either ADCS, Senior Chief Aviation Machinist's Mate (E-8), or AMCS, Senior Chief Aviation Structural Mechanic (E-8).

Description

Able to perform the duties required for either ADCS (Senior Chief Aviation Machinist's Mate) or AMCS (Senior Chief Aviation Structural Mechanic); assists in statistical analyses of aircraft accident reports; formulates guidelines for safety inspections and instructions; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; administers inventory, requisition, receipt, and transfer procedures for aircraft and components; monitors implementation of preventive maintenance program; serves as liaison with other Navy units; reviews and evaluates inspection records, quality assurance reports, and flight records to ensure that proper maintenance procedures are followed; prepares staff studies and reports; develops operating budgets and monitors expenditures.

Recommendation

In the lower-division baccalaureate/associate degree category, if the individual progressed from AMCS, use the credit recommended in exhibit NER-AM-001 or NER-AM-002; if progressed from ADCS, use the credit recommended in exhibit NER-AD-001 (in the 1954-1989 Guide), NER-AD-002, or NER-AD-004, as appropriate. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, 3 in operations management, and 3 in communication techniques for managers (3/91).

NER-AG-001

Aerographer's Mate
AG3
AG2
AG1
AGC
AGCS
AGCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 23 (Meteorology).

Career Pattern

AN: Airman (E-3). *AG3:* Aerographer's Mate, Third Class (E-4). *AG2:* Aerographer's Mate, Second Class (E-5). *AG1:* Aerographer's Mate, First Class (E-6). *AGC:* Chief Aerographer's Mate (E-7). *AGCS:* Senior Chief Aerographer's Mate (E-8). *AGCM:* Master Chief Aerographer's Mate (E-9).

Description

Summary: Observes, collects, records, and analyzes meteorological and oceanographic data; makes visual and instrument observations of weather and sea conditions. *AG3:* Identifies the types and knows the purposes of instruments and equipment used by the Weather Service; operates equipment and performs routine checks and operator preventive maintenance on meteorological and oceanographic equipment and instruments; observes, collects, records, and prepares for transmission surface meteorological elements; plots synoptic surface charts using aviation observations, constant pressure charts, data from environmental warnings and advisories, and skew T, Log P diagrams; determines tracking data from meteorological satellite predict messages; applies grid to meteorological satellite pictures; operates radio receivers and facsimile and teletype equipment; uses publications and directives related to weather communications. *AG2:* Able to perform the duties required for AG3; checks surface observations for accuracy prior to transmission; applies meteorological fundamentals of primary, secondary, and tertiary circulations of the earth's atmosphere and of types of weather associated with air masses, frontal systems, and anticyclonic systems in drawing weather charts; identifies physical properties of sea water and major current systems and water masses of the ocean; constructs radiological fallout plot from upper wind data; draws synoptic surface charts showing frontal systems, isobars, isallobars, and pressure centers; draws constant-pressure charts showing isohypses, troughs, ridges, and height centers; interprets oceanographic charts; computes astronomical and tidal data; maintains directives, publications, and climatological records; orders, inventories, and disposes of meteorological and oceanographic equipment, instruments, and supplies. *AG1:* Able to perform the duties required for AG2; prepares short-range (up to 24 hours) environmental forecasts; identifies and classifies weather echoes on radar; computes atmospheric refractive index; analyzes and uses skew T, Log P diagrams in preparing environmental forecasts; prepares and presents weather data for local and extended flights; identifies charts and related products from digital computers; performs calibrations and adjustments to meteorological and oceanographic equipment (excluding electronic components). *AGC:* Able to perform the duties required for AG1; interprets ocean thermal structure and factors affecting underwater transmission of sound, wind wave, swell generation, and propagation in preparing oceanographic forecasts; analyzes and uses constant pressure charts, streamline charts, surface charts, satellite data, and sea condition charts in preparing environmental forecasts; constructs and verifies prognostic surface and constant pressure charts; prepares environmental warnings and advisories; assigns tasks to personnel assigned to weather service units; trains subordinates in correct operating and maintenance procedures for assigned equipment. *AGCS:* Able to perform the duties required for AGC; evaluates recent meteorological and oceanographic developments for integration into local routines; provides climatological, meteorological, and oceanographic data at planning-level meetings; organizes, schedules, and evaluates training programs; administers technical publications library; prepares directives and instructions for attaining organizational objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, assigning, and evaluating personnel. *AGCM:* Able to perform the duties required for AGCS; prepares statistical analyses of climatological data and provides information concerning its uses, capabilities, and limitations; reviews personnel, equipment, and material requirements and forecasts future requirements; establishes goals and set priorities; develops operating budgets and monitors expenditures.

Recommendation, AG3

In the lower-division baccalaureate/associate degree category, 2 semester hours in meteorology and 2 in meteorology laboratory (2/77).

Recommendation, AG2

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 2 in meteorology laboratory, and 1 in oceanography (2/77).

Recommendation, AG1

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 2 in climatology, and 1 in oceanography. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics (2/77).

Recommendation, AGC

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 2 in oceanography, and 1 in personnel supervision. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics (2/77).

Recommendation, AGCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 3 in oceanography, and 3 in personnel supervision. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics and 1 in measurements and data systems (2/77).

Recommendation, AGCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 3 in oceanography, 3 in personnel supervision, and 3 in principles of administration. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics, 2 in measurement and data systems, 3 in weather station management, and 3 in management problems (2/77).

AGCM

Exhibit Dates: 1/91–Present.

Occupational Field: 23 (Meteorology).

Career Pattern

AN: Airman (E-3). *AG3:* Aerographer's Mate, Third Class (E-4). *AG2:* Aerographer's Mate, Second Class (E-5). *AG1:* Aerographer's Mate, First Class (E-6). *AGC:* Chief Aerographer's Mate (E-7). *AGCS:* Senior Chief Aerographer's Mate (E-8). *AGCM:* Master Chief Aerographer's Mate (E-9).

Description

Summary: Observes, collects, records, and analyzes meteorological and oceanographic data; computers are used whenever applicable; makes visual and instrumental observations of weather and sea conditions; conducts briefings. *AG3:* Identifies the types and knows the purposes of instruments and equipment used by the Weather Service; operates equipment and performs routine checks and operator preventive maintenance on meteorological and oceanographic equipment and instruments; observes, collects, records, and prepares for transmission surface meteorological elements; plots synoptic surface charts using aviation observations, constant pressure charts, data from environmental warnings and advisories, and skew T, Log P diagrams; determines tracking data from meteorological satellite predict messages; applies grid to meteorological satellite pictures; operates radio receivers and facsimile and teletype equipment; uses publications and directives related to weather communications. *AG2:* Able to perform the duties required for AG3; checks surface observations for accuracy prior to transmission; applies meteorological fundamentals of primary, secondary, and tertiary circulations of the earth's atmosphere and of types of weather associated with air masses, frontal systems, and anticyclonic systems in drawing weather charts; identifies physical properties of sea water and major current systems and water masses of the ocean; constructs radiological fallout plot from upper wind data; draws synoptic surface charts showing frontal systems, isobars, isallobars, and pressure centers; draws constant-pressure charts showing isohypses, troughs, ridges and height centers; interprets oceanographic charts; computes astronomical and tidal data; maintains directives, publications, and climatological records; orders, inventories, and disposes of meteorological and oceanographic equipment, instruments, and supplies. *AG1:* Able to perform the duties required for AG2; prepares short-range (up to 24 hours) environmental forecasts; identifies and classifies weather echoes on radar; computes atmospheric refractive index; analyzes and uses skew T, Log P diagrams in preparing environmental forecasts; prepares and presents weather data for local and extended flights;

identifies charts and related products from digital computers; performs calibration and adjustments to meteorological and oceanographic equipment (excluding electronic components). *AGC:* Able to perform the duties required for AG1; interprets ocean thermal structure and factors affecting underwater transmission of sound, wind wave, swell generation, and propagation in preparing oceanographic forecasts; analyzes and uses constant pressure charts, streamline charts, surface charts, satellite data, and sea condition charts in preparing environmental forecasts; constructs and verifies prognostic surface and constant pressure charts; prepares environmental warnings and advisories; assigns tasks to personnel; trains subordinates in correct operating and maintenance procedures for assigned equipment. *AGCS:* Able to perform the duties required for AGC; evaluates recent meteorological and oceanographic developments for integration into local routines; provides climatological, meteorological, and oceanographic data at planning-level meetings; organizes, schedules, and evaluates training programs; administers technical publications library; prepares directives and instructions for attaining organizational objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, assigning, and evaluating personnel. *AGCM:* Able to perform the duties required for AGCS; prepares statistical analyses of climatological data and provides information concerning its uses, capabilities, and limitations; reviews personnel, equipment and material requirements and forecasts future requirements; establishes goals and sets priorities; develops operating budgets and monitors expenditures.

Recommendation, AG3

In the lower-division baccalaureate/associate degree category, 2 semester hours in meteorology, 2 in meteorology laboratory, and 3 in computer familiarization (3/91).

Recommendation, AG2

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 2 in meteorology laboratory, 1 in oceanography, 3 in computer familiarization, and 3 in computer applications (3/91).

Recommendation, AG1

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 1 in oceanography, 3 in computer familiarization, and 3 in computer applications. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics (3/91).

Recommendation, AGC

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 2 in oceanography, 1 in personnel supervision, 3 in computer familiarization, and 3 in computer applications. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics (3/91).

Recommendation, AGCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 3 in oceanography, 3 in personnel supervision, 3 in computer familiarization, and 3 in computer applications. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics and 1 in measurements and data systems (3/91).

Recommendation, AGCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology, 3 in atmospheric environment, 3 in meteorology laboratory, 3 in climatology, 3 in oceanography, 3 in personnel supervision, 3 in computer familiarization, and 3 in computer applications. In the upper-division baccalaureate category, 1 semester hour in atmospheric physics, 2 in measurement and data systems, 3 in weather station management, 3 in organizational management, and 3 in management problems (3/91).

NER-AK-001

AVIATION STOREKEEPER
AK3
AK2
AK1
AKC
AKCS
AKCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 16 (Logistics).

Career Pattern

AN: Airman (E-3). *AK3:* Aviation Storekeeper, Third Class (E-4). *AK2:* Aviation Storekeeper, Second Class (E-5). *AK1:* Aviation Storekeeper, First Class (E-6). *AKC:* Chief Aviation Storekeeper (E-7). *AKCS:* Senior Chief Aviation Storekeeper (E-8). *AKCM:* Master Chief Aviation Storekeeper (E-9).

Description

Summary: Receives, identifies, stores, and issues aviation supplies, spare parts, and equipment; maintains stock control records; conducts inventories. *AK3:* Applies automated data processing supply procedures; operates various office machines; receives, verifies for quantity and condition, and acknowledges the receipt of materials; issues materials; maintains receipt control records; prepares and submits requisition, purchase, and transportation documents; types (at 20 words per minute), routes, and files correspondence, messages, and forms; operates material-handling equipment and microfiche/microfilm reader equipment. *AK2:* Able to perform the duties required for AK3; drafts correspondence and messages; monitors day-to-day status of funds and prepares rough periodic financial reports; maintains equipage inventories and records; conducts inventories; carries out procedures for maintaining, expediting, and processing components awaiting parts; applies procedures for control and accounting of classified equipment; maintains files of publications. *AK1:* Able to perform the duties required for AK2; reviews computer output for accuracy of data content; ensures compliance with procedures for records disposal; establishes and maintains tickler files and a technical library; accounts for damaged, overage, and short shipments and deliveries; develops storage plans; prepares correspondence and messages. *AKC:* Able to perform the duties required for AK1; monitors shipboard uniform automated data processing system procedures applicable to supply department functions; plans the layout of offices, storerooms, and issue rooms to facilitate efficient operations; organizes and administers elements of aviation supply activities; prepares lists of material requirements; develops and implements inventory procedures. *AKCS:* Able to perform the duties required for AKC; prepares operating and safety instructions; applies procedures for the establishment, control, and supervision of supply operations; prepares local directives and instructions; reviews and evaluates personnel; organizes on-the-job training program. *AKCM:* Able to perform the duties required for AKCS; monitors conformity to safety and maintenance regulations; plans organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; supervises the administrative, control, material, and fiscal functions of an aviation supply department; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; evaluates supply procedures and personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AK3

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines and 1 in office procedures (2/77).

Recommendation, AK2

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in record keeping, and 1 in office procedures (2/77).

Recommendation, AK1

In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 2 in office machines, and 1 in office procedures (2/77).

Recommendation, AKC

In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 2 in office machines, 2 in office management, 1 in office procedures, and 1 in personnel supervision. In the upper-division baccalaureate category, credit for a practicum in management on the basis of institutional evaluation (2/77).

Recommendation, AKCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 3 in management electives, 2 in office machines, 2 in office management, 2 in personnel supervision, and 1 in office procedures. In the upper-division baccalaureate category, 3 semester hours for a practicum in management (2/77).

Recommendation, AKCM

In the vocational certificate category, 1 semester hour in office procedures and 2 in office management. In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 3 in management electives, 3 in personnel supervision, 3 in office management, 3 in office procedures, and 2 in office machines. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in management problems, and additional credit in personnel management and human relations on the basis of institutional evaluation (2/77).

NER-AK-002

Aviation Storekeeper

Exhibit Dates: 1/91–Present.

Occupational Field: 16 (Logistics).

Career Pattern

AN: Airman (E-3). *AK3:* Aviation Storekeeper, Third Class (E-4). *AK2:* Aviation Storekeeper, Second Class (E-5). *AK1:* Aviation Storekeeper, First Class (E-6). *AKC:* Chief Aviation Storekeeper (E-7). *AKCS:* Senior Chief Aviation Storekeeper (E-8). *AKCM:* Master Chief Aviation Storekeeper (E-9).

Description

Summary: Receives, identifies, stores, and issues aviation supplies, spare parts, and equipment; maintains stock control records; conducts inventories. *AK3:* Applies automated data processing supply procedures; operates various office machines; receives, verifies for quantity and condition, and acknowledges the receipt of materials; issues materials; maintains receipt control records; prepares and submits requisition, purchase, and transportation documents; types, routes, and files correspondence, messages, and forms; operates material-handling equipment and microfiche/microfilm reader equipment. *AK2:* Able to perform the duties required for AK3; drafts correspondence and messages; monitors day-to-day status of funds and prepares rough periodic financial reports; maintains equipage inventories and records; conducts inventories; carries out procedures for maintaining, expediting, and processing components awaiting parts; applies procedures for control and accounting of classified equipment; maintains files of publications. *AK1:* Able to perform the duties required for AK2; reviews computer output for accuracy of data content; ensures compliance with procedures for records disposal; establishes and maintains tickler files and a technical library; accounts for damaged, overage, and short shipments and deliveries; develops storage plans; prepares correspondence and messages. *AKC:* Able to perform the duties required for AK1; monitors shipboard uniform automated data processing system procedures applicable to supply department functions; plans the layout of offices, storerooms, and issue rooms to facilitate efficient operations; organizes and administers elements of aviation supply activities; prepares lists of material requirements; develops and implements inventory procedures. *AKCS:* Able to perform the duties required for AKC; prepares operating and safety instructions; applies procedures for the establishment, control, and supervision of supply operations; prepares local directives and instructions; reviews and evaluates personnel; organizes on-the-job training program. *AKCM:* Able to perform the duties required for AKCS; monitors conformity to safety and maintenance regulations; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; supervises the administrative, control, material, and fiscal functions of an aviation supply department; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; evaluates supply procedures and personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AK3

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in clerical procedures, 2 in records and information management, and 3 in supply management (5/92).

Recommendation, AK2

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in clerical procedures, 2 in records and information management, and 3 in supply management (5/92).

Recommendation, AK1

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in clerical procedures, 3 in records and information management, 3 in supply management, 2 in office administration, 2 in business communication, and 2 in personnel supervision (5/92).

Recommendation, AKC

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in clerical procedures, 3 in records and information management, 3 in supply management, 3 in office administration, 2 in business communication, and 3 in personnel supervision (5/92).

Recommendation, AKCS

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in clerical procedures, 3 in records and information management, 3 in supply management, 3 in office administration, 2 in business communication, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (5/92).

Recommendation, AKCM

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 1 in office procedures, 2 in clerical procedures, 3 in records and information management, 3 in supply management, 3 in office administration, 2 in business communication, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, 3 in operations management, and 3 in communication techniques for managers (5/92).

NER-AM-001

Aviation Structural Mechanic, Senior Chief
AMCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress from AMHC, Chief Aviation Structural Mechanic, Hydraulics (E-7); AMEC, Chief Aviation Structural Mechanic, Safety Equipment (E-7); or AMSC, Chief Aviation Structural Mechanic, Structures (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Manages, supervises, and administers airframe work centers of varying sizes; supervises aviation structural mechanics in the inspection, maintenance, and repair of aircraft, airframes, and hydraulic and pneumatic systems; plans safety program pertaining to airframes, related equipment, and assigned work areas; evaluates requirements and requests technical assistance from contractor representatives, as needed; prepares local directives and instructions; prepares correspondence; organizes, schedules, and evaluates training programs; monitors the overhaul and rework of airframes, structural components, and related systems; applies concepts, objectives, and functions of quality control; administers long-range, planned maintenance program; applies material control practices and supply management policies.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in safety management and 3 in principles of administration; add the 30 semester hours recommended for AMHC (Chief Aviation Structural Mechanic, Hydraulics) in exhibit NER-AMH-001, or AMEC (Chief Aviation Structural Mechanic, Safety Equipment) in exhibit NER-AME-001, or AMSC (Chief Aviation Structural Mechanic, Structural) in exhibit NER-AMS-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, 3 in quality control, and 3 in human relations (2/77).

NER-AM-002

Aviation Structural Mechanic, Senior Chief
AMCS

Exhibit Dates: 1/91–8/96.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress from AMHC, Chief Aviation Structural Mechanic, Hydraulics (E-7); AMEC, Chief Aviation Structural Mechanic, Safety Equipment (E-7); or AMSC, Chief Aviation Structural Mechanic, Structures (E-7). *AMCS:* Master Chief Aircraft Maintenanceman (E-9).

Description

Manages, supervises, and administers airframe work centers of varying sizes; supervises aviation structural mechanics in the inspection, maintenance, and repair of aircraft, airframes, and hydraulic and pneumatic systems; plans safety program pertaining to airframes, related equipment, and assigned work areas; evaluates requirements and requests technical assistance from contractor representatives, as needed; prepares local directives and instructions; prepares correspondence; organizes, schedules, and evaluates training programs; monitors the overhaul and rework of airframes, structural components, and related systems; applies concepts, objectives, and functions of quality control; administers long-range, planned maintenance program; applies material control practices and supply management policies.

Recommendation

In the lower-division baccalaureate/associate degree category, if individual progressed from AMEC, use the credit recommendation in exhibit NER-AME-001 or NER-AME-002; if progressed from AMHC, use the credit recommendation in exhibit NER-AMH-001 or NER-AMH-002; if progressed from AMSC, use the credit recommendation in exhibit NER-AMS-001 or NER-AMS-002. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (3/91).

NER-AM-003

Aviation Structural Mechanic, Senior Chief
AMCS

Exhibit Dates: 9/96–Present.

Occupational Field: 5 (Aviation Maintenance/ Weapons).

Career Pattern

May progress from AMHC, Chief Aviation Structural Mechanic, Hydraulics (E-7); AMEC, Chief Aviation Structural Mechanic, Safety Equipment (E-7); or AMSC, Chief Aviation Structural Mechanic, Structures (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Manages, supervises, and administers airframe work centers of varying sizes; supervises aviation structural mechanics in the inspection, maintenance, and repair of aircraft, airframes, hydraulic and pneumatic systems, ejection systems, safety belts and shoulder harnesses, gaseous and liquid oxygen systems, and related equipment; plans safety program pertaining to airframes, related equipment, and assigned work areas; evaluates requirements and requests technical assistance from contractor representatives, as needed; prepares local directives and instructions; prepares correspondence; organizes, schedules, and evaluates training programs; monitors the overhaul and rework of airframes, structural components, and related systems; applies concepts, objectives, and functions of quality control; administers long-range, planned maintenance programs; applies material control and supply management practices; exercises leadership and motivational techniques toward work center personnel; manages, supervises, coordinates, and leads the maintenance efforts of the airframe work centers, across the range of specializations in safety equipment (AME), hydraulics (AMH), and structures (AMS) for large maintenance organizations (150 or more persons).

Recommendation

In the lower-division baccalaureate/associate degree category, if individual progressed from AMEC, use the credit recommendations in exhibit NER-AME-003; if progressed from AMHC, use the credit recommendations in exhibit NER-AMH-003; if progressed from AMSC, use the credit recommendations in exhibit NER-AMS-003. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 in a management internship, and 3 in human resource management (10/96).

Aviation Structural Mechanic, Safety Equipment
AME3
AME2
AME1
AMEC

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/ Weapons).

Career Pattern

AN: Airman (E-3). AME3: Aviation Structural Mechanic, Safety Equipment, Third Class (E-4). AME2: Aviation Structural Mechanic, Safety Equipment, Second Class (E-5). AME1: Aviation Structural Mechanic, Safety Equipment, First Class (E-6). AMEC: Chief Aviation Structural Mechanic, Safety Equipment (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Maintains safety belts, shoulder harnesses and integrated flight harnesses, inertia reels, seat and canopy ejection systems, gaseous and liquid oxygen systems, life raft ejection systems, fire extinguishing systems (excluding fire detection systems), emergency egress systems, air conditioning, heating, and cockpit pressurization systems, and anti-G systems; replenishes liquid oxygen and gaseous systems; removes, inspects, installs, and rigs egress systems; performs daily preflight, postflight, and other periodic inspections. *AME3:* Applies operating principles of aircraft oxygen systems; services aircraft with liquid and gaseous oxygen, using oxygen transfer trailers or direct filling equipment; purges aircraft oxygen systems; removes and installs aircraft oxygen systems, cockpit canopies, canopy seals, safety belts, automatic lap belts, shoulder harnesses, and inertia reels; adjusts actuating controls and mechanisms; replaces defective indicators and controls; removes and installs temperature and pressure control units and components of cooling system equipment; replaces components of fixed fire extinguishing systems; bleeds air defrosting, anti-ice, and rain removal systems; uses schematic diagrams, drawings, and charts; uses and maintains hand tools; uses technical publications. *AME2:* Able to perform the duties required for AME3; assembles and installs equipment; performs periodic aircraft inspections; assists with inventory of equipment; orders parts, equipment, material, and tools; applies operating principles of air conditioning, pressurization, and utility systems; removes and installs ejection seats and components; adjusts ejection seat and canopy components; performs ground checks on oxygen systems; is a first-line supervisor of four to seven person work group. *AME1:* Able to perform the duties required for AME2; operates vapor cycle system and portable testers for cabin pressurization; troubleshoots and repairs malfunctioning equipment; trains subordinates on operation, maintenance, and repair of aircraft environmental system and egress system; orders and maintains shop files of technical publications, directives, and manuals; adjusts cockpit canopy mechanisms and linkages; tests cockpits and cabins for pressure tightness, leaks, proper pressure, and temperature control; inspects, tests, and adjusts firing mechanisms in ejection seats, lap belts, canopies, and other cartridge-actuated emergency escape systems; analyzes air conditioning, pressurization, and utility system malfunctions, isolates defective components, and determines corrective action; inspects installation and evaluates operation of repaired or newly installed parts and components; supervises inspections; prepares weekly schedules of preventive maintenance. *AMEC:* Able to perform the duties required for AME1; interprets technical publications and directives; plans, organizes, and lays out work centers; maintains work center registers and prepares local reports; monitors inspection procedures to ensure that technical specifications and standards of workmanship are met; prepares quarterly schedules of preventive maintenance; maintains work center inventory records; estimates spare parts, supplies, equipment, and manpower requirements.

Recommendation, AME3

In the lower-division baccalaureate/associate degree category, 10 semester hours in aircraft safety and warning systems and 3 in aviation maintenance technology (2/77).

Recommendation, AME2

In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft safety and warning systems, 4 in aviation maintenance technology, and 2 in personnel supervision (2/77).

Recommendation, AME1

In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft safety and warning systems, 6 in aviation maintenance technology, 3 in personnel supervision, and 2 in maintenance management (2/77).

Recommendation, AMEC

In the lower-division baccalaureate/associate degree category, 15 semester hours in aircraft safety and warning systems, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in shop management. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

In the lower-division baccalaureate/associate degree category, 8 semester hours in airframe structures repair, 4 in airframe structures, and 1 in personnel supervision (3/91).

Recommendation, AMS1

In the lower-division baccalaureate/associate degree category, 8 semester hours in airframe structures repair, 6 in airframe structures, 2 in personnel supervision, 2 in maintenance management, 2 in composite structure repair, and 2 in records and information management (3/91).

Recommendation, AMSC

In the lower-division baccalaureate/associate degree category, 8 semester hours in airframe structures repair, 6 in airframe structures, 3 in personnel supervision, 3 in maintenance management, 2 in composite structure repair, and 2 in records and information management. In the upper-division baccalaureate category, 2 semester hours in organizational management and 2 for field experience in management (3/91).

NER-AMS-003

AVIATION STRUCTURAL MECHANIC, STRUCTURES

AMS3
AMS2
AMS1
AMSC

Exhibit Dates: 9/96–Present.

Occupational Field: =.

Career Pattern

AN: Airman (E-3). AMS3: Aviation Structural Mechanic, Structures, Third Class (E-4). AMS2: Aviation Structural Mechanic, Structures, Second Class (E-5). AMS1: Aviation Structural Mechanic, Structures, First Class (E-6). AMSC: Chief Aviation Structural Mechanic, Structures (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AFCM:* Master Chief Aircraft Maintenanceman (E-9).

Description

Summary: Inspects and maintains aircraft fuselages, wings, fixed and movable surfaces, airfoils, empennages, seats (except ejection seats), wheels, tires, controls, and mechanisms; installs and rigs flight controls; fabricates and assembles metallic and non-metallic parts and makes minor repairs to aircraft skin; installs rivets and metal fasteners; welds; assembles and repairs wheels and tires; paints; performs dye penetrant inspections; performs daily preflight, postflight, and other periodic aircraft inspections. *AMS3:* Uses schematic diagrams, drawings, and charts; prepares layout patterns and templates for metal work; fabricates, fits, and tests rigid and flexible hose assemblies; uses technical publications; uses and maintains hand tools; performs hardness tests; detects and assists in correction and prevention of corrosion; prepares, primes, and paints aircraft surfaces; applies identification markings; builds up wheels and tires. *AMS2:* Able to perform the duties required for AMS3; assembles and installs equipment; repairs stressed and non-stressed skin; fabricates and/or repairs metallic and nonmetallic parts and internal structural members; performs periodic aircraft inspections; orders aircraft parts, equipment, materials, and tools; treats metals chemically after corrosion removal; removes and installs special rivets, metal fasteners, flight control surfaces, and detachable fuselage section of aircraft; replaces panels in windshields, canopies, plastic enclosures, and windows; repairs minor surface damage to transparent plastics and breaks, cracks, and punctures in reinforced plastics; repairs leaks in integral fuel tanks; uses computer systems for record keeping, reports, and inventories; supervise a three to seven person work group. *AMS1:* Able to perform the duties required for AMS2; troubleshoots and corrects materials failures; removes and installs wing panels and stabilizers; corrects balancing of flight control surfaces; performs alignment checks of airframes and landing gear; analyzes the extent of corrosion damage; determines repair procedures for aircraft structural damage; supervises aircraft inspections and repairs; supervises and evaluates hardness tests and dye penetrant inspections on metals; inspects installation and evaluates operation of repaired or newly installed parts and components; orders and maintains shop files of technical publications, directives, and manuals; trains personnel on aircraft structural systems; uses, operates, and supervises the use of computer systems; supervises medium-sized (20-30 persons) work center. *AMSC:* Able to perform the duties required for AMS1; plans, organizes, and lays out work centers; schedules and assigns work loads; maintains work center registers, and inventory records; prepares local reports; uses and supervises the use of computer hardware and software; interprets technical publications, directives, and manuals; analyzes reports of discrepancies and malfunctions and determines corrective action; monitors inspection procedures to ensure that technical specifications and standards of workmanship are met; prepares long- and short-range schedules of preventive maintenance; estimates aircraft spare parts, supplies, equipment, and manpower requirements; implements a program for detecting, treating, and preventing corrosion of aircraft; may supervise of a large (30-150 persons) shop or maintenance department.

Recommendation, AMS3

In the lower-division baccalaureate/associate degree category, 4 semester hours in airframe structures repair and 2 in airframe structures (10/96).

Recommendation, AMS2

In the lower-division baccalaureate/associate degree category, 6 semester hours in airframe structures repair, 4 in airframe structures, 1 in composite structure repair, and 1 in personnel supervision (10/96).

Recommendation, AMS1

In the lower-division baccalaureate/associate degree category, 6 semester hours in airframe structures repair, 6 in airframe structures, 2 in personnel supervision, 2 in maintenance management, 2 in composite structure repair, and 2 in automated records and information management (10/96).

Recommendation, AMSC

In the lower-division baccalaureate/associate degree category, 6 semester hours in airframe structures repair, 6 in airframe structures, 3 in personnel supervision, 3 in maintenance management and planning, 2 in composite structure repair, and 2 in automated records and information management. In the upper-division baccalaureate category, 2 semester hours in organizational management, 2 in instructional development and teaching, and 2 for a management internship (10/96).

NER-AN-002

AIRMAN
AN

Exhibit Dates: 1/90–Present.

Career Pattern

Airman is a general rate (Naval apprenticeship) for persons at pay grade E-1 (recruit), E-2 (Airman apprentice), and E-3 (Airman). At pay grade E-4 (petty officer third class), the person may enter any one of the following ratings: Aircrew Survival Equipmentman (PR), Aviation Antisubmarine Warfare Technician (AX), Aviation Electrician's Mate (AE), Aviation Electronics Technician (AT), Aviation Fire Control Technician (AQ), Aviation Machinist's Mate (AD), Aviation Maintenance Administrationman (AZ), Aviation Ordnanceman (AO), Aviation Structural Mechanic (AM), Aviation Equipment Technician (AS), Air Traffic Controller (AC), Tradevman (TD); Aviation Storekeeper (AK), Photographer's Mate (PH), Aerographer's Mate (AG), or Aviation Antisubmarine Warfare Operator (AW).

Description

Assists in the maintenance of aircraft, associated aeronautical equipment, and aircraft support equipment; services, cleans, and handles aircraft; performs other apprentice-level duties involved in the operation of a naval aircraft afloat and ashore.

Recommendation

In the vocational certificate category, 2 semester hours in fundamentals of aircraft service/maintenance. NOTE: Credit for airman (AN) should be granted only after pay grade E-3 has been achieved (3/91).

NER-AO-002

AVIATION ORDNANCEMAN
AO3
AO2
AO1
AOC
AOCS
AOCM

Exhibit Dates: 1/90–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AO3:* Aviation Ordnanceman, Third Class (E-4). *AO2:* Aviation Ordnanceman, Second Class (E-5). *AO1:* Aviation Ordnanceman, First Class (E-6). *AOC:* Chief Aviation Ordnanceman (E-7). *AOCS:* Senior Chief Aviation Ordnanceman (E-8). *AOCM:* Master Chief Aviation Ordnanceman (E-9).

Description

Summary: Maintains, inspects, and repairs aircraft armament equipment and aviation ordnance (weapons) equipment, including aircraft guns, gun accessories, noncomputing gun sights, aerial towed target equipment, small arms, ammunition, handling equipment, ammunition suspension, release launching, and arming equipment; stores and loads aviation ammunition, nuclear weapons, aerial mines, torpedoes, air-launched guided missiles; operates small-arm ranges; supervises the operation of aviation ordnance shops and storage facilities. *AO3:* Prepares gun ammunition for loading; assembles and disassembles aircraft ordnance weapons; performs weapons maintenance; uses schematics, diagrams, and charts to trace systems; performs routine inspection of ordnance equipment; completes periodic maintenance data forms; performs electromechanical maintenance on air armament units; issues standards for safety in ordnance maintenance; operates ground support equipment; detects, removes, and controls corrosion on aircraft armament and aviation ordnance handling equipment; maintains tool inventory; orders supplies and equipment. *AO2:* Able to perform the duties required for AO3; serves as arming/dearming crew leader; supervises and coordinates crew loading of munitions aboard aircraft; maintains shop files, logs, and records; orders technical publications and manuals; performs periodic aircraft preloading inspections. *AO1:* Able to perform the duties required for AO2; supervises the preparation of fuel, air, and gel weapons; analyzes test equipment defects; conducts on-the-job training; performs quality checks ad inspections on loaded aircraft; supervises and directs aircraft inspections; troubleshoots release and arming systems; prepares planned maintenance schedules. *AOC:* Able to perform the duties required for AO1; supervises and coordinates receipt, stowage, movement, preparation, and loading of munitions by squadron crews; interprets technical publications and instructions on the handling of aviation ordnance equipment and munitions; prepares correspondence and reports; plans, organizes, and supervises aviation ordnance shops, storage facilities, and handling areas; supervises the training of special weapons loading teams; analyzes reports and prepares schedules of preventive maintenance; accounts for inventory; evaluates assigned personnel; assists in aircraft accident investigation. *AOCS:* Able to perform the duties required for AOC; supervises and coordinates all the munitions-loading crews of an airwing (several squadrons); prepares local directives and instructions; prepares correspondence; interviews, evaluates, and assigns personnel; organizes and schedules training programs and evaluates their effectiveness; administers long-range planned maintenance program; monitors quality control program; makes recommendations on utilization, capabilities, reliability, and operations for airwing ordnance units. *AOCM:* Able to perform the duties required for AOCS; evaluates aviation ordnance equipment safety requirements and initiates recommendations for improvements; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; initiates action to satisfy requirements; establishes goals and priorities; reviews and evaluates space, personnel, equipment, and material requirements; provides technical information and advice on the capabilities, limitations, reliability, and use of aviation ordnance, aircraft armament, and related equipment; evaluates the effectiveness of special weapons team training; evaluates new armament equipment and aviation ordnance materials; implements procedures for emergency storage facilities; develops operating budgets and monitors expenditures.

Recommendation, AO3

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, and 1 in basic electricity (6/87).

Recommendation, AO2

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, and 2 in industrial safety (6/87).

Recommendation, AO1

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (6/87).

Recommendation, AOC

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management and 1 in shop management (6/87).

Recommendation, AOCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (6/87).

Recommendation, AOCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in weaponry maintenance, 1 in industrial corrosion control, 1 in basic electricity, 1 in basic electricity troubleshooting, 2 in industrial safety, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, 3 in industrial management and problem solving, and 2 for field experience in management (6/87).

NER-AQ-002

AVIATION FIRE CONTROL TECHNICIAN

AQ3
AQ2
AQ1
AQC
AQCS

Exhibit Dates: 1/90–12/90. Effective 1/91, the AQ rating was discontinued and its duties were incorporated into the Aviation Electronics Technician rating (NER-AT-003).

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AQ3:* Aviation Fire Control Technician, Third Class (E-4). *AQ2:* Aviation Fire Control Technician, Second Class (E-5). *AQ1:* Aviation Fire Control Technician, First Class (E-6). *AQC:* Chief Aviation Fire Control Technician (E-7). *AQCS:* Senior Chief Aviation Fire Control Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs aircraft weapons control systems, including weapons control radar, computers, Doppler computing sights, gyroscopes and related equipment, and air-launched guided missile equipment. Duty assignments are designated as either O-Level (troubleshooting and replacing modular systems on aircraft) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AQ rating receive equivalent training and must pass the same advancement examination, regardless of whether duty assignments have been O-Level, I-Level, or both. *AQ3:* Troubleshoots and repairs electrical and electronic weapons control systems (such as radar, infrared, optical, laser, and television systems; analog and digital computers; and gyro stabilizing systems and sensing elements) and related accessories and equipment; follows standard checkout procedures to locate and repair system malfunctions; reads schematics and block diagrams; uses volt-ohm-milliammeter; applies a working knowledge of hydraulic systems; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AQ2:* Able to perform the duties required for AQ3; performs troubleshooting and repair tasks not covered in standard service manuals; knows how to use oscilloscope, signal generators, and meggers; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising from two to three persons on a job; maintains technical library; interprets technical directives. *AQ1:* Able to perform the duties required for AQ2; serves as shift supervisor, supervising from eight to nine persons; diagnoses nonroutine malfunctions and demonstrates repair techniques; conducts on-the-job training programs; inspects and approves completed work assignments; prepares weekly schedules of preventive maintenance. *AQC:* Able to perform the duties required for AQ1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; prepares maintenance duty schedules; prepares periodic or recurring reports; prepares quarterly schedules of preventive maintenance; supervises quality control programs; provides technical assistance in aircraft accident investigations. *AQCS:* Able to perform the duties required for AQC; oversees three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AQ3

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, and 3 in basic mathematics (10/87).

Recommendation, AQ2

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, and 3 in instrumentation/measurement (10/87).

Recommendation, AQ1

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (10/87).

Recommendation, AQC

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management and 1 in shop management (10/87).

Recommendation, AQCS

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (10/87).

NER-AS-003

AVIATION SUPPORT EQUIPMENT TECHNICIAN

AS3
AS2
AS1
ASC
ASCS
ASCM

Exhibit Dates: 1/90–Present.

Occupational Field: 6 (Aviation Ground Support).

Career Pattern

AN: Airman (E-3). *AS3:* Aviation Support Equipment Technician, Third Class (E-4). *AS2:* Aviation Support Equipment Technician, Second Class (E-5). *AS1:* Aviation Support Equipment Technician, First Class (E-6). *ASC:* Chief Aviation Support Equipment Technician (E-7). *ASCS:* Senior Chief Aviation Support Equipment Technician (E-8). *ASCM:* Master Chief Aviation Support Equipment Technician (E-9).

Description

Summary: Performs preventive and corrective maintenance on aviation ground support equipment, mobile fire fighting units, material handling and moving units; inspects and repairs gasoline, diesel and turbine ground power units; services transmissions, hydraulic and pneumatic systems, cryogenic and air conditioning equipment; performs troubleshooting and repair of electrical control and motors; replaces electrical generating components; adjusts mechanical and electrical regulators; provides training and work schedules; manages distribution and maintenance schedules for ground support equipment at different command levels. *AS3:* Uses electrical and mechanical test equipment to aid in the diagnosis and repair of aviation ground support equipment that utilizes various electrical and mechanical drive and control systems; tests and installs electrical and mechanical components; completes maintenance logs and applicable records. *AS2:* Able to perform the duties required for AS3; conducts training; provides coordination between the repair teams; assists in the inspection and repair of the more advanced drive or control units; generates and correlates repair logs. *AS1:* Able to perform the duties required for AS2; analyzes and diagnoses malfunctions of the hydraulics, pneumatic, electrical power generating, chassis and chassis electrical systems and internal combustion engines and air conditioning and gas turbine compressors; determines corrective action; maintains shop files and technical publications; plans shop work schedule; supervises subordinates; performs quality control inspections; prepares schedules of preventive maintenance;

requisitions and is responsible for materials and equipment. *ASC:* Able to perform the duties required for AS1; supervises training of personnel who operate, maintain, and repair aviation support equipment; coordinates administration, planning, and work load scheduling; organizes facilities for repair and maintenance of equipment and components; is responsible for ordering, storing, and inventory of materials and supplies for organizational unit. *ASCS:* Able to perform the duties required for ASC; is responsible for the administrative function of the organizational unit; organizes, schedules, and evaluates training; reviews, evaluates, and recommends improvements to maintenance procedures; administers long-range maintenance program. *ASCM:* Able to perform the duties required for ASCS; responsible for the administration of assigned organizational unit, including planning, organizing, and implementing activities in compliance with policy statements; reviews personnel, equipment, and material requirements; establishes objectives and sets priorities in area of responsibility; evaluates and monitors maintenance planning and quality control programs; develops operating budget and monitors expenditures; assists in formulating and implementing safety program; provides technical information and assistance to subordinates; prepares maintenance evaluation and staff studies.

Recommendation, AS3

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic shop practices, 2 in basic electricity, 1 in diesel engines, and 1 in basic hydraulics (3/91).

Recommendation, AS2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic shop practices, 3 in basic electricity, 2 in diesel engines, 2 in basic hydraulics, 1 in electric generators, 1 in electric control systems, and 1 in personnel supervision (3/91).

Recommendation, AS1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic shop practices, 3 in basic electricity, 2 in diesel engines, 2 in basic hydraulics, 2 in electric generators, 2 in electric control systems, 1 in shop management, 2 in records and information management, 2 in personnel supervision, and 2 in maintenance management (3/91).

Recommendation, ASC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic shop practices, 3 in basic electricity, 2 in diesel engines, 2 in basic hydraulics, 2 in electric generators, 2 in electric control systems, 2 in shop management, 2 in records and information management, 3 in personnel supervision, and 3 in maintenance management (3/91).

Recommendation, ASCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic shop practices, 3 in basic electricity, 2 in diesel engines, 2 in basic hydraulics, 2 in electric generators, 2 in electric control systems, 3 in shop management, 3 in records and information management, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, and 3 in organizational management (3/91).

Recommendation, ASCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic shop practices, 3 in basic electricity, 2 in diesel engines, 2 in basic hydraulics, 2 in electric generators, 2 in electric control systems, 3 in shop management, 3 in records and information management, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in organizational management, and 3 in communication techniques for managers (3/91).

NER-AT-002

Aviation Electronics Technician
AT3
AT2
AT1
ATC
ATCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AT3:* Aviation Electronics Technician, Third Class (E-4). *AT2:* Aviation Electronics Technician, Second Class (E-5). *AT1:* Aviation Electronics Technician, First Class (E-6). *ATC:* Chief Aviation Electronics Technician (E-7). *ATCS:* Senior Chief Aviation Electronics Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs electronic communications systems and inflight navigation and detection systems on aircraft. Duty assignments are designated as either O-Level (troubleshooting and replacing module systems on aircraft) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AT rating receive equivalent training and must pass the same advancement examinations, regardless of whether duty assignments have been O-Level, I-Level, or both. *AT3:* Troubleshoots and repairs radar systems, radar and tactical displays, IFF/SIF equipment, radar altimeters, Doppler navigation equipment, radio navigation equipment, analog computing devices, communications systems, CIC and electronics countermeasures equipment, infrared devices, recorder systems, and aircraft digital data systems; follows standard checkout procedures to locate and repair malfunctions; reads schematics and block diagrams; uses volt-ohm-milliammeter, frequency counters, and specialized system test equipment; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AT2:* Able to perform the duties required for AT3; performs troubleshooting and repair tasks not covered in standard service manuals; knows how to use oscilloscope, signal generator, and megger; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising from two to three persons on a job; maintains technical library and inventory records; inspects, tests, and maintains aircraft transmission lines and antennas. *AT1:* Able to perform the duties required for AT2; serves as shift supervisor, supervising from eight to nine persons; diagnoses nonroutine malfunctions and demonstrates repair techniques; inspects and approves completed work assignments including the installation of new parts and components; conducts on-the-job training program and maintains training records; prepares weekly schedules of preventive maintenance. *ATC:* Able to perform the duties required for AT1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; prepares maintenance duty schedules; prepares periodic or recurring reports; prepares quarterly schedules of preventive maintenance; supervises quality control programs; provides technical assistance in aircraft accident investigations. *ATCS:* Able to perform the duties required for ATC; oversees three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AT3

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, and 3 in basic mathematics (6/87).

Recommendation, AT2

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, and 3 in instrumentation/measurement (6/87).

Recommendation, AT1

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (6/87).

Recommendation, ATC

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management and 1 in shop management (6/87).

Recommendation, ATCS

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (6/87).

Recommendation, ATC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 3 in computer systems and organization, 3 in communications (electronics), 3 in electronic systems troubleshooting and maintenance, 3 in personnel supervision, 3 in maintenance management, and 3 in records and information management (5/92).

Recommendation, ATCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 3 in computer systems and organization, 3 in communications (electronics), 3 in electronic systems troubleshooting and maintenance, 3 in personnel supervision, 3 in maintenance management, and 3 in records and information management. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (5/92).

NER-AV-001

Avionics Technician, Master Chief
AVCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress to AVCM, Master Chief Avionics Technician (E-9), from AXCS, Senior Chief Aviation Antisubmarine Warfare Technician (E-8); AECS, Senior Chief Aviation Electrician's Mate (E-8); ATCS, Senior Chief Aviation Electronics Technician (E-8); or AQCS, Senior Chief Aviation Fire Control Technician (E-8).

Description

Able to perform the duties required for AXCS (Senior Chief Aviation Antisubmarine Warfare Technician), AECS (Senior Chief Aviation Electrician's Mate), ATCS (Senior Chief Aviation Electronics Technician), or AQCS (Senior Chief Aviation Fire Control Technician); plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; prepares maintenance plans and staff studies for management review; exercises techniques of aircraft maintenance and personnel management; develops and implements preventive maintenance, corrosion control, and quality assurance programs; develops operating budget and monitors expenditures.

Recommendation

In the vocational certificate category, use the recommendation for AE1 (Aviation Electrician's Mate First Class) in exhibit NER-AE-001 (in the 1954-1989 Guide), or NER-AE-002, AT2 (Aviation Electronics Technician Second Class) in exhibit NER-AT-001 (in the 1954-1989 Guide), or NER-AT-002, or AQ2 (Aviation Fire Control Technician Second Class) in exhibit NER-AQ-001 (in the 1954-1989 Guide), or NER-AQ-002, or AX1 (Aviation Antisubmarine Warfare Technician, First Class) in exhibit NER-AX-001 (in the 1954-1989 Guide) or NER-AX-002, as appropriate. In the lower-division baccalaureate/associate degree category, add 1 semester hour in technical writing to the recommendation for AECS (Senior Chief Aviation Electrician's Mate) in exhibit NER-AE-001 (in the 1954-1989 Guide) or NER-AE-002, or ATCS (Senior Chief Aviation Electronics Technician) in exhibit NER-AT-001 (in the 1954-1989 Guide) or NER-AT-002, or AQCS (Senior Chief Aviation Fire Control Technician) in exhibit NER-AQ-001 (in the 1954-1989 Guide) or NER-AQ-002, or AXC (Chief Aviation Antisubmarine Warfare Technician) in exhibit NER-AX-001 (in the 1954-1989 Guide) or NER-AX-002, as appropriate. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in management problems, 3 in human relations, and additional credit in quality control on the basis of institutional evaluation (2/77).

NER-AV-002

Avionics Technician, Master Chief
AVCM

Exhibit Dates: 1/91–Present.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

May progress to AVCM, Master Chief Avionics Technician (E-9), from AECS, Senior Chief Aviation Electrician's Mate (E-8) or ATCS, Senior Chief Aviation Electronics Technician (E-8).

Description

Able to perform the duties required for AECS (Senior Chief Aviation Electrician's Mate) or ATCS (Senior Chief Aviation Electronics Technician); plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; prepares maintenance plans and staff studies for management review; exercises techniques for aircraft maintenance and personnel management; develops and implements preventive maintenance, corrosion control, and quality assurance programs; develops operating budget and monitors expenditures.

Recommendation

In the lower-division baccalaureate/associate degree category, use the credit recommended for either AECS (Senior Chief Aviation Electrician's Mate) in exhibits NER-AE-001 (in the 1954-1989 Guide) or NER-AE-002, or for ATCS (Senior Chief Aviation Electronic's Technician) in exhibits NER-AT-001 (in the 1954-1989 Guide) or NER-AT-002. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in operations management, 3 in management problems, and 3 in communication techniques for managers (5/92).

Aviation Antisubmarine Warfare Operator
(Acoustic)
AW3
AW2
AW1
AWC
AWCS
AWCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AW3:* Aviation Antisubmarine Warfare Technician, Third Class (E-4). *AW2:* Aviation Antisubmarine Warfare Technician, Second Class (E-5). *AW1:* Aviation Antisubmarine Warfare Technician, First Class (E-6). *AWC:* Chief Aviation Antisubmarine Warfare Technician (E-7). *AWCS:* Senior Chief Aviation Antisubmarine Warfare Technician (E-8). *AWCM:* Master Chief Aviation Antisubmarine Warfare Technician (E-9).

Description

Summary: Performs general flight crew duties; operates antisubmarine warfare equipment. *AW3:* Operates various acoustic sensors in order to discover and track submarines; identifies and classifies targets; identifies sounds produced by surface ships, submarines, marine life, and other natural phenomena; determines acoustic energy propagation characteristics under various oceanographic conditions. *AW2:* Able to perform the duties required for AW3; identifies submarine evasion tactics; classifies targets in more detail than an AW3 and has a fuller understanding of the effects of the ocean environment on antisubmarine warfare data. *AW1:* Able to perform the duties required for AW2; may serve as an instructor; performs reconstruction of antisubmarine tactical exercises; navigates using airborne radar; has knowledge of nonacoustic antisubmarine warfare; analyzes multitarget situations; supervises and instructs personnel in use of equipment. *AWC:* Able to perform the duties required for AW1; conducts airborne exercises which include the use of both acoustic and nonacoustic equipment; assists in establishing tactical procedures. *AWCS:* Able to perform the duties required for AWC; analyzes and evaluates operational efficiency for each aircrew; determines adequate areas of operation and training; performs the duties of squadron operations department manager; supervises an antisubmarine warfare division; prepares correspondence; organizes and schedules training programs. *AWCM:* Able to perform the duties required for AWCS; performs as antisubmarine warfare training coordinator; plans, organizes, implements, and controls activities in compliance with policy statements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AW3

In the lower-division baccalaureate/associate degree category, 3 semester hours in survey of oceanography (8/79).

Recommendation, AW2

In the lower-division baccalaureate/associate degree category, 4 semester hours in survey of oceanography. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AW1

In the lower-division baccalaureate/associate degree category, 5 semester hours in survey of oceanography, 2 in survey of meteorology, and 3 in personnel supervision. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWC

In the lower-division baccalaureate/associate degree category, 5 semester hours in oceanography, 3 in meteorology, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCS

In the lower-division baccalaureate/associate degree category, 5 semester hours in oceanography, 3 in meteorology, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 for management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

Recommendation, AWCM

In the lower-division baccalaureate/associate degree category, 5 semester hours in oceanography, 3 in meteorology, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems; if served as an instructor, 3 semester hours for a practicum in teaching (8/79).

AN: Airman (E-3). *AW3:* Aviation Warfare Systems Operator, Third Class (E-4). *AW2:* Aviation Warfare Systems Operator, Second Class (E-5). *AW1:* Aviation Warfare Systems Operator, First Class (E-6). *AWC:* Chief Aviation Warfare Systems Operator (E-7). *AWCS:* Senior Chief Aviation Warfare Systems Operator (E-8). *AWCM:* Master Chief Aviation Warfare Systems Operator (E-9).

Description

Summary: Performs general flight crew duties; operates aviation warfare systems equipment; performs flight-related diagnostic functions using manual and computer routines;

analyzes and classifies aviation warfare systems data; assists in aircrew briefing and debriefing; provides tactical information relating to military objectives. *AW3:* Operates equipment to detect submarine by electromagnetic or infrared means; operates airborne radar to detect, identify, and interpret targets and to avoid hazardous weather; advises pilot of expected weather conditions; maintains and uses logs and publications; performs operational checks on airborne nonacoustic systems; maintains crew flight time log books; navigates with radar. *AW2:* Able to perform the duties required for AW3; identifies submarine evasion tactics; interprets effects of deception devices; maintains aviation warfare systems operator training records. *AW1:* Able to perform the duties required for AW2; performs reconstruction of airborne aviation warfare systems exercises; supervises and instructs personnel in use of equipment. *AWC:* Able to perform the duties required for AW1; conducts airborne exercises which include the use of both acoustic and nonacoustic equipment; assists in establishing tactical procedures; conducts and supervises safety and inspection programs. *AWCS:* Able to perform the duties required for AWC; analyzes and evaluates operational efficiency for each aircrew; determines adequate areas of operation and training; performs the duties of squadron operations department manager; supervises an aviation warfare systems division; prepares correspondence; organizes and schedules training programs. *AWCM:* Able to perform the duties required for AWCS; serves as aviation warfare systems training coordinator; plans, organizes, implements, and controls activities in compliance with policy statements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AW3

In the lower-division baccalaureate/associate degree category, 2 semester hours in meteorology concepts, 1 in oceanographic concepts, 1 in basic electronics, 1 in physical conditioning, 1 in emergency rescue techniques (including medical), and 1 in computer applications (2/98).

Recommendation, AW2

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology concepts, 2 in oceanographic concepts, 1 in basic electronics, 1 in physical conditioning, 1 in emergency rescue techniques (including medical), and 1 in computer applications (2/98).

Recommendation, AW1

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology concepts, 3 in oceanographic concepts, 1 in basic electronics, 1 in physical conditioning, 1 in emergency rescue techniques (including medical), 1 in computer applications, and 3 in personnel supervision (2/98).

Recommendation, AWC

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology concepts, 4 in oceanographic concepts, 1 in basic electronics, 1 in physical conditioning, 1 in emergency rescue techniques (including medical), 1 in computer applications, 3 in personnel supervision, and 3 in resource management (2/98).

Recommendation, AWCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology concepts, 4 in oceanographic concepts, 1 in basic electronics, 1 in physical conditioning, 1 in emergency rescue techniques (including medical), 1 in computer applications, 3 in personnel supervision, and 3 in resource management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in human resource resource management, and 3 in management problems (2/98).

Recommendation, AWCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in meteorology concepts, 4 in oceanographic concepts, 1 in basic electronics, 1 in physical conditioning, 1 in emergency rescue techniques (including medical), 1 in computer applications, 3 in personnel supervision, and 3 in resource management. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in human resource management, and 3 in management problems (2/98).

Exhibit Dates: 12/93–Present.

Occupational Field: 24 (Aviation Sensor Operations).

Career Pattern

AN: Airman (E-3). *AW3:* Aviation Warfare Systems Operator, Third Class (E-4). *AW2:* Aviation Warfare Systems Operator, Second Class (E-5). *AW1:* Aviation Warfare Systems Operator, First Class (E-6). *AWC:* Chief Aviation Warfare Systems Operator (E-7). *AWCS:* Senior Chief Aviation Warfare Systems Operator (E-8). *AWCM:* Master Chief Aviation Warfare Systems Operator (E-9).

Description

Summary: Performs general flight duties; operates aviation warfare (AW) systems equipment; performs flight-related diagnostic functions using manual and computer routines; analyzes and classifies AW data; assists in aircrew briefing and debriefing; provides practical information relating to military objectives. *AW3:* Uses both acoustic and nonacoustic devices to detect and track submarines; serves as crewmember on a helicopter; uses airborne radar to detect, identify, and intercept targets and avoid hazardous weather; uses airborne sonar to detect, classify, and track; identifies sounds produced by surface ships, submarines, evasion devices, and marine life and other natural phenomena; analyzes environmental data and implements tactical procedures; fixes targets acoustically; navigates with radar; analyzes acoustic signatures; relates capabilities to environmental conditions; applies electronic support measures contacts; performs operational checks on airborne acoustic and nonacoustic systems; functions as a member of search and rescue team; provides emergency medical assistance. *AW2:* Operates equipment and interprets results; identifies submarine evasion tactics; interprets effects of deception devices; instructs personnel in aircrew duties and in tactical use of airborne AW equipment; provide training for subordinates maintains operator training records. *AW1:* Performs reconstruction of helicopter tactical exercises; performs analyses in multitarget situations; supervises and instructs personnel in use of equipment; prepares flight schedules; instructs personnel in use of antisubmarine warfare (ASW) tactical and intelligence publications; briefs personnel on search and rescue procedures. *AWC:* Conducts airborne exercises which include the use of both acoustic and nonacoustic equipment; assists in establishing tactical procedures. *AWCS:* Analyzes and evaluates operational efficiency for each aircrew; determines adequate areas of operation and training; performs the duties of squadron operations department manager; supervises an aviation warfare systems division; prepares correspondence; organizes and schedules training programs; evaluates all flight-related operational check requirements for ASW equipment. *AWCM:* Performs as aviation warfare systems training coordinator; plans, organizes, implements, and controls activities in compliance with policy statements; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, AW3

In the lower-division baccalaureate/associate degree category, 3 semester hours in emergency rescue techniques (including medical), 2 in meteorology concepts, 2 in oceanography concepts, 1 in basic electronics, 2 in physical conditioning, 1 in first aid, and 1 in computer applications (2/98).

Recommendation, AW2

In the lower-division baccalaureate/associate degree category, 4 semester hours in emergency rescue techniques (including medical), 2 in meteorology concepts, 3 in oceanography concepts, 1 in basic electronics, 2 in physical conditioning, 1 in first aid, and 1 in computer applications (2/98).

Recommendation, AW1

In the lower-division baccalaureate/associate degree category, 5 semester hours in emergency rescue techniques (including medical), 3 in meteorology concepts, 4 in oceanography concepts, 1 in basic electronics, 2 in physical conditioning, 1 in first aid, 1 in computer applications, and 3 in personnel supervision (2/98).

Recommendation, AWC

In the lower-division baccalaureate/associate degree category, 5 semester hours in emergency rescue techniques (including medical), 3 in meteorology concepts, 4 in oceanography concepts, 1 in basic electronics, 2 in physical conditioning, 1 in first aid, 1 in computer applications, 3 in personnel supervision, and 3 in resource management (2/98).

Recommendation, AWCS

In the lower-division baccalaureate/associate degree category, 5 semester hours in emergency rescue techniques (including medical), 3 in meteorology concepts, 4 in oceanography concepts, 1 in basic electronics, 2 in physical conditioning, 1 in first aid, 1 in computer applications, 3 in personnel supervision, and 3 in resource management. In the upper-division baccalaureate category, 3 for field experience in management, 3 in human resource management, and 3 in management problems (2/98).

Recommendation, AWCM

In the lower-division baccalaureate/associate degree category, 5 semester hours in emergency rescue techniques (including medical), 3 in meteorology concepts, 4 in oceanography concepts, 1 in basic electronics, 2 in physical conditioning, 1 in first aid, 1 in computer applications, 3 in personnel supervision, and 3 in resource management. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in human resource management, and 3 in management problems (2/98).

NER-AX-002

Aviation Antisubmarine Warfare Technician

AX3
AX2
AX1
AXC
AXCS

Exhibit Dates: 1/90–12/90. Effective 1/91, the AX rating was discontinued and its duties were incorporated into the Aviation Electronics Technician rating (see NER-AT-003).

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3). *AX3:* Aviation Antisubmarine Warfare Technician, Third Class (E-4). *AX2:* Aviation Antisubmarine Warfare Technician, Second Class (E-5). *AX1:* Aviation Antisubmarine Warfare Technician, First Class (E-6). *AXC:* Chief Aviation Antisubmarine Warfare Technician (E-7). *AXCS:* Senior Chief Aviation Antisubmarine Warfare Technician (E-8). *AVCM:* Master Chief Avionics Technician (E-9).

Description

Summary: Maintains and repairs aviation antisubmarine warfare sensor equipment and associated integrated systems, including those relating to magnetic anomaly detection, underwater detection, acoustic analysis, electronic support measures, computer/data processing, electro-optics, data display, data link, and electromechanical recorders; operates and maintains associated test equipment. Duty assignments are designated either O-Level (troubleshooting and replacing modular systems) or I-Level (disassembling, repairing, and bench-testing modules); persons assigned the AX rating receive equivalent training and must pass the same advancement examinations regardless of whether duty assignments have been O-Level, I-Level, or both. *AX3:* Troubleshoots and repairs radar systems, radar and tactical displays, digital data systems, infrared devices, data link equipment, analog computing devices and acoustic magnetic tape recorder systems; follows standard checkout procedures to locate and repair malfunctions; reads schematics and block diagrams; uses volt-ohm-milliammeter, frequency counters, and specialized system test equipment; completes maintenance forms and inventories parts and supplies; performs avionics corrosion control. *AX2:* Able to perform the duties required for AX3; performs troubleshooting and repair tasks not covered in standard service manuals; knows how to use oscilloscope, signal generator, and megger; may have attended short training programs in troubleshooting and repairing specialized equipment; serves as crew leader, supervising from two to three persons on a job; maintains technical library and inventory records; inspects, tests, and maintains aircraft transmissions, lines, and antennas; troubleshoots and repairs acoustic processing equipment, recorder systems, combat information center and electronic countermeasure equipment, electronics support measures equipment, and underwater detection equipment. *AX1:* Able to perform the duties required for AX2; serves as shift supervisor, supervising from eight to nine persons; diagnoses non-routine malfunctions and demonstrates repair techniques; inspects and approves completed work assignments including the installation of new parts and components; conducts on-the-job training programs and maintains training records; prepares weekly schedules of preventive maintenance. *AXC:* Able to perform the duties required for AX1; serves as shop supervisor, supervising 15-20 persons; plans and implements safety instruction and inspection programs; prepares maintenance duty schedules; prepares periodic or recurring reports; prepares quarterly schedules of preventive maintenance; supervises quality control programs; provides technical assistance in aircraft accident investigations. *AXCS:* Able to perform the duties required for AXC; oversees three shops; serves as liaison with other Navy units; administers quality control programs; prepares directives, instructions, and correspondence; advises on personnel, production, material, and training requirements; administers long-range planned maintenance program and training programs and evaluates their effectiveness; recommends changes in methods and techniques to promote safety and operational readiness.

Recommendation, AX3

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, and 3 in basic mathematics (10/87).

Recommendation, AX2

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, and 3 in instrumentation/measurement (10/87).

Recommendation, AX1

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management (10/87).

Recommendation, AXC

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 3 in technical report writing, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in industrial management and 1 in shop management (10/87).

Recommendation, AXCS

In the vocational certificate category, 3 semester hours in beginning electrical/electronic laboratory. In the lower-division baccalaureate/associate degree category, 3 semester hours in AC fundamentals, 3 in DC fundamentals, 3 in communications systems troubleshooting, 3 in basic mathematics, 3 in electrical circuitry, 3 in schematic reading, 3 in instrumentation/measurement, 3 in technical report writing, 3 in personnel supervision, and 3 in industrial maintenance planning. In the upper-division baccalaureate category, 2 semester hours in industrial management, 2 in shop management, 3 in management planning, and 1 for field experience in management (10/87).

AZCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 5 (Aviation Maintenance/Weapons).

Career Pattern

AN: Airman (E-3) *AZ3:* Aviation Maintenance Administrationman, Third Class (E-4). *AZ2:* Aviation Maintenance Administrationman, Second Class (E-5). *AZ1:* Aviation Maintenance Administrationman, First Class (E-6). *AZC:* Chief Aviation Maintenance Administrationman (E-7). *AZCS:* Senior Chief Aviation Maintenance Administrationman (E-8). *AZCM:* Master Chief Aviation Maintenance Administrationman (E-9).

Description

Summary: Performs or supervises clerical duties including typewriting, office machine operations, preparation of correspondence and reports, filing, and records administration for the Navy aviation maintenance program. *AZ3:* Types correspondence and reports (a straight-copy typing rate of at least 20 words per minute is required); uses duplicating or photocopy equipment; maintains files and a technical library. *AZ2:* Able to perform the duties required for AZ3; prepares, verifies, and maintains aircraft logs and records; prepares and processes work requests; determines the need for updating aeronautical technical libraries and distributes updates. *AZ1:* Able to perform the duties required for AZ2; supervises administrative procedures of the office; analyzes data; prepares data in narrative, tabular, chart, or graphic form. *AZC:* Able to perform the duties required for AZ1; schedules aircraft and equipment for maintenance; coordinates unscheduled maintenance actions; screens and interprets messages and instructions; analyzes reports; determines data requirements for aircraft maintenance activities. *AZCS:* Able to perform the duties required for AZC; determines personnel and material needs; prepares directives and instructions for improving operations; develops a program for interviewing, evaluating, and assigning personnel for maximum utilization; organizes, schedules, and evaluates training programs; develops objectives for preventive maintenance and quality assurance programs; coordinates the preparation and dissemination of safety instructions applicable to aviation maintenance; provides information and advice on utilization, capabilities, reliability, and operations. *AZCM:* Able to perform the duties required for AZCS; formulates guidelines for safety and assists in the analysis of aircraft accident reports; forecasts future requirements; plans and initiates action to satisfy requirements; establishes goals and priorities; reviews and evaluates space, personnel, equipment, and material requirements; recommends, prepares, and submits aviation maintenance staff studies; plans, organizes implements, and controls activities in compliance with policy statements, operation orders, and directives; plans and forecasts work load requirements; administers aircraft and component inventory, requisition, receipt, transfer, and survey; develops operating budgets and monitors expenditures.

Recommendation, AZ3

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 2 in clerical office procedures, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZ2

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZ1

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZC

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communication, 1 in personnel supervision, and additional credit in typewriting on the basis of institutional evaluation (2/77).

Recommendation, AZCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communication, 2 in personnel supervision, and additional credit in typewriting on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/77).

Recommendation, AZCM

In the lower-division baccalaureate/associate degree category, 2 semester hours in office machines, 2 in filing, 3 in clerical office procedures, 3 in record keeping, 3 in office management, 2 in business communication, 3 in personnel supervision, 3 in management electives, 3 in technical writing, and additional credit in typewriting on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in management problems, and additional credit in human relations and personnel management on the basis of institutional evaluation (2/77).

BOATSWAIN'S MATE

BM3
BM2
BM1
BMC
BMCS
BMCM

Exhibit Dates: 1/90–4/96.

Occupational Field: 1 (General Seamanship).

Career Pattern

SN: Seaman (E-3). *BM3:* Boatswain's Mate, Third Class (E-4). *BM2:* Boatswain's Mate, Second Class (E-5). *BM1:* Boatswain's Mate, First Class (E-6). *BMC:* Chief Boatswain's Mate (E-7). *BMCS:* Senior Chief Boatswain's Mate (E-8). *BMCM:* Master Chief Boatswain's Mate (E-9).

Description

Summary: Knows shipboard operations including stevedoring and maintenance; operates and maintains small boats, deck equipment, and machinery; is knowledgeable in rigging, ship's security, deck seamanship, navigation, and piloting. *BM3:* Prepares metal and wood surface for primers and paints; prepares and applies primers and paints; rigs cargo handling equipment to replenish ship at sea; handles cargo in port; knows signals for directing winch and crane operators; cares for and stows natural fiber, synthetic, and wire rope; makes fenders and eye splices; handles small boats as coxswain; uses navigational aids; understands limitations of small boats in rough weather, low visibility, and capacity; interprets nautical rules of the road regarding crossing and overtaking situations and avoiding collisions; reads compasses; steers by compass; operates and maintains sewing machine for sewing canvas; stands watch as boatswain's-mate-of-watch at sea and in port; uses, maintains, repairs, and overhauls blocks, tackles, and shipboard rigging. *BM2:* Able to perform the duties required for BM3; supervises cargo handling; supervises rigging for fueling at sea, using the astern, constant-tension, span-wire, and close-in methods; maintains and overhauls anchors, chains, cables, connecting links, and shackles; performs damage control and basic fire fighting procedures; rigs for towing and being towed; inspects and maintains lifeboats, life rafts, and survival equipment; launches and recovers lifeboats and ship's small craft; maintains hull records, painting records, and inventories of equipment, tools, and paint; obtains replacement equipment, tools, and paint; prepares hull reports; supervises 6-40 persons performing work details, deck functions, general upkeep of ship, and maintenance and repair of deck equipment; maintains discipline; serves as master-at-arms and police petty officer. *BM1:* Able to perform the duties required for BM2; supervises repair parties during shipboard emergencies; determines ship's position by bearing, cross-bearing, and running fix; computes effects of wind and current; determines the appropriate rigging method to use; plans, organizes, and assigns work for 6-40 persons and trains and supervises them in all aspects of seamanship, equipment maintenance, and spare parts inventory; keeps records and logs. *BMC:* Able to perform the duties required for BM1; supervises the handling and sorting of ammunition and flammables; supervises ship repair crews and the care, maintenance, and overhaul of ground tackle and rigging for mooring; operates and maneuvers service craft and other small craft in amphibious docking, undocking, and rescue operations; uses tide and current tables and navigational aids; uses the three-minute rule to determine speed-distance-time; has a working knowledge of the inland and international nautical rules of the road. *BMCS:* Able to perform the duties required for BMC; calculates the stability of the ship; coordinates shipboard activities during cargo operations and anchoring and mooring while underway and in port; supervises persons in all rates in a division of 20-30 persons; organizes and schedules training programs; prepares information directives and instructions for attaining organizational objectives; prepares correspondence; establishes and implements a program for evaluating and assigning personnel; evaluates the division's effectiveness and initiates improvements. *BMCM:* Able to perform the duties required for BMCS; establishes objectives and priorities in area of responsibility; administers departmental long-range programs; coordinates salvage and rescue operations; develops operating budgets and monitors expenditures; plans, organizes, and implements all deck departmental operations aboard ship in accordance with policies and procedures; reviews and evaluates personnel, equipment, and material requirements and makes appropriate recommendations.

Recommendation, BM3

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship and 2 in record keeping (12/89).

Recommendation, BM2

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, and 2 in personnel supervision (12/89).

Recommendation, BM1

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 3 in personnel supervision, and 1 in supply management (12/89).

Recommendation, BMC

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 3 in personnel supervision, 2 in supply management, 3 in coastal navigation and piloting, and 1 in personnel administration (12/89).

Recommendation, BMCS

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 3 in personnel supervision, 2 in supply management, 3 in coastal navigation and piloting, and 1 in personnel administration. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, BMCM

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 3 in personnel supervision, 2 in supply management, 3 in coastal navigation and piloting, and 1 in personnel administration. SN: Seaman (E-3). *BM3:* Boatswain's Mate, Third Class (E-4). *BM2:* Boatswain's Mate, Second Class (E-5). *BM1:* Boatswain's Mate, First Class (E-6). *BMC:* Chief Boatswain's Mate (E-7). *BMCS:* Senior Chief Boatswain's Mate (E-8). *BMCM:* Master Chief Boatswain's Mate (E-9).

Description

Summary: Knows shipboard operations including stevedoring and maintenance; operates and maintains small boats, deck equipment, and machinery; is knowledgeable in rigging, ship's security, deck seamanship, navigation, and piloting. *BM3:* Prepares metal and wood surface for primers and paints; prepares and applies primers and paints; rigs cargo handling equipment to replenish ship at sea; handles cargo in port; knows signals for directing winch and crane operators; cares for and stows natural fiber, synthetic, and wire rope; makes fenders and eye splices; handles small boats as coxswain; uses navigational aids; understands limitations of small boats in rough weather, low visibility, and capacity; interprets nautical rules of the road regarding crossing and overtaking situations and avoiding collisions; reads compasses; steers by compass; operates and maintains sewing machine for sewing canvas; stands watch as boatswain's-mate-of-watch at sea and in port; uses, maintains, repairs, and overhauls blocks, tackles, and shipboard rigging. *BM2:* Able to perform the duties required for BM3; supervises cargo handling; supervises rigging for fueling at sea, using the astern, constant-tension, span-wire, and close-in methods; maintains and overhauls anchors, chains, cables, connecting links, and shackles; performs damage control and basic fire fighting procedures; rigs for towing and being towed; inspects and maintains lifeboats, life rafts, and survival equipment; launches and recovers lifeboats and ship's small craft; maintains hull records, painting records, and inventories of equipment, tools, and paint; obtains replacement equipment, tools, and paint; prepares hull reports; supervises 6-40 persons performing work details, deck functions, general upkeep of ship, and maintenance and repair of deck equipment; maintains discipline; serves as master-at-arms and police petty officer. *BM1:* Able to perform the duties required for BM2; supervises repair parties during shipboard emergencies; determines ship's position by bearing, cross-bearing, and running fix; computes effects of wind and current; determines the appropriate rigging method to use; plans, organizes, and assigns work for 6-40 persons and trains and supervises them in all aspects of seamanship, equipment maintenance, and spare parts inventory; keeps records and logs. *BMC:* Able to perform the duties required for BM1; supervises the handling and sorting of ammunition and flammables; supervises ship repair crews and the care, maintenance, and overhaul of ground tackle and rigging for mooring; operates and maneuvers service craft and other small craft in amphibious docking, undocking, and rescue operations; uses tide and current tables and navigational aids; uses the three-minute rule to determine speed-distance-time; has a working knowledge of the inland and international nautical rules of the road. *BMCS:* Able to perform the duties required for BMC; calculates the stability of the ship; coordinates shipboard activities during cargo operations and anchoring and mooring while underway and in port; supervises persons in all rates in a division of 20-30 persons; organizes and schedules training programs; prepares information directives and instructions for attaining organizational objectives; prepares correspondence; establishes and implements a program for evaluating and assigning personnel; evaluates the division's effectiveness and initiates improvements. *BMCM:* Able to perform the duties required for BMCS; establishes objectives and priorities in area of responsibility; administers departmental long-range programs; coordinates salvage and rescue operations; develops operating budgets and monitors expenditures; plans, organizes, and implements all deck departmental operations aboard ship in accordance with policies and procedures; reviews and evaluates personnel, equipment, and material requirements and makes appropriate recommendations.

Recommendation, BM3

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, and 1 in introduction to computers (5/96).

Recommendation, BM2

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 1 in introduction to computers, and 2 in personnel supervision (5/96).

Recommendation, BM1

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 1 in introduction to computers, 3 in personnel supervision, and 1 in supply management (5/96).

Recommendation, BMC

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 2 in introduction to computers, 1 in hazardous materials handling, 3 in personnel supervision, 2 in supply management, and 3 in coastal navigation and piloting (5/96).

Recommendation, BMCS

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 2 in introduction to computers, 1 in hazardous materials handling, 3 in personnel supervision, 2 in supply management, and 3 in coastal navigation and piloting. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/96).

Recommendation, BMCM

In the vocational certificate category, 1 semester hour in small boat handling, 1 in basic fire fighting, 2 in rigging, and 2 in boat maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 1 in advanced seamanship, 3 in record keeping, 2 in introduction to computers, 1 in hazardous materials handling, 3 in personnel supervision, 2 in supply management, and 3 in coastal navigation and piloting. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/96).

CONSTRUCTION MECHANIC
CM3
CM2
CM1
CMC
CMCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *CM3:* Construction Mechanic, Third Class (E-4). *CM2:* Construction Mechanic, Second Class (E-5). *CM1:* Construction Mechanic, First Class (E-6). *CMC:* Chief Construction Mechanic (E-7). *CMCS:* Senior Chief Construction Mechanic (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Summary: Maintains, repairs, and overhauls automotive, construction, and material-handling equipment; keeps equipment maintenance records; prepares requisitions and reports; trains subordinates in maintenance procedures and techniques. *CM3:* Works from shop drawings, specifications, and repair and parts manuals; performs preventive maintenance; operates equipment during test procedures; repairs braking systems; tests electrical systems and makes minor repairs. *CM2:* Able to perform the duties required for CM3; prepares time sheets, material distribution records, equipment historical files, and parts and material requisitions; performs engine diagnosis and corrects problems through subassembly repair or replacement; repairs and adjusts steering system; performs minor body repairs and painting; performs gas welding, cutting, and brazing; operates construction, automotive, and material-handling equipment during diagnosis and testing; rebuilds components. *CM1:* Able to perform the duties required for CM2; prepares work progress reports and provides material usage data; conducts personnel readiness capability program interviews; prepares vehicle and equipment inspection reports; implements training for crews and overhauls internal combustion engines; diagnoses engine malfunctions; tests, diagnoses, overhauls, and adjusts diesel engine fuel systems; diagnoses malfunctions and repairs power train units (except torque converter power shift and automatic transmission); troubleshoots hydraulic, air, and vacuum braking systems; supervises personnel repairing automotive, construction, and material-handling equipment; performs diagnosis and repair of standard and electronic ignition systems using test equipment; organizes work assignments for team and crew leaders; prepares equipment, manpower, and material estimates from drawings and specifications; uses principles and techniques of Critical Path Method scheduling; identifies fossil fuel and combustion polluting components and applies atmospheric pollution control measures. *CMC:* Able to perform the duties required for CM1; drafts letters, instructions, and notices; prepares reports; administers accident prevention program; coordinates the assignment of tasks to department and unit personnel; provides technical advice and assistance; implements maintenance and cost control program; organizes and controls the use of equipment and material. *CMCS:* Able to perform the duties required for CMC; organizes, schedules, and evaluates training programs; prepares directives and instructions for attaining organizational objectives; prepares correspondence; establishes and implements a program for interviewing and evaluating personnel; coordinates equipment assignment among various units according to priorities; directs transportation and equipment services; establishes maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data; prepares and submits related reports.

Recommendation, CM3

In the vocational certificate category, 9 semester hours in diesel, truck, or automotive mechanics. In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive, diesel, or truck mechanics and 1 in care and use of tools (1/77).

Recommendation, CM2

In the vocational certificate category, 15 semester hours in diesel, truck, or automotive mechanics. In the lower-division baccalaureate/associate degree category, 6 semester hours in automotive, diesel, or truck mechanics, 3 in shop practices, and 1 in care and use of tools (1/77).

Recommendation, CM1

In the vocational certificate category, 18 semester hours in diesel, truck, or automotive mechanics. In the lower-division baccalaureate/associate degree category, 9 semester hours in diesel, truck, or automotive mechanics, 3 in shop practices, 2 in personnel supervision, 1 in records administration, and 1 in care and use of tools (1/77).

Recommendation, CMC

In the vocational certificate category, 18 semester hours in diesel, truck, or automotive mechanics. In the lower-division baccalaureate/associate degree category, 9 semester hours in diesel, truck, or automotive mechanics, 3 in shop practices, 3 in personnel supervision, 2 in records administration, and 1 in care and use of tools (1/77).

Recommendation, CMCS

In the vocational certificate category, 18 semester hours in diesel, truck, or automotive mechanics and 3 in leadership. In the lower-division baccalaureate/associate degree category, 9 semester hours in diesel, truck, or automotive mechanics, 3 in shop practices, 3 in personnel supervision, 3 in records administration, 3 in introduction to management, and 1 in care and use of tools. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in human relations (1/77).

Description

Summary: Maintains, repairs, and overhauls automotive, construction, and material-handling equipment; keeps equipment maintenance records; prepares requisitions and reports; trains subordinates in maintenance procedures and techniques. *CM3:* Works from shop drawings, specifications, and repair and parts manuals; performs preventive maintenance; operates equipment during test procedures; repairs braking systems; tests electrical systems and makes minor repairs. *CM2:* Able to perform the duties required for CM3; prepares time sheets, material distribution records, equipment historical files, and parts and material requisitions; performs engine diagnosis and corrects problems through subassembly repair or replacement; repairs and adjusts steering system; performs minor body repairs and painting; performs gas welding, cutting, and brazing; operates construction, automotive, and material-handling equipment during diagnosis and testing; rebuilds components. *CM1:* Able to perform the duties required for CM2; prepares work progress reports and provides material usage data; conducts personnel readiness capability program interviews; prepares vehicle and equipment inspection reports; implements training for crews and overhauls internal combustion engines; diagnoses engine malfunctions and repairs power train units (except torque converter power shift and automatic transmission); troubleshoots hydraulic, air, and vacuum braking systems; supervises personnel repairing automotive, construction, and material-handling equipment; performs diagnosis and repair of standard and electronic ignition systems using test equipment; organizes work assignments for team and crew leaders; prepares equipment, manpower, and material estimates from drawings and specifications; uses principles and techniques of Critical Path Method scheduling; identifies fossil fuel and combustion polluting components and applies atmospheric pollution control measures. *CMC:* Able to perform the duties required for CM1; drafts letters, instructions, and notices; prepares reports; administers accident prevention program; coordinates the assignment of tasks to department and unit personnel; provides technical advice and assistance; implements maintenance and cost control program; organizes and controls the use of equipment and material. *CMCS:* Able to perform the duties required for CMC; organizes, schedules, and evaluates training programs; prepares directives and instructions for attaining organizational objectives; prepares correspondence; establishes and implements a program for interviewing and evaluating personnel; coordinates equipment assignment among various units, according to priorities; directs transportation and equipment services; establishes maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data; prepares and submits related reports.

Recommendation, CM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or truck brake systems and 3 in automotive electrical systems (3/91).

Recommendation, CM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or truck brake systems, 3 in automotive electrical systems, 3 in engine diagnosis and repair, and 3 in shop practices (3/91).

Recommendation, CM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or truck brake systems, 3 in automotive electrical systems, 3 in engine diagnosis and repair, 3 in engine performance (tune-up), 3 in shop practices, 2 in personnel supervision, and 2 in maintenance management (3/91).

Recommendation, CMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or truck brake systems, 3 in automotive electrical systems, 3 in engine diagnosis and repair, 3 in engine performance (tune-up), 3 in power train repair, 3 in shop practices, 3 in personnel supervision, 2 in records and information management, and 3 in maintenance management (3/91).

Recommendation, CMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or truck brake systems, 3 in automotive electrical systems, 3 in engine diagnosis and repair, 3 in engine performance (tune-up), 3 in power train repair, 3 in shop practices, 3 in personnel supervision, 2 in records and information management, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (3/91).

NER-CN-001

CONSTRUCTIONMAN
CN

Exhibit Dates: 1/90–12/90.

Career Pattern

Constructionman (CN) is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Constructionman apprentice), and E-3 (Constructionman). At pay grade E-4 (petty officer, third class), the person may enter any one of the following ratings: Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), or Utilitiesman (UT).

Description

Is introduced to all phases of construction work, including construction equipment operation and equipment maintenance, surveying and drafting, site preparation and earthwork, concrete and masonry, steelwork, carpentry, painting, utilities, and tools; understands the mission of the various operating units of the naval construction force; reads simple sketches used in construction; has basic knowledge of map and compass techniques; knows hand signals for construction equipment operation; uses and maintains common measuring, cutting, line-clearing, manual excavating, and portable power tools; paints with brushes and rollers; applies safety requirements regarding construction equipment and tools, fuels, paints, and electricity; applies first aid procedures for controlling bleeding, preparing and applying improvised splints, administering artificial respiration, treating heat exhaustion and heat stroke, and transporting injured persons; knows symptoms of and immediate treatment for shock; can classify and administer first aid treatment for burns.

Recommendation

In the vocational certificate category, 3 semester hours in introduction to construction procedures. In the lower-division baccalaureate/associate degree category, 1 semester hour in map and compass reading and interpretation and 1 in first aid. NOTE: Credit for Constructionman (CN) should be granted only after pay grade E-3 has been achieved (1/77).

NER-CN-002

CONSTRUCTIONMAN
CN

Exhibit Dates: 1/91–Present.

Career Pattern

Constructionman (CN) is a general rate (Naval apprenticeship for persons at pay grades E-1 (recruit), E-2 (Constructionman apprentice), and E-3 (Constructionman)). At pay grade E-4 (petty officer, third class), the individual may enter any one of the following ratings: Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), or Utilitiesman (UT).

Description

May be introduced to all phases of construction work, including construction equipment operation and equipment maintenance, surveying and drafting, site preparation and earthwork, concrete and masonry, steelwork, carpentry, painting, utilities, and tools; understands the mission of the various operating units of the Naval construction force; reads simple sketches used in construction; has basic knowledge of map and compass techniques; knows hand signals for construction equipment operation; uses and maintains common measuring, cutting, line-clearing, manual excavating, and portable power tools; paints with brushes and rollers; applies safety requirements regarding construction equipment and tools, fuels, paints, and electricity.

Recommendation

Credit is not recommended due to the diverse on-the-job experiences of personnel in this rate (1/77).

CTM3
CTM2
CTM1
CTMC
CTMCS
CTMCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 20 (Cryptology).

Career Pattern

SN: Seaman (E-3). CTM3: Cryptologic Technician, Maintenance, Third Class (E-4). CTM2: Cryptologic Technician, Maintenance, Second Class (E-5). CTM1: Cryptologic Technician, Maintenance, First Class (E-6). CTMC: Chief Cryptologic Technician, Maintenance (E-7). CTMCS: Senior Chief Cryptologic Technician, Maintenance (E-8). CTMCM: Master Chief Cryptologic Technician, Maintenance (E-9).

Description

Summary: Repairs and performs maintenance on electronic systems. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledge associated with the rating were evaluated. *CTM3:* Repairs analog and digital electronic systems; reads schematic diagrams and identifies physical components; applies theory of operation and function of power supplies, amplifiers, oscillators, and filters; uses meters, oscilloscopes, and signal generators to troubleshoot systems; knows the relationships between current, voltage, and power in AC and DC circuits containing resistors, capacitors, and inductors; uses Boolean algebra truth tables to evaluate digital logic circuits; uses and maintains hand and power tools. *CTM2:* Able to perform the duties required for CTM3; performs maintenance on computers; applies theory of operation of digital computers, including control units, memory, and input/output; applies techniques of analog-digital and digital-analog conversion; prepares maintenance schedules. *CTM1:* Able to perform the duties required for CTM2; aligns, adjusts, and calibrates electronic equipment; troubleshoots, diagnoses, and repairs complex malfunctions. *CTMC:* Able to perform the duties required for CTM1; provides maintenance support services; evaluates operational test results against engineering design standards on electronic systems; supervises and evaluates subordinates; prepares written evaluation reports; establishes schedules of calibration, alignment, and preventive maintenance; allocates and assigns personnel; manages safety program, determines safety of work areas, and corrects discrepancies; provides technical and supervisory liaison between assigned work centers. *CTMCS:* Able to perform the duties required for CTMC; prepares technical reports and evaluations on operational performance on equipment installed at assigned location; evaluates test and performance results against design standards; prepares directives for attaining unit objectives; evaluates and assigns personnel; prepares and implements local safety and security directives; administers long-range maintenance program; supervises and evaluates subordinates. *CTMCM:* Able to perform the duties required for CTMCS; manages personnel and resources; plans, organizes, implements, and controls activities in maintenance of electronics equipment; coordinates overall maintenance effort with other departments; establishes goals, objectives, and priorities in own areas of responsibility; forecasts future requirements and initiates action to satisfy objectives and requirements; evaluates subordinate supervisors and other personnel; develops operating budget and monitors expenditures.

Recommendation, CTM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 2 in solid state circuitry, 3 in troubleshooting techniques, and 5 in digital electronics (2/81).

Recommendation, CTM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 3 in solid state circuitry, 5 in troubleshooting techniques, and 6 in digital electronics (2/81).

Recommendation, CTM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid state circuitry, 6 in troubleshooting techniques, and 7 in digital electronics (2/81).

Recommendation, CTMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid state circuitry, 6 in troubleshooting techniques, 7 in digital electronics, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management (2/81).

Recommendation, CTMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid state circuitry, 6 in troubleshooting techniques, 7 in digital electronics, 2 in personnel supervision, and 2 in administrative communication. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, and 2 in personnel management (2/81).

Recommendation, CTMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory electronics, 3 in circuit analysis, 4 in solid state circuitry, 6 in troubleshooting techniques, 7 in digital electronics, 2 in personnel supervision, 2 in administrative communication, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, 2 in management problems, and 3 in personnel management (2/81).

Description

Summary: Operates equipment that receives, records, and analyzes radio waves. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledge associated with the rating were evaluated. *CTR3:* Operates receiving and recording equipment; identifies call signs and encrypted call signs; types messages received; knows operating and procedure signals; identifies natural and man made radio interference; recognizes and reports unusual radio wave activity; handles magnetic tapes and makes recordings; maintains files, records, logs, and publications. *CTR2:* Able to perform the duties required for CTR3; is familiar with various systems for direction finding; loads and operates data processing computers. *CTR1:* Able to perform the duties required for CTR2; designs plans for intercept coverage; has knowledge of the geographical, political, and economic characteristics of target area; drafts status reports. *CTRC:* Able to perform the duties required for CTR1; supervises the preparation and conduct of support operations in the area of information collection; prepares plans for signal security; supervises and evaluates subordinates; prepares written evaluation reports; prepares reports of significant activities; drafts security reports and other reports as required; identifies communications circuits required for specific geographic areas. *CTRCS:* Able to perform the duties required for CTRC; manages the preparation and evaluation of support operations relating to information collection; prepares recommended changes for submission in area of responsibility; advises on utilization, capabilities, reliability, and operations; establishes and implements a program for interviewing, evaluating, and assigning personnel; prepares personnel utilization report; establishes and maintains a system for the control, maintenance, and updating of publications, instructions, and functional files; administers records disposal program; prepares correspondence, local directives, and instructions in the conduct of operations; organizes and schedules local training programs; prepares rough draft budget estimates in area of operations. *CTRCM:* Able to perform the duties required for CTRCS; plans, organizes, implements, and controls activities that comply with policy statements; forecasts future requirements for own area of responsibility; establishes goals and objectives; reviews and evaluates personnel including written evaluations; performs analyses of organization tools, manpower, and work load; develops operating budget and monitors expenditures.

Recommendation, CTR3

In the lower-division baccalaureate/associate degree category, 1 semester hour in technical mathematics, 1 in computer systems and organization, 1 in communications (electronics), 3 in records and information management, 2 in security operations, and 3 in computer applications (2/96).

Recommendation, CTR2

In the lower-division baccalaureate/associate degree category, 2 semester hours in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, 2 in security operations, and 3 in computer applications (2/96).

Recommendation, CTR1

In the lower-division baccalaureate/associate degree category, 2 semester hours in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, 3 in personnel supervision, 3 in technical writing, 2 in security operations, and 3 in computer applications (2/96).

Recommendation, CTRC

In the lower-division baccalaureate/associate degree category, 2 semester hours in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, 3 in personnel supervision, 3 in computer applications, 3 in technical writing, and 2 in security operations. In the upper-division baccalaureate category, 3 semester hours for field experience in management (2/96).

Recommendation, CTRCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, 3 in personnel supervision, 3 in computer applications, 2 in security operations, and 3 in technical writing. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (2/96).

Recommendation, CTRCM

In the lower-division baccalaureate/associate degree category, 2 semester hours in technical mathematics, 2 in communications (electronics), 3 in records and information management, 3 in personnel supervision, 3 in computer applications, 3 in technical writing, and 2 in security operations. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in organizational management, and 3 in presentation techniques (2/96).

CTTC
CTTCS
CTTCM

Exhibit Dates: 1/90–12/91.

Occupational Field: 20 (Cryptology).

Career Pattern

SN: Seaman (E-3). CTT3: Cryptologic Technician, Technical, Third Class (E-4). CTT2: Cryptologic Technician, Technical, Second Class (E-5). CTT1: Cryptologic Technician, Technical, First Class (E-6). CTTC: Chief Cryptologic Technician, Technical (E-7). CTTCS: Senior Cryptologic Technician, Technical (E-8). CTTCM: Master Chief Cryptologic Technician, Technical (E-9).

Description

Summary: Operates a computer system and monitors operational functions. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledge associated with the rating were evaluated. *CTT3:* Able to identify and classify the general characteristics of electromagnetic energy, interference, and common emitters; operates a computer system; types at 20 words per minute; inspects, cleans, and makes necessary adjustments to keyboard equipment; performs minor repairs; maintains logs, records, files, and publications. *CTT2:* Able to perform the duties required for CTT3; prepares routine technical reports; uses analysis equipment, including signal generators, graphic recorders, and spectrum analyzers. *CTT1:* Able to perform the duties required for CTT2; identifies and analyzes complex and sophisticated radio signals; performs system analysis to ensure effective data flow; prepares technical reports. *CTTC:* Able to perform the duties required for CTT1; supervises and maintains communications center; supervises and evaluates subordinates; prepares written evaluation reports; prepares requests for activation or deactivation of communications networks; allocates and tasks manpower assets to complete work load; manages safety program and maintenance program in work area. *CTTCS:* Able to perform the duties required for CTTC; prepares, supervises, and evaluates cryptographic operations; prepares changes to security regulations; advises on utilization, capabilities, reliability, and operations in own area of responsibility; establishes and implements program for interviewing, evaluating, and assigning personnel; supervises classified material control systems; administers and evaluates security requirements; organizes and schedules local training programs. *CTTCM:* Able to perform the duties required for CTTCS; plans, organizes, implements, and controls activities that comply with policy statements; forecasts future requirements for own area of responsibility; establishes goals and objectives; reviews and evaluates personnel; performs organizational, manpower, and work load analysis; develops operating budget and monitors expenditures; may manage three or four Navy shops or shop crews.

Recommendation, CTT3

In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting (2/81).

Recommendation, CTT2

In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting (2/81).

Recommendation, CTT1

In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, and 1 in technical report writing (2/81).

Recommendation, CTTC

In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, 1 in technical report writing, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in introduction to management (2/81).

Recommendation, CTTCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, 1 in technical report writing, 2 in personnel supervision, and 2 in administrative communication. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, and 2 in personnel management (2/81).

Recommendation, CTTCM

In the lower-division baccalaureate/associate degree category, 2 semester hours in typewriting, 3 in introduction to computer operations, 1 in technical report writing, 2 in personnel supervision, 2 in administrative communication, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 for field experience in management, 2 in management problems, and 3 in personnel management (2/81).

Description

Summary: Operates a computer system to analyze intercepted electronic signals and monitors operational functions. NOTE: Many of the duties required for this rating involve highly classified materials, equipment, and activities; therefore, not all the competencies and knowledge associated with the rating were evaluated.

CTT3: Able to identify and classify the general characteristics of electromagnetic signals; operates a computer system; inspects, cleans, and makes necessary adjustments to keyboard equipment; performs minor repairs; maintains logs, records files, and publications. *CTT2:* Able to perform the duties required for CTT3; prepares routine technical reports; uses analysis equipment, including signal generators, graphic recorders, and spectrum analyzers. *CTT1:* Able to perform the duties required for CTT2; identifies and analyzes complex and sophisticated radio signals; performs system analysis to ensure effective data flow; prepares technical reports. *CTTC:* Able to perform the duties required for CTT1; supervises and maintains communications center; supervises and evaluates subordinates; prepares written evaluation reports; prepares requests for activation or deactivation of communications networks; allocates and tasks manpower assets to complete work load; manages safety program and maintenance program in work area. *CTTCS:* Able to perform the duties required for CTTC; prepares, supervises, and evaluates cryptographic operations; prepares changes to security regulations; advises on utilization capabilities, reliability, and operations in own area of responsibility; establishes and implements program for interviewing, evaluating, and assigning personnel; supervises classified material control systems; administers and evaluates security requirements; organizes and schedules local training programs. *CTTCM:* Able to perform the duties required for CTTCS; plans, organizes, implements, and controls activities that comply with policy statements; forecasts future requirements for own area of responsibility; establishes goals and objectives; reviews and evaluates personnel; performs organizational, manpower, and work load analysis; develops operating budget and monitors expenditures; may manage three or four Navy shops or shop crews.

Recommendation, CTT3

In the lower-division baccalaureate/associate degree category, 2 semester hours in keyboarding, 1 in technical mathematics, 1 in computer systems and organization, 1 in communications (electronics), and 3 in records and information management (5/92).

Recommendation, CTT2

In the lower-division baccalaureate/associate degree category, 2 semester hours in keyboarding, 2 in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), and 3 in records and information management (5/92).

Recommendation, CTT1

In the lower-division baccalaureate/associate degree category, 2 semester hours in keyboarding, 2 in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, and 2 in personnel supervision (5/92).

Recommendation, CTTC

In the lower-division baccalaureate/associate degree category, 2 semester hours in keyboarding, 2 in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, and 3 in personnel supervision (5/92).

Recommendation, CTTCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in keyboarding, 2 in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (5/92).

Recommendation, CTTCM

In the lower-division baccalaureate/associate degree category, 2 semester hours in keyboarding, 2 in technical mathematics, 2 in computer systems and organization, 2 in communications (electronics), 3 in records and information management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, 3 in operations management, and 3 in communication techniques for managers (5/92).

NER-CU-001

Constructionman, Master Chief
CUCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 13 (Construction).

Career Pattern

May progress to CUCM, Master Chief Constructionman (E-9) from BUCS, Senior Chief Builder (E-8), EACS, Senior Chief Engineering Aid (E-8), or SWCS Senior Chief Steelworker (E-8).

Description

Able to perform the duties required for BUCS (Senior Chief Builder), EACS (Senior Chief Engineering Aid), or SWCS (Senior Chief Steelworker); establishes goals and sets priorities in area of responsibility; uses the Critical Path Method; forecasts future personnel equipment and material requirements and takes necessary action to satisfy them; develops procedures for work improvement and simplification through organizational analysis; prepares correspondence and reports; serves as a construction inspector; manages a contracts inspection branch; implements pollution control and energy conservation programs; assists in the management and operations of a public works department; develops operating budgets and monitors expenditures.

Recommendation

In the vocational certificate category, the recommendation is the same as that for BU1 (Builder First Class) in exhibit NER-BU-001; EA1 (Engineering Aid First Class) in exhibit NER-EA-001 (in the 1954-1989 Guide); or NER-EA-002, or SW1 (Steelworker First Class), in exhibit NER-SW-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of administration, 3 in construction contracts and agreements, and 3 in government budgeting procedures; add the 25 semester hours for BUCS (Senior Chief Builder) in exhibit NER-BU-001, the 25 semester hours for EACS (Senior Chief Engineering Aid) in exhibit NER-EA-001 (in the 1954-1989 Guide) or the 26 semester hours in exhibit NER-EA-002; or the 21 semester hours for SWCS (Senior Chief Steelworker) in exhibit NER-SW-001. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in forecasting, and 3 in management problems; add the 6 semester hours for BUCS in exhibit NER-BU-001, the 6 semester hours for EACS in exhibit NER-EA-001 (in the 1954-1989 Guide) or NER-EA-002; or the 9 semester hours for SWCS in exhibit NER-SW-001, as appropriate (1/77).

NER-CU-002

Constructionman, Master Chief
CUCM

Exhibit Dates: 1/91–Present.

Occupational Field: 13 (construction).

Career Pattern

May progress to CUCM, Master Chief Constructionman (E-9) from BUCS, Senior Chief Builder (E-8); EACS, Senior Chief Engineering Aid (E-8); or SWCS Senior Chief Steelworker (E-8).

Description

Able to perform the personnel, operational, and managerial duties of BUCS (Senior Chief Builder), EACS (Senior Chief Engineering Aid), or SWCS (Senior Chief Steelworker); has the flexibility to perform as a personnel manager, construction manager, project manager, facilities manager, operations chief, or educational administrator; establishes goals and priorities in areas of responsibility; develops procedures for work improvement and simplification through organizational analysis; prepares correspondence and reports; develops operating budgets and monitors expenditures; performs scheduling, planning, and quality control; evaluates the whole organization and understands the functions and capabilities of all the technical and support staff within the organization.

Recommendation

In the lower-division baccalaureate/associate degree category, if the individual progressed from BUCS, use the credit recommendation in exhibit NER-BU-001 or NER-BU-002; if progressed from EACS, use the credit recommendation in exhibit NER-EA-001 (in the 1954-1989 Guide) or NER-EA-002; if progressed from SWCS, use the credit recommendation in exhibit NER-SW-001 or NER-SW-002. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in operations management, 3 for field experience in management, 3 in construction contracts/specifications, and 3 in computing and estimating (3/91).

NER-DC-001

Damage Controlman
DC3
DC2
DC1
DCC
DCCS
DCCM

Exhibit Dates: 1/90–Present.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *DC3:* Damage Controlman, Third Class (E-4). *DC2:* Damage Controlman, Second Class (E-5). *DC1:* Damage Controlman, First Class (E-6). *DCC:* Chief Damage Controlman (E-7). *DCCS:* Senior

Chief Damage Controlman (E-8). *DCCM:* Master Chief Damage Controlman (E-9).

Description

Summary: Performs organizational and intermediate level maintenance and repair of damage control equipment and systems; plans, supervises, and performs tasks necessary for damage control, ship stability, preservation of watertight integrity, fire fighting, and chemical, biological, and radiological (CBR) warfare defense. *DC3:* Operates and maintains fire fighting, fixed-flooding, wash down, ventilation, dewatering, and air test equipment and damage control life support devices. *DC2:* Able to perform the duties required for DC3; performs radiological and chemical monitoring and surveying; serves as on-scene leader; organizes and directs fire party; inventories damage control equipment. *DC1:* Able to perform the duties required for DC2; instructs and coordinates damage control parties; instructs personnel in the techniques of damage control and CBR defense; supervises and performs tasks in procurement and issuance of supplies and repair parts; prepares records and reports. *DCC:* Able to perform the duties required for DC1; plans and conducts damage control exercises; maintains records and prepares progress reports; supervises training programs; estimates time, personnel, and material requirements; prepares quarterly maintenance schedules. *DCCS:* Able to perform the duties required for DCC; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; prepares correspondence; organizes and evaluates training programs; administers a long-range planned maintenance program. *DCCM:* Able to perform the duties required for DCCS; reviews personnel, equipment, and material requirements and forecasts future requirements; plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation, DC3

In the lower-division baccalaureate/associate degree category, 1 semester hour in fire protection systems, 4 in portable and fixed extinguishing systems, 1 in fire fighting strategy, and 1 in blueprint reading (3/90).

Recommendation, DC2

In the lower-division baccalaureate/associate degree category, 2 semester hours in fire protection systems, 5 in portable and fixed extinguishing systems, 2 in fire fighting strategy, 1 in chemical radiation hazards, 2 in blueprint reading, 1 in record keeping, and 1 in principles of supervision (3/90).

Recommendation, DC1

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire protection systems, 6 in portable and fixed extinguishing systems, 3 in fire fighting strategy, 2 in chemical radiation hazards, 2 in blueprint reading, 1 in record keeping, and 2 in principles of supervision (3/90).

Recommendation, DCC

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire protection systems, 6 in portable and fixed extinguishing systems, 4 in fire fighting strategy, 3 in chemical radiation hazards, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 2 in ship stability (3/90).

Recommendation, DCCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire protection systems, 6 in portable and fixed extinguishing systems, 4 in fire fighting strategy, 3 in chemical radiation hazards, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 2 in ship stability. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, DCCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in fire protection systems, 6 in portable and fixed extinguishing systems, 4 in fire fighting strategy, 3 in chemical radiation hazards, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 2 in ship stability. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

DM2
DM1
DMC
DMCS
DMCM

Exhibit Dates: 1/90–1/96.

Occupational Field: 17 (Media).

Career Pattern

SN: Seaman (E-3). *DM3:* Illustrator Draftsman, Third Class (E-4). *DM2:* Illustrator Draftsman, Second Class (E-5). *DM1:* Illustrator Draftsman, First Class (E-6). *DMC:* Chief Illustrator Draftsman (E-7). *DMCS:* Senior Chief Illustrator Draftsman (E-8). *DMCM:* Master Chief Illustrator Draftsman (E-9).

Description

Summary: Makes illustrations with pen and ink, water color, and other art media; makes orthographic and other mechanical drawings; operates and maintains graphic arts reproduction and audiovisual presentation equipment. *DM3:* Makes illustrations with pen and ink, water color, pencils, art markers, and other media for posters, graphs, charts, training aids, books, and publications; mixes colors; designs and executes freehand drawings in realistic and/or cartoon style; makes orthographic and other mechanical drawings; prepares sketches and drawings for visual presentations; mounts and retouches photographs; uses and performs operator maintenance on graphic arts reproduction and audio visual presentation equipment; sets up and operates office duplicators (offset reproduction). *DM2:* Able to perform the duties required for DM3; uses horizontal and vertical copy cameras; constructs basic cartoon figures; draws overlays with acetate inks and cell paints; uses electronic mixers and pulse generators in sound-slide presentations; makes technical illustrations (isometric, phantom, and exploded views); estimates time and materials needed for assigned jobs; maintains technical library. *DM1:* Able to perform the duties required for DM2; schedules and assigns routine shop work; prepares cost estimates for work requested; uses air brush for illustrations and for retouching photographs; and uses and maintains silkscreen process equipment. *DMC:* Able to perform the duties required for DM1; organizes a training aids and graphics shop; ensures compliance with copy and reproduction regulations; evaluates visual aids and maintains quality control; monitors control of produced classified material. *DMCS:* Able to perform the duties required for DMC; provides technical advice concerning illustration and drafting equipment; prepares directives and instructions for achieving organization objectives and improving operations; establishes and implements a program for interviewing, evaluating, and assigning personnel; organizes, schedules, and evaluates training programs; monitors quality control assurance requirements. *DMCM:* Able to perform the duties required for DMCS; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; develops operating budgets and monitors expenditures; evaluates and makes recommendations for new audiovisual equipment and innovations.

BEST COPY AVAILABLE

Recommendation, DM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, and 3 in basic techniques of commercial art (3/86).

Recommendation, DM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, and 3 for field experience in graphics (3/86).

Recommendation, DM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silkscreen printing, and 2 in graphic arts management. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (3/86).

Recommendation, DMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silkscreen printing, 3 in graphic arts management, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (3/86).

Recommendation, DMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silkscreen printing, 3 in graphic arts management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 3 for field experience in management, and 3 in management problems (3/86).

Recommendation, DMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 for field experience in graphics, 3 in silkscreen printing, 3 in graphic arts management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 6 for field experience in management, and 3 in management problems (3/86).

ILLUSTRATOR DRAFTSMAN

DM3
DM2
DM1
DMC
DMCS
DMCM

Exhibit Dates: 2/96–Present.

Occupational Field: 17 (Media).

Career Pattern

SN: Seaman (E-3). *DM3:* Illustrator Draftsman, Third Class (E-4). *DM2:* Illustrator Draftsman, Second Class (E-5). *DM1:* Illustrator Draftsman, First Class (E-6). *DMC:* Chief Illustrator Draftsman (E-7). *DMCS:* Senior Chief Illustrator Draftsman (E-8). *DMCM:* Master Chief Illustrator Draftsman (E-9).

Description

Summary: Makes illustrations with pen and ink, water color, computer graphics programs, and other art media; makes orthographic and other mechanical drawings; operates and maintains graphic arts reproduction and audiovisual presentation equipment, and computer graphics workstations. *DM3:* Makes illustrations with pen and ink, water color, pencils, art makers, computer graphics programs, and other media for posters, graphs, charts, training aids, books, and publications; mixes colors; designs and executes drawings in realistic and/or cartoon style; makes orthographic and other mechanical drawings; prepares sketches and drawings for visual presentations; mounts and retouches photographs; uses various computer platforms and graphics applications programs for computer generated graphics; uses and performs operator maintenance on graphic arts reproduction and audio visual presentation equipment; sets up and operates office duplicators (offset reproduction). *DM2:* Able to perform the duties required for DM3; uses horizontal and vertical copy cameras; constructs basic cartoon figures; draws overlays with acetate inks and cell paints; uses electronic mixers and pulse generators in sound-slide presentations; makes technical illustrations (isometric, phantom, and exploded views); estimates time and materials needed for assigned jobs; maintains technical library. *DM1:* Able to perform the duties required for DM2; schedules and assigns routine shop work; prepares cost estimates for work requested; uses air brush for illustrations and for retouching photographs; uses and maintains silkscreen process equipment. *DMC:* Able to perform the duties required for DM1; organizes a training aids and graphics shop; ensures compliance with copy and reproduction regulations; evaluates visual aids and maintains quality control; monitors control of produced classified material. *DMCS:* Able to perform the duties required for DMC; provides technical advice concerning illustration and drafting equipment; prepares directives and instructions for achieving organization objectives and improving operations; establishes and implements a program for interviewing, evaluating, and assigning personnel; organizes, schedules, and evaluates training programs; monitors quality control assurance requirements. *DMCM:* Able to perform the duties required for DMCS; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; develops operating budgets and monitors expenditures; evaluates and makes recommendations for new audiovisual equipment and innovations.

Recommendation, DM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, and 3 in computer generated graphics (2/96).

Recommendation, DM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, and 3 in computer generated graphics (2/96).

Recommendation, DM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 in computer generated graphics, 3 in silkscreen printing, and 2 in graphic arts management. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (2/96).

Recommendation, DMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 in computer generated graphics, 3 in silkscreen printing, 3 in graphic arts management, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics) (2/96).

Recommendation, DMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 in computer generated graphics, 3 in silkscreen printing, 3 in graphic arts management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 3 for field experience in management, and 3 in management problems (2/96).

Recommendation, DMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic drawing, 3 in visual design, 3 in technical drafting, 3 in basic techniques of commercial art, 3 in technical illustrating, 3 in visual graphics, 3 in computer generated graphics, 3 in silkscreen printing, 3 in graphic arts management, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in industrial arts education (graphics), 6 for field experience in management, and 3 in management problems (2/96).

NER-DN-001

DENTALMAN

DN

Exhibit Dates: 1/90–4/92.

Career Pattern

Dentalman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Dentalman apprentice), and E-3 (Dentalman). At pay grade E-4 (petty officer, third class), the person may enter any one of the following ratings: Dental Technician, General (DTG); Dental Technician, Repair (DTR); or Dental Technician, Prosthodontics (DTP).

Description

Assists dental officers in the treatment of patients; performs first aid; maintains, sterilizes, and arranges dental instruments; cares for dental equipment; maintains dental offices and dental records; uses medical terminology and standard abbreviations; identifies bones of head, neck, and oral structures; classifies and identifies teeth and supporting structures; instructs patients in oral health education.

Recommendation

In the lower-division baccalaureate/associate degree category, 2-3 semester hours for a dental practicum, 3 in dental assisting, 1 in dental office procedures, 3 in dental anatomy, and 3 in dental radiography. NOTE: Credit for Dentalman (DN) should be granted only after pay grade E-3 has been achieved (12/81).

NER-DN-002

Dentalman
DN

Exhibit Dates: 5/92–Present.

Career Pattern

Dentalman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Dentalman apprentice), and E-3 (Dentalman). At pay grade E-4 (petty officer, third class), the person progresses to the Dental Technician (DT) rating.

Description

Assists dental officers in the treatment of patients and the performance of general dentistry procedures; performs first aid; maintains, sterilizes, and arranges dental instruments; practices infection control procedures; exposes and processes dental X-ray films; cares for dental equipment; maintains dental offices and dental records; performs cardiopulmonary resuscitation; renders emergency first aid; uses medical terminology and standard abbreviations; identifies bones of head, neck, and oral structures; classifies and identifies teeth and supporting structures; instructs patients in oral health education.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 1 in infection control procedures, 3 in dental assisting practicum, 3 in chairside dental assisting, 3 in dental anatomy, 3 in dental radiography, and 1 in dental office procedures. NOTE: Credit for Dentalman (DN) should be granted only after pay grade E-3 has been achieved (5/93).

NER-DP-002

Data Processing Technician
DP3
DP2
DP1
DPC
DPCS
DPCM

Exhibit Dates: 1/90–10/98. Effective 10/98, the Data Processing Technician rating merged with the Radioman rating.

Occupational Field: 12 (Data Systems).

Career Pattern

SN: Seaman (E-3). *DP3:* Data Processing Technician, Third Class (E-4). *DP2:* Data Processing Technician, Second Class (E-5). *DP1:* Data Processing Technician, First Class (E-6). *DPC:* Chief Data Processing Technician (E-7). *DPCS:* Senior Chief Data Processing Technician (E-8). *DPCM:* Master Chief Data Processing Technician (E-9).

Description

Summary: Operates data processing equipment to record source data; sets up and operates data processing equipment, including card, magnetic tape, disk, computers, and peripherals. *DP3:* Prepares program controls; handles and stores cards, magnetic tapes, and disk packs in compliance with environmental requirements; processes data and record operations; performs routine user maintenance on data processing equipment; uses maintenance and procedure manuals and operational flow charts; maintains data medium library records. *DP2:* Able to perform the duties required for DP3; supervises data medium library records and the preparation and operation of computer peripherals; constructs programming, data and operational flow charts, decision tables, and internal and external subroutine programs; differentiates source and object programs, low-level and high-level programming languages, and the purposes of automatic and programmed checks. *DP1:* Able to perform the duties required for DP2; schedules electronic data processing (EDP) run, ensuring accurate and timely processing; prepares and maintains flow charts for manual and machine operating procedures; prepares and maintains a program run book; writes, debugs, and documents interactive and batch COBOL and FORTRAN programs; performs systems analysis; identifies characteristic of open and closed subroutines; identifies functions of index registers; trains and evaluates personnel in local automatic (ADP) and electronic data processing procedures. *DPC:* Able to perform the duties required for DP1; analyzes ADP and EDP systems and subsystems; implements computer maintenance and diagnostic programs; designs input and output requirements for systems and subsystems; ensures quality assurance of ADP generated products; designs and documents specifications for COBOL or FORTRAN programs; implements data file and data base management systems; ensures data integrity; directs an ADP installation or office operation. *DPCS:* Able to perform the duties required for DPC; coordinates ADP methods and procedures, site preparation, installation and operation, and activities between ADP installation units including data communications; analyzes proposed EDP changes; designs ADP software systems; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel; prepares local directives and instructions for attaining organization objective, improving operations, and achieving computer security; organizes and schedules training programs, evaluates their effectiveness, and initiates improvements. *DPCM:* Able to perform the duties required for DPCS; establishes correspondence and report control system procedures; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; establishes goals, objectives, and priorities and forecasts future requirements; reviews personnel, equipment, and material requirements; develops operating budget and monitors expenditures.

Recommendation, DP3

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and 3 in computer operations (11/83).

Recommendation, DP2

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, and 3 in computer programming concepts (11/83).

Recommendation, DP1

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 2 in personnel supervision, and 3 in human relations (11/83).

Recommendation, DPC

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 3 in data base concepts, 3 in personnel supervision, and 3 in human relations (11/83).

Recommendation, DPCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 3 in data base concepts, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (11/83).

Recommendation, DPCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in computer operations, 3 in systems design I, 3 in computer programming concepts, 3 in FORTRAN, 3 in COBOL I, 3 in data base concepts, 3 in personnel supervision, and 3 in human relations. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (11/83).

Description

Summary: Assists dental officers in the treatment of patients; performs clinical and administrative duties. *DTG3:* Assists dental officers in all phases of dentistry; performs routine scaling and polishing of teeth; performs cardiopulmonary resuscitation; prepares dental treatment records; maintains dental appointment system; performs routine maintenance on dental equipment. *DTG2:* Able to perform the duties required for DTG3; prepares dental materials and setups for all phases of dentistry; prepares oral health education material for presentation to groups; coordinates the clinical duties and assignment of subordinate personnel. *DTG1:* Able to perform the duties required for DTG2; directs preventive dentistry programs; requisitions and maintains records of dental supplies and equipment; performs minor repairs and operational checks on dental equipment; ensures proper security of dental supplies and equipment. *DTGC:* Able to perform the duties required for DTG1; supervises and coordinates record management programs; supervises performance evaluation programs; maintains financial records; analyzes budgetary and programming requirements; analyzes manpower authorizations for accuracy and adequacy; responsible for the inventory control of dental supplies and equipment.

Recommendation, DTG3

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation, and 2 in dental office procedures. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

Recommendation, DTG2

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation, 2 in dental office procedures, 1 in personnel supervision, and 2 in dental records management. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

Recommendation, DTG1

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation, 2 in dental office procedures, 3 in personnel supervision, 2 in dental records management, and 3 in dental office management. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

Recommendation, DTGC

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in cardiopulmonary resuscitation, 2 in dental office procedures, 3 in personnel supervision, 2 in dental records management, 3 in dental office management, 3 in business management, and 2 in communication techniques. In the upper-division baccalaureate category, 3 semester hours in personnel management. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

NER-DTP-001

DENTAL TECHNICIAN, PROSTHODONTICS
DTP3
DTP2
DTP1
DTPC

Exhibit Dates: 1/90–4/92.

Occupational Field: 14 (Health Care).

Career Pattern

DN: Dentalman (E-3). DTP3: Dental Technician, Prosthodontics, Third Class (E-4). DTP2: Dental Technician, Prosthodontics, Second Class (E-5). DTP1: Dental Technician, Prosthodontics, First Class (E-6). DTPC: Chief Dental Technician, Prosthodontics (E-7). *DTCS:* Senior Chief Dental Technician, Prosthodontics (E-8). *DTCM:* Master Chief Dental Technician, Prosthodontics (E-9).

Description

Summary: Assists dental officer in all phases of prosthetic dentistry; constructs and repairs prosthetic dental devices. *DTP3:* Prepares setups and dental materials used in prosthetic procedures; performs routine scaling and polishing of teeth; constructs and repairs dental devices; performs routine maintenance on dental equipment. *DTP2:* Able to perform the duties required for DTP3; prepares and maintains dental laboratory records and precious metal records. *DTP1:* Able to perform the duties required for DTP2; supervises a dental laboratory; requisitions dental supplies and equipment; maintains dental appointment system; performs minor repairs and operational checks on dental equipment; ensures proper security of dental supplies and equipment. *DTPC:* Able to perform the duties required for DTP1; supervises and coordinates dental laboratory records management programs; supervises the performance evaluation program; analyzes manpower authorizations for accuracy and adequacy.

Recommendation, DTP3

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid and 2 in dental laboratory procedures. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

Recommendation, DTP2

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in dental laboratory procedures, 2 in dental laboratory records management (prosthetic), and 3 in prosthetic procedures. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

Recommendation, DTP1

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in dental laboratory procedures, 2 in dental laboratory records management (prosthetic), 3 in prosthetic procedures, 3 in dental laboratory management, and 2 in personnel supervision. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

Recommendation, DTPC

In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 2 in dental laboratory procedures, 2 in dental laboratory records management (prosthetic), 3 in prosthetic procedures, 3 in dental laboratory management, 3 in personnel supervision, and 3 in business management. In the upper-division baccalaureate category, 3 semester hours in personnel management. Add the credit recommended for Dentalman (E-3) in exhibit NER-DN-001 (12/81).

NER-DTR-001

DENTAL TECHNICIAN, REPAIR
DTR2
DTR1
DTRC

Exhibit Dates: 1/90–4/92.

Occupational Field: 14 (Health Care).

Career Pattern

DN: Dentalman (E-3). DTG3: Dental Technician, General, Third Class (E-4). DTR2: Dental Technician, Repair, Second Class (E-5). DTR1: Dental Technician, Repair, First Class (E-6). DTRC: Chief Dental Technician, Repair (E-7). *DTCS:* Senior Chief Dental Technician (E-8). *DTCM:* Master Chief Dental Technician (E-9).

Description

Summary: Performs or supervises maintenance and repair of dental equipment. *DTR2:* Able to perform the duties required for DTG3; performs preventive maintenance and repair on air and water control units, patient positioning chairs, intraoral and panoramic X-ray machines, X-ray film processors, dental hand pieces, and general dental support apparatus; supervises sterilization procedures; files directives and technical manuals pertaining to dental equipment and maintenance activities; prepares dental equipment reports. NOTE: Progressed to DTR2 from DTG3 (Dental Technician, General, Third Class). *DTR1:* Able to perform the duties required for DTR2; applies procedures for treatment and mass casualties; prepares correspondence; conducts in-service training for dental maintenance and repair activities; develops and maintains a repairman's preventive maintenance program for dental facilities; develops and maintains maintenance records; requisitions and maintains records for issue and disposal of dental equipment. *DTRC:* Able to perform the duties required for DTR1; analyzes manpower authorizations; supervises dental equipment repair records; supervises and evaluates performance of subordinates; serves as dental equipment maintenance supervisor; analyzes and projects programming and budgetary requirements.

Recommendation, DTR2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronic circuits, 2 in electrical troubleshooting techniques, and 2 in mechanical troubleshooting techniques. Add the credit recommended for DTG3 in exhibit NER-DTG-001; and Dentalman (E-3) in exhibit NER-DN-001 (10/82).

Recommendation, DTR1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronic circuits, 2 in electrical troubleshooting techniques, 2 in mechanical troubleshooting techniques, 2 in dental equipment maintenance and repair, and 3 in personnel supervision. Add the credit recommended for DTG3 in exhibit NER-DTG-001; and Dentalman (E-3) in exhibit NER-DN-001 (10/82).

Recommendation, DTRC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity and electronic circuits, 2 in electrical troubleshooting techniques, 2 in mechanical troubleshooting techniques, 2 in dental equipment maintenance and repair, 3 in personnel supervision, and 2 in electrical and plumbing codes and standards. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 in human relations. Add the credit recommended for DTG3 in exhibit NER-DTG-001; and Dentalman (E-3) in exhibit NER-DN-001 (10/82).

NER-EA-002

ENGINEERING AID
EA3
EA2
EA1
EAC
EACS

Exhibit Dates: 1/90–12/90.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *EA3:* Engineering Aid, Third Class (E-4). *EA2:* Engineering Aid, Second Class (E-5). *EA1:* Engineering Aid, First Class (E-6). *EAC:* Chief Engineering Aid (E-7). *EACS:* Senior Chief Engineering Aid (E-8). *CUCM:* Master Chief Constructionman (E-9).

Description

Summary: Plans, supervises, and performs required tasks in construction surveying, drafting, planning and estimating, and quality control. *EA3:* Traces and revises drawings; prepares charts and sketches; places construction stakes and other references; uses standard surveying instruments; performs basic calculations of regular areas and volumes; performs simple tests on soils and concrete materials. *EA2:* Able to perform the duties required for EA3; draws mechanical layouts of service and building utilities and of distribution and collection systems from existing plans, sketches, or specifications; prepares material requisitions; records survey field notes; inspects the placing of concrete and tests its compressive and flexural strength; computes irregular areas; performs stadia and hydrographic surveying; tests for soil compaction field density, Atterberg limits, and aggregate soundness. *EA1:* Able to perform the duties required for EA2; checks layouts and drawings for accuracy and conformity to standards; prepares progress reports; organizes work assignments; prepares equipment, manpower, and material estimates; performs maintenance and construction inspections; performs Marshall stability test; prepares concrete, flexible pavement, and soil stabilization design mixes; as party chief, establishes vertical and horizontal control and directs topographic, boundary, and engineering surveys. *EAC:* Able to perform the duties required for EA1; supervises and coordinates all construction tasks assigned to a unit; provides technical advice and assistance on plans and specifications and on construction and maintenance techniques; implements a program of maintenance and cost control. *EACS:* Able to perform the duties required for EAC; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program to ensure maximum use of personnel; determines requirements for advance planning; coordinates equipment assignment among projects; is capable of directing the operation and maintenance of all utilities and the repair, alteration and maintenance of all facilities under the cognizance of the public works department; directs transportation and equipment services to all activities and maintains all equipment used for that purpose; establishes a maintenance and cost control program.

Recommendation, EA3

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in drafting, 2 in surveying, and 2 in materials testing. In the lower-division baccalaureate/associate degree category, 1 semester hour in construction technology, 2 in drafting, and 1 in surveying (3/86).

Recommendation, EA2

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in construction methods, 4 in materials testing, 4 in drafting, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in trigonometry, 3 in drafting, and 1 in construction technology (3/86).

Recommendation, EA1

In the vocational certificate category, 6 semester hours in materials testing, 4 in drafting, 3 in introduction to construction, 3 in construction methods, 3 in earthwork computation, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in surveying, 3 in pavement design, 3 in trigonometry, 3 in drafting, 2 in personnel supervision, and 1 in construction technology (3/86).

Recommendation, EAC

In the vocational certificate category, 6 semester hours in materials testing, 4 in drafting, 3 in introduction to construction, 3 in construction methods, 3 in earthwork computation, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in construction management, 3 in surveying, 3 in pavement design, 3 in trigonometry, 3 in personnel supervision, 3 in construction technology, and 3 in drafting (3/86).

Recommendation, EACS

In the vocational certificate category, 6 semester hours in materials testing, 4 in drafting, 3 in introduction to construction, 3 in construction methods, 3 in earthwork computation, and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 6 semester hours for field experience in construction management, 3 in surveying, 3 in pavement design, 3 in trigonometry, 3 in personnel supervision, 3 in construction technology, 3 in drafting, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in management problems (3/86).

Career Pattern

CN: Constructionman (E-3). *EA3:* Engineering Aid, Third Class (E-4). *EA2:* Engineering Aid, Second Class (E-5). *EA1:* Engineering Aid, First Class (E-6). *EAC:* Chief Engineering Aid (E-7). *EACS:* Senior Chief Engineering Aid (E-8). *CUCM:* Master Chief Constructionman (E-9).

Description

Summary: Plans, supervises, and performs tasks required in construction surveying, drafting, planning and estimating, and quality control. *EA3:* Traces and revises drawings; prepares construction drawings and architectural layouts; performs field sanitation procedures; places construction stakes and other references; uses standard surveying instruments; performs basic calculations of regular areas and volumes; performs simple tests on soils and concrete materials. *EA2:* Able to perform the duties required for EA3; draws detailed electrical and mechanical drawings of service utilities and distribution/collection systems; draws detailed civil, architectural, and structural drawings; prepares materials requisitions; records survey field notes; inspects the placing of concrete and tests its compressive and flexural strength; computes irregular areas; prepares topographic maps; conducts tests and performs field adjustments on survey equipment; tests for soil compaction field destiny, Atterberg limits, and aggregate soundness. *EA1:* Able to perform the duties required for EA2; checks layouts and drawings for accuracy and conformity to standards; prepares progress reports; organizes work assignments; prepares equipment, manpower, and material estimates; performs maintenance and construction inspections; supervises lab and field soils aggregate tests; controls environmental pollution at construction sites, work areas, and shops; prepares concrete, flexible pavement, and soil stabilization design mixes. *EAC:* Able to perform the duties required for EA1; supervises and coordinates all construction tasks assigned to a unit; provides technical advice and assistance on plans and specifications and on construction and maintenance techniques; implements a program of maintenance and cost control; manages environmental pollution control programs at construction sites, work areas, and shops. *EACS:* Able to perform the duties required for EAC; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program to ensure maximum use of personnel; determines requirements for advance planning; coordinates equipment assignment among projects; is capable of directing the operation and maintenance of all utilities and the repair, alteration, and maintenance of all facilities under the cognizance of the public works department; directs transportation and equipment services to all activities and maintains all equipment used for that purpose; establishes a maintenance and cost control program; serves as liaison between command and customer on assigned projects.

Recommendation, EA3

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction, 3 in drafting, 2 in materials testing, and 1 in surveying (6/91).

Recommendation, EA2

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction, 4 in drafting, 3 in materials testing, 3 in surveying, 3 in construction methods, and 1 in personnel supervision (6/91).

Recommendation, EA1

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction, 4 in drafting, 3 in materials testing, 3 in surveying, 3 in construction methods, 3 in earthwork computation, 3 in pavement design, 2 in personnel supervision, and 2 in construction management (6/91).

Recommendation, EAC

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction, 4 in drafting, 3 in materials testing, 3 in surveying, 3 in construction methods, 3 in earthwork computation, 3 in pavement design, 3 in personnel supervision, 3 in construction management, and 2 in records and information management (6/91).

Recommendation, EACS

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction, 4 in drafting, 3 in materials testing, 3 in surveying, 3 in construction methods, 3 in earthwork computation, 3 in pavement design, 3 in personnel supervision, 3 in construction management, 2 in records and information management, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for field experience in construction management, and 3 in organizational management (6/91).

NER-EM-002

ELECTRICIAN'S MATE
EM3
EM2
EM1
EMC
EMCS

Exhibit Dates: 1/90–4/96.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *EM3:* Electrician's Mate, Third Class (E-4). *EM2:* Electrician's Mate, Second Class (E-5). *EM1:* Electrician's Mate, First Class (E-6). *EMC:* Chief Electrician's Mate (E-7). *EMCS:* Senior Chief Electrician's Mate (E-8). *EMCM:* Master Chief Electrician's Mate (E-9).

Description

Summary: Operates and maintains power and lighting circuits, electrical fixtures, film projectors, motors, generators, controllers, switchboards, voltage and frequency regulators, and other test equipment; tests for short circuits; rebuilds electrical equipment. *EM3:* Operates standard test and metering equipment, including multimeter, voltmeter, ammeter, ohmmeter, oscilloscope, stroboscope, voltage tester, wattmeter, and vacuum tube voltmeter; makes standard wire splices; detects and locates ground, open circuits, and short circuits in lighting and power circuits; solders electrical connections; examines motors and generators for conditions and needed maintenance; operates AC and DC generators; replaces bearings in generators and motors; repairs portable electrical tools; prepares, activates, and services storage batteries; troubleshoots and repairs small boat electrical systems; tests and maintains signal lights, search lights, and beacons; maintains electrical cooking equipment; computes resistance, current, voltage, phase angle, and impedance; prepares diesel generators for operation; reads and interprets schematic diagrams and electrical blueprints. *EM2:* Able to perform the duties required for EM3; operates and uses signal generator; operates instrument transformer; conducts bench tests on motor and generator windings; operates and maintains AC and DC ship propulsion equipment; installs new power and lighting circuits; connects shore power to main distribution board of ship; inspects and maintains battery charges, cathodic protective units, air conditioning control circuits, air compressor control circuits, hoist/winch systems, ship's fueling continuity circuits, solid state logic components, and helicopter starting units; maintains equipment calibration schedules; completes planned maintenance reports; inventories installed equipment and spare parts support; may supervise up to four Third Class Electrician's Mates. *EM1:* Able to perform the duties required for EM2; conducts bench tests on electric governors; checks logic on solid state electrohydraulic controllers; inspects ship's service and emergency switchboard equipment when power is connected; estimates extent of casualty damage to equipment; removes, tests, and replaces defective components in automatic degaussing control panels; determines type and value of acceptable substitute components; checks electrical operating logs and maintenance records; prepares weekly maintenance schedules; instructs personnel in operation, maintenance, and casualty control; may supervise up to nine Electrician's Mates. *EMC:* Able to perform the duties required for EM1; tests, inspects, and directs repairs of power and lighting equipment, static magnetic amplifier equipment, voltage and speed regulators, and static inverters; maintains files; direct operation and control of electrical distribution and interior communication system and circuits; plans, organizes, and directs the operation and maintenance of electrical systems; estimates time, materials, and labor required for repair of electrical systems and equipment; verifies compliance with quality assurance procedures; performs casualty analysis; stands engineering watch; assigns personnel to watch stations; supervises training in operation, maintenance, and casualty control; reviews efficiency reports of subordinates; prepares ship trial reports. *EMCS:* Able to perform the duties required for EMC; advises on preparation for administrative, material, and readiness inspections, the opening and inspection of equipment, and preparation of work requests; provides information and advises on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel; administers a long-range planned maintenance program; reviews and submits reports; initiates correspondence and directives; evaluates operational deficiencies and test results; reviews ship trial data; organizes and schedules training programs; evaluates effectiveness of subordinates.

Recommendation, EM3

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 2 in AC/DC machines, and 1 in basic electronics (12/89).

Recommendation, EM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 3 in AC/DC machines, 2 in basic electronics, and 2 in personnel supervision (12/89).

Recommendation, EM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 4 in AC/DC machines, 2 in basic electronics, and 3 in personnel supervision (12/89).

Recommendation, EMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 4 in AC/DC machines, 2 in basic electronics, 3 in personnel supervision, and 3 in maintenance management (12/89).

Recommendation, EMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in electrical systems troubleshooting and maintenance, 4 in AC/DC machines, 2 in basic electronics, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

NER-EM-004

ELECTRICIAN'S MATE, MASTER CHIEF
EMCM

Exhibit Dates: 1/90–4/96.

Occupational Field: 3 (Marine Engineering).

Career Pattern

May progress to EMCM, Master Chief Electrician's Mate (E-9) from EMCS, Senior Chief Electrician's Mate (E-8), or ICCS, Senior Chief Interior Communications Electrician (E-8).

Description

Able to perform the duties required for either EMCS (Senior Chief Electrician's Mate) or ICCS (Senior Chief Interior Communications Electrician); advises on new developments and new technical information concerning capabilities, limitations, and employment of interior communications and electrical equipment; plans, organizes, and implements activities; plans and initiates actions to satisfy personnel, equipment, and material requirements and forecasts future requirements; schedules major maintenance and repair; develops procedures and supervises practices and techniques for correction of equipment and system malfunctions; supervises inspections and surveys of equipment; evaluates defective and worn electrical equipment items in terms of feasibility of repair or replacement; develops operating budgets and monitors expenditures; prepares staff studies, establishes goals, objectives, and priorities; reviews efficiency of subordinates; prepares policy statements and directives.

Recommendation

In the lower-division baccalaureate/associate degree category, if progressed to EMCM from ICCS (Interior Communications Electrician, Senior Chief), use the recommendation for ICCS in exhibit NER-IC-001; if progressed from EMCS, use the recommendation in exhibit NER-EM-002. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

FN: Fireman (E-3). *EN3:* Engineman, Third Class (E-4). *EN2:* Engineman, Second Class (E-5). *EN1:* Engineman, First Class (E-6). *ENC:* Chief Engineman (E-7). *ENCS:* Senior Chief Engineman (E-8). *ENCM:* Master Chief Engineman (E-9).

Description

Summary: Operates, repairs, and performs maintenance on internal combustion engines, main propulsion machinery, refrigeration and air conditioning equipment, gas turbine engines, and shipboard auxiliary equipment; stands watch on auxiliary boilers. *EN3:* Aligns and operates drain systems, stripping systems, machinery cooling water systems, oil systems, and purifier systems; aligns steam systems; operates pumps; aligns, operates, and secures internal combustion engines, steam distilling plants, compressed air systems, refrigeration and air conditioning systems; records pressure and temperature readings on operating equipment; conducts tests on lubricating oil and distillate fuels; operates and maintains auxiliary boilers; maintains tools; overhauls valves; performs preventive maintenance on auxiliary equipment, main propulsion equipment, and on small craft clutches, transmissions, drive shafts, and packing glands; tests electrohydraulic steering systems; inspects for leaks in reduction gears and thrust bearings; installs or removes and replaces flange shields on piping systems; fabricates and fits tubing and flexible hose assemblies; monitors electrical charging and regulating systems; operates and maintains hydraulic equipment; controls or minimizes the effects of oil and fuel spills; completes maintenance data system forms; uses blueprints, drawings, and manuals; tests boiler water and feed water. *EN2:* Able to perform the duties required for EN3; operates lube oil service, fill and storage systems, and steam reducing stations; performs prestart inspections; tests evaporators and condensers for leaks; conducts feed tests and treatment on distilling plants; aligns pump driving units; overhauls air compressors, internal combustion engines, pumps, refrigeration and air conditioning compressors, small craft clutches, transmissions and drive shafts; repairs valves and packing glands; tests and recharges refrigeration and air conditioning systems; tests and repairs piping systems; tests, cleans, inspects, and repairs or replaces heat exchangers; troubleshoots and repairs auxiliary equipment, internal combustion engines, and distilling plants; uses halide torch to test for leaks on refrigeration and air conditioning equipment; adjusts valves, injectors, control racks, governor, and governor control linkages on diesel engines; checks oil clearance in bearings; disassembles, cleans, repairs, assembles, tests, and replaces fuel nozzles; inspects and repairs lube oil and fuel oil purifiers; inspects metal surfaces for cracks or defects by the dye penetrant and magnaflux methods; inspects, adjusts and test-runs diesel and gasoline engines; lubricates steering gear; operates and maintains vertical conveyors; operates and troubleshoots internal combustion engine blowers and turbochargers; operates an engine lathe; adjusts and repairs refrigeration automatic controls. *EN1:* Able to perform the duties required for EN2; analyzes malfunctions of main propulsion equipment and takes corrective action; repairs and maintains mechanical and hydraulic governors, overspeed trips, and load limiting governors; checks main engine bearing readings; inspects and checks clearances on blowers and turbochargers; measures main propulsion shaft thrust clearance; conducts quality assurance inspections; supervises maintenance activities; prepares planned maintenance schedules. *ENC:* Able to perform the duties required for EN1; conducts diesel engine postoverhaul checkout; checks main reduction gears for backlash and alignment; measures crankshaft deflection; uses trend analysis data to determine changes in diesel engines; supervises personnel in the operation, maintenance, and repair of engine room and auxiliary equipment; analyzes results of oil tests. *ENCS:* Able to perform the duties required for ENC; monitors environmental pollution control programs; administers long-range planned maintenance programs; plans and schedules work loads; writes correspondence, directives, and instructions. *ENCM:* Able to perform the duties required for ENCS; reviews overhaul work package; monitors all ship-to-shop work and maintenance progress reports; establishes goals, objectives, and priorities; prepares staff studies; develops operating budgets and monitors expenditures; forecasts future requirements.

Recommendation, EN3

In the lower-division baccalaureate/associate degree category, 10 semester hours in engine maintenance and repair, 3 in maintenance technology, and 1 in blueprint reading (10/87).

Recommendation, EN2

In the lower-division baccalaureate/associate degree category, 12 semester hours in engine maintenance and repair, 3 in maintenance technology, 1 in blueprint reading, and 1 in record keeping; if assigned to gas turbine propulsion systems, 1-3 semester hours in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, EN1

In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 2 in maintenance management, and 2 in personnel supervision; if assigned to gas turbine propulsion systems, 1-3 semester hours in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, ENC

In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 3 in maintenance management, and 3 in personnel supervision; if assigned to gas turbine propulsion systems; 1-3 semester hours in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, ENCS

In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 3 in maintenance management, and 3 in personnel supervision; if assigned to gas turbine propulsion systems; 1-3 semester hours in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (10/87).

Recommendation, ENCM

In the lower-division baccalaureate/associate degree category, 15 semester hours in engine maintenance and repair, 6 in maintenance technology, 1 in blueprint reading, 2 in record keeping, 3 in maintenance management, and 3 in personnel supervision; if assigned to gas turbine propulsion systems; 1-3 semester hours in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (10/87).

NER-EO-001

EQUIPMENT OPERATOR
EO3
EO2
EO1
EOC
EOCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *EO3:* Equipment Operator, Third Class (E-4). *EO2:* Equipment Operator, Second Class (E-5). *EO1:* Equipment Operator, First Class (E-6). *EOC:* Chief Equipment Operator (E-7). *EOCS:* Senior Chief Equipment Operator (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Summary: Operates automotive, material-handling, weight lifting, and construction equipment involved in earth moving, road building, quarrying, asphalt batching and paving, concrete paving, and construction work. *EO3:* Able to perform the duties required for CN (Constructionman); reads workshop drawings and sketches; reads grade stake markings; computes working loads for lines and wire rope; uses slings, spreaders, cargo nets, and hooks; determines optimum working distances for construction equipment with Option of scrapers; changes attachments and adapts cable/hydraulic assemblies on tractors (wheeled and crawler) with front and rear mounted and towed attachments; maintains, dismounts, repairs, and mounts tires; operates and performs operator maintenance on portable rotary rock drill, self-propelled compaction equipment, wheel and crawler tractors, wheel and crawler front-end loaders, warehouse and rough-terrain forklifts up to 6,000 pounds capacity, passenger-carrying vehicles, and trucks through five-ton including truck-tractor with semitrailer. *EO2:* Able to perform the duties required for EO3; works from construction drawings and specifications; draws simple shop drawings and sketches; maintains records and logs including time sheets; prepares requisitions; changes attachments and adapts cable/hydraulic assemblies on multipurpose excavators and cranes (crawler), up to and including three-cubic-yard for clamshell, dragline, shovel-front, backhoe, pile driver, and hooklock; operates and performs operator maintenance on scrapers, cranes, pile drivers, rock drills, asphalt pavers, soil stabilization mixers, and rough-terrain forklifts, up to and including those with 18,000-pound capacity; maintains asphalt surfaces. *EO1:* Able to perform the duties required for EO2; prepares as-built drawings, work progress reports, and material usage data; implements on-the-job training; directs crews in excavating, paving, grading, hauling, and materials-handling operations; makes work assignments; uses Critical Path Method schedules; is a quarry operator and construction inspector; operates and performs operator maintenance on asphalt and concrete batch plants; computes volume of embankment sections; estimates manpower, material, and equipment needs from drawings and specifications; carries out procedures to limit or minimize the adverse effects of oil and fuel spills and of fuel combustion on air quality. *EOC:* Able to perform the duties required for EO1; drafts letters, reports, and instructions; coordinates and supervises the work performed by unit personnel; provides technical advice on plans and specifications and on equipment operation, construction, and maintenance techniques; implements maintenance and cost control programs; prepares and maintains project progress charts; organizes and controls the site deployment of materials and equipment. *EOCS:* Able to perform the duties required for EOC; provides information and advice on the capabilities, utilization, and operations in own area of responsibility; prepares correspondence; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program for assigning and evaluating personnel; coordinates the assignment of equipment among various projects according to priorities; administers construction force tool inventory and inspection program; prepares and maintains visual status boards; directs the repair, alteration, and maintenance of all facilities under the cognizance of public works department; establishes a maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data and prepares related reports; organizes, schedules, and evaluates training programs.

Recommendation, EO3

In the vocational certificate category, 10 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 2 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 2 semester hours in construction equipment operation and 1 in mechanical maintenance (1/77).

Recommendation, EO2

In the vocational certificate category, 20 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 4 semester hours in construction equipment operation and 2 in mechanical maintenance (1/77).

Recommendation, EO1

In the vocational certificate category, 30 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment operation, 2 in operations management, 2 in personnel supervision, and 2 in mechanical maintenance (1/77).

Recommendation, EOC

In the vocational certificate category, 30 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment operation, 3 in operations management, 3 in personnel supervision, and 2 in mechanical maintenance (1/77).

Recommendation, EOCS

In the vocational certificate category, 30 semester hours in construction equipment operation, 3 in introduction to construction equipment, and 3 in mechanical maintenance. In the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment operation, 3 in operation planning, 3 in operations management, 3 for field experience in management, 3 in personnel supervision, and 2 in mechanical maintenance. In the upper-division baccalaureate category, 3 semester hours in operations/construction management and 3 in human relations (1/77).

Description

Summary: Operates automotive, material-handling, weight lifting and construction equipment involved in earth moving, road building, quarrying, asphalt batching and paving, concrete paving, and construction work. *EO3:* Able to perform the duties required for CN (Constructionman); reads workshop drawings and sketches; reads grade stake markings; computes working loads for lines and wire rope; uses slings, spreaders, cargo nets, and hooks; determines optimum working distances for construction equipment with the exception of scrapers; changes attachments and adapts cable/hydraulic assemblies on tractors (wheeled and crawler) with front and rear mounted and towed attachments; maintains, dismounts, repairs, and mounts tires; operates and performs operator maintenance on portable rotary rock drill, self-propelled compaction equipment, wheel and crawler tractors, wheel and crawler front-end loaders, warehouse and rough-terrain forklifts up to 6,000 pounds capacity, passenger-carrying vehicles, and trucks through five-ton, including truck-tractor with semitrailer. *EO2:* Able to perform the duties required for EO3; works from construction drawings and specifications; draws simple shop drawings and sketches; maintains records and logs including time sheets; prepares requisitions; changes attachments and adapts cable/hydraulic assemblies on multipurpose excavators and cranes (crawler), up to and including three-cubic-yard for clamshell, dragline, shovel-front, backhoe, pile driver, and hooklock; operates and performs operator maintenance on scrapers, cranes, pile drivers, rock drills, asphalt pavers, soil stabilization mixers, and rough-terrain forklifts up to and including those with 18,000-pound capacity; maintains asphalt surfaces. *EO1:* Able to perform the duties required for EO2; prepares as-built drawings, work progress reports, and material usage data; implements on-the-job training; directs crews in excavating, paving, grading, hauling, and materials-handling operations; makes work assignments; uses Critical Path Method schedules; is a quarry operator and construction inspector; operates and performs operator maintenance on asphalt and concrete batch plants; computes volume of embankment sections; estimates manpower, material, and equipment needs from drawings and specifications; carries out procedures to limit or minimize the adverse effects of oil and fuel spills and of fuel combustion on air quality. *EOC:* Able to perform the duties required for EO1; drafts letters, reports, and instructions; coordinates and supervises the work performed by unit personnel; provides technical advice on plans and specifications and on equipment operation, construction, and maintenance techniques; implements maintenance and cost control programs; prepares and maintains project progress charts; organizes and controls the site deployment of materials and equipment. *EOCS:* Able to perform the duties required for EOC; provides information and advice on the capabilities, utilization, and operations in own area of responsibility; prepares correspondence; prepares local directives and instructions for attaining organizational objectives and improving operations; establishes and implements a program for assigning and evaluating personnel; coordinates the assignment of equipment among various projects according to priorities; administers construction force tool inventory and inspection program; prepares and maintains visual status boards; directs the repair, alteration, and maintenance of all facilities under the cognizance of public works department; establishes a maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data and prepares related reports; organizes, schedules, and evaluates training programs.

Recommendation, EO3

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction equipment, 2 in mechanical maintenance, and 3 in construction equipment operation (6/91).

Recommendation, EO2

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction equipment, 3 in mechanical maintenance, 4 in construction equipment operation, and 1 in personnel supervision (6/91).

Recommendation, EO1

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction equipment, 3 in mechanical maintenance, 6 in construction equipment operation, 2 in personnel supervision, and 2 in maintenance management (6/91).

Recommendation, EOC

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction equipment, 3 in mechanical maintenance, 6 in construction equipment operation, 3 in personnel supervision, 3 in maintenance management, and 2 in records and information management (6/91).

Recommendation, EOCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to construction equipment, 3 in mechanical maintenance, 6 in construction equipment operation, 3 in personnel supervision, 3 in maintenance management, and 2 in records and information management. In the upper-division baccalaureate category, 3 semester hours in operations/construction management and 3 in organizational management (6/91).

NER-EQ-001

EQUIPMENTMAN, MASTER CHIEF
EQCM

Exhibit Dates: 1/90–12/90.

Occupational Field: 13 (Construction).

Career Pattern

May progress to EQCM, Master Chief Equipmentman (E-9), from either EOCS, Senior Chief Equipment Operator (E-8), or CMCS, Senior Chief Construction Mechanic (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Able to perform the duties required for Either EOCS (Senior Chief Equipment Operator) or CMCS (Senior Chief Construction Mechanic); forecasts future requirements and plans and initiates action to satisfy them; establishes goals and priorities; plans, organizes, implements, and controls work activities in compliance with policy statements and directives; reviews personnel, equipment, and material requirements; is responsible for the administration of a department or company; develops procedures for work improvement and simplification through organizational analysis; manages a contracts inspection branch; implements pollution control and energy conservation programs; develops operating budgets and monitors expenditures; assists in managing a public works department.

Recommendation

In the vocational certificate category, use the recommendation for either EO1 (Equipment Operator First Class) in exhibit NER-EO-001 or CMCS (Senior Chief Construction Mechanic) in exhibit NER-CM-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of administration, 3 in construction contracts and agreements, and 3 in government budgeting procedures; add either the 20 semester hours for EOCS (Senior Chief Equipment Operator) in exhibit NER-EO-001 or the 22 semester hours for CMCS in exhibit NER-CM-001. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in forecasting, and 3 for a practicum in management; add either the 6 semester hours for EOCS in exhibit NER-EO-001 or the 6 semester hours for CMCS in exhibit NER-CM-001, as appropriate (1/77).

NER-EQ-002

EQUIPMENTMAN, MASTER CHIEF
EQCM

Exhibit Dates: 1/91–Present.

Occupational Field: 13 (Construction).

Career Pattern

May progress to EQCM, Master Chief Equipmentman (E-9), from either EOCS, Senior Chief Equipment Operator (E-8), or CMCS, Senior Chief Construction Mechanic (E-8). *EQCM:* Master Chief Equipmentman (E-9).

Description

Able to perform the duties required for either EOCS (Senior Chief Equipment Operator) or CMCS (Senior Chief Construction Mechanic); forecasts future requirements and plans and initiates action to satisfy them; establishes goals and priorities; plans, organizes, implements, and controls work activities in compliance with policy statements and directives; reviews personnel, equipment, and material requirements; is responsible for the administration of a department or company; develops procedures for work improvement and simplification through organizational analysis; manages a contracts inspection branch; implements pollution control and energy conservation programs; develops operating budgets and monitors expenditures; assists in managing a public works department.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in office administration, 3 in construction contracts and agreements, and 3 in government budgeting procedures; add the credit for either EOCS (Senior Chief Equipment Operator) in exhibit NER-EO-001 or NER-EO-002, or CMCS in exhibit NER-CM-001 or NER-CM-002, as appropriate. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, and 3 in operations management; add the credit for either EOCS in exhibit NER-EO-001 or NER-EO-002 or for CMCS in exhibit NER-CM-001 or NER-CM-002, as appropriate (6/91).

NER-ET-003

ELECTRONICS TECHNICIAN
ET3
ET2
ET1
ETC
ETCS
ETCM

Exhibit Dates: 1/90–2/96.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *ET3:* Electronics Technician, Third Class (E-4). *ET2:* Electronics Technician, Second Class (E-5). *ET1:* Electronics Technician, First Class (E-6). *ETC:* Chief Electronics Technician (E-7). *ETCS:* Senior Chief Electronics Technician (E-8). *ETCM:* Master Chief Electronics Technician (E-9).

Description

Summary: Performs maintenance on electronic equipment for surface ships and submarines, electronic air detection and tracking equipment, electronic recognition and identification equipment, aids to navigation, and electronic equipment and components used for communication, cryptography, and navigation; possesses a general working knowledge of electricity and electronics. *ET3:* Reads and interprets schematics and block diagrams; uses test equipment and hand tools; repairs electrical/electronic cables and connectors; localizes malfunctions and repairs or replaces faulty parts or subassemblies; aligns, adjusts, calibrates, and performs preventive maintenance on equipment; inventories tools and portable test equipment; completes maintenance data forms. *ET2:* Able to perform the duties required for ET3, maintains radar transmitting equipment, radar receiving equipment, radar identification equipment, and air navigation equipment; localizes malfunctions to systems, subsystems, circuits, and parts; inventories installed equipment; completes maintenance reports. *ET1:* Able to perform the duties required for ET2; diagnoses, isolates, aligns, adjusts, and calibrates electronic subsystems; monitors maintenance quality control; prepares weekly preventive maintenance schedules; maintains inventory of parts; reviews completed maintenance data forms; trains subordinates in the operation of tests on systems and subsystems. *ETC:* Able to perform the duties required for ET1; supervises the repair of electronic systems and subsystems; uses accounting procedures to maintain control of inventories, work flow, and work accomplished; estimates time and support required for repair of equipment; provides technical and supervisory liaison between work centers; implements and administers a maintenance and repair program; prepares quarterly preventive maintenance schedules. *ETCS:* Able to perform the duties required for ETC; evaluates operational test results against engineering design standards; reviews, prepares, and administers the electronic repair organization bill; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; organizes and schedules training programs and evaluates their effectiveness; administers a long-range planned maintenance program. *ETCM:* Able to perform the duties required for ETCS; plans, organizes, controls, directs, and evaluates personnel and equipment utilization; forecasts future requirements and reviews personnel, equipment, and material requirements; coordinates activities with other departments; develops operating budgets and monitors expenditures.

Recommendation, ET3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, 3 in electronic systems troubleshooting and maintenance, 2 in technical mathematics, 1 in electronic control systems, 1 in electronic communications, 1 in DC circuits, and 1 in AC circuits (12/89).

Recommendation, ET2

NER-EW-002

ELECTRONICS WARFARE TECHNICIAN
EW3
EW2
EW1
EWC
EWCS
EWCM

Exhibit Dates: 1/92–4/96.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman (E-3). *EW3:* Electronics Warfare Technician, Third Class (E-4). *EW2:* Electronics Warfare Technician, Second Class (E-5). *EW1:* Electronics Warfare Technician, First Class (E-6). *EWC:* Chief Electronics Warfare Technician (E-7). *EWCS:* Senior Chief Electronics Warfare Technician (E-8). *EWCM:* Master Chief Electronics Warfare Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on electronic warfare equipment; analyzes and evaluates received signals. *EW3:* Operates electronic signal analyzing equipment; operates electronic direction-finding equipment; maintains radio frequency transmission systems; performs maintenance on electronic warfare equipment; reads and interprets electronic block diagrams. If NEC is 1733, Electronic Warfare Systems Technician (AN/SLQ-32(V)2), performs corrective and preventive maintenance on electronic warfare support system; if NEC is 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), performs preventive and corrective maintenance on electronic warfare DECM system. *EW2:* Able to perform the duties required for EW3; tests analog and digital circuits, servomechanisms, and digital logic and interconnecting circuits; operates general purpose test equipment, including power meters, oscilloscopes, signal generators, counters, pulse generators, and time/frequency domain reflectometers; reads and interprets electrical/electronic schematics and blueprints for maintenance and modifications; inventories installed equipment and spare part support. *EW1:* Able to perform the duties required for EW2; analyzes electronic systems faults and initiates corrective action; analyzes test equipment defects and determines corrective action; trains electronics warfare operators in signal analysis and equipment operation; prepares weekly preventive maintenance schedules. *EWC:* Able to perform the duties required for EW1; tests and evaluates newly-installed or repaired electronic warfare equipment; conducts electronic interference surveys and recommends corrective action; supervises an operational training program for electronic warfare personnel; supervises and trains personnel in maintenance procedures; coordinates test equipment calibration requirements and procedures; writes messages and prepares reports; prepares quarterly maintenance schedules. *EWCS:* Able to perform the duties required for EWC; administers a long-range planned maintenance program; coordinates the collection, preparation, and dissemination of technical information pertaining to test, maintenance, and repair of electronic warfare systems; prepares directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; organizes and schedules training programs. *EWCM:* Able to perform the duties required for EWCS; plans, organizes, and implements electronic warfare activities; forecasts future requirements; develops operating budgets and monitors expenditures.

Recommendation, EW3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 1 in digital principles, 1 in solid state electronics, 1 in computer systems and organization, 1 in control systems (electronic), and 1 in communications (electronic); if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2), or 1734, Electronic Warfare System Technician (SLQ-32(V)3), 3 semester hours in electronic systems troubleshooting and maintenance (5/92).

Recommendation, EW2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 2 in computer systems and organization, 2 in control systems (electronic), and 2 in communications (electronic); if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2), or 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), 3 semester hours in electronic systems troubleshooting and maintenance (5/92).

Recommendation, EW1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 2 in computer systems and organization, 2 in control systems (electronic), 2 in communications (electronic), 2 in personnel supervision, 2 in maintenance management, and 2 in records and information management; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2), or 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), 3 semester hours in electronic systems troubleshooting and maintenance (5/92).

Recommendation, EWC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 2 in computer systems and organization, 2 in control systems (electronic), 2 in communications (electronic), 3 in personnel supervision, 3 in maintenance management, and 3 in records and information management; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2), or 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), 3 semester hours in electronic systems troubleshooting and maintenance (5/92).

Recommendation, EWCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 2 in computer systems and organization, 2 in control systems (electronic), 2 in communications (electronic), 3 in personnel supervision, 3 in maintenance management, and 3 in records and information management; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2), or 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), 3 semester hours in electronic systems troubleshooting and maintenance. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (5/92).

Recommendation, EWCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 1 in DC circuits, 1 in AC circuits, 2 in digital principles, 2 in solid state electronics, 2 in computer systems and organization, 2 in control systems (electronic), 2 in communications (electronic), 3 in personnel supervision, 3 in maintenance management, and 3 in records and information management; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2), or 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), 3 semester hours in electronic systems troubleshooting and maintenance. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, 3 in operations management, and 3 in communication techniques for managers (5/92).

NER-EW-003

Electronics Warfare Technician
EW3
EW2
EW1
EWC
EWCS
EWCM

Exhibit Dates: 5/96–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman (E-3). *EW3:* Electronics Warfare Technician, Third Class (E-4). *EW2:* Electronics Warfare Technician, Second Class (E-5). *EW1:* Electronics Warfare Technician, First Class (E-6). *EWC:* Chief Electronics Warfare Technician (E-7). *EWCS:* Senior Chief Electronics Warfare Technician (E-8). *EWCM:* Master Chief Electronics Warfare Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on electronic warfare equipment; analyzes and evaluates received signals. *EW3:* Operates electronic signal analyzing equipment; operates electronic direction-finding equipment; maintains radio frequency transmission systems; performs maintenance on electronic warfare equipment; reads and interprets electronic block diagrams. If NEC is 1733, Electronic Warfare Systems Technician (AN/SLQ-32(V)2), performs corrective and preventive maintenance on electronic warfare support system; if NEC is 1734, Electronic Warfare Systems Technician (SLQ-32(V)3), performs preventive and corrective maintenance on electronic warfare DECM system; if NEC is 1738, Journeyman Technician, troubleshoots and repairs electronic systems to component level; if NEC is 1781, Advanced Applications, interprets data. *EW2:* Able to perform the duties required for EW3; tests analog and digital circuits, servomechanisms, and digital logic and interconnecting circuits; operates general purpose test equipment, including power meters, oscilloscopes, signal generators, counters, pulse generators, and time/frequency domain reflectometers; reads and interprets electrical/electronic schematics and blueprints for maintenance and modifications; inventories installed equipment and spare part support. *EW1:* Able to perform the duties required for EW2; analyzes electronic systems faults and initiates corrective action; analyzes test equipment defects and determines corrective action; trains electronics warfare operators in signal analysis and equipment operation; prepares weekly preventive maintenance schedules. *EWC:* Able to perform the duties required for EW1; tests and evaluates newly-installed or repaired electronic warfare equipment; conducts electronic interference surveys and recommends corrective action; supervises an operational training program for electronic warfare personnel; supervises and trains personnel in maintenance procedures; coordinates test equipment calibration requirements and procedures; writes messages and prepares reports; prepares quarterly maintenance schedules. *EWCS:* Able to perform the duties required for EWC; administers a long-range planned maintenance program; coordinates the collection, preparation, and dissemination of technical information pertaining to test, maintenance, and repair of electronic warfare systems; prepares directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; organizes and schedules training programs. *EWCM:* Able to perform the duties required for EWCS; plans, organizes, and implements electronic warfare activities; forecasts future requirements; develops operating budgets and monitors expenditures.

Recommendation, EW3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in principles of electronics, 2 in computer systems troubleshooting and maintenance, and 2 in computer systems operation; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2); 1734, Electronic Warfare System Technician (SLQ-32(V)3); 1738, Journeyman Technician; or 1781, Advanced Applications, 3 semester hours in electronic systems troubleshooting and maintenance (5/96).

Recommendation, EW2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in principles of electronics, 3 in computer systems troubleshooting and maintenance, and 3 in computer systems operation; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2); 1734, Electronic Warfare System Technician (SLQ-32(V)3); 1738, Journeyman Technician; or 1781, Advanced Applications, 3 semester hours in electronic systems troubleshooting and maintenance (5/96).

Recommendation, EW1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in principles of electronics, 6 in computer systems troubleshooting and maintenance, and 6 in computer systems operation; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2); 1734, Electronic Warfare System Technician (SLQ-32(V)3); 1738, Journeyman Technician; or 1781, Advanced Applications, 3 semester hours in electronic systems troubleshooting and maintenance (5/96).

Recommendation, EWC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in principles of electronics, 6 in computer systems troubleshooting and maintenance, and 6 in computer systems operation; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2); 1734, Electronic Warfare System Technician (SLQ-32(V)3); 1738, Journeyman Technician; or 1781, Advanced Applications, 3 semester hours in electronic systems troubleshooting and maintenance. In the upper-division baccalaureate category, 3 semester hours in human resource management, 3 in management information systems, and 2 in data analysis and management (5/96).

Recommendation, EWCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in principles of electronics, 6 in computer systems troubleshooting and maintenance, and 6 in computer systems operation; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2); 1734, Electronic Warfare System Technician (SLQ-32(V)3); 1738, Journeyman Technician; or 1781, Advanced Applications, 3 semester hours in electronic systems troubleshooting and maintenance. In the upper-division baccalaureate category, 4 semester hours in human resource management, 3 in management information systems, and 4 in data analysis and management (5/96).

Recommendation, EWCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in principles of electronics, 6 in computer systems troubleshooting and maintenance, and 6 in computer systems operation; if NEC was 1733, Electronic Warfare System Technician (AN/SLQ-32(V)2); 1734, Electronic Warfare System Technician (SLQ-32(V)3); 1738, Journeyman Technician; or 1781, Advanced Applications, 3 semester hours in electronic systems troubleshooting and maintenance. In the upper-division baccalaureate category, 6 semester hours in human resource management, 3 in management information systems, and 6 in data analysis and management (5/96).

NER-FC-001

FIRE CONTROLMAN

FC3
FC2
FC1
FCC
FCCS
FCCM

Exhibit Dates: 1/90–Present.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *FC3:* Fire Controlman, Third Class (E-4). *FC2:* Fire Controlman, Second Class (E-5). *FC1:* Fire Controlman, First Class (E-6). *FCC:* Chief Fire Controlman (E-7). *FCCS:* Senior Chief Fire Controlman (E-8). *FCCM:* Master Chief Fire Controlman (E-9).

Description

Summary: Operates, repairs, and performs maintenance on shipboard gun fire control systems (including submarine weapon control systems and associated test equipment) and surface missile fire control systems (including weapon direction systems and search radar), telemetry equipment, missiles, and associated support equipment. *FC3:* Troubleshoots and repairs electrical and electronic gun fire control systems and surface missile fire control systems; performs preventive maintenance on weapons; follows standard checkout procedures to locate and repair system malfunctions; tests, aligns, and adjusts radar-indicating circuits and power supplies; uses test equipment, including voltmeters, oscilloscopes, and signal generators; performs operational tests and operator adjustments on weapon equipment; operates radar equipment, fire control systems, and weapons direction/designation systems in all modes; fabricates, maintains, and installs electrical/electronic cable assemblies; performs electromechanical maintenance; completes maintenance forms; inventories parts and supplies. *FC2:* Able to perform the duties required for FC3; repairs, troubleshoots, and performs preventive maintenance on electrical and electronic gun fire control systems, specialized equipment, and circuits; reads schematics and block diagrams; completes maintenance reports; inventories installed equipment. *FC1:* Able to perform the duties required for FC2; analyzes fire control systems failures and directs corrective maintenance action; coordinates shop activities and serves as weapon systems test coordinator; diagnoses nonroutine malfunctions and provides the expertise necessary to affect repairs; inspects completed work assignments; tests, analyzes, isolates faults, and adjusts digital computers; prepares weekly maintenance schedules. *FCC:* Able to perform the duties required for FC1; plans and implements inspection programs and safety inspections; prepares periodic reports; serves as shop supervisor; prepares quarterly maintenance schedules. *FCCS:* Able to perform the duties required for FCC; advises and provides information on reliability, utilization, capabilities, and operations of weapons department; prepares directives and instructions for attaining organization objectives; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; organizes and schedules training programs; administers a long-range planned maintenance program. *FCCM:* Able to perform the duties required for FCCS; provides technical information and advice concerning operational employment of weapons equipment; plans, organizes, implements, and controls activities; forecasts future requirements and reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, FC3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in applied mathematics (10/87).

Recommendation, FC2

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, and 3 in basic blueprint reading (10/87).

Recommendation, FC1

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (10/87).

Recommendation, FCC

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations (10/87).

Recommendation, FCCS

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (10/87).

Recommendation, FCCM

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (10/87).

NER-FN-002

FIREMAN

FN

Exhibit Dates: 1/90–Present.

Career Pattern

Fireman is a general rate (Naval apprenticeship) for persons at paygrade E-1 (recruit), E-2 (Fireman apprentice), and E-3 (Fireman). At paygrade E-4 (petty officer, third class), the person may enter any one of the following ratings: Boiler Technician (BT), Electrician's Mate (EM), Engineman (EN), Gas Turbine System Technician (GS), Interior Communications Electrician (IC), Machinist's Mate (MM), Damage Controlman (DC), Hull Maintenance Technician (HT), Machinery Repairman (MR), Molder (ML), or Patternmaker (PM).

Description

Performs all basic fireman apprenticeship functions in engineering areas aboard ship, involving cleanliness, operation, maintenance, and preservation of main propulsion, auxiliary steam or diesel machinery, steam or diesel generators, various pumps, motors, and associated equipment; identifies basic types and components of naval boilers, steam turbines, reduction gears, propellers and shafting, shipboard electric systems, and internal combustion engines; performs routine maintenance procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to marine engineering and 1 in blueprint reading; if qualified as a swimmer, first class, 1 semester hour in swimming and additional credit in swimming on the basis of institutional evaluation. Credit for Fireman should be granted only after paygrade E-3 has been achieved (3/90).

NER-FT-002

FIRE CONTROL TECHNICIAN

FTCS
FTCM

Exhibit Dates: 1/90–2/96.

Occupational Field: 8 (Weapons Control).

Career Pattern

May progress from: FTBC, Chief Fire Control Technician, Ballistic Missile Fire Control (E-7); FTGC, Chief Fire Control Technician, Gun Fire Control (E-7); or MTC, Chief Missile Technician (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

FTCS: Able to perform the duties required for FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control), FTGC (Chief Fire Control Technician, Gun Fire Control), or MTC (Chief Missile Technician); advises and provides information on reliability, utilization, capabilities, and operations of weapons department; reviews directives and instructions for attaining organization objectives; prepares correspondence; organizes and schedules training programs; administers a long-range planned maintenance program. *FTCM:* Able to perform the duties required for FTCS; provides technical information and advice concerning operational employment of weapons equipment; plans, organizes, implements, and controls activities; forecasts future requirements and reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures; prepares staff studies.

Recommendation, FTCS

In the lower-division baccalaureate/associate degree category, use the recommendation for FTCG (Chief Fire Control Technician, Gun Fire Control) in exhibit NER-FTG-002; FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control) in exhibit NER-FTB-002; or MTC (Chief Missile Technician) in exhibit NER-MT-001 or NER-MT-002, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, FTCM

In the lower-division baccalaureate/associate degree category, use the recommendation for FTCG (Chief Fire Control Technician, Gun Fire Control) in exhibit NER-FTG-002, or FTBC (Chief Fire Control Technician, Ballistic Missile Fire Control) in exhibit NER-FTB-002, or MTC (Chief Missile Technician) in exhibit NER-MT-001 or NER-MT-002, as appropriate. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

NER-FT-003

Fire Control Technician
FT3
FT2
FT1
FTC
FTCS
FTCM

Exhibit Dates: 3/96–Present.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). *FT3:* Fire Control Technician, Third Class (E-4). *FT2:* Fire Control Technician, Second Class (E-5). *FT1:* Fire Control Technician, First Class (E-6). *FTC:* Chief Fire Control Technician (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

Summary: Operates, tests, repairs, and performs maintenance on fire control systems, equipment, and associated test equipment. *FT3:* Adjusts, aligns, and calibrates basic electronic circuits; under supervision, performs troubleshooting, calibration, adjustments, and tests on fire control and guidance systems; performs maintenance on optical alignment equipment; isolates and replaces faulty parts and components; identifies electrical components and parts from drawings and schematic diagrams; identifies basic circuits; prepares computer for all modes of operations; interprets printouts of computers and peripheral equipment; complies with nuclear weapons safety standards; orders repair parts; completes maintenance data forms. *FT2:* Able to perform the duties required for FT3; isolates and replaces defective circuit components; performs troubleshooting, calibration, adjustments, and tests on fire control and guidance systems and support subsystems; operates digital computer; maintains logs and records; completes maintenance reports; inventories installed equipment. *FT1:* Able to perform the duties required for FT2; inspects maintenance and repair work of weapons systems and auxiliary equipment; reviews completed maintenance data forms; prepares planned maintenance schedules; administers nuclear weapons security procedures; supervises subordinates. *FTC:* Able to perform the duties required for FT1; compiles and analyzes missile targeting data; serves as shop supervisor; coordinates and directs maintenance on fire control, guidance, test, and readiness equipment and support subsystems; serves as special weapons handling supervisor; ensures compliance with nuclear weapons safety rules; prepares reports; prepares quarterly maintenance schedules. *FTCS:* Able to perform the duties required for FTC; advises and provides information on reliability, utilization, capabilities, and operations of weapons systems; reviews directives and instructions for attaining organization objectives; prepares correspondence; organizes and schedules training programs; administers a long-range planned maintenance program. *FTCM:* Able to perform the duties required for FTCS; provides technical information and advice concerning operational employment of weapons equipment; plans, organizes, implements, and controls activities; forecasts future requirements and reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures; prepares staff studies.

Recommendation, FT3

In the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, and 1 in basic algebra and geometry (3/96).

Recommendation, FT2

In the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics, 3 in basic electronics laboratory, 4 in computer systems troubleshooting and maintenance, 2 in personnel supervision, and 2 in basic algebra and geometry (3/96).

Recommendation, FT1

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in basic electronics laboratory, 4 in computer systems troubleshooting and maintenance, 3 in personnel supervision, and 3 in basic algebra and geometry (3/96).

Recommendation, FTC

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in basic electronics laboratory, 4 in computer systems troubleshooting and maintenance, 3 in personnel supervision, 3 in maintenance management, and 3 in basic algebra and geometry (3/96).

Recommendation, FTCS

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in basic electronics laboratory, 4 in computer systems troubleshooting and maintenance, 3 in personnel supervision, 3 in maintenance management, and 3 in basic algebra and geometry. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/96).

Recommendation, FTCM

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in basic electronics laboratory, 4 in computer systems troubleshooting and maintenance, 3 in personnel supervision, 3 in maintenance management, and 3 in basic algebra and geometry. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/96).

Fire Control Technician, Gun Fire Control
FTG3
FTG2
FTG1
FTGC

Exhibit Dates: 1/90–2/96.

Occupational Field: 8 (Weapons Control).

Career Pattern

SN: Seaman (E-3). FTG3: Control Technician, Gun Fire Control, Third Class (E-4). FTG2: Fire Control Technician, Gun Fire Control, Second Class (E-5). FTG1: Fire Control Technician, Gun Fire Control, First Class (E-6). FTGC: Chief Fire Control Technician, Gun Fire Control (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

Summary: Operates, tests, repairs, and performs maintenance on shipboard gun fire control systems including submarine weapons control systems and associated test equipment. *FTG3:* Assists in troubleshooting and repairing electrical and electronic gun fire control systems; performs preventive maintenance on weapons; follows standard checkout procedures to locate and repair system malfunctions; operates target bearing transmitters and digital data storage devices; loads computer programs; complies with nuclear weapons safety standards; uses test equipment, including voltmeters, oscilloscopes, and signal generators; performs operational test and operator adjustments on weapon equipment; operates fire control systems and weapons direction/designation systems in all modes; fabricates, maintains, and installs electrical/electronic cable assemblies; completes maintenance forms; inventories parts and supplies; performs mathematical computations as necessary in plotting targets. *FTG2:* Able to perform the duties required for FTG3; writes and installs machine-coded maintenance procedures; repairs, troubleshoots, and performs preventive maintenance on electrical and electronic gun fire control systems and circuits; prepares computer for all modes of operations; reads schematics and block diagrams; evaluates performance of digital data systems; completes maintenance reports; inventories installed equipment. *FTG1:* Able to perform the duties required for FTG2; analyzes fire control systems failures and directs corrective maintenance action; supervises work of subordinates; coordinates shop activities and serves as weapon systems test coordinator; analyzes digital data equipment trends and determines corrective action; inspects completed work assignments; supervises fire control plots; tests, analyzes, and isolates faults and adjusts digital computers; prepares planned maintenance schedules. *FTGC:* Able to perform the duties required for FTG1; plans and implements inspection programs and safety inspections; prepares periodic reports; serves as shop supervisor; supervises torpedo/missile fire control system maintenance; prepares quarterly maintenance schedules; trains fire control plotting teams.

Recommendation, FTG3

In the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics, 2 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, and 1 in technical mathematics (12/89).

Recommendation, FTG2

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, 1 in solid state electronics, 2 in technical mathematics, and 2 in personnel supervision (12/89).

Recommendation, FTG1

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, 1 in solid state electronics, 2 in technical mathematics, and 3 in personnel supervision (12/89).

Recommendation, FTGC

In the lower-division baccalaureate/associate degree category, 4 semester hours in digital electronics, 3 in computer organization, 3 in basic electronics laboratory, 3 in computer systems troubleshooting and maintenance, 1 in solid state electronics, 2 in technical mathematics, 3 in personnel supervision, and 3 in maintenance management (12/89).

NER-GM-002

Gunner's Mate, Chief, Senior Chief, and Master Chief
GMC
GMCS
GMCM

Exhibit Dates: 1/90–Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

May progress from either GMG1, Gunner's Mate, Guns, First Class (E-6), or GMM1, Gunner's Mate, Missiles, First Class (E-6). *GMC:* Chief Gunner's Mate (E-7). *GMCS:* Senior Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

GMC: Able to perform the duties required for GMG1 (Gunner's Mate, Guns, First Class) or GMM1 (Gunner's Mate, Missiles, First Class); supervises maintenance of ordnance electrical and electronic systems; supervises the handling and storage of explosive ordnance components; supervises training programs; analyzes discrepancy trends and determines corrective action; prepares quarterly maintenance schedules; conducts inventories; supervises the shipboard environmental pollution control programs. *GMCS:* Able to perform the duties required for GMC; plans, organizes, implements, and controls work activities in the alignment, maintenance, repair, and operation of guns, missiles, and associated equipment; organizes, schedules, and evaluates effectiveness of training; administers a long-range planned maintenance program; controls expenditure of materials; prepares performance, inventory, and inspection reports on guns, missiles, and associated equipment; administers a program for interviewing, evaluating, and assigning personnel; writes directives and correspondence. *GMCM:* Able to perform the duties required for GMCS; coordinates and manages departmental ordnance safety program and the overhaul and repair of shipboard weapons systems; prepares operating budget and monitors expenditures; prepares periodic reports concerning equipment performance and maintenance; forecasts future requirements; plans, organizes, implements, and controls activities.

Recommendation, GMC

In the lower-division baccalaureate/associate degree category, use the recommendation for either GMG1 (Gunner's Mate, Guns, First Class) in exhibit NER-GMG-003 or GMM1 (Gunner's Mate, Missiles, First Class) in exhibit NER-GMM-003, plus 3 semester hours in maintenance management (12/89).

Recommendation, GMCS

In the lower-division baccalaureate/associate degree category, use the recommendation for either GMG1 (Gunner's Mate, Guns, First Class) in exhibit NER-GMG-003 or GMM1 (Gunner's Mate, Missiles, First Class) in exhibit NER-GMM-003, plus 3 semester hours in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, GMCM

In the lower-division baccalaureate/associate degree category, use the recommendation for either GMG1 (Gunner's Mate, Guns, First Class) in exhibit NER-GMG-003 or GMM1

(Gunner's Mate, Missiles, First Class) in exhibit NER-GMM-003, plus 3 semester hours in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

NER-GMG-003

Gunner's Mate, Guns
GMG3
GMG2
GMG1

Exhibit Dates: 1/90–Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). GMG3: Gunner's Mate, Guns, Third Class (E-4). GMG2: Gunner's Mate, Guns, Second Class (E-5). GMG1: Gunner's Mate, Guns, First Class (E-6). *GMC:* Chief Gunner's Mate (E-7). *GMCS:* Senior Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

Summary: Operates and performs maintenance on shipboard guns, gun mounts, ammunition handling equipment, and small arms; inspects and repairs electric, electronic, hydraulic, mechanical, and servo systems in shipboard guns, gun mounts, rocket launchers, and ammunition-handling equipment; tests and inspects gun and rocket ammunition. *GMG3:* Tests electrical/electronic components and parts and replaces printed circuit boards; inspects and services hydraulic equipment; handles and stows ordnance, pyrotechnics, and small arms; issues, maintains, and inventories pistols, rifles, and other small arms; operates mechanical and electrical test equipment; tests for short circuits using schematics and drawings; completes maintenance records and forms. *GMG2:* Able to perform the duties required for GMG3; analyzes and repairs electronic and electrical systems malfunctions; installs and maintains components on the hydraulic systems; uses demolition charges for emergency destruction; installs, aligns, and zeroes synchros; interprets data from alignment and indicating equipment and makes adjustments; repairs hydraulic pumps; operates gun mount dynamic test equipment; instructs personnel in the transferring, handling, and storage of ammunition; orders parts, supplies, and equipment; maintains maintenance records. *GMG1:* Able to perform the duties required for GMG2; supervises crews in transferring, handling, and storing ammunition; supervises maintenance and inspection procedures; diagnoses electronic and electrical malfunctions; operates an oscilloscope and interprets results; repairs power drives; repairs and adjusts gun mount mechanical, hydraulic, and pneumatic systems; prepares periodic equipment performance and maintenance reports and environmental pollution control report; prepares weekly maintenance schedules.

Recommendation, GMG3

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electrical laboratory, 1 in electrical systems troubleshooting and maintenance, and 1 in hydraulic systems troubleshooting and maintenance (12/89).

Recommendation, GMG2

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electrical laboratory, 2 in electrical systems troubleshooting and maintenance, 1 in hydraulic systems troubleshooting and maintenance, and 2 in personnel supervision (12/89).

Recommendation, GMG1

In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electrical laboratory, 3 in electrical systems troubleshooting and maintenance, 2 in hydraulic systems troubleshooting and maintenance, and 3 in personnel supervision (12/89).

NER-GMM-003

Gunner's Mate, Missiles
GMM3
GMM2
GMM1

Exhibit Dates: 1/90–Present.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). GMM3: Gunner's Mate, Missiles, Third Class (E-4). GMM2: Gunner's Mate, Missiles, Second Class (E-5). GMM1: Gunner's Mate, Missiles, First Class (E-6). *GMC:* Chief Gunner's Mate (E-7). *GMCS:* Master Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

Summary: Operates and performs maintenance on guided missile launching systems, missile launching groups, rocket launchers, guns, gun mounts, turrets, projectors, and associated handling equipment; inspects and repairs electrical, electronic, hydraulic, mechanical, and servo systems; tests and inspects ammunition and missiles and their components. *GMM3:* Tests and replaces circuit boards and components of electronic equipment; inspects and services hydraulic equipment; maintains hydraulic pipes, fittings, and pressure gauges; handles and stows explosive ordnance; tests for short circuits, ground, and continuity of interconnecting cables and wiring between components of electrical and electronic equipment; follows schematic diagrams and hydraulic system blueprints; installs mechanical alignment hardware; completes maintenance data forms; conducts supply inventories. *GMM2:* Able to perform the duties required for GMM3; performs systems operability tests; instructs crews in the handling and storage of explosives; inspects missile-handling equipment; adjusts and aligns launch equipment; maintains shop and equipment logs; orders repair parts and special tools. *GMM1:* Able to perform the duties required for GMM2; diagnoses intermittent, recurring, and interacting electrical and electronic malfunctions; supervises crews in missile and nuclear weapon handling; prepares equipment maintenance reports.

Recommendation, GMM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in digital principles, 2 in computer systems and organization, and 2 in computer systems troubleshooting and maintenance (12/89).

Recommendation, GMM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital principles, 1 in solid state electronics, 3 in computer systems and organization, 3 in computer systems troubleshooting and maintenance, and 2 in personnel supervision (12/89).

Recommendation, GMM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 4 in digital principles, 2 in solid state electronics, 4 in computer systems and organization, 3 in computer systems troubleshooting and maintenance, and 3 in personnel supervision (12/89).

NER-GS-001

Gas Turbine System Technician, Senior Chief
and Master Chief
GSCS
GSCM

Exhibit Dates: 1/90–4/92.

Occupational Field: 3 (Marine Engineering).

Career Pattern

May progress from GSEC, Chief Gas Turbine System Technician, Electrical (E-7), or GSMC, Chief Gas Turbine System Technician, Mechanical (E-7). *GSCS:* Senior Chief Gas Turbine System Mechanic (E-8). *GSCM:* Master Chief Gas Turbine System Mechanic (E-9).

Description

GSCS: Able to perform the duties required for GSMC (Chief Gas Turbine System Technician, Mechanical) or GSEC (Chief Gas Turbine System Technician, Electrical); provides guidance on technical information pertaining to operation, maintenance, and repair of gas turbine systems; interviews, evaluates, and assigns personnel; prepares correspondence, directives, and reports; maintains divisional training records; organizes and schedules training programs and evaluates their effectiveness; may supervise 25-30 persons. *GSCM:* Able to perform the duties required for GSCS; develops and monitors safety programs; prepares diagrams and equipment layouts; coordinates repair activities, and performs casualty analysis; forecasts future requirements; establishes goals and priorities; plans, implements, and controls activities in compliance with orders and directives; develops operating budgets and monitors expenditures.

Recommendation, GSCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 1 in technical writing, and 1 additional semester hour in personnel supervision; add either the 27 semester hours for GSMC (Chief Gas Turbine System Technician, Mechanical) in exhibit NER-GSM-001 (in the 1954-1989 Guide) or the 32 semester hours for GSEC (Chief Gas Turbine System Technician, Electrical), in exhibit NER-GSE-001, as appropriate. In the upper-division baccalaureate category, 3 semester hours in quality control, 3 in personnel management, and 3 for field experience in management (5/81).

Recommendation, GSCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in record keeping, 2 in technical writing, and 1 additional semester hour in personnel supervision; add either the 27 semester hours for GSMC (Chief Gas Turbine System Technician, Mechanical) in exhibit NER-GSM-001 (in the 1954-1989 Guide), or the 32 semester hours for GSEC (Chief Gas Turbine System Technician, Electrical) in exhibit NER-GSE-001, as appropriate.

In the upper-division baccalaureate category, 3 semester hours in quality control, 3 in personnel management, and 6 for field experience in management (5/81).

NER-GS-002

Gas Turbine System Technician, Senior Chief and Master Chief
GSCS
GSCM

Exhibit Dates: 5/92–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

May progress from GSEC, Chief Gas Turbine System Technician, Electrical (E-7), or GSMC, Chief Gas Turbine System Technician, Mechanical (E-7). *GSCS:* Senior Chief Gas Turbine System Mechanic (E-8). *GSCM:* Master Chief Gas Turbine System Mechanic (E-9).

Description

GSCS: Able to perform the duties required for GSCM (Chief Gas Turbine System Technician, Mechanical) or GSEC (Chief Gas System Technician, Electrical); provides guidance on technical information pertaining to operation, maintenance, and repair of gas turbine systems; interviews, evaluates, and assigns personnel; prepares correspondence, directives, and reports; maintains divisional training records; organizes and schedules training programs and evaluates their effectiveness; supervises environmental pollution control programs; administers maintenance and material management program and screens requests for tender or shipyard work; may supervise 25-30 persons. *GSCM:* Able to perform the duties required for GSCS; develops and monitors safety programs; prepares diagrams and equipment layouts; coordinates repair activities and performs casualty analysis; forecasts future requirements; establishes goals and priorities; plans, implements, and controls activities in compliance with orders and directives; develops operating budgets and monitors expenditures.

Recommendation, GSCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in maintenance management, and 3 in records and information management; add the credit recommended for: GSCM (Chief Gas Turbine System Technician, Mechanical) in exhibit NER-GSM-001 or NER-GSM-002; or GSCE (Chief Gas Turbine System Technician, Electrical) in exhibit NER-GSE-001 or NER-GSE-002. In the upper-division baccalaureate category, 3 semester hours in organizational management and 3 for field experience in management (5/92).

Recommendation, GSCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in maintenance management, and 3 in records and information management; add the credit recommended for: GSCM (Chief Gas Turbine System Technician, Mechanical) in exhibit NER-GSM-001 or NER-GSM-002; or GSCE (Chief Gas Turbine System Technician, Electrical) in exhibit NER-GSE-001 or NER-GSE-002. In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 for field experience in management, 3 in management problems, 3 in operations management, and 3 in communication techniques for managers (5/92).

NER-GSE-001

Gas Turbine System Technician, Electrical
GSE3
GSE2
GSE1
GSEC

Exhibit Dates: 1/90–4/92.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). GSE3: Gas Turbine System Technician, Electrical, Third Class (E-4). GSE2: Gas Turbine System Technician, Electrical, Second Class (E-5). GSE1: Gas Turbine System Technician, Electrical, First Class (E-6). GSEC: Chief Gas Turbine System Technician, Electrical (E-7). *GSCS:* Senior Chief Gas Turbine System Technician (E-8). *GSCM:* Master Chief Gas Turbine System Technician (E-9).

Description

Summary: Operates, repairs, and performs organizational and intermediate maintenance on electrical and electronic components of gas turbine engine, main propulsion machinery, auxiliary equipment, and control systems; repairs and performs maintenance on assigned electrical and electronic circuitry up to printed circuit module with an ability to continue to the component level. *GSE3:* Inspects, locates, identifies, and replaces faulty components; performs preventive maintenance on control and monitoring circuits; maintains electrical equipment such as motors, batteries, and bus transfer equipment; tests alarm and indicating system and locates faults; interprets technical drawings in the form of schematics, blueprints, and charts; operates and performs mechanical maintenance on propulsion systems; operates and recognizes fault indicators from dials, gauges, and controls; locates, interprets, and maintains files of publications, directives, manuals, and catalogs; operates engine control systems, electrical generators, and electric plant control equipment from local operating stations or switchboards; performs maintenance and checkout procedures on power supplies, engineering control systems, and electrical generator control units; locates equipment casualties to systems, subsystems, and circuits in main gas turbine control equipment; uses necessary test equipment for troubleshooting gas turbine control equipment; checks, repairs, or adjusts alarm and indicating systems. *GSE2:* Able to perform the duties required for GSE3; inserts and monitors diagnostic programs in order to diagnose malfunctions of digital data equipment; maintains electromechanical and electrohydraulic control systems; performs engineering system control checks and calibrations. *GSE1:* Able to perform the duties required for GSE2; diagnoses intermittent, recurring, and interacting electrical and electronic malfunctions; analyzes system control and monitoring circuit malfunctions and determines corrective action; coordinates and controls operation of engineering control system at control stations or consoles; inspects, monitors, and analyzes condition of all subsystems; trains and supervises subordinates in operation, maintenance, and repair of engineering control systems; reviews completed system forms and prepares schedules for preventive maintenance. *GSEC:* Able to perform the duties required for GSE1; prepares and maintains quarterly schedules, summaries, and performance logs; monitors system performance logs; estimates time and materials necessary for repair of gas turbine control and auxiliary systems; analyzes discrepancy trends, determines deficiencies, and develops inspection and corrective procedures; inspects installation, alteration, and repair of equipment; maintains accounting system forms, records, and reports.

Recommendation, GSE3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 3 in basic AC/DC theory, 1 in applied physics, 2 in motors and controls, 2 in blueprint reading, and 2 in technical mathematics; add 3 semester hours in electronic systems troubleshooting on the basis of institutional evaluation (5/81).

Recommendation, GSE2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 1 in applied physics, 3 in basic AC/DC theory, 2 in motors and controls, 2 in blueprint reading 2 in technical mathematics, 6 in systems troubleshooting, and 2 in digital fundamentals. In the upper-division baccalaureate category, 2 semester hours in quality control (5/81).

Recommendation, GSE1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 1 in applied physics, 3 in basic AC/DC theory, 2 in motors and controls, 2 in blueprint reading, 2 in technical mathematics, 6 in systems troubleshooting, 2 in digital fundamentals, 2 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours in quality control (5/81).

Recommendation, GSEC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics laboratory, 1 in applied physics, 3 in basic AC/DC theory, 2 in motors and controls, 2 in blueprint reading, 2 in technical mathematics, 6 in systems troubleshooting, 2 in digital fundamentals, 2 in personnel supervision, 3 in maintenance management, 3 in introduction to management, and 3 in safety management. In the upper-division baccalaureate category, 3 semester hours in quality control (5/81).

NER-GSE-002

Gas Turbine System Technician, Electrical
GSE3
GSE2
GSE1
GSEC

Exhibit Dates: 5/92–1/98.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). GSE3: Gas Turbine System Technician, Electrical, Third Class (E-4). GSE2: Gas Turbine System Technician, Electrical, Second Class (E-5). Description

Summary: Operates, repairs, and performs organizational and intermediate maintenance on electrical and electronic components of gas turbine engine, main propulsion machinery, auxiliary equipment, and control systems; repairs and performs maintenance on assigned electrical and electronic circuitry up to printed circuit module with an ability to continue to the component level. *GSE3:* Inspects, locates, identifies, and replaces faulty components; performs preventive maintenance on control and monitoring circuits; maintains electrical equipment such as motors, batteries, and bus transfer equipment; tests alarm and indicating system and locates faults; interprets technical drawings in the form of schematics, blueprints, and charts; operates and performs mechanical maintenance on propulsion systems; operates and recognizes fault indicators from dials, gauges, and controls; locates, interprets, and maintains files of publications, directives, manuals, and catalogs; operates engine control systems, electrical generators, and electric plant control equipment from local operating stations or switchboards; performs maintenance and checkout procedures on power supplies, engineering control systems, and electrical generator control units; locates equipment casualties to systems, subsystems, and circuits in main gas turbine control equipment; uses necessary test equipment for troubleshooting gas turbine control equipment; checks, repairs, or adjusts alarm and indicating systems; analyzes samples of fuel, oil, and water for quality assurance; detects and treats corrosion; monitors and minimizes pollution; maintains inventory; orders supplies and equipment. *GSE2:* Able to perform the duties required for GSE3; inserts and monitors diagnostic programs in order to diagnose malfunctions of digital data equipment; maintains electromechanical, pneumatic, and electrohydraulic control systems; performs engineering system control checks and calibrations; performs general and technical administration. *GSE1:* Able to perform the duties required for GSE2; diagnoses intermittent, recurring, and interacting electrical and electronic malfunctions; analyzes system control and monitoring circuit malfunctions and determines corrective action; coordinates and controls operation of engineering control system at control stations or consoles; inspects, monitors, and analyzes condition of all subsystems; trains and supervises personnel in operation, maintenance, and repair of engineering control systems; reviews completed system forms and prepares schedules for preventive maintenance; performs quality assurance inspections and training. *GSEC:* Able to perform the duties required for GSE1; supervises the maintenance, operation, and repair of electrical, electronic, propulsion, and auxiliary equipment; prepares and maintains quarterly schedules, summaries, and performance logs; monitors system performance logs; estimates time and materials necessary for repair of gas turbine control and auxiliary systems; analyzes discrepancy trends, determines deficiencies, and develops inspection and corrective procedures; inspects installation, alteration, and repair of equipment; maintains accounting system forms, records, and reports.

Recommendation, GSE3

In the lower-division baccalaureate/associate degree category, 1 semester hour in DC circuits, 1 in basic electricity laboratory, 2 in motors and generators, 2 in schematic diagrams, and 3 in electrical systems troubleshooting (2/98).

Recommendation, GSE2

In the lower-division baccalaureate/associate degree category, 2 semester hours in DC circuits, 2 in basic electricity laboratory, 2 in motors and generators, 2 in schematic diagrams, 3 in electrical systems troubleshooting, 3 in digital circuits, 2 in applied physics, 2 in control systems, and 1 in computer literacy (2/98).

Recommendation, GSE1

In the lower-division baccalaureate/associate degree category, 2 semester hours in DC circuits, 2 in basic electricity laboratory, 2 in motors and generators, 2 in schematic diagrams, 3 in electrical systems troubleshooting, 3 in digital circuits, 2 in applied physics, 2 in control systems, 2 in personnel supervision, 2 in maintenance management, 2 in records and information management, 2 in fluid analysis laboratory (POL), and 1 in computer literacy (2/98).

Recommendation, GSEC

In the lower-division baccalaureate/associate degree category, 2 semester hours in DC circuits, 2 in basic electricity laboratory, 2 in motors and generators, 2 in schematic diagrams, 3 in electrical systems troubleshooting, 3 in digital circuits, 2 in applied physics, 2 in control systems, 3 in personnel supervision, 3 in maintenance management, 3 in records and information management, 2 in fluid analysis laboratory (POL), and 1 in computer literacy (2/98).

NER-GSM-002

Gas Turbine System Technician, Mechanical

GSM3
GSM2
GSM1
GSMC

Exhibit Dates: 1/90–10/97.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). GSM3: Gas Turbine System Technician, Mechanical, Third Class (E-4). GSM2: Gas Turbine System Technician, Mechanical, Second Class (E-5). GSM1: Gas Turbine System Technician, Mechanical, First Class (E-6). GSMC: Chief Gas Turbine System Technician, Mechanical (E-7). *GSCS:* Senior Chief Gas Turbine System Technician (E-8). *GSCM:* Master Chief Gas Turbine System Technician (E-9).

Description

Summary: Operates, repairs, and performs maintenance on mechanical components of gas turbine engines, main propulsion machinery, auxiliary equipment, and propulsion control systems. *GSM3:* Troubleshoots and performs maintenance on hydraulic, electrical, and propulsion systems of a gas turbine; uses schematic diagrams, drawings, charts, and blueprints; fabricates and installs both high and low pressure tubing and hose; maintains logs and records. *GSM2:* Able to perform the duties required for GSM3; repairs hydraulic system components and pneumatic/hydraulic systems; repairs and maintains low pressure air compressors, and gas turbine reduction gear clutching assemblies; tests propulsion fuels and lubricants; makes pitch and valve adjustments; replaces seal rings; overhauls pumps; prepares and maintains daily fuel and water reports; requisitions supplies and equipment; operates propulsion console equipment. *GSM1:* Able to perform the duties required for GSM2; supervises propulsion machinery spaces; coordinates and controls operations of engineering control systems at the central control station; supervises the receiving, transferring, discharging, and storage of propulsion fuels and lubricants; trains and supervises personnel in the operation of engineering control systems; maintains, inspects, and monitors all systems; maintains records and prepares maintenance schedules. *GSMC:* Able to perform the duties required for GSM1; supervises engine change-outs and shipboard mechanical alterations; prepares summaries and quarterly preventive maintenance schedules; maintains accounting system forms, records, and reports; inspects the installation, alteration, and repair of equipment.

Recommendation, GSM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering (gas turbines), 3 in basic marine engineering (auxiliaries), 3 in maintenance technology, and 1 in blueprint reading (3/90).

Recommendation, GSM2

In the lower-division baccalaureate/associate degree category, 5 semester hours in basic marine engineering (gas turbines), 5 in basic marine engineering (auxiliaries), 6 in maintenance technology, 2 in blueprint reading, 1 in record keeping, and 1 in principles of supervision (3/90).

Recommendation, GSM1

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (gas turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in record keeping, 2 principles of supervision, and 1 in maintenance management (3/90).

Recommendation, GSMC

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (gas turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 2 in maintenance management (3/90).

Hospital Corpsman

HM3
HM2
HM1
HMC
HMCS
HMCM

Exhibit Dates: 1/90–4/92.

Occupational Field: 14 (Health Care).

Career Pattern

HN: Hospitalman (E-3). *HM3:* Hospital Corpsman, Third Class (E-4). *HM2:* Hospital Corpsman, Second Class (E-5). *HM1:* Hospital Corpsman, First Class (E-6). *HMC:* Chief Hospital Corpsman (E-7). *HMCS:* Senior Chief Hospital Corpsman (E-8). *HMCM:* Master Chief Hospital Corpsman (E-9).

Description

Summary: Serves as an assistant in the prevention and treatment of diseases and injuries and in the administration of medical departments. *HM3:* Administers first aid; assists with physical examinations; provides nursing care to patients; administers medicine and collects specimens; assists in the transportation of the sick and injured; performs cardiopulmonary resuscitation; performs emergency procedures for the treatment of common injuries; transcribes medical orders; writes admission nursing notes; admits, transfers, and discharges patients; maintains mechanical equipment on the ward. *HM2:* Able to perform the duties required for HM3; submits routine medical reports; supervises personnel in performance of clinic or ward duties; maintains medical journals, logs, and health records; prepares, processes, controls, and transmits optical-scan documents; instructs medical and nonmedical personnel in general and emergency medical care and in self-administration of medications; performs elementary laboratory procedures, such as urinalysis, blood count, and preparation of smears. *HM1:* Able to perform the duties required for HM2; performs supervisory duties in such areas as sick call, health care inspections, preventive medicine and environmental inspections; differentiates between normal and abnormal laboratory results; maintains health, dental, personnel, and accounting records; determines legal implications in routine and emergency medical care situations. *HMC:* Able to perform the duties required for HM1; supervises departmental administrative procedures and patient care delivery; plans, supervises, and coordinates health care programs; compiles budgetary statistical data; orders, receives, and issues supplies. *HMCS:* Able to perform the duties required for HMC; prepares directives and instructions for attaining organization objectives and improving operations; establishes a program for interviewing, evaluating, and assigning personnel for maximum utilization; prepares correspondence; organizes and schedules training programs. *HMCM:* Able to perform the duties required for HMCS; plans, organizes, and implements activities; reviews personnel, equipment, and material requirements and forecasts future requirements; establishes goals, objectives, and priorities; provides counseling on medical department training opportunities; develops operating budgets and monitors expenditures.

Recommendation, HM3

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation and 2 in advanced first aid. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 (12/81).

Recommendation, HM2

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, and 1 in human relations. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 (12/81).

Recommendation, HM1

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, 2 in human relations, 2 in personnel supervision, 3 in sanitation/environmental control, and 3 in personnel office procedures. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 (12/81).

Recommendation, HMC

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, 3 in human relations, 3 in personnel supervision, 3 in sanitation/environmental control, 3 in personnel office procedures, 2 in communication skills, and 3 in business organization. In the upper-division baccalaureate category, 3 semester hours in personnel management. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 (12/81).

Recommendation, HMCS

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, 3 in human relations, 3 in personnel supervision, 3 in sanitation/environmental control, 3 in personnel office procedures, 2 in communication skills, and 3 in business organization. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business management, 3 for field experience in management, 3 in human relations, and 3 in health care administration. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 (12/81).

Recommendation, HMCM

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 2 in advanced first aid, 3 in introduction to medical laboratory techniques, 3 in records management, 3 in human relations, 3 in personnel supervision, 3 in sanitation/environmental control, 3 in personnel office procedures, 2 in communication skills, and 3 in business organization. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in business management, 6 for field experience in management, 3 in human relations, 3 in health care administration, and 3 in health care planning. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 (12/81).

Description

Summary: Serves as an assistant in the prevention and treatment of diseases and injuries, and in the administration of medical departments. *HM3:* Administers first aid; assists with physical examinations and makes basic clinical assessments; provides nursing care to patients; administers medicine and collects specimens; assists in the transportation of the sick and injured; transcribes medical orders; writes admission nursing notes; admits, transfers, and discharges patients; maintains mechanical equipment on the ward. *HM2:* Able to perform the duties required for HM3; submits routine medical reports; supervises personnel in performance of clinic or ward duties; maintains medical journals, logs, and health records; prepares, processes, controls, and transmits optical-scan documents; instructs medical and nonmedical personnel in general and emergency medical care and in self-administration of medications; performs elementary laboratory procedures, such as urinalysis, blood count, and preparation of smears. *HM1:* Able to perform the duties required for HM2; performs supervisory duties in such areas as sick call, health care inspections, preventive medicine, and environmental inspections; differentiates normal and abnormal laboratory results; maintains health, dental, personnel, and accounting records; determines legal implications in routine and emergency medical care situations. *HMC:* Able to perform the duties required for HM1; supervises departmental administrative procedures and patient care delivery; plans, supervises, and coordinates health care programs; compiles budgetary statistical data; orders, receives, and issues supplies. *HMCS:* Able to perform the duties required for HMC; prepares directives and instructions for attaining organization objectives and improving operations; establishes a program for interviewing, evaluating, and assigning personnel for maximum utilization; prepares correspondence; organizes and schedules training programs. *HMCM:* Able to perform the duties required for HMCS; plans, organizes, and implements activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; establishes goals, objectives, and priorities; provides counseling on medical department training opportunities; develops operating budgets and monitors expenditures.

Recommendation, HM3

In the lower-division baccalaureate/associate degree category, 2 semester hours in clinical nursing practice and 2 in physical assessment. Add the credit recommended for Hospitalman (E-3) in exhibit NER-HN-001 or NER-HN-002, depending on the time frame during which the rank of E-3 was held (5/93).

Recommendation, HM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in clinical nursing practice, 2 in physical assessment, 2 in personnel supervision, and 3 in records and information management. Add the credit recommended for Hospitalman (E-3) in either exhibit NER-HN-001 or NER-HN-002, depending on the time frame during which the rank of E-3 was held (5/93).

Recommendation, HM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in clinical nursing practice, 2 in physical assessment, 3 in personnel supervision, and 3 in records and information management. In the upper-division baccalaureate category, 3 semester hours in health care facilities management. Add the credit recommended for Hospitalman (E-3) in either exhibit NER-HN-001 or NER-HN-002, depending on the time frame during which the rank of E-3 was held (5/93).

Recommendation, HMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in clinical nursing practice, 2 in physical assessment, 3 in personnel supervision, and 3 in records and information management. In the upper-division baccalaureate category, 4 semester hours in health care facilities management and 3 in communication techniques for managers. Add the credit recommended for Hospitalman (E-3) in either exhibit NER-HN-001 or NER-HN-002, depending on the time frame during which the rank of E-3 was held (5/93).

Recommendation, HMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in clinical nursing practice, 2 in physical assessment, 3 in personnel supervision, and 3 in records and information management. In the upper-division baccalaureate category, 4 semester hours in health care facilities management, 3 in communication techniques for managers, 3 in human resource management, 3 for field experience in management, and 3 in management problems. Add the credit recommended for Hospitalman (E-3) in either exhibit NER-HN-001 or NER-HN-002, depending on the time frame during which the rank of E-3 was held (5/93).

Recommendation, HMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in clinical nursing practice, 2 in physical assessment, 3 in personnel supervision, and 3 in records and information management. In the upper-division baccalaureate category, 4 semester hours in health care facilities management, 3 in communication techniques for managers, 3 in human resource management, 6 for field experience in management, and 3 in management problems. Add the credit recommended for Hospitalman (E-3) in either exhibit NER-HN-001 or NER-HN-002, depending on the time frame during which the rank of E-3 was held (5/93).

NER-HN-001

HOSPITALMAN
HN

Exhibit Dates: 1/90–4/92.

Career Pattern

Hospitalman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Hospitalman apprentice), and E-3 (Hospitalman). At pay grade E-4 (petty officer, third class), the person progresses to the Hospital Corpsman (HM) rating.

Description

Performs basic nursing care; applies bandages, splints, and dressings; takes and records vital signs; collects specimens; under direction, administers medication; identifies the basic elements and functions of the circulatory, respiratory, digestive, urogenital, musculoskeletal, and nervous systems; keeps medical department equipment and spaces clean and sanitary; performs routine clerical duties of the ward.

Recommendation

In the vocational certificate category, the training is equivalent to a one-year practical nursing program, including basic knowledge in the following areas: nursing techniques and clinical applications, basic anatomy and physiology, pharmacology, and medical terminology. In the lower-division baccalaureate/associate degree category, 2 semester hours in health and hygiene, 3 in nursing techniques, 4-5 in clinical nursing, 2 in emergency medical techniques, 1 in medical terminology, and credit in anatomy and physiology on the basis of institutional evaluation. Credit for Hospitalman (HN) should be granted only after pay grade E-3 has been achieved (12/81).

NER-HN-002

HOSPITALMAN
HN

Exhibit Dates: 5/92–Present.

Career Pattern

Hospitalman is a general rate (Naval apprenticeship) for persons at pay grades E-1 (recruit), E-2 (Hospitalman apprentice), and E-3 (Hospitalman). At pay grade E-4 (petty officer, third class), the person progresses to the Hospital Corpsman (HM) rating.

Description

Performs basic nursing care; performs basic emergency and CPR procedures; takes and records vital signs; collects specimens; performs phlebotomy and IV insertions; under direction, administers medication; identifies the basic elements and functions of the circulatory, respiratory, digestive, urogenital, musculoskeletal, and nervous systems; keeps medical department equipment and spaces clean and sanitary; performs routine clerical duties of the ward; promotes patient wellness.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation, 1 in infection control procedures, 2 in health and wellness, 2 in phlebotomy procedures, 3 in nursing procedures, 4 in clinical nursing practice, 3 in emergency medical procedures, and 1 in medical terminology. Credit for Hospitalman (HN) should be granted only after pay grade E-3 has been achieved (5/93).

NER-HT-002

HULL MAINTENANCE TECHNICIAN
HT3
HT2
HT1
HTC
HTCS
HTCM

Exhibit Dates: 1/90–10/97.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *HT3:* Hull Maintenance Technician, Third Class (E-4). *HT2:* Hull Maintenance Technician, Second Class (E-5). *HT1:* Hull Maintenance Technician, First Class (E-6). *HTC:* Chief Hull Maintenance Technician (E-7). *HTCS:* Senior Chief Hull Maintenance Technician (E-8). *HTCM:* Master Chief Hull Maintenance Technician (E-9).

Description

Summary: Performs repairs to the ship's hull, plumbing and piping systems, and structural members. *HT3:* Performs brazing, electrical arc welding, oxyacetylene welding and cutting, and MIG/TIG welding; repairs ship plumbing and piping systems; fabricates damage control patches, sheet metal ducting, brackets, ladders, and platforms; controls discharging and pumping of waste in restricted water; completes maintenance data forms; orders repairs parts and tools. *HT2:* Able to perform the duties required for HT3; performs gas-free testing of voids and compartments to ensure safe entry; performs repairs to ship structure using heavy gauge metal; completes maintenance reports; inventories installed equipment. *HT1:* Able to perform the duties required for HT2; organizes and supervises damage repair parties; prepares training records; reviews completed maintenance data forms; prepares weekly maintenance schedules. *HTC:* Able to perform the duties required for HT1; plans and conducts damage repair exercises; maintains shop records and prepares progress reports; supervises training programs; estimates time, personnel, and material requirements; prepares quarterly maintenance schedules; supervises a hull maintenance technician shop. *HTCS:* Able to perform the duties required for HTC; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; prepares correspondence; organizes and evaluates training programs; administers a long-range planned maintenance program. *HTCM:* Able to perform the duties required for HTCS; reviews personnel, equipment, and material requirements and forecasts future requirements; plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation, HT3

In the lower-division baccalaureate/associate degree category, 2 semester hours in oxyacetylene welding, 2 in arc welding, 2 in MIG/TIG welding, 2 in plumbing and pipefitting, 1 in blueprint reading, and 1 in maintenance technology (3/90).

Recommendation, HT2

In the lower-division baccalaureate/associate degree category, 3 semester hours in oxyacetylene welding, 3 in arc welding, 3 in MIG/TIG welding, 3 in plumbing and pipefitting, 2 in blueprint reading, 2 in maintenance technology, and 1 in record keeping (3/90).

Recommendation, HT1

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology, 1 in record keeping, 2 in principles of supervision, and 2 in maintenance management (3/90).

Recommendation, HTC

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology, 2 in record keeping, 3 in principles of supervision, and 3 in maintenance management (3/90).

Recommendation, HTCS

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology, 2 in record keeping, 3 in principles of supervision, and 4 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, HTCM

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology, 2 in record keeping, 3 in principles of supervision, and 5 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology (preventive), 3 in personnel supervision, 3 in applied computer technology, and 3 in maintenance management (11/97).

Recommendation, HTCS

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology (preventive), 3 in personnel supervision, 3 in applied computer technology, and 4 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (11/97).

Recommendation, HTCM

In the lower-division baccalaureate/associate degree category, 4 semester hours in oxyacetylene welding, 4 in arc welding, 4 in MIG/TIG welding, 4 in plumbing and pipefitting, 2 in blueprint reading, 3 in maintenance technology (preventive), 3 in personnel supervision, 3 in applied computer technology, and 5 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (11/97).

NER-IC-001

INTERIOR COMMUNICATIONS ELECTRICIAN
IC3
IC2
IC1
ICC
ICCS

Exhibit Dates: 1/90–Present.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *IC3:* Interior Communications Electrician, Third Class (E-4). *IC2:* Interior Communications Electrician, Second Class (E-5). *IC1:* Interior Communications Electrician, First Class (E-6). *ICC:* Chief Interior Communications Electrician (E-7). *ICCS:* Senior Chief Interior Communications Electrician (E-8). *EMCM:* Master Chief Electrician's Mate (E-9).

Description

Summary: Operates and performs maintenance on voice interior communications systems, alarm systems, warning systems, ship's control systems, plotting systems, gyrocompass systems, and entertainment systems. *IC3:* Operates standard test and metering equipment, including multimeter, voltmeter, ammeter, ohmmeter, oscilloscope, signal generator, frequency meter, vacuum tube voltmeter, and megger; makes standard wire splices; tests and operates alarm and indicating systems; troubleshoots and repairs synchro systems; inspects, tests, maintains, charges, and replaces batteries; repairs components of general announcing systems and sound-powered telephone systems; cleans and inspects plotters and dead reckoning equipment; tests external circuits of interior communications equipment for continuity, short circuits, and grounds and measures electrical quantities; reads and interprets schematic diagrams and blueprints of basic electrical, electronic, and logic circuits. *IC2:* Able to perform the duties required for IC3; troubleshoots and repairs ship's metering, alarm, and indicating systems; troubleshoots and repairs synchro-amplifiers, servo systems, and tape recorders/producers; maintains microfiche readers/printers; isolates and repairs malfunctions in common electronic circuits; inspects and cleans commutators and adjusts brushes on motors and generators; inventories installed equipment and spare parts; may supervise up to three third class Interior Communications Electricians. *IC1:* Able to perform the duties required for IC2; isolates troubles in dead-reckoning systems including gyrocompass; tests, replaces, and adjusts components on the interior communication and local switchboards; determines types of acceptable substitute components; checks operating logs and maintenance records; prepares weekly maintenance schedules; may supervise up to five Interior Communications Electricians. *ICC:* Able to perform the duties required for IC1; analyzes and evaluates electrical and electronic tests; adjusts, calibrates, and repairs interior communications equipment; plans, organizes, and directs work of personnel operating and maintaining interior communications systems; estimates time, materials, and labor required for repair of equipment. *ICCS:* Able to perform the duties required for ICC; advises on the opening and inspection of equipment and preparation of work request; provides information and advises on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel; administers a long-range planned maintenance program.

Recommendation, IC3

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 4 in troubleshooting techniques, 5 in electrical/electronic circuits, and 4 in electrical/mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/

mechanical systems, and 2 in applied mathematics (10/87).

Recommendation, IC2

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 6 in troubleshooting techniques, 6 in electrical/electronic circuits, and 4 in electrical/mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, and 1 in digital electronics; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation (10/87).

Recommendation, IC1

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 8 in troubleshooting techniques, 6 in electrical/electronic circuits, and 4 in electrical/mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 2 in maintenance management, and 2 in personnel supervision; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis on institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits (10/87).

Recommendation, ICC

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 8 in troubleshooting techniques, 6 in electrical/electronic circuits, and 4 in electrical/mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 3 in maintenance management, 3 in personnel supervision, 1 in record keeping, and 1 in report writing; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits (10/87).

Recommendation, ICCS

In the vocational certificate category, 5 semester hours in basic electricity/electronics, 8 in troubleshooting techniques, 6 in electrical/electronic circuits, and 4 in electrical/mechanical systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics, 2 in electrical/electronics laboratory, 2 in troubleshooting techniques, 3 in electrical/electronic circuits, 3 in electrical/mechanical systems, 2 in applied mathematics, 2 in digital electronics, 3 in human relations, 3 in maintenance management, 3 in personnel supervision, 1 in record keeping, and 1 in report writing; if assigned to gas turbine propulsion systems, credit in gas turbine technology on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in electrical circuits, 3 for field experience in management, and 3 in management problems (10/87).

NER-IM-002

INSTRUMENTMAN
IM3
IM2
IM1
IMC
IMCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

SN: Seaman (E-3). *IM3:* Instrumentman, Third Class (E-4). *IM2:* Instrumentman, Second Class (E-5). *IM1:* Instrumentman, First Class (E-6). *IMC:* Chief Instrumentman (E-7). *IMCS:* Senior Chief Instrumentman (E-8). *PICM:* Master Chief Opticalman (E-9).

Description

Summary: Performs maintenance on mechanical instruments, office machines, and Navy timepieces and implements mechanical instrument repair and calibration shop procedures. *IM3:* Uses schematic diagrams; prepares sketches of mechanical parts; manufactures and maintains instrument repair and calibration tools; brazes brass and steel; tempers, hardens, and anneals metals; determines nominal value of measuring instruments and related test equipment; calibrates and adjusts pressure instruments and vacuum measuring instruments, centrifugal tachometers, bimetallic thermometers, and torque measuring tools; completes correct forms, labels, and tags during calibration; disassembles, cleans, lubricates, and repairs measurement devices and performs casualty analysis; exercises precautions and safety procedures to prevent contamination of oxygen and nitrogen test instruments; operates demagnetizers; reassembles, adjusts, and repairs various types of office equipment. *IM2:* Able to perform the duties required for IM3; calibrates and adjusts flow, temperature, pressure, and level instruments; adjusts and repairs electric typewriters; operates and maintains jeweler's lathe and attachments; completes maintenance reports; prepares and maintains shop work records; inventories installed equipment; orders repair parts and special tools. *IM1:* Able to perform the duties required for IM2; calibrates resistance thermometer indicators and pressure working standards; calibrates and adjusts liquid level indicators, absolute pressure gages, hydraulic, remote reading, and liquid level systems, and thermocouple and resistance thermometer systems; supervises repair of watches and clocks; disassembles cash registers and liquid, thermal, and coated paper reproduction equipment; instructs personnel; ensures that Navy calibration procedures are current; prepares preventive maintenance schedules; plans and supervises report work. *IMC:* Able to perform the duties required for IM1; directs operations and repair of test equipment in instrument repair work center; supervises operation and use of office machine test equipment and special tools; manages the maintenance, calibration, and repair of jeweled instruments and the maintenance, repair, procurement, and utilization of all parts and machines in stock; informs supervisors about new developments and procedures pertaining to precision measuring instruments and design, use, and support of office equipment; instructs personnel in techniques and procedures of repair of temperature, fluid, and flow measuring instruments, watches, clocks, and office machines; prepares quarterly maintenance schedules; supervises maintenance, repair and calibration activities; disassembles, cleans, reassembles, adjusts, and repairs rotary and electronic calculators and dual spectrum and electrostatic reproduction equipment. *IMCS:* Able to perform the duties required for IMC; prepares directives and instructions for attaining organizational objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; administers repair and maintenance records; organizes and schedules training programs, evaluates their effectiveness, and initiates improvements; coordinates quality assurance audits; coordinates and prepares work estimates; directs quality assurance program; administers a long-range maintenance program.

Recommendation, IM3

In the vocational certificate category, 1 semester hour in office machine repair. In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 2 in machine tool operation, 2 in instrumentation technology, and 1 in record keeping (3/90).

Recommendation, IM2

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 3 in machine tool operation, 4 in instrumentation technology, 1 in record keeping, and 1 in principles of supervision (3/90).

Recommendation, IM1

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 6 in instrumentation technology, 2 in maintenance management, 2 in record keeping, and 2 in principles of supervision (3/90).

Recommendation, IMC

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 6 in instrumentation technology, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision (3/90).

Recommendation, IMCS

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 6 in instrumentation technology, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

IM2
IM1
IMC
IMCS
IMCM

Exhibit Dates: 1/91–Present.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

SN: Seaman (E-3). *IM3:* Instrumentman, Third Class (E-4). *IM2:* Instrumentman, Second Class (E-5). *IM1:* Instrumentman, First Class (E-6). *IMC:* Chief Instrumentman (E-7). *IMCS:* Senior Chief Instrumentman (E-8). *IMCM:* Master Chief Instrumentman (E-9).

Description

Summary: Performs maintenance on mechanical instruments, office machines, and Navy timepieces and implements mechanical instrument repair and calibration shop procedures. *IM3:* Uses schematic diagrams; prepares sketches of mechanical parts; manufactures and maintains instrument repair and calibration tools; brazes brass and steel; tempers, hardens, and anneals metals; determines nominal value of measuring instruments and related test equipment; calibrates and adjusts pressure instruments and vacuum measuring instruments, centrifugal tachometers, bimetallic thermometers, and torque measuring tools; completes correct forms, labels, and tags during calibration; disassembles, cleans, lubricates, and repairs measurement devices and performs casualty analysis; exercises precautions and safety procedures to prevent contamination of oxygen and nitrogen test instruments; operates demagnetizers; reassembles, adjusts, and repairs various types of office equipment. *IM2:* Able to perform the duties required for IM3; calibrates and adjusts flow, temperature, pressure, and level instruments; adjusts and repairs electric typewriters; operates and maintains jeweler's lathe and attachments; completes maintenance reports; prepares and maintains shop work records; inventories installed equipment; orders repair parts and special tools. *IM1:* Able to perform the duties required for IM2; calibrates resistance thermometer indicators and pressure working standards; calibrates and adjusts liquid level indicators, absolute pressure gages, hydraulic, remote reading, and liquid level systems, and thermocouple and resistance thermometer systems; supervises repair of watches and clocks; disassembles cash registers and liquid, thermal, and coated paper reproduction equipment; instructs personnel; ensures that Navy calibration procedures are current; prepares preventive maintenance schedules; plans and supervises report work. *IMC:* Able to perform the duties required for IM1; directs operations and repair of test equipment in instrument repair work center; supervises operation and use of office machine test equipment and special tools; manages the maintenance, calibration, and repair of jeweled instruments and the maintenance, repair, procurement, and utilization of all parts and machines in stock; informs supervisors about new developments and procedures pertaining to precision measuring instruments and design, use, and support of office equipment; instructs personnel in techniques and procedures of repair of temperature, fluid, and flow measuring instruments, watches, clocks, and office machines; prepares quarterly maintenance schedules; supervises maintenance, repair and calibration activities; disassembles, cleans, reassembles, adjusts, and repairs rotary and electronic calculators, dual spectrum and electrostatic reproduction equipment. *IMCS:* Able to perform the duties required for IMC; prepares directives and instructions for attaining organizational objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; administers repair and maintenance records; organizes and schedules training programs, evaluates their effectiveness, and initiates improvements; coordinates quality assurance audits; coordinates and prepares work estimates; directs quality assurance program; administers a long-range maintenance program. *IMCM:* Able to perform the duties required for IMCS; develops procedures for conducting safety programs and monitoring compliance; plans, organizes, implements, and controls activities in accordance with policies and directives; forecasts future requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; assists in the management of records; coordinates liaison between repair activities and ship or shipyard; manages repair division; schedules repair work; develops operating budgets and monitors expenditures.

Recommendation, IM3

In the vocational certificate category, 1 semester hour in office machine repair. In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 2 in machine tool operation, 2 in instrumentation technology, and 1 in record keeping (3/90).

Recommendation, IM2

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 3 in machine tool operation, 4 in instrumentation technology, 1 in record keeping, and 1 in principles of supervision (3/90).

Recommendation, IM1

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 6 in instrumentation technology, 2 in maintenance management, 2 in record keeping, and 2 in principles of supervision (3/90).

Recommendation, IMC

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 6 in instrumentation technology, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision (3/90).

Recommendation, IMCS

In the vocational certificate category, 2 semester hours in office machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 6 in instrumentation technology, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

FN: Fireman (E-3). *ML3:* Molder, Third Class (E-4). *ML2:* Molder, Second Class (E-5). *ML1:* Molder, First Class (E-5). *MLC:* Chief Molder (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

Summary: Operates foundries aboard ship and at shore stations; makes molds and cores; sets up flasks; prepares heats; operates melting furnaces and pours castings of ferrous and nonferrous metals and alloys; cleans castings; casts a variety of Navy equipment components, including bearings, brass and bronze fittings, and cast iron, steel, and aluminum items; operates muller and controls sand quality; performs maintenance on assigned equipment; works from shop drawings. *ML3:* Conducts bench and floor molds; makes and installs cores, rebabbits bearings, prepares and evaluates molding sands; arranges molding sequence; identifies Navy babbitts; charges induction furnaces; selects casting alloys; identifies metals and alloys; selects and applies gas purging methods; repairs refractory linings; cleans furnaces and ladles; uses and maintains pyrometers, electric and pneumatic power tools, and oxyacetylene welding/cutting equipment; makes carbon dioxide process cores; reads and works from shop drawings and sketches; maintains shop files; determines weights of castings; cleans castings. *ML2:* Able to perform the duties required for ML3; makes molds directly from castings and analyzes casting quality; allows for shrinkage effects of cast steel and monel; identifies and uses bonding materials; designs gating systems; determines proper use of refractories; identifies type and effects of gas absorption; selects methods of obtaining proper casting solidification; controls the reaction of sodium silicate binders with carbon dioxide and heat; determines cause and method of detection of casting defects related to foundry sand, melting and pouring practice, and molding technique; determines and obtains proper molding pressure for metals cast; identifies abrasive materials and their uses; orders repair parts and special tools for equipment maintenance; prepares sketches from mechanical drawings and existing parts. *ML1:* Able to perform the duties required for ML2; interprets materials lists and modifications; maintains manuals; estimates time, material, and cost for foundry work; designs gating systems and special techniques for shrinkage allowance and finish machining; designs and makes internal chills; identifies types and effects of grain formation in cast metal; determines mold buoyancy; melts steel and monel; distinguishes mechanical properties of cast metals and alloys; interprets bindary phase diagrams and cooling curves for commonly used casting compositions; interprets cooling characteristics of metal microstructures; makes special mixture cores; determines gassing and baking times for carbon dioxide cores; schedules and checks maintenance work. *MLC:* Able to perform the duties required for ML1; designs castings with inserts and determines pouring rates and temperatures; trains, manages, and supervises personnel in foundry operations, metal identification, and pyrometry; prepares quarterly preventive maintenance schedules.

Recommendation, ML3

In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 1 in welding, 2 in metallurgy, and 2 in foundry practice (3/90).

Recommendation, ML2

In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 2 in welding, 3 in metallurgy, 4 in foundry practice, 1 in record keeping, and 2 in principles of supervision (3/90).

Recommendation, ML1

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in welding, 3 in metallurgy, 6 in foundry practice, 2 in record keeping, and 3 in principles of supervision (3/90).

Recommendation, MLC

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in welding, 3 in metallurgy, 8 in foundry practice, 2 in record keeping, and 4 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 1 in management problems (3/90).

NER-ML-004

Molder, Senior Chief and Master Chief
MLCS
MLCM

Exhibit Dates: 1/90–1/96.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

May progress from either MLC, Chief Molder (E-7), or PMC, Chief Patternmaker (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

MLCS: Able to perform the duties required for MLC (Chief Molder) or PMC (Chief Patternmaker); provides information and advises on utilization, capabilities, reliability, and operations of foundry; prepares local directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel for maximum utilization; serves as ship's supervisor; supervises operations of foundries and pattern shops; instructs personnel in physical and mechanical properties of metals, alloys, and plastics; coordinates construction and uses of master patterns, molds, and castings; organizes and schedules training programs and evaluates their effectiveness; initiates improvements; administers long-range preventive maintenance programs. *MLCM:* Able to perform the duties required for MLCS; assists repair officer in management of repair department; serves as technical advisor to repair officer; plans, organizes, implements, and controls activities in compliance with policy, operations orders, and directives; forecasts future requirements; plans and initiates actions to satisfy safety requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, MLCS

In the lower-division baccalaureate/associate degree category, if progressed from Molder, use the recommendation for MLC in exhibit NER-ML-002 plus 3 semester hours in materials science; if progressed from Patternmaker, use the recommendation for PMC in exhibit NER-PM-002 plus 3 semester hours in materials science. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, MLCM

In the lower-division baccalaureate/associate degree category, if progressed from Molder, use the recommendation for MLC in exhibit NER-ML-002 plus 3 semester hours in materials science; if progressed from Patternmaker, use the recommendation for PMC in exhibit NER-PM-002 plus 3 semester hours in materials science. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

MM2
MM1
MMC
MMCS
MMCM

Exhibit Dates: 1/90–10/97.

Occupational Field: 3 (Marine Engineering).

Career Pattern

FN: Fireman (E-3). *MM3:* Machinist's Mate, Third Class (E-4). *MM2:* Machinist's Mate, Second Class (E-5). *MM1:* Machinist's Mate, First Class (E-6). *MMC:* Chief Machinist's Mate (E-7). *MMCS:* Senior Chief Machinist's Mate (E-8). *MMCM:* Master Chief Machinist's Mate (E-9).

Description

Summary: Operates, repairs, and performs maintenance on ship propulsion machinery and auxiliary equipment. *MM3:* Operates main propulsion steam engines, turbo generators and associated systems (condensate circulating water, lube oil, etc.); operates auxiliary systems such as compressed air portable water, air conditioning and refrigeration systems, and steering systems; completes maintenance data forms; exercises environmental control procedures to prevent or minimize air pollution and oil spills. *MM2:* Able to perform the duties required for MM3; calibrates pressure and temperature sensing devices; carries out chemical water treatment procedures; performs maintenance on whistles, sirens, anchor windlasses, cranes, winches, steering engines, food preparation and dishwashing machinery, and air and reefer compressors; operates and performs mechanical maintenance on propulsion system equipment; adjusts thermal expansion valves, pressure switches, thermostats, and regular valves; may serve as engine room watch supervisor (in port); completes maintenance reports; inventories installed equipment; orders repair parts and tools. *MM1:* Able to perform the duties required for MM2; identifies factors governing main propulsion plant efficiency, causes of poor performance, and appropriate remedies; tests, dehydrates, and recharges refrigeration and air conditioning systems; may serve as engine room watch supervisor (underway); instructs engine room personnel in casualty control and plant operation procedures; reviews completed maintenance data forms; prepares weekly schedules of preventive maintenance; prepares environmental pollution control reports. *MMC:* Able to perform the duties required for MM1; prepares equipment and machinery performance and repair reports; monitors the qualifications of engine room watchstanders; supervises personnel in carrying out casualty control procedures; plans and schedules work load; prepares quarterly maintenance schedules; supervises and assists personnel in the repair, overhaul, and procurement of ship propulsion and auxiliary equipment. *MMCS:* Able to perform the duties required for MMC; identifies deficiencies of equipment and machinery; provides information and advises on utilization, capabilities, reliability, and operation; prepares directives and instructions for attaining organization objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; reviews requirements for watchstanding qualifications; prepares correspondence; trains and supervises personnel; organizes and schedules training programs; administers a long-range planned maintenance program; supervises environmental pollution control programs. *MMCM:* Able to perform the duties required for MMCS; develops and monitors safety programs; advises personnel about new technical information; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements, and forecasts future requirements; prepares major maintenance and repair schedules; supervises inspections and surveys of equipment; develops operating budgets and monitors expenditures.

Recommendation, MM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering (steam turbines), 3 in basic marine engineering (auxiliaries), 3 in maintenance technology, and 1 in blueprint reading (3/90).

Recommendation, MM2

In the lower-division baccalaureate/associate degree category, 5 semester hours in basic marine engineering (steam turbines), 5 in basic marine engineering (auxiliaries), 6 in maintenance technology, 2 in blueprint reading, 1 in record keeping, and 1 in principles of supervision (3/90).

Recommendation, MM1

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in record keeping, 2 in principles of supervision, and 1 in maintenance management (3/90).

Recommendation, MMC

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 2 in maintenance management (3/90).

Recommendation, MMCS

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, MMCM

In the lower-division baccalaureate/associate degree category, 6 semester hours in basic marine engineering (steam turbines), 6 in basic marine engineering (auxiliaries), 9 in maintenance technology, 2 in blueprint reading, 2 in record keeping, 3 in principles of supervision, and 3 in maintenance management. MRCM

Exhibit Dates: 1/90–Present.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *MR3:* Machinery Repairman, Third Class (E-4). *MR2:* Machinery Repairman, Second Class (E-5). *MR1:* Machinery Repairman, First Class (E-6). *MRC:* Chief Machinery Repairman (E-7). *MRCS:* Senior Chief Machinery Repairman (E-8). *MRCM:* Master Chief Machinery Repairman (E-9).

Description

Summary: Performs maintenance on shipboard equipment and machinery using lathes, milling machines, boring mills, grinders, power hacksaws, drill presses, and other machine tools. *MR3:* Operates and performs maintenance on all machine shop equipment that is required to repair, rebuild, or fabricate parts to maintain shipboard equipment and machinery; reads sketches, diagrams, and blueprints; operates bench or pedestal drills, pedestal grinders, machine reamers, engine lathes, planers or shapers, milling machines, pantographs, disk metal band saw, arbor and hydraulic presses, and oxyacetylene equipment; performs computations to make threads, press fits, tapers, and keyways; completes maintenance data forms. *MR2:* Able to perform the duties required for MR3; maintains blueprint files for machine shop; uses machine shop equipment including attachments with special capabilities; performs hardness tests on metals, plastics, and casting; selects metals and plastics according to specifications; completes maintenance reports; inventories installed equipment; orders repair parts and tools. *MR1:* Able to perform the duties required for MR2; operates equipment that analyzes ferrous and nonferrous metals; performs heat-treating operations; repairs fixed machinery and equipment; performs alignment tests on ship equipment; reviews completed maintenance data forms; prepares weekly maintenance schedules. *MRC:* Able to perform the duties required for MR1; supervises maintenance and repair activities; estimates time and material requirements; maintains work center records; prepares quarterly maintenance schedules; directs the replacement, installation, maintenance and repair of complex repair shop equipment; supervises inventory of tools, equipment, and supplies. *MRCS:* Able to perform the duties required for MRC; provides information and advice on utilization, capabilities, reliability, and operations; prepares directives and instructions for attaining organization objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; prepares correspondence; organizes and schedules training programs; administers a long-range planned maintenance program. *MRCM:* Able to perform the duties required for MRCS; develops and maintains safety programs; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements and forecasts future requirements; supervises inspections and survey of equipment; develops operating budgets and monitors expenditures.

Recommendation, MR3

In the lower-division baccalaureate/associate degree category, 3 semester hours in machine tool operations, 3 in maintenance technology, 1 in blueprint reading, and 1 in metallurgy (3/90).

Recommendation, MR2

In the lower-division baccalaureate/associate degree category, 6 semester hours in machine tool operations, 6 in maintenance technology, 2 in blueprint reading, 1 in maintenance management, and 2 in metallurgy (3/90).

Recommendation, MR1

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in record keeping, 2 in principles of supervision, 2 in maintenance management, and 2 in metallurgy (3/90).

Recommendation, MRC

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in record keeping, 3 in principles of supervision, 3 in maintenance management, and 2 in metallurgy (3/90).

Recommendation, MRCS

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in record keeping, 3 in principles of supervision, 4 in maintenance management, and 2 in metallurgy. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, MRCM

In the lower-division baccalaureate/associate degree category, 9 semester hours in machine tool operations, 9 in maintenance technology, 3 in blueprint reading, 2 in record keeping, 3 in principles of supervision, 5 in maintenance management, and 2 in metallurgy. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 6 in management problems (3/90).

MISSILE TECHNICIAN
MT3
MT2
MT1
MTC

Exhibit Dates: 1/90–9/93.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *MT3:* Missile Technician, Third Class (E-4). *MT2:* Missile Technician, Second Class (E-5). *MT1:* Missile Technician, First Class (E-6). *MTC:* Chief Missile Technician (E-7). *FTCS:* Senior Chief Fire Technician (E-8). *FTCM:* Master Chief Fire Technician (E-9).

Description

Summary: Operates, tests, and repairs fleet ballistic missile systems and missile launcher equipment; performs maintenance (electrical, electronic, pneumatic, and hydraulic) on ballistic missiles and associated handling and launching equipment. *MT3:* Aligns and calibrates basic electronic circuits; under supervision, performs troubleshooting, calibration, adjustments, and tests on missile launcher and missile support equipment; uses circuit diagrams and mechanical drawings; identifies basic digital circuits; operates weapons system equipment; completes maintenance data forms. *MT2:* Able to perform the duties required for MT3; inspects and repairs pneumatic and hydraulic systems; isolates malfunctions and replaces defective electronic circuit components; performs troubleshooting, calibration, adjustments, and tests on missile, launcher, and missile support equipment; maintains logs and records; completes maintenance reports; inventories installed equipment. *MT1:* Able to perform the duties required for MT2; serves as a nuclear weapons handling supervisor; supervises the maintenance and operation of missile and missile launching and handling equipment; reviews completed maintenance forms; prepares weekly maintenance schedules. *MTC:* Able to perform the duties required for MT1; coordinates and directs maintenance programs; ensures compliance with nuclear weapons safety rules; prepares records and reports; prepares quarterly maintenance schedules; serves as shop supervisor.

Recommendation, MT3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic elec-

tricity/electronics and 3 in applied mathematics (12/78).

Recommendation, MT2

In the vocational certificate category, 2 semester hours in applied physics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, and 2 in basic hydraulics (12/78).

Recommendation, MT1

In the vocational certificate category, 2 semester hours in applied physics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in basic hydraulics, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations (12/78).

Recommendation, MTC

In the vocational certificate category, 2 semester hours in applied physics. In the lower-division baccalaureate/associate degree category, 6 semester hours in basic electricity/electronics, 3 in applied mathematics, 3 in basic blueprint reading, 2 in basic hydraulics, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 1 in record keeping (12/78).

NER-MU-001

Musician

MU3
MU2
MU1
MUC
MUCS
MUCM

Exhibit Dates: 1/90–1/93.

Occupational Field: 18 (Musician).

Career Pattern

SN: Seaman (E-3). *MU3:* Musician, Third Class (E-4). *MU2:* Musician, Second Class, (E-5). *MU1:* Musician, First Class (E-6). *MUC:* Chief Musician (E-7). *MUCS:* Senior Chief Musician (E-8). *MUCM:* Master Chief Musician (E-9).

Description

Summary: Provides music for various functions and ceremonies as members of Navy unit bands; performs on one or more designated instruments. NOTE: Musicians are further identified by the following NEC (Navy Enlisted Classification) codes: MU-3801 Flute/Piccolo Instrumentalist; MU-3802 Oboe Instrumentalist; MU-3803 Clarinet Instrumentalist; MU-3804 Bassoon Instrumentalist; MU-3805 Saxophone Instrumentalist; MU-3806 Trumpet/Cornet Instrumentalist; MU-3807 French Horn Instrumentalist; MU-3808 Baritone/Euphonium Instrumentalist; MU-3809 Trombone Instrumentalist; MU-3811 Tuba/String Bass Instrumentalist; MU-3812 Guitar/Bass Drum Instrumentalist; MU-3813 Percussion Instrumentalist; MU-3814 Piano/Bass Drum Instrumentalist; MU-3825 Vocalist; and MU-3851 Assistant Bandleader. *MU3:* Performs as a member of a musical ensemble; performs first parts of elementary music with good intonation and characteristic tone (and with good diction for vocalists); performs from memory all major and minor scales; is responsive to musical interpretation, including dynamics, tempo, musical terms, and devices peculiar to dance music; able to perform elementary melodic improvisation including alphabetical chord symbols notated in standard dance and popular music; able to identify, by sound, simple chord progressions used in popular music; able to identify, by sight and sound, major, minor, diminished, and augmented triads in root position and inversions; able to notate melodic (single part) dictation of elementary music, at sight, one tone higher or lower than written. *MU2:* Able to perform the duties required for MU3; performs first parts of intermediate music; performs intermediate melodic improvisation following the alphabetic chord symbols notated in standard dance and popular music; interprets chord symbols used in modern dance music up to and including seventh chords and identifies these chords with the correct symbols; performs, from memory, ten standard dance tunes and standard advanced solos; notates melodic (single part) dictation of intermediate music; identifies, by sound, intermediate chord progression used in popular music; arranges popular melodies for a five-piece combo; rehearses and prepares a small combo for public appearances; rehearses and conducts the national anthem and one prepared march. *MU1:* Able to perform the duties required for MU2; performs first parts of advanced music at sight; performs advanced melodic improvisation following the alphabetic chord symbols notated in standard dance and popular music; analyzes and identifies all chords from piano lead sheets and stock piano parts; performs, from memory, eighteen standard dance tunes and advanced solos; harmonizes melodies in four parts, indicating figured bass and using diatonic triads, dominant and diatonic seventh chords, higher dominant dischords, simple modulation, and secondary dominants; arranges songs for an instrumental/vocal ensemble; notates melodic, single part dictation in moderately difficult music; rehearses and conducts a ceremonial band in a program of marches, popular music, and ceremonial music; rehearses and prepares for public performance a dance band of at least eight instruments; assembles and maneuvers a marching band. *MUC:* Able to perform the duties required for MU1; performs advanced solos from memory; rehearses and conducts ten marches and three difficult selections or overtures; prepares a musical program for public performance utilizing dance band and/or combo and featuring solo or entertainment capabilities of band members; identifies, by sound, advanced chord progressions used in popular music; analyzes scores for harmonic content, modulations and nonharmonic tones and melodic and harmonic content of piano sheet music; corrects mistakes and omissions in printing of alphabetical chord symbols; arranges 32 or more measures including introduction and ending of a song or melody for a small concert band and a popular song or folk song for a seventeen-piece dance band; supervises professional and military instruction; supervises the daily operation of a performing unit of a Navy band; evaluates requests for band performances; initiates and coordinates the preparation of posters, pictures, biographies, radio/TV spots, news releases, programs, and other promotional material required for a Navy band; supervises reports, records maintenance, and other personnel administration requirements; supervises the custody, care, and maintenance of music material; prepares requests for procurement and disposition of music material. *MUCS:* Able to perform the duties required for MUC; conducts a large concert band in performance of advanced literature; prepares a musical program for radio or television, utilizing dance band and/or combo, and featuring solo or entertainment capabilities of band personnel; analyses dominant and diatonic seventh chords in root position and inversions; harmonizes melodies in four parts, indicating figured bass, using diatonic triads with inversions, dominant seventh chords with inversions, and nonharmonic tones; organizes and schedules training programs and evaluates their effectiveness; manages, schedules, and coordinates the rehearsal and performance of all units of a Navy band; manages the preparation and distribution of posters, pictures, biographies, radio/TV spots, news releases, programs, and other promotional material; establishes and implements an effective community relations program; manages nonmusical logistical support for Navy band; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to ensure maximum utilization; manages procurement, control, maintenance, and disposition of music, musical equipment, and supplies. *MUCM:* Able to perform the duties required for MUCS; plans, organizes, implements, and controls activities; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements, and forecasts future requirements; evaluates musical background proficiency and potential of applicants for the Navy music program; develops operating budgets and monitors expenditures.

Recommendation, MU3

In the lower-division baccalaureate/associate degree category, 4 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 2-4 in applied performance (individual instruction), and 2 in performing ensembles (3/79).

Recommendation, MU2

In the lower-division baccalaureate/associate degree category, 4 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 2 in performing ensembles, 1 in elementary conducting, 1 in marching band, and 1 in concert band (3/79).

Recommendation, MU1

In the lower-division baccalaureate/associate degree category, 8 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 4 in performing ensembles, 1 in elementary conducting, 2 in marching band, and 1 in concert band (3/79).

Recommendation, MUC

In the lower-division baccalaureate/associate degree category, 12 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 1 in applied performance (secondary instrument), 4 in performing ensembles, 1 in elementary conducting, 3 in marching band, and 1 in concert band. In the upper-division baccalaureate category, 2 semester hours in arranging (3/79).

Recommendation, MUCS

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 1 in applied performance (secondary instrument), 4 in performing ensembles, 1 in elementary conducting, 3 in marching band, and 1 in concert band. In the upper-division baccalaureate category, 4 semester hours in arranging, 2 in advanced conducting, 2 in band management, and 2 in personnel management (3/79).

Recommendation, MUCM

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (including harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 1 in applied performance (individual instruction in secondary instrument), 4 in performing ensembles, 1 in elementary conducting, 3 in marching band, 1 in concert band, 1 in elementary class piano, 1 in instrumental techniques, and 2 in public speaking. In the upper-division baccalaureate category, 6 semester hours in arranging, 4 in advanced conducting, 3 in dance band techniques, 3 in band management, and 3 in personnel management. In the graduate degree category, 2 semester hours in advanced conducting (3/79).

Description

Summary: Provides music for various functions and ceremonies as members of Navy unit bands; performs on one or more designated instruments. NOTE: Musicians are further identified by the following NEC (Navy Enlisted Classification) codes: MU-3801 Flute/Piccolo Instrumentalist; MU-3802 Oboe Instrumentalist; MU-3803 Clarinet Instrumentalist; MU-3804 Bassoon Instrumentalist; MU-3805 Saxophone Instrumentalist; MU-3806 Trumpet/Cornet Instrumentalist; MU-3807 French Horn Instrumentalist; MU-3808 Baritone/Euphonium Instrumentalist; MU-3809 Trombone Instrumentalist; MU-3811 Tuba/String Bass Instrumentalist; MU-3812 Guitar/Bass Drum Instrumentalist; MU-3813 Percussion Instrumentalist; MU-3814 Piano/Bass Drum Instrumentalist; MU-3825 Vocalist; and MU-3851 Assistant Bandleader. *MU3:* Performs preventive maintenance and makes minor repairs to assigned musical equipment; transposes and performs elementary music at sight; performs from memory all major and minor scales (percussionists perform all rudiments); performs from memory assigned first parts of the national anthem, honors, and ceremonial music; identifies by sight and sound major and minor triads in inversions; notates elementary melodic dictation; copies music legibly and accurately; performs as a member of ceremonial, dance, and concert band ensembles; improvises an elementary eight-bar melody following alphabetical chord symbols; sight reads intermediate literature; performs two standard melodies with a five-piece ensemble. *MU2:* Able to perform the duties required for MU3; notates intermediate melodic dictation; identifies elementary chord progressions by sound; arranges a standard dance tune for a two-horn, four-rhythm ensemble exhibiting the use of nonharmonic tones, dominant seventh chords, secondary triads, progressions, and cadences; rehearses and ensemble of at least six performers; plays improvised intermediate melodies following alphabetical chord symbols; conducts the national anthem and one prepared march; sight reads advanced music; harmonizes melodies in four parts using primary triads; performs advanced literature from memory; writes standard alphabetical symbols used in dance and modern music given notated chords; notates from memory melodic lines of the national anthem, honors, and ceremonial music; performs as an instrumental section leader; sets up and operates sound reinforcement equipment. *MU1:* Able to perform the duties required for MU2; notates advanced melodic dictation; harmonizes melodies in four parts using diatonic triads and dominant and diatonic seventh chords; writes an arrangement of a standard dance tune for a four-horn, four-rhythm ensemble exhibiting various voicing and ensemble methods; rehearses an ensemble of at least eight instrumentalists; plays improvised advanced melodies following alphabetical chord symbols; rehearses and conducts the national anthem, honors, and ceremonial music from memory; conducts a ceremonial band in public performance; assembles and maneuvers a marching band; prepares requests for procurement and disposition of music material. *MUC:* Able to perform the duties required for MU1; harmonizes melodies in four parts using advanced traditional harmonic techniques; identifies advanced chord progressions by sound; arranges a standard melody of 32 measures or more for a small concert band or 17-piece dance band; rehearses and conducts a small concert band or 17-piece dance band in a public performance featuring solo or entertainment capabilities of band personnel; supervises the daily operation of a performing unit of a Navy band; conducts auditions; manages nonmusical logistical support for a performing unit of a Navy band; evaluates requests for band performance. *MUCS:* Able to perform the duties required for MUC; rehearses and conducts a medium-sized concert band in a public performance; analyzes advanced compositions for harmonic content; manages, schedules, and coordinates the rehearsals and performances of all units of a Navy band; manages nonmusical logistical support for a Navy band; evaluates and provides information on the use, capabilities, reliability, and operations of all units of a Navy band. *MUCM:* Able to perform the duties required for MUCS; plans, organizes, implements, controls, and evaluates Navy band activities; rehearses and conducts a large concert band in public performance.

Recommendation, MU3

In the lower-division baccalaureate/associate degree category, 2 semester hours in music theory (harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 2-4 in applied performance (individual instruction), and 2 in performing ensembles (concert, jazz, and marching bands) (2/93).

Recommendation, MU2

In the lower-division baccalaureate/associate degree category, 4 semester hours in music theory (harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), and 4 in performing ensembles (concert, jazz, and marching bands). In the upper-division baccalaureate category, 1 semester hour in conducting (2/93).

Recommendation, MU1

In the lower-division baccalaureate/associate degree category, 8 semester hours in music theory (harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 6 in performing ensembles (concert, jazz, and marching bands), and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in conducting (2/93).

Recommendation, MUC

In the lower-division baccalaureate/associate degree category, 12 semester hours in music theory (harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 6-8 in performing ensembles (concert, jazz, and marching bands), and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in conducting, 2 in rehearsal techniques of conducting (concert and jazz), 2 in arranging, and 3 in logistics management (2/93).

Recommendation, MUCS

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 6-8 in performing ensembles (concert, jazz, and marching bands), and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in conducting, 2 in rehearsal techniques of conducting (concert and jazz), 4 in arranging, 2 in organizational management, and 3 in logistics management (2/93).

Recommendation, MUCM

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (harmony, ear training, and sight singing), 2 in jazz theory/improvisation, 4-6 in applied performance (individual instruction), 6-8 in performing ensembles (concert, jazz, and marching bands), and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in conducting, 4 in rehearsal techniques of conducting (concert and jazz), 6 in arranging, 4 in organizational management, 3 in logistics management, and 3 in music business management (2/93).

NER-NC-002

NAVY COUNSELOR

NC1
NCC
NCCS
NCCM

Exhibit Dates: 1/90–11/97.

Occupational Field: 15 (Administration).

Career Pattern

May have progressed from Petty Officer, Second Class (E-5) of any rating. *NC1:* Navy Counselor, First Class (E-6). *NCC:* Chief Navy Counselor (E-7). *NCCS:* Senior Chief Navy Counselor (E-8). *NCCM:* Master Chief Navy Counselor (E-9).

Description

Summary: Interviews, advises, and counsels enlisted personnel about career development opportunities, benefits, and regulations; organizes and implements recruiting and retention programs. *NC1:* Prepares recruiting and preenlistment brochures and kits; writes news releases; supervises collateral duty career counselors; coordinates retention programs; instructs and trains recruiters and retention teams in counseling skills and Navy programs and benefits; writes and delivers public relations and recruiting talks; participates in community events; conducts interviews, counsels, and advises enlisted personnel; administers, scores, and records results of vocational preference and aptitude tests; informs personnel of local agencies capable of assisting Naval personnel and their families. *NCC:* Able to perform the duties required for NC1; trains and supervises subordinates; prepares and submits operating budgets for recruiting station; develops training schedules; trains recruiters in prospecting, sales, time management, recruit processing, and resource management; may specialize in career counseling, recruiting, or drugs and alcohol rehabilitation counseling. *NCCS:* Able to perform the duties required for NCC; may serve as area supervisor of a large counseling program; drafts correspondence; interviews, evaluates, and assigns personnel; verifies accuracy of administrative reports; collects, develops, and disseminates career program information; develops plans for organizing and implementing surveys; develops motivation programs; organizes and schedules training program for subordinates. *NCCM:* Able to perform the duties required for NCCS; forecasts future personnel requirements; plans and initiates action to satisfy personnel requirements; provides information to the command on regulations, procedures, and practices applicable to recruiting and retention; develops written materials for counseling program; evaluates effectiveness of recruiting and retention programs; monitors, analyzes, and makes recommendations concerning personnel utilization; provides technical assistance to subordinate commands; develops operating budget and monitors expenditures.

Recommendation, NC1

In the lower-division baccalaureate/associate degree category, 1 semester hour in applied psychology, 1 in community relations, 1 in management electives, 2 in interviewing techniques, 3 in communication (speech), 3 in communication (written), 3 in career information and counseling, and 3 in human relations (2/89).

Recommendation, NCC

In the lower-division baccalaureate/associate degree category, 1 semester hour in applied psychology, 1 in community relations, 2 in interviewing techniques, 2 in management electives, 3 in communication (speech), 3 in communication (written), 3 in career information and counseling, and 3 in human relations; if the duty assignment was career counselor, additional credit in applied psychology and in occupational choice and career analysis on the basis of institutional evaluation; if the duty assignment was drugs and alcohol rehabilitation counselor, additional credit in applied psychology, psychological counseling theory and techniques, behavior crisis intervention, and drug and alcohol abuse on the basis of institutional evaluation (2/89).

Recommendation, NCCS

In the lower-division baccalaureate/associate degree category, 1 semester hour in applied psychology, 1 in community relations, 2 in interviewing techniques, 3 for field experience in management, 3 in communication (speech), 3 in communication (written), 3 in career information and counseling, 3 in human relations, and 3 in management electives; if the duty assignment was career counselor, additional credit in applied psychology and in occupational choice and career analysis on the basis of institutional evaluation; if the duty assignment was drugs and alcohol rehabilitation counselor, additional credit in applied psychology, psychological counseling theory and techniques, behavior crisis intervention, and drug and alcohol abuse on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in problems in human relations (2/89).

Recommendation, NCCM

In the lower-division baccalaureate/associate degree category, 1 semester hour in applied psychology, 1 in community relations, 2 in interviewing techniques, 3 in communication (speech), 3 in communication (written), 3 in career information and counseling, 3 in human relations, 3 for field experience in management, and 6 in management electives; if the duty assignment was career counselor, additional credit in applied psychology and in occupational choice and career analysis on the basis of institutional evaluation; if the duty assignment was drugs and alcohol rehabilitation counselor, additional credit in applied psychology, psychological counseling theory and techniques, behavior crisis intervention, and drug and alcohol abuse on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for a practicum in vocational counseling, and 6 in problems in human relations (2/89).

Occupational Field: 15 (Administration).

Career Pattern

May have progressed from Petty Officer, Second Class (E-5) of any rating. *NC1:* Navy Counselor, First Class (E-6). *NCC:* Chief Navy Counselor (E-7). *NCCS:* Senior Chief Navy Counselor (E-8). *NCCM:* Master Chief Navy Counselor (E-9).

Description

Summary: Interviews, advises, and counsels enlisted personnel about career development opportunities, benefits, and regulations; organizes and implements recruiting and retention programs. *NC1:* Prepares recruiting and preenlistment brochures and kits; writes news releases; supervises nonschooled duty career counselors; coordinates retention programs; instructs and trains recruiters and retention teams in counseling skills and Navy programs and benefits; writes and delivers public relations and recruiting talks; participates in community events; conducts interviews, counsels, and advises enlisted personnel; administers, scores, and records results of vocational preference and aptitude tests; informs personnel of local agencies capable of assisting Naval personnel and their families; may specialize in career counseling or recruiting. *NCC:* Able to perform the duties required for NC1; trains and supervises subordinates; prepares and submits operating budgets for recruiting station; develops training schedules; trains recruiters in prospecting, sales, time management, recruit processing, and resource management; may specialize in career counseling, or recruiting. *NCCS:* Able to perform the duties required for NCC; may serve as area supervisor of a large counseling program; drafts correspondence; interviews, evaluates, and assigns personnel; verifies accuracy of administrative reports; collects, develops, and disseminates career program information; develops plans for organizing and implementing surveys; develops motivation programs; organizes and schedules training program for subordinates; evaluates retention programs for subordinate units. *NCCM:* Able to perform the duties required for NCCS; forecasts future personnel requirements; plans and initiates action to satisfy personnel requirements; provides information to the command on regulations, procedures, and practices applicable to recruiting and retention; develops written materials for counseling program; evaluates effectiveness of recruiting and retention programs; monitors, analyzes, and makes recommendations concerning personnel use; provides technical assistance to subordinate commands in implementing and planning retention programs and policies; develops operating budget and monitors expenditures.

Recommendation, NC1

In the lower-division baccalaureate/associate degree category, 3 semester hours in interpersonal communication, 3 in report writing, and 3 in career counseling. In the upper-division baccalaureate category, 3 semester hours in human resource management and 3 in applied psychology. If duty assignment was recruiting, additional credits as follows: in the lower-division baccalaureate/associate degree category, 3 semester hours in public relations; in the upper-division baccalaureate category, 3 semester hours in salesmanship and 3 in marketing (11/97).

Recommendation, NCC

In the lower-division baccalaureate/associate degree category, 3 semester hours in interpersonal communication, 3 in report writing, 3 in human relations, and 3 in career counseling. In the upper-division baccalaureate category, 3 semester hours in human resource management, 3 in applied psychology, and 3 in personnel management problems. If duty assignment was recruiting, additional credits as follows: in the lower-division baccalaureate/associate degree category, 3 semester hours in public relations; in the upper-division baccalaureate category, 3 semester hours in salesmanship and 3 in marketing (11/97).

Recommendation, NCCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in interpersonal communication, 3 in report writing, 3 in human relations, and 3 in career counseling. In the upper-division baccalaureate category, 3 semester hours in human resource management, 3 in applied psychology, 3 in personnel management, 3 in vocational counseling, and 6 for field experience in personnel relations. If duty assignment was recruiting, additional credits as follows: in the lower-division baccalaureate/associate degree category, 3 semester hours in public relations; in the upper-division baccalaureate category, 3 semester hours in salesmanship and 3 in marketing (11/97).

Recommendation, NCCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in interpersonal communication, 3 in report writing, 3 in human relations, and 3 in career counseling. In the upper-division baccalaureate category, 3 semester hours in human resource management, 3 in applied psychology, 3 in personnel management, 3 in vocational counseling, 3 in program management, and 6 for field experience in personnel relations. If duty assignment was recruiting, additional credits as follows: in the lower-division baccalaureate/associate degree category, 3 semester hours in public relations; in the upper-division baccalaureate category, 3 semester hours in salesmanship and 3 in marketing (11/97).

OMCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

SN: Seaman (E-3). *OM3:* Opticalman, Third Class (E-4). *OM2:* Opticalman, Second Class (E-5). *OM1:* Opticalman, First Class (E-6). *OMC:* Chief Opticalman (E-7). *OMCS:* Senior Chief Opticalman (E-8). *PICM:* Master Chief Precision Instrumentman (E-9).

Description

Summary: Performs maintenance on small navigational instruments, binoculars, gun sights, range finders, submarine and turret periscopes, night vision sights, and other optical instruments. *OM3:* Operates lathe, milling machine, bench grinder, and drill press; joins metal by soft and silver solder; repairs and overhauls binoculars, telescopes, marine alidades, fixed prism gun sight telescopes, azimuth and bearing circles, sextants, stadimeters, and magnetic compasses; performs maintenance on image-intensifying and night vision sights and on external fittings of submarine periscopes; recements lenses using a lens centering instrument; uses the metric and English systems of measurement to determine focal lengths, dioptric strength, and magnifying power of a positive and negative lens; uses and maintains hand tools; completes maintenance data forms. *OM2:* Able to perform the duties required for OM3; reads blueprints and sketches; makes mechanical parts for optical instruments; removes and installs submarine periscopes; repairs and overhauls ship-mounted binoculars, submarine periscopes, and tilting-prism gun sight telescopes; completes maintenance reports; inventories installed equipment; orders repair parts and tools. *OM1:* Able to perform the duties required for OM2; establishes alignment references, autocollination, base and line transfer, and azimuth transfer; performs complete overhaul of Mk 21 range finders; prepares and maintains records, logs, reports, and work requests; maintains current naval publications concerning standard optical equipment; reviews completed maintenance data forms; prepares weekly maintenance schedule. *OMC:* Able to perform the duties required for OM1; coordinates repair and maintenance programs for measuring instruments; supervises equipment inspections; supervises training of personnel in repair and overhaul of optical equipment; plans, schedules, and assigns repair work; prepares quarterly maintenance schedules; supervises repair of precision measuring mechanical and optical instruments; performs laboratory calibration services providing standards for pressure, temperature, flow, and linear measurements. *OMCS:* Able to perform the duties required for OMC; prepares directives and instructions for attaining organization objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; administers repair maintenance records; organizes, schedules, and evaluates training programs; coordinates quality assurance audits; prepares work estimates; administers a long-range planned maintenance program.

Recommendation, OM3

In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 2 in machine tool operation, 1 in electromechanical technology, 3 in optical laboratory, and 1 in record keeping (3/90).

Recommendation, OM2

In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 3 in machine tool operation, 2 in electronic systems troubleshooting and repair, 2 in electromechanical technology, 4 in optical laboratory, 1 in record keeping, and 1 in principles of supervision (3/90).

Recommendation, OM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 3 in electronic systems troubleshooting and repair, 3 in electromechanical technology, 4 in optical laboratory, 2 in maintenance management, 2 in record keeping, and 2 in principles of supervision (3/90).

Recommendation, OMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 3 in electronic systems troubleshooting and repair, 3 in electromechanical technology, 4 in optical laboratory, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision (3/90).

Recommendation, OMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 3 in electronic systems troubleshooting and repair, 3 in electromechanical technology, 4 in optical laboratory, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/90).

Recommendation, OMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 3 in machine tool operation, 3 in electronic systems troubleshooting and repair, 3 in electromechanical technology, 4 in optical laboratory, 3 in maintenance management, 2 in record keeping, and 3 in principles of supervision. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/90).

NER-OS-002

Operations Specialist
OS3
OS2
OS1
OSC
OSCS
OSCM

Exhibit Dates: 1/90–4/96.

Occupational Field: 2 (Ship Operations).

Career Pattern

SN: Seaman (E-3). *OS3:* Operations Specialist, Third Class (E-4). *OS2:* Operations Specialist, Second Class (E-5). *OS1:* Operations Specialist, First Class (E-6). *OSC:* Chief Operations Specialist (E-7). *OSCS:* Senior Chief Operations Specialist (E-8). *OSCM:* Master Chief Operations Specialist (E-9).

Description

Summary: Operates radar and associated equipment; identifies and maintains a display (plot) of the movement of ships, aircraft, missiles, and natural objects detected by observing a radar; maintains a radar navigation plot of own ship's movement; evaluates information collected by radar and appropriately disseminates it; performs routine preventive maintenance on radar equipment; operates radiotelephones. *OS3:* Operates a radar/console screen, observing objects detected by the radar and displayed on the radar screen; identifies the objects detected, determines their movement, and disseminates this information to users by internal communications systems; operates radiotelephones; plots and maintains current display of objects detected; determines own ship's position on nautical charts using ranges, bearing, and standard navigational symbols; changes given positions into grid coordinates; knows the basic functions and interrelations of the modulator, receiver, antenna, control, and indicator units; reads electronic block diagrams; solves maneuvering board problems for course, speed, closest point of approach, true wind, and desired wind. *OS2:* Able to perform the duties required for OS3; tests radar and associated electronic equipment; supervises and trains personnel operating radar and associated electronic equipment, plotting display information, operating radiotelephones and keeping logs; solves course and speed problems using polar coordinate graph paper; performs duties of marine coastal radar navigator using nautical charts; maintains strategic geographic and surface plots; interprets international and inland nautical rules of the road. *OS1:* Able to perform the duties required for OS2; assigns duties to operations specialist personnel and supervises their performance; performs as supervisor of a watch section directing the task performance of plotters, radiotelephone operators, and other members of the watch section; prepares weekly preventive maintenance schedules. *OSC:* Able to perform the duties required for OS1; supervises the training program for operation specialists; prepares quarterly preventive maintenance schedules; supervises the performance of preventive maintenance; serves as an assistant to the officer in charge of the communications information center; serves as piloting officer during radar-assisted piloting. *OSCS:* Able to perform the duties required for OSC; prepares correspondence, other written instructions, and directives; organizes, schedules, and evaluates training programs; administers long-range radar equipment maintenance program; provides superiors with information and advice on utilization and capabilities of personnel, equipment, and material in area of responsibility; interviews, evaluates, and assigns personnel; establishes work priorities. *OSCM:* Able to perform the duties required for OSCS; performs technical administrative functions; establishes objectives and sets priorities; reviews personnel, equipment, and material requirements; plans, organizes, and implements activities in accordance with policies and procedures; coordinates repair and maintenance programs in accordance with ship's operating schedule; develops budgets and monitors expenditures.

Recommendation, OS3

In the vocational certificate category, 3 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation, 2 in seamanship, 1 in computer applications, 1 in technical mathematics, and 2 in electronic systems maintenance (12/89).

Recommendation, OS2

In the vocational certificate category, 3 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation, 3 in seamanship, 1 in computer applications, 3 in technical mathematics, 3 in electronic systems maintenance, 3 in radar navigation, 1 in personnel supervision, and 1 in record keeping (12/89).

Recommendation, OS1

In the vocational certificate category, 3 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation, 3 in seamanship, 1 in computer applications, 3 in technical mathematics, 3 in electronic systems maintenance, 3 in radar navigation, 3 in personnel supervision, 1 in record keeping, and 1 in supply management (12/89).

Recommendation, OSC

In the vocational certificate category, 3 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation, 3 in seamanship, 1 in computer applications, 3 in technical mathematics, 3 in electronic systems maintenance, 3 in radar navigation, 3 in personnel supervision, 1 in record keeping, 2 in supply management, and 1 in personnel administration (12/89).

Recommendation, OSCS

In the vocational certificate category, 3 semester hours in radar operations. In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation, 3 in seamanship, 1 in computer applications, 3 in technical mathematics, 3 in electronic systems maintenance, 3 in radar navigation, 3 in personnel supervision, 1 in record keeping, 2 in supply management, and 1 in personnel administration. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, OSCM

NER-OT-002

OCEAN SYSTEMS TECHNICIAN, MASTER CHIEF
OTCM

Exhibit Dates: 1/90–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

May progress to OTCM, Master Chief Ocean Systems Technician (E-9), from either OTACS, Senior Chief Ocean Systems Technician, Analyst (E-8), or OTMCS, Senior Chief Ocean Systems Technician, Maintainer (E-8).

Description

Able to perform the duties required for OTACS, Senior Chief Ocean Systems Technician, Analyst, or OTMCS, Senior Chief Ocean Systems Technician, Maintainer; performs technical and operational administrative functions; establishes objectives and goals; plans, organizes, and controls activities to achieve objectives; serves as a technical advisor in the maintenance and operations areas; develops budgets and monitors expenditures.

Recommendation

In the lower-division baccalaureate/associate degree category, if the individual progressed to OTCM from OTACS, Senior Chief Ocean Systems Technician, Analyst, grant the credit for OTACS in exhibit NER-OTA-001; if the individual progressed from OTMCS, Senior Chief Ocean Systems Technician, Maintainer, grant the credit for OTMCS in exhibit NER-OTM-001. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/85).

NER-OTA-001

OCEAN SYSTEMS TECHNICIAN, ANALYST
OTA3
OTA2
OTA1
OTAC
OTACS

Exhibit Dates: 1/90–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman. OTA3: Ocean Systems Technician, Analyst, Third Class (E-4). OTA2: Ocean Systems Technician, Analyst, Second Class (E-5). OTA1: Ocean Systems Technician, Analyst, First Class (E-6). OTAC: Chief Ocean Systems Technician, Analyst (E-7). OTACS: Senior Chief Ocean Systems Technician, Analyst (E-8). *OTCM:* Master Chief Ocean Systems Technician (E-9).

Description

Summary: Collects oceanographic data on underwater acoustical signals; processes this information for automatic data processing and forwards information to superiors; has knowledge of basic oceanography, underwater acoustics, sonar systems, and computer data input. *OTA3:* Analyzes various acoustic displays and converts displayed information into a format acceptable for computer inputs; operates computer systems. *OTA2:* Able to perform the duties required for OTA3; performs plotting and navigation tasks; has knowledge of a variety of acoustic signal processors designed to collect data on underwater sound. *OTA1:* Able to perform the duties required for OTA2; trains and supervises subordinates; serves as watch coordinator directing and supervising the performance of 4-20 persons in the watch section. *OTAC:* Able to perform the duties required for OTA1; supervises the training of personnel in the operation of underwater acoustic equipment and in the gathering and processing of oceanographic data. *OTACS:* Able to perform the duties required for OTAC; prepares correspondence and written inspections; organizes schedules and evaluates training programs; implements a program for evaluating and assigning personnel.

Recommendation, OTA3

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTA2

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTA1

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 2 in introduction to management, and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTAC

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 3 in introduction to management, and credit in oceanography on the basis of institutional evaluation (10/85).

Recommendation, OTACS

In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing, 3 in personnel supervision, 3 in introduction to management, and credit in oceanography on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/85).

Ocean Systems Technician, Maintainer
OTM3
OTM2
OTM1
OTMC
OTMCS

Exhibit Dates: 1/90–Present.

Occupational Field: 10 (Sensor Operations).

Career Pattern

SN: Seaman. OTM3: Ocean Systems Technician, Maintainer, Third Class (E-4). OTM2: Ocean Systems Technician, Maintainer, Second Class (E-5). OTM1: Ocean Systems Technician, Maintainer, First Class (E-6). OTMC: Chief Ocean Systems Technician, Maintainer (E-7). OTMCS: Senior Chief Ocean Systems Technician, Maintainer (E-8). *OTCM:* Master Chief Ocean Systems Technician (E-9).

Description

Summary: Performs preventive maintenance, troubleshooting, and repair on all operational systems (containing both analog and digital equipment including digital computer) used by Ocean Systems Technicians. *OTM3:* Repairs and performs maintenance on several operational systems; uses basis test equipment, schematics, and instruction manuals to troubleshoot electronic equipment. *OTM2:* Able to perform the duties required for OTM3; repairs and performs maintenance on additional operational systems; solves more complex troubleshooting problems; works with digital equipment and computers. *OTM1:* Able to perform the duties required for OTM2; has acquired extensive background in the maintenance and repair of the operational systems; solves nonroutine troubleshooting problems; supervises the maintenance and repair of oceanographic/acoustic equipment. *OTMC:* Able to perform the duties required for OTM1; supervises the training of personnel in the maintenance and repair of oceanographic/acoustic equipment; administers a maintenance and repair program. *OTMCS:* Able to perform the duties required for OTMC; prepares written instructions and correspondence; organizes, schedules, and evaluates training program; develops and implements a program for evaluating and assigning personnel.

Recommendation, OTM3

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 2 in systems maintenance, 3 in digital electronics, 2 in microprocessors, and 2 in computer organization (10/85).

Recommendation, OTM2

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 4 in systems maintenance, 3 in digital electronics, 3 in microprocessors, and 2 in computer organization (10/85).

Recommendation, OTM1

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 5 in systems maintenance, 3 in digital electronics, 3 in microprocessors, 3 in computer organization, 3 in personnel supervision, 2 in maintenance management, and 2 in introduction to management (10/85).

Recommendation, OTMC

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 5 in systems maintenance, 3 in digital electronics, 3 in microprocessors, 3 in computer organization, 3 in personnel supervision, 3 in maintenance management, and 3 in introduction to management (10/85).

Recommendation, OTMCS

In the lower-division baccalaureate/associate degree category, 2 semester hours in applied mathematics, 2 in basic electronics, 3 in circuit theory, 5 in systems maintenance, 3 in digital electronics, 3 in microprocessors, 3 in computer organization, 3 in personnel supervision, 3 in maintenance management, and 3 in introduction to management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/85).

Description

Summary: Operates Navy post office. *PC3:* Performs postal counter work, including selling stamps, processing international money orders, and collecting and remitting COD charges; performs general clerical duties including mail sorting and distribution and record maintenance; advises personnel on packaging and preparation of customs declarations; able to type 20 words per minute. *PC2:* Able to perform the duties required for PC3; establishes mail transportation schedules and routes; supervises and trains personnel in the operation of a Navy post office; supervises preparation, maintenance, and distribution of local postal records and reports. *PC1:* Able to perform the duties required for PC2; audits and reviews inspection reports of Navy post offices; prepares parent office reports; collects and remits postage meter funds; able to assume the duties, responsibilities, and functions of a postal officer when necessary. *PCC:* Able to perform the duties required for PC1; supervises postal counter and sorting activities; ensures compliance with customs procedures; audits Navy post offices; supervises postal office procedures in a large Navy post office. *PCCS:* Able to perform the duties required for PCC; conducts inspections of Navy post offices and develops recommendations for the improvement of postal operations; prepares correspondence; develops evaluation programs dealing with personnel and management efficiency; conducts work simplification and efficiency analysis. *PCCM:* Able to perform the duties required for PCCS; develops and monitors operating budgets; forecasts future manpower and material requirements; develops basic plans for implementing policy statements and directives; establishes goals, objectives, and priorities in own area of responsibility; develops operating budget and monitors expenditures; develops transportation plans for mail routing in bulk.

Recommendation, PC3

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 2 in interpersonal communication or postal customer services, and 3 in postal practices and procedures (3/90).

Recommendation, PC2

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 2 in interpersonal communication or postal customer services, 4 in postal practices and procedures, and 3 in postal delivery and collection (3/90).

Recommendation, PC1

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communication or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in record keeping, and 3 in clerical procedures. In the upper-division baccalaureate category, 2 semester hours in logistics management (3/90).

Recommendation, PCC

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communication or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in record keeping, 3 in clerical procedures, 3 in principles of supervision, and 3 in postal problems analysis. In the upper-division baccalaureate category, 3 semester hours in logistics management (3/90).

Recommendation, PCCS

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communication or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in record keeping, 3 in clerical procedures, 3 in principles of supervision, 3 in postal problems analysis, and 2 in technical writing. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 in logistics management (3/90).

Recommendation, PCCM

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in interpersonal communication or postal customer services, 6 in postal practices and procedures, 3 in postal delivery and collection, 2 in record keeping, 3 in clerical procedures, 3 principles of supervision, 3 in postal problems analysis, and 3 in technical writing. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 in logistics management (3/90).

NER-PI-002

Precision Instrumentman, Master Chief
PICM

Exhibit Dates: 1/90–12/90. Effective 1/91, PICM was discontinued and its duties were incorporated into Senior Chief Opticalman (NER-OM-003) and Senior Chief Instrumentman (NER-IM-003).

Occupational Field: 4 (Ship Maintenance).

Career Pattern

May progress from either IMCS, Senior Chief Instrumentman (E-8), or OMCS, Senior Chief Opticalman (E-8). *PICM:* Master Chief Precision Instrumentman (E-9).

Description

Able to perform the duties required for IMCS (Senior Chief Instrumentman), OMCS (Senior Chief Instrumentman), or OMCS (Senior Chief Opticalman); develops procedures for conducting safety programs and monitoring compliance; plans, organizes, implements, and controls activities in accordance with policies and directives; forecasts future requirements; establishes goals, objectives, and priorities; reviews personnel, equipment, and material requirements; assists in the management of records; coordinates liaison between repair activities and ship or shipyard; manages repair division; schedules repair work; develops operating budgets and monitors expenditures.

Recommendation

In the vocational certificate category, if progressed from Instrumentman, use the credit recommended for IMCS in exhibit NER-IM-002. In the lower-division baccalaureate/associate degree category, if progressed from Instrumentman, use the credit recommended for IMCS in exhibit NER-IM-002; if progressed from Opticalman, use the credit recommended for OMCS in exhibit NER-OM-002. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/90).

NER-PM-002

Patternmaker
PM3
PM2
PM1
PMC

Exhibit Dates: 1/90–1/96.

Occupational Field: 4 (Ship Maintenance).

Career Pattern

FN: Fireman (E-3). *PM3:* Patternmaker, Third Class (E-4). *PM2:* Patternmaker, Second Class (E-5). *PM1:* Patternmaker, First Class (E-6). *PMC:* Chief Patternmaker (E-7). *MLCS:* Senior Chief Molder (E-8). *MLCM:* Master Chief Molder (E-9).

Description

Summary: Makes wooden, plaster, and metal patterns, core boxes, and flasks used by molders in a Navy foundry. *PM3:* Works from shop drawings and sketches to fabricate simple templates; lays out and constructs simple one-piece patterns; applies standard color code finishes; identifies patternmaking woods; identifies ferrous and nonferrous metal by chip and files. *PM2:* Able to perform the duties required for PM3; prepares sketches from mechanical drawings; fabricates layouts from mechanical drawings, freehand sketches, and castings; constructs layout and cuts templates, master patterns, and patterns used for composite casting; constructs molds; designs and constructs flasks for patterns; lays out and constructs patterns and core boxes; computes areas, volumes, weights, and quantities of lumber for patterns; designs and manufactures labor saving devices; completes maintenance reports. *PM1:* Able to perform the duties required for PM2; constructs intricate gypsum cement patterns and core boxes; manufactures patterns using plastic materials; constructs tensile test coupon patterns with gating system and risers attached; designs and uses pattern padding required for control of solidification; prepares maintenance schedules. *PMC:* Able to perform the duties required for PM1; estimates cost for patternmaking jobs; prepares and maintains records and reports required for repair department; solves problems of casting design; applies principles of mold construction and foundry methods for minimizing stress, strains, and hot spots by using chills, risers, and fillets; controls shrinkage by the use of chills, risers, and pods; conducts on-the-job training; supervises and trains personnel in the design, construction, layout, and manufacture of patterns, in identifying metals, and in the use of immersion and optical pyrometers; prepares quarterly maintenance schedules.

Recommendation, PM3

In the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 1 in mechanical drafting, 1 in woodworking laboratory, 1 in machine tool operation, and 2 in patternmaking (3/90).

Recommendation, PM2

In the lower-division baccalaureate/associate degree category, 2 semester hours in blueprint reading, 2 in mechanical drafting, 2 in woodworking laboratory, 2 in machine tool operation, 4 in patternmaking, 1 in record keeping, and 2 in principles of supervision (3/90).

Recommendation, PM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 2 in mechanical drafting, 3 in woodworking laboratory, 3 in machine tool operation, 6 in patternmaking, 2 in record keeping, and 3 in principles of supervision (3/90).

Recommendation, PMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading, 2 in mechanical drafting, 3 in woodworking laboratory, 3 in machine tool operation, 6 in patternmaking, 2 in record keeping, and 4 in principles of supervision. AN: Airman (E-3). *PR3:* Aircrew Survival Equipmentman, Third Class (E-4). *PR2:* Aircrew Survival Equipmentman, Second Class (E-5). *PR1:* Aircrew Survival Equipmentman, First Class (E-6). *PRC:* Chief Aircrew Survival Equipmentman (E-7). *PRCS:* Senior Chief Aircrew Survival Equipmentman (E-8). *PRCM:* Master Chief Aircrew Survival Equipmentman (E-9).

Description

Summary: Inspects, maintains, and repairs parachutes, survival equipment, and flight and protective clothing and equipment; inspects, detects, and treats aircraft corrosion. *PR3:* Packs and rigs parachutes; packs and equips life rafts; sews-stitches, and tacks material; installs, repairs, and replaces fasteners, grommets, and speedy rivets; performs preflight, postflight, turn around, and conditional inspections of aircrew survival equipment; maintains components of oxygen masks; operates, lubricates, and adjusts sewing machines; operates carbon dioxide recharge equipment. *PR2:* Able to perform the duties required for PR3; supervises four to seven persons working in parachute lofts and survival gear work centers; operates oxygen system component test stand and liquid oxygen converter test stand; operates test equipment for cartridge-actuated devices associated with parachute systems; inspects, cleans, tests, fits, adjusts, repairs and/or replaces aircrew protective equipment; inspects, rigs, packs, and repairs aircrew inflatable survival equipment; rigs, inspects, packs, and maintains seat-contained survival kits; tests oxygen breathing regulators and liquid oxygen converters and components. *PR1:* Able to perform the duties required for PR2; constructs, modifies, and repairs aircrew survival and associated equipment; repairs oxygen breathing regulators, emergency oxygen systems, and liquid oxygen converters and components; maintains carbon dioxide recharge equipment; maintains test equipment for cartridge-actuated devices associated with parachute systems; maintains technical publications and directives; supervises inspections; prepares weekly schedules of preventive maintenance; inventories, orders, and turns in equipment, spare parts, and materials; troubleshoots and repairs sewing machine malfunctions. *PRC:* Able to perform the duties required for PR1; monitors compliance with safety program; interprets maintenance directives and instructions; ensures maximum utilization of personnel, equipment, and facilities; estimates material, equipment, and manpower requirements; initiates recommendations concerning work center repair capabilities and facility requirements; prepares quarterly schedules of preventive maintenance; prepares reports concerning material and equipment. *PRCS:* Able to perform the duties required for PRC; recommends changes to ground and flight safety programs; assists in aircraft accident investigations; collects and disseminates technical information concerning assigned equipment; prepares local directives and instructions for attaining objectives and improving operations; prepares correspondence; provides information and advice regarding operations in area of responsibility; implements a program for interviewing, assigning, and evaluating personnel; organizes, schedules, and evaluates training programs; administers long-range maintenance programs. *PRCM:* Able to perform the duties required for PRCS; formulates guidelines for use in safety inspections; plans and estimates work load commitments; monitors implementation of preventive maintenance program; ensures that procedures for requisitioning, receiving, storing, and transferring equipment are followed; prepares studies concerning maintenance and staff problems; plans, organizes, and coordinates functions between work centers and branches in the maintenance department; reviews and forecasts material, equipment, and personnel requirements; establishes objectives and sets priorities in area of responsibility; reviews and evaluates inspection records and quality control reports; develops operating budgets and monitors expenditures.

Recommendation, PR3

In the vocational certificate category, 3 semester hours in sewing machine operations and service, 3 in fabric layout and pattern design, and 3 in parachute packing. In the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft corrosion control (11/97).

Recommendation, PR2

In the vocational certificate category, 3 semester hours in sewing machine operations and service, 3 in fabric layout and pattern design, 3 in parachute packing, 3 in survival equipment inspection and repair, and 3 in survival equipment testing and assembly. In the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft corrosion control and 2 in personnel supervision (11/97).

Recommendation, PR1

In the vocational certificate category, 3 semester hours in sewing machine operations and service, 3 in fabric layout and pattern design, 3 in parachute packing, 3 in survival equipment inspection and repair, 3 in survival equipment testing and assembly, and 3 in industrial sewing machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 2 in aircraft corrosion control (11/97).

Recommendation, PRC

In the vocational certificate category, 3 semester hours in sewing machine operations and service, 3 in fabric layout and pattern design, 3 in parachute packing, 3 in survival equipment inspection and repair, 3 in survival equipment testing and assembly, and 3 in industrial sewing machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 2 in aircraft corrosion control. In the upper-division baccalaureate category, 1 semester hour in shop management (11/97).

Recommendation, PRCS

In the vocational certificate category, 3 semester hours in sewing machine operations and service, 3 in fabric layout and pattern design, 3 in parachute packing, 3 in survival equipment inspection and repair, 3 in survival equipment testing and assembly, and 3 in industrial sewing machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 2 in aircraft corrosion control, and 3 in safety program supervision. In the upper-division baccalaureate category, 2 semester hours in shop management, 3 in shop maintenance organization and planning, 3 in quality assurance and management control, and 3 for field experience in management (11/97).

Recommendation, PRCM

In the vocational certificate category, 3 in sewing machine operations and service, 3 in fabric layout and pattern design, 3 in parachute packing, 3 in survival equipment inspection and repair, 3 in survival equipment testing and assembly, and 3 in industrial sewing machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 2 in aircraft corrosion control, and 3 in safety program supervision. In the upper-division baccalaureate category, 3 semester hours in shop maintenance organization and planning, 3 in quality assurance and management control, 6 for field experience in management, and 3 in shop management (11/97).

SHCM

Exhibit Dates: 1/90–Present.

Occupational Field: 16 (Logistics).

Career Pattern

SN: Seaman (E-3). *SH3:* Ship's Serviceman, Third Class. *SH2:* Ship's Serviceman, Second Class (E-5). *SH1:* Ship's Serviceman, First Class (E-6). *SHC:* Chief Ship's Serviceman (E-7). *SHCS:* Senior Chief Ship's Serviceman (E-8). *SHCM:* Master Chief Ship's Serviceman (E-9).

Description

Summary: Able to operate barber shop, tailor shop, ship's store, laundry, dry cleaning plant, retail store, soda fountain, and commissary store; able to operate and maintain vending machines and cash registers; performs clerical and stock control functions. NOTE: Ship's Servicemen, Third Class (SH3) specialize as tailors, barbers, laundrymen/dry cleaners, or store clerks. *SH3:* If serves as tailor, operates and adjusts sewing machines; sews and performs alterations and minor repair work on garments; presses garments on mechanical steam and electric presses; installs zippers, buttons, and makes buttonholes; attaches service ribbons and badges with even stitches; sets up accounts for retail clothing, receipts, and expenditures; inventories stock; receives tags and logs items for processing. If serves as barber, cuts hair; schedules appointments; maintains acceptable sanitary and health standards in barber shop; has knowledge of basic first aid; maintains shop equipment; knows medical terminology for hair and scalp diseases and sources of infection. If serves as laundryman, operates and adjusts all laundry and dry cleaning equipment; has knowledge of safety precautions, operating temperatures, and pressures of laundry equipment; removes stains; has knowledge of washing colored clothing and starching garments using detergents, soaps, and bleaches; uses flatwork ironer and air-operated presser; has knowledge of water pollution control; issues and records laundry markings for laundry items; schedules laundry and dry cleaning operations; processes claims for loss of or damage to garments; accounts for receipts and expenditures. If serves as store clerk, performs shipboard and shoreside supply functions; conducts inventories, orders stock, and computes standard markups; uses all memoranda, forms, and vouchers used by the Navy supply corps. *SH2:* Able to perform the duties required for SH3; able to supervise the laundry, barber shop, or tailor shop; plans and schedules work loads; prepares and assembles financial returns; inventories stock; assists superiors on smaller ships without a supply corps officer. *SH1:* Able to perform the duties required for SH2; prepares planned maintenance schedules; prepares reports; able to function as supply officer on small ships. *SHC:* Able to perform the duties required for SH1; supervises and assigns duties; orders materials; prepares work requests; audits maintenance programs; serves as a counselor on reenlistment and advancement opportunities; plans physical layouts for sales and service activities; investigates and resolves customer complaints. *SHCS:* Able to perform the duties required for SHC; supervises entire supply department; serves as liaison with other departments and supply corps; organizes and schedules training programs, evaluates effectiveness, and initiates improvements; writes correspondence, directives and instructions. *SHCM:* Able to perform the duties required for SHCS; serves as the administrator of an entire supply department; supervises up to 70 persons; conducts task analysis; approves procedural changes and modifications; reviews personnel evaluations and performance standards; develops operating budgets and monitors expenditures.

Recommendation, SH3

In the vocational certificate category, if served as laundry/dry cleaning specialist, 2 semester hours in treatment of fabrics (stain removing, spotting, solutions), 3 in laundry equipment operational techniques and repair, 3 in laundry management, and 3 in dry cleaning and pressing. In the lower-division baccalaureate/associate degree category, if served as tailor, 2 semester hours in record keeping, 3 in beginning tailoring, 3 in applied tailoring techniques (alterations, repairs, buttonholing, braiding), 3 in small business management for tailors, and 3 in home economics in tailoring techniques. If served as barber, 2 semester hours in record keeping, 2 in small business management for barbers, 3 in barber science (equipment and nomenclature), 3 in barber science II (sanitation, dermatology, hygiene, and 7 in applied barber shop techniques (haircuts, trims). If served as laundry/dry cleaning specialist, 2 semester hours in record keeping and 1 in environmental control (water). If served as clerk, 2 semester hours in record keeping and 3 in inventory control (10/87).

Recommendation, SH2

In the lower-division baccalaureate/associate degree category, follow the recommendation in SH3 and add 1 semester hour in personnel supervision (10/87).

Recommendation, SH1

In the lower-division baccalaureate/associate degree category, follow the recommendation in SH3 and add 3 semester hours in personnel supervision (10/87).

Recommendation, SHC

In the lower-division baccalaureate/associate degree category, follow the recommendation in SH3 and add 1 semester hour in record keeping, 3 in retail sales management, 3 in personnel supervision, and 3 for field experience in management (10/87).

Recommendation, SHCS

In the lower-division baccalaureate/associate degree category, follow the recommendation in SH3 and add 1 semester hour in record keeping, 3 in retail sales management, 3 in personnel supervision, 3 in management electives, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours for a practicum in management (10/87).

Recommendation, SHCM

In the lower-division baccalaureate/associate degree category, follow the recommendation in SH3 and add 1 semester hour in record keeping, 6 in retail sales management, 3 in personnel supervision, 3 in management electives, and 3 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for a practicum in management, and 3 in personnel management (10/87).

NER-SK-002

STOREKEEPER
SK3
SK2
SK1
SKC
SKCS
SKCM

Exhibit Dates: 1/90–Present.

Occupational Field: 16 (Logistics).

Career Pattern

SN: Seaman (E-3). *SK3:* Storekeeper, Third Class (E-4). *SK2:* Storekeeper, Second Class (E-5). *SK1:* Storekeeper, First Class (E-6). *SKC:* Chief Storekeeper (E-7). *SKCS:* Senior Chief Storekeeper (E-8). *SKCM:* Master Chief Storekeeper (E-9).

Description

Summary: Orders, receives, inspects, stores, preserves, packages, ships, and issues materials and cargo; prepares and maintains forms, records, correspondence, reports, and files. *SK3:* Knows the basic organization and functions of supply departments; is familiar with the purpose and use of major components of automated data processing (ADP) equipment and knows common terms used in ADP; operates office machines; types (at 20 words per minute), routes and files forms and messages; maintains files, requisition log, and budget records; prepares supply related documents; identifies, receives, stows, and issues materials and stock items; prepares items for shipment; prepares shipment documents; inventories stocked material and installed equipment; operates material-handling equipment. *SK2:* Able to perform the duties required for SK3; establishes and maintains files; knows types, uses, and purpose of appropriations and funds; reconciles financial listings; prepares budget reports; requisitions repair parts, supplies, forms, and publications; supervises working parties handling stores; controls inventory using ADP procedures; maintains and interprets reports and records; prepares open purchases documents; applies regulations to maintain the security of materials or documents. *SK1:* Able to perform the duties required for SK2; applies automated supply procedures; prepares correspondence and messages; instructs others in the use of publications and directives; supervises the maintenance of publications; reviews requisitions for nonstandard materials; establishes and maintains a technical library; implements and supervises target budgeting procedures; processes bills for payment; identifies sources and uses of funds; effects supply issuance; carries out Navy supply procedures; supervises regular and special inventories; writes correspondence. *SKC:* Able to perform the duties required for SK1; monitors outgoing correspondence, shipboard ADP, and management of fleet-controlled material; supervises the receipt of material and administrative storekeeper functions; organizes and supervises internal procedures for inventory management; prepares replenishment data for equipage, repair parts, and consumables and estimates requirements which would exist for voyages of various lengths and under various climatic conditions; interviews, supervises, and evaluates personnel. *SKCS:* Able to perform the duties required for SKC; analyzes supply reports and evaluates problem areas; supervises on-the-job training programs; utilizes ADP in supply operations; monitors and directs supply functions, including those related to security, financial control, and logistics; prepares local directives and instructions. *SKCM:* Able to perform the duties required for SKCS; plans, organizes, implements, and controls activities in compliance with policy statements, operation orders, and directives; forecasts future requirements; plans and initiates actions to satisfy requirements; establishes goals and priorities; reviews and evaluates personnel, equipment, and material requirements; develops operating budgets and monitors expenditures; plans and develops operational requirements for service markets, supply operations assistance program, sea markets, and storage warehouses.

Recommendation, SK3

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, and 2 in inventory control (3/90).

Recommendation, SK2

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 2 in inventory control, 2 in supply management, and 3 in records and information management (3/90).

Recommendation, SK1

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 3 in inventory control, 3 in supply management, 3 in records and information management, and 3 in business communication (3/90).

Recommendation, SKC

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 3 in inventory control, 3 in supply management, 3 in records and information management, 3 in business communication, 3 in office procedures, and 3 in principles of supervision (3/90).

Recommendation, SKCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 3 in inventory control, 3 in supply management, 3 in records and information management, 3 in business communication, 3 in office procedures, and 3 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in logistics management (3/90).

Recommendation, SKCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in office machines, 3 in clerical procedures, 3 in inventory control, 3 in supply management, 3 in records and information management, 3 in business communication, 3 in office procedures, and 3 in principles of supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in logistics management, and 3 in principles of management (3/90).

NER-SM-002

SIGNALMAN

SM3
SM2
SM1
SMC
SMCS
SMCM

Exhibit Dates: 1/90–Present.

Occupational Field: 1 (General Seamanship).

Career Pattern

SN: Seaman (E-3). *SM3:* Signalman, Third Class (E-4). *SM2:* Signalman, Second Class (E-5). *SM1:* Signalman, First Class (E-6). *SMC:* Chief Signalman (E-7). *SMCS:* Senior Chief Signalman (E-8). *SMCM:* Master Chief Signalman (E-9).

Description

Summary: Sends and receives messages by flashing light, semaphore, and flag hoist; stands watch on the signal bridge; performs lookout duties; encodes and decodes messages; maintains visual signal equipment; recognizes visual aids to navigation such as beacons and buoys; takes bearings; serves as navigator's assistant. *SM3:* Performs basic seamanship duties; stands watches as a signal operator underway and in port; inventories equipment; performs routine maintenance on optical equipment; uses and recognizes flag, light, international distress, emergency, and storm warning signals; transmits and receives code groups by flashing lights at 8 wpm and semaphore at 10 wpm; selects and displays flags and pennants; receives, sends, and handles routine messages according to precedence; performs duties of a signalman as member of a boat crew; operates infrared and flashing light equipment; performs routine maintenance of visual signaling equipment. *SM2:* Able to perform the duties required for SM3; maintains visual signal log and visual traffic files; locates ships in local formation using formation diagram; corrects and maintains signal publications; completes planned maintenance reports; orders repair parts and special tools required for installed equipment maintenance; constructs and uses all visual call signs, international call signs, and task organization calls for ship and commands; encodes and decodes naval or international signals contained in effective visual communication publications; carries out disposal and destruction of classified communication materials; ensures that correct methods of transmission or transportation of classified information and material are followed; transmits and receives code groups by flashing light of 8 wpm, plain language message by flashing light at 10 wpm, and by semaphore at 15 wpm. *SM1:* Able to perform the duties required for SM2; prepares requests for requisition of equipment; prepares visual equipment communication standing orders for signalmen; instructs signal personnel in identification of ships and aircraft, visual communication procedures, naval communications rules, and recognition procedures and codes; prepares weekly schedules of preventive maintenance; maintains inventory files for equipment and consumable goods; administers security classification policies; authenticates authority of the releaser of visual messages; transmits and receives code group by flashing lights of 10 wpm, plain language messages by flashing lights at 12 wpm, and semaphore at 20 wpm. *SMC:* Able to perform the duties required for SM1; prepares quarterly schedules of preventive maintenance; posts changes to ship equipment configuration accounting system; administers command security education programs; performs duties of tactical communications watch officer; supervises visual communications activities; supervises signal bridge personnel. *SMCS:* Able to perform the duties required for SMC; interprets organization and functions of the communications section; provides information and advice on utilization, capability of operations in own area of responsibility; prepares correspondence; prepares local directives and instruction concerning organization objectives and improving operations; evaluates and assigns personnel to ensure maximum utilization; observes and evaluates visual exercises and drills; organizes and implements communications section of operation orders and plans; organizes, schedules, and evaluates visual communications training programs; administers long-range planned maintenance programs in accordance with Navy maintenance and material management system; administers command security program. *SMCM:* Able to perform the duties required for SMCS; plans, organizes, and implements activities in compliance with policy statements, operation orders, and directives; forecasts future requirements and plans and initiates action to satisfy requirements in area of responsibility; establishes goals, objectives, and priorities in area of responsibility; reviews personnel, equipment, and material requirements; develops operating budgets and monitors expenditures.

Recommendation, SM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship (12/89).

Recommendation, SM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, and 2 in personnel supervision (12/89).

Recommendation, SM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping and 2 in personnel supervision (12/89).

Recommendation, SMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, 3 in personnel supervision, and 3 in personnel administration (12/89).

Recommendation, SMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, 3 in personnel supervision, and 3 in personnel administration. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (12/89).

Recommendation, SMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 2 in record keeping, 3 in personnel supervision, and 3 in personnel administration. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (12/89).

NER-SN-002

SEAMAN

SN

Exhibit Dates: 1/90–Present.

Career Pattern

Seaman (SN) is a general rate (Naval apprenticeship) for persons at paygrades E-1 (recruit), E-2 (Seaman apprentice), and E-3 (Seaman). At paygrade E-4 (petty officer, third class), the person may enter any one of the following ratings: Boatswain's Mate (BM), Cryptologic Technician (CT), Data Processing Technician (DP), Data Systems Technician (DS), Disbursing Clerk (DK), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FTB or FTG), Fire Controlman (FC), Gunner's Mate (GMG or GMM), Gunner's Mate Technician (GMT), Illustrator Draftsman (DM), Instrumentman (IM), Intelligence Specialist (IS), Journalist (JO), Lithographer (LI), Mess Management Specialist (MS), Mineman (MN), Missile Technician (MT), Musician (MU), Ocean Systems Technician (OT), Operations Specialist (OS), Opticalman (OM), Personnelman (PN), Postal Clerk (PC), Quartermaster (QM), Radioman (RM), Religious Program Specialist (RP), Ship's Serviceman (SH), Signalman (SM), Sonar Technician (STG or STS), Storekeeper (SK), Torpedoman's Mate (TM), or Yeoman (YN).

Description

Performs all basic seamanship functions aboard ship that involve line or wire and rigging used to secure the ship to a pier, mooring, or anchor; is able to identify functions of navigation and shipboard equipment; lowers, raises, and launches lifesaving equipment; handles small boats; navigates by using several different types of compasses; keeps records by degrees or points; knows navigational aids, nautical rules of the road, and the buoys of inland waters of the US; knows the nomenclature of decks, superstructures, and parts of the hull; knows the purpose and limitations of first aid and the first aid treatments for electrical shock, simple and compound fractures, heat exhaustion, heat stroke, and burns; must be qualified as a swimmer, fourth class; knows how to determine the classes of fire hoses and how to use carbon dioxide, dry chemical, and water portable fire extinguishers; knows the function of the typical fire main system, fixed carbon dioxide system, water washdown system, and magazine sprinkling system; knows the difference between flooding and progressive flooding and the danger involved.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in nautical science (seamanship) and 3 in nautical science (navigation); if qualified as a swimmer, first class, 1 semester hour in swimming and additional credit in swimming on the basis of institutional evaluation. Credit for Seaman (SN) should be granted only after paygrade E-3 has been achieved (3/90).

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital systems troubleshooting and maintenance, 2 in solid state electronics, 2 in basic oceanographic concepts, and 1 in digital electronics (2/98).

Recommendation, STS2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital systems troubleshooting and maintenance, 2 in digital electronics, 2 in solid state electronics, and 2 in basic oceanographic concepts (2/98).

Recommendation, STS1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital systems troubleshooting and maintenance, 2 in digital electronics, 2 in solid state electronics, 2 in basic oceanographic concepts, and 2 in computer use and applications, and 3 in personnel supervision (2/98).

Recommendation, STSC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 3 in digital systems troubleshooting and maintenance, 2 in digital electronics, 2 in solid state electronics, 2 in basic oceanographic concepts, 2 in computer use and application, and 3 in personnel supervision (2/98).

Recommendation, STSCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance, 3 in basic electronics laboratory, 3 in digital systems troubleshooting and maintenance, 3 in personnel supervision, 3 in maintenance management, 2 in digital electronics, 2 in solid state electronics, 2 in basic oceanographic concepts, and 2 in computer use applications. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (2/98).

Recommendation, STSCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory and 3 in digital systems troubleshooting and maintenance, 2 in digital electronics, 2 in solid state electronics, 2 in basic oceanographic concepts, 2 in computer use and applications, and 3 in personnel supervision. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (2/98).

NER-SW-001

STEELWORKER
SW3
SW2
SW1
SWC
SWCS

Exhibit Dates: 1/90–12/90.

Occupational Field: 13 (Construction).

Career Pattern

CN: Constructionman (E-3). *SW3:* Steelworker, Third Class (E-4). *SW2:* Steelworker, Second Class (E-5). *SW1:* Steelworker, First Class (E-6). *SWC:* Chief Steelworker (E-7). *SWCS:* Senior Chief Steelworker (E-8). *CUCM:* Master Chief Constructionman (E-9).

Description

Summary: Fabricates, assembles, erects, positions, and joins structural members and fabricated sections. *SW3:* Reads shop drawings and sketches; uses simple hoisting devices; cuts, forms, places, and ties reinforcing steel; works with erection crew as a connector or tag man; performs gas cutting, gas welding, and electric arc welding in all positions; identifies types and uses of electrodes, gas rods, and fluxes for welding, soldering, and brazing; identifies types of welded joints; identifies compressed gas cylinders; splices line and wire rope; computes safe working load of lines, wire rope, and block and tackle arrangements; erects common types of metal and swinging scaffolds; identifies types and shapes of structural and reinforcing steel; identifies types of pre-engineered buildings and structures; computes areas of polygons, circles, and cylinders; computes volume of prisms, pyramids, cones, spheres, and cylinders; fabricates elementary designs and shapes in sheet metal by using soldering, brazing, and riveting. *SW2:* Able to perform the duties required for SW3; draws simple shop drawings and sketches; prepares requisitions; welds ferrous/nonferrous metals in all positions using gas metal arc and gas tungsten arc welding procedures; applies methods of controlling metal expansion during welding operations; applies field straightening techniques to damaged structural shapes; applies principles and methods of cutting, chamfering, and scarfing metal using carbon arc chamfer-type rod and air arc processes; performs gas welding and electric arc welding to build up and wearface metal parts; determines mechanical advantage of block and tackle arrangements; determines types and use of drive pins, studs, and power charges for powder-assisted or powder-actuated tools; performs layout and fabrication of simple steel structures for teams and crews; rigs wire charges for powder-assisted or powder-actuated tools; performs layout and fabrication of simple steel structures for teams and crews; rigs wire rope using poured sockets, clips, and related attachments; performs operator maintenance on powder-actuated (low and high velocity) stud guns and on diesel or gasoline driven air compressors. *SW1:* Able to perform the duties required for SW2; prepares as-built drawings; prepares work progress reports; provides material usage data; conducts training for teams and crews; designs and erects simple hoisting devices, such as A-frames, gin poles, tripods, and derricks; directs the movement of cranes and other hoisting devices in moving and positioning objects; directs crews involved in cutting, bending, and placing reinforcing steel; directs teams and crews in erecting rigid frame and other pre-engineered buildings, structures, and airfield matting; directs teams and crews engaged in metal work and fabrication; applies the principles and assembly methods of the various pontoon systems; assigns daily work to teams and crews; prepares equipment, manpower, and material estimates from drawings and specifications; uses principles and techniques of critical path method scheduling; performs duties of shop planner or maintenance scheduler; performs construction and maintenance inspections; performs nondestructive metal tests. *SWC:* Able to perform the duties required for SW1; drafts letters and instructions; prepares reports; administers accident prevention program; makes personnel assignments; provides technical advice on plans and specifications and on construction and maintenance techniques; implements maintenance and cost control program; prepares and uses network analysis; prepares and maintains project progress charts; organizes and controls the site development of materials and equipment. *SWCS:* Able to perform the duties required for SWC; prepares correspondence and local directives and instructions for attaining organizational objectives and improving operations; provides information and advice on utilization, capabilities, reliability, and operations in own area of responsibility; implements a program for assigning and evaluating personnel; coordinates equipment assignment among various projects; administers construction force tool inventory and inspection program; prepares and maintains visual status boards; is capable of directing the operation and maintenance of all utilities in the public works department; directs transportation and equipment services; establishes a maintenance and cost control program; coordinates and evaluates labor reporting, material and equipment usage, and maintenance data and coordinates the preparation and submission of related reports; organizes, schedules, and evaluates training programs.

Recommendation, SW3

In the vocational certificate category, 9 semester hours in welding, 1 in rigging, and 1 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 3 semester hours in welding and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SW2

In the vocational certificate category, 15 semester hours in welding, 2 in rigging, and 2 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 5 semester hours in welding, 1 in steel layout and fabrication, and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SW1

In the vocational certificate category, 15 semester hours in welding, 6 in advanced welding, 3 in rigging, 3 in technical mathematics, and 3 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 7 semester hours in welding, 2 in steel layout and fabrication, 2 in personnel supervision, and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SWC

In the vocational certificate category, 15 semester hours in welding, 6 in advanced welding, 3 in rigging, 3 in technical mathematics, and 3 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 7 semester hours in welding, 3 in personnel supervision, 3 in industrial technology, 2 in steel layout and fabrication, 1 in technical writing, and additional credit in welding on the basis of institutional evaluation (1/77).

Recommendation, SWCS

In the vocational certificate category, 15 semester hours in welding, 6 in advanced welding, 3 in rigging, 3 in technical mathematics, and 3 in steel layout and fabrication. In the lower-division baccalaureate/associate degree category, 7 semester hours in welding, 3 in personnel supervision, 3 in records administration, 3 in technical writing, 3 in industrial technology, 2 in steel layout and fabrication, and additional credit in welding on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for a practicum in management, 3 in construction management, and 3 in human relations (1/77).

TDC
TDCS
TDCM

Exhibit Dates: 1/90–1/92. The Tradevman rating has been discontinued.

Occupational Field: 11 (Weapons System Support).

Career Pattern

AN: Airman (E-3). *TD3:* Tradevman, Third Class (E-4). *TD2:* Tradevman, Second Class (E-5). *TD1:* Tradevman, First Class (E-6). *TDC:* Chief Tradevman (E-7). *TDCS:* Senior Chief Tradevman (E-8). *TDCM:* Master Chief Tradevman (E-9).

Description

Summary: Operates, maintains, and installs training equipment; supervises maintenance; uses equipment in training programs; plans and develops training programs and training aids. *TD3:* Performs maintenance on electronic, hydraulic, and electrical training equipment; prepares computers for operation; records information on training devices; performs electromechanical maintenance; operates and repairs audiovisual training equipment and other training devices. *TD2:* Able to perform the duties required for TD3; analyzes and repairs electronic and hydraulic systems of training devices; operates and maintains sensor equipment; repairs analog computers; prepares computer program tapes and interprets printouts; organizes and maintains technical files; troubleshoots and maintains servo systems used in training devices; locates and corrects defects in mechanical computing elements. *TD1:* Able to perform the duties required for TD2; analyzes and corrects computer system malfunctions; supervises tests and measurements on training devices; prepares maintenance troubleshooting programs for ADP/EDP operations; verifies computer tapes; prepares drawings from mechanical, electrical, and electronic schematics; inspects maintenance work; prepares maintenance schedules; orders technical publications or manuals; orders parts, tools, equipment, and material; maintains and repairs air conditioning systems. *TDC:* Able to perform the duties required for TD1; assists in selection and development of training aids; coordinates scheduling of training devices; supervises training programs; assigns job priorities; analyzes discrepancy trends; directs and monitors installation, operation, and maintenance of assigned equipment; schedules preventive maintenance; develops and directs closed-circuit television programs. *TDCS:* Able to perform the duties required for TDC; provides utilization information; prepares correspondence and local directives; establishes a program for interviewing, evaluating, and assigning personnel; organizes, schedules, and evaluates training programs; evaluates requirements and administers a long-range planned maintenance program. *TDCM:* Able to perform the duties required for TDCS; plans, organizes, and controls activities; forecasts future requirements and plans for personnel, equipment, and materials; establishes goals and priorities; develops operating budgets and monitors expenditures.

Recommendation, TD3

In the vocational certificate category, 2 semester hours in blueprint reading and schematics and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics (2/77).

Recommendation, TD2

In the vocational certificate category, 2 semester hours in blueprint reading and schematics and 3 in technical mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics (2/77).

Recommendation, TD1

In the vocational certificate category, 2 semester hours in blueprint reading and schematics, 3 in technical mathematics, and additional credit in air conditioning and refrigeration on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 2 in personnel supervision, 3 in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics. In the upper-division baccalaureate category, 3 semester hours in audiovisual education (2/77).

Recommendation, TDC

In the vocational certificate category, 2 semester hours in blueprint reading and schematics, 3 in technical mathematics, and additional credit in air conditioning and refrigeration on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in personnel supervision, 3 in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics. In the upper-division baccalaureate category, 3 semester hours in audiovisual education and 3 in instructional techniques and materials (2/77).

Recommendation, TDCS

In the vocational certificate category, 2 semester hours in blueprint reading and schematics, 3 in technical mathematics, and additional credit in air conditioning and refrigeration on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in personnel supervision, 3 for management electives, 3 in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics. In the upper-division baccalaureate category, 3 semester hours in audiovisual education, 3 in instructional techniques and materials, and 3 for field experience in management (2/77).

Recommendation, TDCM

In the vocational certificate category, 2 semester hours in blueprint reading and schematics, 3 in technical mathematics, and additional credit in air conditioning and refrigeration on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping, 3 in personnel supervision, 3 for management electives, 3 in basic electricity, 3 in basic electronics, 3 in basic mathematics, and 6 in applied physics. TORPEDOMAN'S MATE (TECHNICIAN)
TM3
TM2
TM1
TMC
TMCS
TMCM

Exhibit Dates: 1/90–12/96. Effective 12/96, the Torpedoman's Mate rating merged with the Machinist's Mate rating.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *TM3:* Torpedoman's Mate, Third Class (E-4). *TM2:* Torpedoman's

Mate, Second Class (E-5). *TM1:* Torpedoman's Mate, First Class (E-6). *TMC:* Chief Torpedoman's Mate (E-7). *TMCS:* Senior Chief Torpedoman's Mate (E-8). *TMCM:* Master Chief Torpedoman's Mate (E-9).

Description

Summary: NOTE: Torpedoman's Mates may serve as either Technicians or Operators. Technicians are identified by a four-digit NEC code that indicates the weapons systems specialty. Operators are identified by an NEC code of "0000." (See Appendix A for information about NECs.) Refer to exhibit NER-TM-002 for Torpedoman's Mate (Operator). Assembles, repairs, and performs maintenance on underwater electronics torpedoes that are launched from surface ships and submarines; troubleshoots, tests, and replaces defective elements and components in the torpedo electronic systems; uses instrumentation and test equipment. *TM3:* (Technician) Handles, transfers, loads, and offloads torpedoes; operates oscilloscopes, frequency counters, and signal generators; uses multimeter; solders electrical leads and terminals; tests and replaces electronic components; uses technical maintenance publications, schematics, and drawings; maintains torpedo records; uses and cares for hand tools. *TM2:* Able to perform the duties required for TM3; (Technician) performs electronic maintenance; disassembles, cleans, adjusts, reassembles, and tests propulsion and control mechanisms of torpedoes; effects all electronic and electrical circuit tests and makes required adjustments; completes deficiency reports on torpedoes and associated equipment. *TM1:* Able to perform the duties required for TM2; (Technician) tests internal circuits of major units; uses working drawing in making modification to torpedo; maintains a technical library; trains subordinates to perform maintenance on weapons; prepares preventive maintenance schedule. NOTE: If NEC was TM-0747, Advanced Undersea Mk 46 Test Equipment Weaponsman, or TM-0749, Advanced Undersea Mk 48 Test Equipment Weaponsman, also performs maintenance on test equipment (a sophisticated computer system with a number of interfaces to the torpedoes and instrumentation) used by Torpedoman's Mates Technicians; has a thorough knowledge of interfacing, of the interfaced equipment, and of digital and computer electronics. *TMC:* Able to perform the duties required for TM1; (Technician) supervises the upkeep and assembly of torpedoes; administers periodic inspection to ensure quality control. *TMCS:* Able to perform the duties required for TMC; (Technician): prepares local directives and correspondence; organizes and schedules training programs; administers long-range planned maintenance programs; controls expenditure of material and funds used in procurement. *TMCM:* Able to perform the duties required for TMCS; (Technician) plans, organizes, implements, and controls activities in accordance with policies and directives; establishes goals and objectives in area of responsibility; develops operating budgets and monitors expenditures.

Recommendation, TM3

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in computer operations (10/87).

Recommendation, TM2

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics and 3 in computer operations (10/87).

Recommendation, TM1

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in computer operations, 2 in personnel supervision, 2 in maintenance management, and 3 in human relations; if NEC was TM-0747, Advanced Undersea Mk 46 Test Equipment Weaponsman, or TM-0749, Advanced Undersea Mk 48 Test Equipment Weaponsman, additional credit as follows: 2 semester hours in applied mathematics, 4 in digital electronics, 4 in computer organization, 3 in electromechanical systems, and 8 in systems maintenance (10/87).

Recommendation, TMC

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in computer operations, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations; if NEC was TM-0747, Advanced Undersea Mk 46 Test Equipment Weaponsman, or TN-0749, Advanced, Undersea Mk 48 Test Equipment Weaponsman, additional credit as follows: 2 semester hours in applied mathematics, 4 in digital electronics, 4 in computer organization, 3 in electromechanical systems, and 8 in systems maintenance (10/87).

Recommendation, TMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in computer operations, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations; if NEC was TM-0747, Advanced Undersea Mk 46 Test Equipment Weaponsman, or TN-0749, Advanced, Undersea Mk 48 Test Equipment Weaponsman, additional credit as follows: 2 semester hours in applied mathematics, 4 in digital electronics, 4 in computer organization, 3 in electromechanical systems, and 8 in systems maintenance. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

Recommendation, TMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electronics, 3 in computer operations, 3 in personnel supervision, 3 in maintenance management, and 3 in human relations; if NEC was TM-0747, Advanced Undersea Mk 46 Test Equipment Weaponsman, or TN-0749, Advanced, Undersea Mk 48 Test Equipment Weaponsman, additional credit as follows: 2 semester hours in applied mathematics, 4 in digital electronics, 4 in computer organization, 3 in electromechanical systems, and 8 in systems maintenance. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic mechanical systems, 3 in hydraulic/pneumatic systems, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 3 in system maintenance (10/87).

Recommendation, TMCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic mechanical systems, 3 in hydraulic/pneumatic systems, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 3 in system maintenance. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

Recommendation, TMCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic mechanical systems, 3 in hydraulic/pneumatic systems, 3 in personnel supervision, 3 in maintenance management, 3 in human relations, and 3 in system maintenance. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

NER-UC-001

Utilitiesman, Master Chief
UCCM

Exhibit Dates: 1/91–Present.

Occupational Field: 13 (Construction).

Career Pattern

May progress to UCCM from UTCS, Senior Chief Utilitiesman (E-8) or CECS, Senior Chief Construction Electrician (E-8). *UCCM:* Master Chief Utilitiesman (E-9).

Description

Able to perform the duties required for UTCS (Senior Chief Utilitiesman) or CECS (Senior Chief Construction Electrician); plans, organizes, implements, and controls work activities in compliance with policy statements and directives; establishes goals and sets priorities; reviews personnel, equipment, and material requirements; develops procedures for work improvement and simplification through organizational analysis; serves as a construction inspector; manages a contract inspection branch; implements energy conservation and pollution control programs; assists in the management and operation of a public works department; develops operating budgets and monitors expenditures; forecasts future personnel, equipment, and material requirements and takes action necessary to satisfy them; is responsible for the administration of a department or company.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in construction contracts and agreements, 3 in government budgeting, and 3 in office administration; add the credit for either UTCS in exhibit NER-UT-002 or CEC in exhibit NER-CE-002, as appropriate. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in organizational management, 3 in management problems, and 3 in operations management; add the credit for either UTCS in exhibit NER-UT-002 or CMCS in exhibit NER-CE-002, as appropriate (6/91).

CN: Constructionman (E-3). *UT3:* Utilitiesman, Third Class (E-4). *UT2:* Utilitiesman, Second Class (E-5). *UT1:* Utilitiesman, First Class (E-6). *UTC:* Chief Utilitiesman (E-7). *UTCS:* Senior Chief Utilitiesman (E-8). *UTCM:* Master Chief Utilitiesman (E-9).

Description

Summary: Plans, supervises, and performs tasks involved in the installation, maintenance, and repair of plumbing, heating, steam, compressed-air, fuel storage, and distribution systems, water treatment and distribution systems, air conditioning and refrigeration equipment, and sewage collection and disposal facilities. *UT3:* Installs immersion can heaters and space heaters, fuel lines, and piping and pressure vessel insulation materials; performs prestart checks, and maintains and operates assigned vehicles; maintains boilers, water plants, air conditioning and refrigeration equipment, and pumps and air compressors; performs minor repairs on immersion can heaters and space heaters; solders/brazes soft and hard drawn copper tubing and fittings; measures, cuts, and threads galvanized steel pipe, cast iron soil pipe, black iron gas pipe, cast iron water pipe, clay and concrete pipe, cement-asbestos pipe, and plastic pipe; identifies color coding used on piping systems and compressed gas cylinders; cleans watersides and firesides of boilers; handles chemicals used in treating water and sewage. *UT2:* Able to perform the duties required for UT3; reads and works from drawings and specifications; prepares simple shop drawings and sketches; prepares time cards and material requisitions; installs water systems, packaged refrigeration and air conditioning systems, and pressure, check, and shut-off valves; installs laundry equipment, heating systems, galley equipment, plumbing fixtures, water heaters, and sewage systems; performs water treatment and purification tests; maintains and repairs laundry equipment; tests, adjusts, and recalibrates gauges; repairs valves. *UT1:* Able to perform the duties required for UT2; prepares work progress and material usage reports; conducts personnel readiness interviews; implements training for team/crew members; constructs septic tanks, cesspools, and leaching fields; installs fire protection systems, advanced-base type boilers and pressure vessels, stationary refrigeration and air conditioning systems, and compressed air systems; organizes work schedules; prepares estimates; performs inspections; tests boilers and pressure vessels; serves as supervisor for steam, sewage, and water plants. *UTC:* Able to perform the duties required for UT1; drafts letters and reports; administers safety program; assigns personnel based on readiness reports; supervises and coordinates all unit tasks; provides technical advice; implements maintenance and cost control program; organizes and controls the site deployment of materials and equipment. *UTCS:* Able to perform the duties required for UTC; provides information and advice on utilization, capabilities, reliability, and operations in area of responsibility; prepares local directives and instructions for attaining objectives and improving operations; prepares correspondence; establishes and implements a program for interviewing, evaluating, and assigning personnel for maximum utilization; determines requirement for advanced base planning; coordinates equipment assignment; directs operation and maintenance of all utilities; establishes a maintenance/cost control program. *UTCM:* Able to perform the duties required for UTCS or CECS (Senior Chief Construction Electrician); plans, organizes, implements, and controls work activities in accordance with policy statements and directives; establishes goals and sets priorities; reviews personnel, equipment, and material requirements; develops procedures for work improvement and simplification through organizational analysis; serves as a construction inspector; manages a contract inspection branch; implements energy conservation and pollution control programs; assists in the management and operation of a public works department; develops operating budgets and monitors expenditures; forecasts future personnel, equipment, and material requirements and takes action necessary to satisfy them; is responsible for the administration of a department or company.

Recommendation, UT3

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in utilities maintenance, and 3 in plumbing. In the lower-division baccalaureate/associate degree category, 3 semester hours in utilities construction and maintenance (1/77).

Recommendation, UT2

In the vocational certificate category, 3 semester hours in introduction to construction, 3 in utilities maintenance, 3 in plumbing, 3 in utilities installation, and 2 in blueprint reading and sketching. In the lower-division baccalaureate/associate degree category, 3 semester hours in utilities construction and maintenance, 3 in applied science, and 2 in general plans and specifications (1/77).

Recommendation, UT1

In the vocational certificate category, 6 semester hours in utilities installation, 3 in introduction to construction, 3 in utilities maintenance, 3 in plumbing, and 2 for blueprint reading and sketching. In the lower-division baccalaureate/associate degree category, 4 semester hours in utilities construction and maintenance, 3 in applied science, 3 in utilities construction estimating, 3 in water and sewage treatment systems, 2 in general plans and specifications, and 2 in personnel supervision (1/77).

Recommendation, UTC

In the vocational certificate category, 6 semester hours in utilities installation, 3 in introduction to construction, 3 in utilities maintenance, 3 in plumbing, and 2 for blueprint reading and sketching. In the lower-division baccalaureate/associate degree category, 4 semester hours in utilities construction and maintenance, 3 in applied science, 3 in utilities construction estimating, 3 in water and sewage treatment systems, 3 in personnel supervision, 2 in general plans and specifications, 2 in shop management, and 1 in safety management (1/77).

Recommendation, UTCS

In the vocational certificate category, 6 semester hours in utilities installation, 3 in introduction to construction, 3 in utilities maintenance, 3 in plumbing, and 2 for blueprint reading and sketching. In the lower-division baccalaureate/associate degree category, 4 semester hours in utilities construction and maintenance, 3 in applied science, 3 in utilities construction estimating, 3 in water and sewage treatment systems, 3 in personnel supervision, 2 in introduction to management, 2 in general plans and specifications, 2 in shop management, and 1 in safety management. In the upper-division baccalaureate category, 3 semester hours for a practicum in management and 3 in human relations (1/77).

Recommendation, UTCM

In the vocational certificate category, use the recommendation for UT1 or CE1 (Construction Electrician First Class) in exhibit NER-CE-001, as appropriate. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of administration, 3 in construction contracts and agreements, and 3 in government budgeting; add either the 23 semester hours for UTCS or the 17 semester hours for CECS (Senior Chief Construction Electrician) in exhibit NER-CE-001, as appropriate. In the upper-division baccalaureate category, 6 semester hours for a practicum in management, 3 in human relations, 3 in management problems, and 3 in forecasting (1/77).

WEAPONS TECHNICIAN

WT3
WT2
WT1
WTC
WTCS
WTCM

Exhibit Dates: 1/90–4/96. Effective 4/96, the Weapons Technician rating has been discontinued.

Occupational Field: 9 (Ordnance Systems).

Career Pattern

SN: Seaman (E-3). *WT3:* Weapons Technician, Third Class (E-4). *WT2:* Weapons Technician, Second Class (E-5). *WT1:* Weapons Technician, First Class (E-6). *WTC:* Chief Weapons Technician (E-7). *WTCS:* Senior Chief Weapons Technician (E-8). *WTCM:* Master Chief Weapons Technician (E-9).

Description

Summary: Performs organizational, intermediate, and depot maintenance on nuclear weapons and components; stores, inspects, tests, adjusts, repairs, and packages nuclear weapon components and associated equipment; assembles, disassembles, and converts nuclear weapons, warheads, and/or components; maintains magazines and assembly and stowage areas; maintains sprinkler and alarm systems. *WT3:* Packages, unpackages, handles, and stows nuclear weapons; operates handling equipment applicable to nuclear weapons; inspects magazines and records temperatures; performs modernization and stowage monitoring tests on nuclear weapons and components; operates torquing tools; repairs sealing surfaces, mating areas and threads; replaces fastening hardware and seals, pipe fittings, seals, and gaskets; inspects and cleans components of electrical equipment; solders, wire wraps connections, and tests for shorts, grounds, and continuity; replaces electrical components; installs and removes dust covers and shorting plugs; uses and cares for pneumatic and electrical power tools; operates measuring devices; detects and treats corrosion; performs preventive maintenance; operates magazine fire fighting systems; performs nuclear weapons accident response and decontamination procedures; completes maintenance data system forms; uses drawings; inventories tools and portable test equipment. *WT2:* Able to perform the duties required for WT3; replaces nuclear weapon components; inspects nuclear weapons, components, and equipment; tests alarm and sensing devices; troubleshoots and repairs ordnance electrical systems; maintains nuclear weapons test equipment; installs components in hydraulic systems; troubleshoots and repairs hydraulic pumps; repairs magazine fire fighting systems; maintains publications; complies with requirements for nuclear weapons tactical inspections. *WT1:* Able to perform the duties required for WT2; identifies damaged explosive ordnance components; repairs hydraulic system components; prepares planned maintenance schedules; supervises response to nuclear accidents and incidents; supervises modernizations, alterations, and modifications. *WTC:* Able to perform the duties required for WT1; inspects completed modernizations; inspects nuclear weapons material stowage, space layout, and storeroom maintenance; coordinates repair and calibration of test equipment; prepares reports; supervises training programs. *WTCS:* Able to perform the duties required for WTC; administers long-range planned maintenance programs; prepares ordnance loading and stowage plans; coordinates weapon overhaul and repair; writes correspondence, directives, and instructions; organizes and schedules training programs and evaluates effectiveness. *WTCM:* Able to perform the duties required for WTCS; establishes goals, objectives, and priorities; plans, organizes, implements, and controls activities; reviews personnel, equipment, and material requirements; evaluates new trends in weapons systems; develops operating budgets and monitors expenditures; forecasts future requirements.

Recommendation, WT3

Credit is not recommended because of the limited or specialized nature of the skills, competencies, and knowledge (10/87).

Recommendation, WT2

Credit is not recommended because of the limited or specialized nature of the skills, competencies, and knowledge (10/87).

Recommendation, WT1

In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel supervision, 3 in human relations, and 2 in maintenance management (10/87).

Recommendation, WTC

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, and 3 in maintenance management (10/87).

Recommendation, WTCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, and 3 in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

Recommendation, WTCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, and 3 in maintenance management. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in personnel management, and 3 in management problems (10/87).

Exhibit Dates: 1/90–Present.

Occupational Field: 15 (Administration).

Career Pattern

SN: Seaman (E-3). *YN3:* Yeoman, Third Class (E-4). *YN2:* Yeoman, Second Class (E-5). *YN1:* Yeoman, First Class (E-6). *YNC:* Chief Yeoman (E-7). *YNCS:* Senior Chief Yeoman (E-8). *YNCM:* Master Chief Yeoman (E-9).

Description

Summary: Performs general office, clerical, and administrative duties, including typewriting, office machine operation, office communication, and filing and records maintenance. *YN3:* Maintains files; operates duplicating, adding, calculating, and copying machines; serves as paralegal counselor when a legalman is not available; types correspondence, reports, and other communication from rough draft (a straight-copy typing rate of at least 30 words per minute is required). *YN2:* Able to perform the duties required for YN3; organizes and monitors filing and records maintenance, retention, and disposal; maintains officer personnel records; routes correspondence; types records, correspondence, and reports (a straight-copy typing rate of at least 40 words per minute is required); sends, receives, and accounts for official and registered mail; advises personnel of benefits, types of duty, and resolution of personal problems. *YN1:* Able to perform the duties required for YN2; drafts correspondence, instructions, and notices (a straight-copy typing rate of at least 50 words per minute is required); verifies accuracy of job orders and work requests; assists in the supervision of clerical functions. *YNC:* Able to perform the duties required for YN1; maintains classified materials controls system; verifies accuracy of official correspondence and reports; monitors submission and maintenance of officer fitness reports; supervises and directs clerical functions. *YNCS:* Able to perform the duties required for YNC; interviews, assigns, supervises, and evaluates office personnel; recommends improvements in office procedures; procures and allocates office materials and equipment; supervises and controls the security of sensitive records; trains office personnel; functions as office supervisor. *YNCM:* Able to perform the duties required for YNCS; establishes goals, objectives, and priorities in the administration of the office function; plans, organizes, implements, coordinates, and controls activities; reviews and makes recommendations concerning office personnel, equipment, and supply requirements; develops operating budget for the office and monitors office expenditures; prepares staff studies.

Recommendation, YN3

In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in record keeping, 1 in clerical procedures, 1 in automatic data processing (ADP) operations, 1 in interpersonal communication, and 1 in military legal practices and procedures (3/90).

Recommendation, YN2

In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in record keeping, 2 in clerical procedures, 2 in automatic data processing (ADP) operations, 1 in interpersonal communication, and 1 in military legal practices and procedures (3/90).

Recommendation, YN1

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in record keeping, 2 in clerical procedures, 2 in automatic data processing (ADP) operations, 2 in technical writing, 2 in interpersonal communication, and 2 in military legal practices and procedures. In the upper-division baccalaureate category, 2 semester hours in management problems (3/90).

Recommendation, YNC

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in record keeping, 3 in clerical procedures, 2 in automatic data processing (ADP) operations, 3 in technical writing, 1 in office administration, 1 in principles of supervision, 2 in interpersonal communication, and 2 in military legal practices and procedures. In the upper-division baccalaureate category, 2 semester hours for field experience in management, 2 in management problems, and 2 in human resource management (3/90).

Recommendation, YNCS

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in record keeping, 3 in clerical procedures, 2 in automatic data processing (ADP) operations, 3 in technical writing, 2 in office administration, 2 in principles of supervision, 3 in interpersonal communication, and 3 in military legal practices and procedures. In the upper-division baccalaureate category, 2 semester hours for field experience in management, 3 in management problems, and 3 in human resource management (3/90).

Recommendation, YNCM

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in record keeping, 3 in clerical procedures, 2 in automatic data processing (ADP) operations, 3 in technical writing, 2 in office administration, 2 in principles of supervision, 3 in interpersonal communication, and 3 in military legal practices and procedures. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in management problems, and 3 in human resource management (3/90).

Navy Limited Duty Officer Exhibits

LDO-611X-001

DECK (SURFACE)
611X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Deck (Surface) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Surface) Warrant Officer (711X).

Description

Serves as an officer technical manager in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-611X-002

SURFACE DECK
611X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Deck (Surface) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Surface) Warrant Officer (711X).

Description

Serves as an officer technical manager in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel under their command; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 in management information systems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-612X-001

OPERATIONS
(Operations (Surface))
612X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Operations (Surface) Limited Duty Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), Sonar Technician (ST), or Operations Surface Technician Warrant Officer (712X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-612X-002

SURFACE OPERATIONS
612X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Operations (Surface) Limited Duty Officer from Electronics Warfare Technician (EW); Operations Specialist (OS); Ocean Systems Technician (OT); Sonar Technician (ST); or Operations Surface Technician Warrant Officer (712X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 in management information systems, 6 for field experience in management, and 3 in any of the following areas: project management, leadership, or budget administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-613X-001

ENGINEERING/REPAIR (SURFACE)
613X

Exhibit Dates: 1/90–2/96.

Career Pattern

May have progressed to Engineering/Repair (Surface) Limited Duty Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician, Electrical (GSE); Gas Turbine System Technician, Mechanical (GSM); Hull Maintenance Technician (HT); Instrumentman (IM); Interior Communications Electrician (IC); Machinery Repairman (MR); Machinist's Mate (MM); Molder (ML); Opticalman (OM); Patternmaker (PM); Precision Instrumentman, Master Chief (PICM); Engineering Technician

(Submarine) Warrant Officer (723X); Engineering Technician (Surface) Warrant Officer (713X); Repair Technician (Submarine) Warrant Officer (724X); or Repair Technician (Surface) Warrant Officer (714X).

Description

Serves as an officer technical manager in the field of surface ship marine engineering, including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alterations or design modifications; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes, and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-613X-002

Surface Engineering/Repair
613X

Exhibit Dates: 3/96–Present.

Career Pattern

May have progressed to Engineering/Repair (Surface) Limited Duty Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician (GS); Interior Communications Electrician (IC); Machinist's Mate (MM); Engineering Technician (Surface) Warrant Officer (713X); or Repair Technician (Surface) Warrant Officer (714X).

Description

Serves as an officer technical manager in the field of surface ship marine engineering, including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alterations or design modifications; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes, and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work or repair facilities; applies many elements of total quality management and quality assurance; uses computerized management information systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in management information systems, 3 in quality control systems, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/96).

LDO-616X-002

Surface Ordnance
616X

Exhibit Dates: 1/90–2/96.

Career Pattern

May have progressed to Surface Ordnance Limited Duty Officer from Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Gunner's Mate (GM); Gunner's Mate, Guns (GMG); Gunner's Mate, Missiles (GMM); Gunner's Mate Technician (GMT); Missile Technician (MT); Torpedoman's Mate (TM); or Ordnance Technician Warrant Officer (716X).

Description

Serves as an officer technical manager with practical experience in ordnance operations; plans, supervises, trains, and directs subordinates in the operation, maintenance, and repair of ordnance equipment and related systems; assists, plans, coordinates, and advises commands and staffs in ordnance management, logistics, repair, and safety; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-616X-003

Surface Ordnance
616X

Exhibit Dates: 3/96–Present.

Career Pattern

May have progressed to Surface Ordnance Limited Duty Officer from Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Fire Controlman (FC); Gunner's Mate, Guns (GMG); Gunner's Mate, Missiles (GMM); Mineman (MN); Torpedoman's Mate (TM); or Surface Ordnance Technician Warrant Officer (716X).

Description

Serves as an officer technical manager with practical experience in ordnance operations; plans, supervises, trains, and directs subordinates in the operation, maintenance, repair, and tests of ordnance equipment and related systems; assists, plans, coordinates, and advises commands and staffs in ordnance management, logistics, repair, and safety; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, directs, and evaluates activities of subordinates; applies many elements of total quality management and quality assurance; and uses computerized management information systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in management information systems, and 3 in quality control systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/96).

LDO-618X-001

Electronics (Surface)
618X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Electronics (Surface) Limited Duty Officer from Data Systems Technician (DS); Electronic Warfare Technician (EW); Electronics Technician (ET); Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Ocean Systems Technician (OT); Operations Specialist (OS); Sonar Technician (ST); or Electronics Technician (Surface) Warrant Officer (718X).

Description

Serves as an officer technical manager in the field of non-nuclear electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of all non-nuclear electronic systems installed in units of the surface force; conducts operational evaluations of new installations and modifications to existing systems; provides operational and technical input to the research and development community for consideration in the design and testing of electronic systems or components; prepares and distributes operator training courses and operation guidance for electronic systems; plans, schedules, and conducts training for electronics personnel; writes reports and provides technical advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 5 for field experience in management, and 2 for field experience in electronics. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-618X-002

SURFACE ELECTRONICS
618X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Electronics (Surface) Limited Duty Officer from Data Systems Technician (DS); Electronic Warfare Technician (EW); Electronics Technician (ET); Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Ocean Systems Technician (OT); Operations Specialist (OS); Sonar Technician (ST); or Electronics Technician (Surface) Warrant Officer (718X).

Description

Serves as an officer technical manager in the field of non-nuclear electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of all non-nuclear electronic systems installed in units of the surface force; conducts operational evaluations of new installations and modifications to existing systems; provides operational and technical input to the research and development community for consideration in the design and testing of electronic systems or components; prepares and distributes operator training courses and operation guidance for electronic systems; plans, schedules, and conducts training for electronics personnel; writes reports, prepares budgets, and provides technical advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 5 for field experience in management, 3 in management information systems, and 3 in budget administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-619X-001

SURFACE COMMUNICATIONS
619X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Surface Communications Limited Duty Officer from Radioman (RM) or Surface Communications Technician Warrant Officer (719X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in surface communications, with practical experience in these areas; assists and advises commands in communication planning, direction, and control and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communications personnel; assists in the administration of onboard training programs, facilities, and services; formulates, directs, and evaluates training program; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-619X-002

SURFACE COMMUNICATIONS
619X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Surface Communications Limited Duty Officer from Radioman (RM) or Surface Communications Technician Warrant Officer (719X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in surface communications, with practical experience in these areas; assists and advises commands in communication planning, direction, and control and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communications personnel; assists in the administration of onboard training programs, facilities, and services; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 in management information systems, 6 for field experience in management, and 3 in any of the following areas: project management, leadership, or budget administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-621X-001

DECK (SUBMARINE)
621X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Deck (Submarine) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Submarine) Warrant Officer (721X).

Description

Serves as an officer technical manager in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of subordinates; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-621X-002

SUBMARINE DECK
621X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Deck (Submarine) Limited Duty Officer from Boatswain's Mate (BM), Quartermaster (QM), Signalman (SM), or Boatswain (Submarine) Warrant Officer (721X).

Description

Serves as an officer technical manager in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck and navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities; writes technical reports and personnel evaluation reports; and applies many elements of total quality management and quality assurance.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in management information systems, and 3 in quality control systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-623X-002

Engineering/Repair (Submarine)
623X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Engineering/Repair (Submarine) Limited Duty Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician, Electrical (GSE); Gas Turbine System Technician, Mechanical (GSM); Hull Maintenance Technician (HT); Instrumentman (IM); Interior Communications Electrician (IC); Machinery Repairman (MR); Machinist's Mate (MN); Molder (ML); Opticalman (OM); Patternmaker (PM); Precision Instrumentman, Master Chief (PICM); Engineering Technician (Submarine) Warrant Officer (723X); Engineering Technician (Surface) Warrant Officer (713X); Repair Technician (Submarine) Warrant Officer (724X); or Repair Technician (Surface) Warrant Officer (714X).

Description

Serves as an officer technical manager in the field of ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alteration or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work at auxiliary or repair facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/84).

LDO-623X-003

Submarine Engineering/Repair
623X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Engineering/Repair (Submarine) Limited Duty Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician, (GS); Hull Maintenance Technician (HT); Instrumentman (IM); Interior Communications Electrician (IC); Machinery Repairman (MR); Machinist's Mate (MN); Molder (ML); Opticalman (OM); Patternmaker (PM); Precision Instrumentman, Master Chief (PICM); Engineering Technician (Submarine) Warrant Officer (723X); Engineering Technician (Surface) Warrant Officer (713X); Repair Technician (Submarine) Warrant Officer (724X).

Description

Serves as an officer technical manager in the field of ship marine engineering including maintenance and repair of main propulsion (gas turbine, diesel, and steam), electrical, and auxiliary machinery and systems, ship's hull, structure and associated fittings, and practical and theoretical damage control procedures; plans, administers, and supervises the installation, operation, maintenance, and repair of equipment; makes ship alteration or designs modification; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, organizes and controls industrial shop production; develops and administers policy and procedures for regulating and integrating work at auxiliary or repair facilities; uses computer software.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, and 4 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-626X-002

Submarine Ordnance
626X

Exhibit Dates: 1/90–2/96.

Career Pattern

May have progressed to Submarine Ordnance Limited Duty Officer from Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Gunner's Mate (GM); Gunner's Mate, Guns (GMG); Gunner's Mate, Missiles (GMM); Gunner's Mate Technician (GMT); Missile Technician (MT); Torpedoman's Mate (TM); or Submarine Ordnance Technician Warrant Officer (726X).

Description

Serves as an officer technical manager in the strategic weapons and ordnance field, with practical experience in related areas; plans, supervises, trains, and directs subordinates in the operation and maintenance of ordnance and related equipment; assists, plans, coordinates, and advises commands in operational, maintenance, and technical ordnance related matters; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-626X-003

Submarine Ordnance
626X

Exhibit Dates: 3/96–Present.

Career Pattern

May have progressed to Submarine Ordnance Limited Duty Officer from Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Controlman (FC); Gunner's Mate (GM); Gunner's Mate, Guns (GMG); Gunner's Mate, Missiles (GMM); Gunner's Mate Technician (GMT); Mineman (MN); Torpedoman's Mate (TM); Weapons Technician (WT); or Submarine Ordnance Technician Warrant Officer (726X).

Description

Serves as an officer technical manager in the strategic weapons and ordnance field, with practical experience in related areas; plans, supervises, trains, evaluates, and directs subordinates in the operation and maintenance of ordnance and related equipment; assists, plans, coordinates, and advises commands in operational, maintenance, and technical ordnance related matters; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates; applies many elements of total quality management and quality assurance.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in management information systems, and 3 in quality control systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/96).

LDO-628X-001

Electronics (Submarine)
628X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Electronics Technician (Submarine) Limited Duty Officer 628X from Data Systems Technician (DS); Electronics Technician (ET); Electronics Warfare Technician (EW); Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Operations Specialist (OS); Ocean Systems Technician (OT); Sonar Technician (ST); or Electronics Technician (Submarine) Warrant Officer (728X).

Description

Serves as an officer technical manager in the field of electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of electronic systems; plans, organizes, and manages the activities of technical personnel; provides the leadership necessary to guide personnel and develop individual responsibility for the training and growth of assigned personnel; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 4 for field experience in electronics. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-628X-002

Submarine Electronics
628X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Electronics Technician (Submarine) Limited Duty Officer 628X from Data Systems Technician (DS); Electronics Technician (ET); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Controlman (FT); Ocean Systems Technician (OT); Sonar Technician (ST); or Electronics Technician (Submarine) Warrant Officer (728X).

Description

Serves as an officer technical manager in the field of electronics; plans, coordinates, directs, and supervises the installation, operation, and maintenance of electronic systems; plans, organizes, and manages the activities of technical personnel; provides the leadership necessary to guide staff and develop individual responsibility for the training and growth of assigned personnel; writes reports and provides advice about electronic and computer systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, 3 for field experience in management, and 4 for field experience in electronics. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-629X-001

Submarine Communications
629X

Exhibit Dates: 1/90–Present.

Career Pattern

May have progressed to Submarine Communications Limited Duty Officer from Radioman (RM) or Submarine Communication Technician Warrant Officer (729X).

Description

Serves as an officer technical manager in the operation, employment, and application of techniques, equipment, systems, and procedures in submarine communications, with practical experience in these areas; assists and advises commands in communication planning, direction and control and in the employment and utilization of communications personnel; assists in administration of onboard training programs, facilities, and services; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/96).

LDO-630X-003

Aviator
630X

Exhibit Dates: 1/90–12/90.

Career Pattern

May have progressed to Aviator Limited Duty Officer from any enlisted rating or Warrant Officer Specialty.

Description

Serves as a flight training specialist in naval aviation flight training programs; provides flight instruction in aircraft and ground (academic and simulator) training for prospective naval aviators in the primary flight training environment; writes reports and provides assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, aviation programs vary considerably at different institutions. Forty to sixty semester hours in an aviation flight technology program may be awarded. 3 semester hours may be awarded in some or all of the following areas, which are generally included in aviation programs: history of aviation, aviation safety, safety of flight, physiology of flight, general aviation, aircraft weather, airframe structures and/or systems, power plant structures and/or systems, federal aviation regulations, aircraft transportation, aircraft business organization and management, corporate and business aviation, government and aviation, aviation insurance, aviation law, air cargo operation, air carrier operation, aircraft navigation, advanced aircraft navigation, and air traffic control procedures. (See note.) For individuals holding military pilot ratings (equivalent to FAA ratings), 3 semester hours may be awarded in some or all of the following areas: student pilot rating, private pilot ground school, private pilot rating, commercial pilot ground school, commercial pilot rating (up to 9 semester hours), instrument pilot ground school, and instrument pilot rating. For individuals holding military instructor pilot ratings (equivalent to FAA ratings), an additional 3 semester hours may be awarded in some or all of the following areas: flight instructor FAA regulations, flight instructor rating, instrument flight instructor ground school, instrument flight instructor rating, and multiengine flight instructor rating. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 3 for field experience in aviation administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration. All Aviator LDOs should receive the following credit: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 in general mathematics (10/85).

LDO-630X-004

Aviator
630X

Exhibit Dates: 1/91–Present.

Career Pattern

May have progressed to Aviator Limited Duty Officer from any enlisted rating or warrant officer specialty.

Description

Serves as a flight training specialist in naval aviation flight training programs; provides initial, intermediate, and advanced flight instruction in aircraft and ground (academic and simulator) training for prospective naval aviators in the primary flight training environment; writes reports and provides assistance and advice; plans, supervises, and directs activities of subordinates; acts as a line pilot for carrier-capable aircraft; position allows potential advancement to a senior air operations manager.

Recommendation

In the lower-division baccalaureate/associate degree category, aviation programs vary considerably at different institutions. Forty to sixty semester hours in an aviation flight technology program may be awarded. In some or all of the following areas, 3 semester hours may be awarded which are generally included in aviation programs: history of aviation, aviation safety, safety of flight, physiology of flight, general aviation, aircraft weather, airframe structures and/or systems, power plant structures and/or systems, federal aviation regulations, aircraft transportation, aircraft business organization and management, corporate and business aviation, government and aviation, aviation insurance, aviation law, air cargo operation, air carrier operation, aircraft navigation, advanced aircraft navigation, and air traffic control procedures. (See note.) For individuals holding military pilot ratings (equivalent to FAA ratings), 3 semester hours may be awarded in some or each of the following areas: student pilot rating, private pilot ground school, private pilot rating, commercial pilot ground school, commercial pilot rating (up to 9 semester hours), instrument pilot ground school, and instrument pilot rating. For individuals holding military instructor pilot ratings (equivalent to FAA ratings), an additional 3 semester hours may be awarded in some or all of the following areas: flight instructor FAA regulations, flight instructor rating, instrument flight instructor ground school, instrument flight instructor rating, and multi-engine flight instructor rating. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 3 for field experience in aviation administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration. All Aviator LDOs should receive the following credit: In the lower-division baccalaureate/associate degree category, 2 semester hours in technical report writing, 1 in public speaking, 3 in personnel supervision, and 3 in general mathematics (11/97).

LDO-631X-001

Aviation (Deck)
631X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Aviation (Deck) Limited Duty Officer from Aviation Boatswain's Mate (AB); Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE); Aviation Boatswain's Mate, Fuels (ABF); Aviation Boatswain's Mate, Aircraft Handling (ABH); or Aviation Boatswain Warrant Officer (731X).

Description

Serves as an officer technical manager in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-631X-002

Aviation (Deck)
631X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Aviation (Deck) Limited Duty Officer from Aviation Boatswain's Mate (AB); Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE); Aviation Boatswain's Mate, Fuels (ABF); Aviation Boatswain's Mate, Aircraft Handling (ABH); or Aviation Boatswain Warrant Officer (731X).

Description

Serves as an officer technical manager in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; may supervise the maintenance and operation of aircraft catapults, arresting gear, optical landing systems, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing and 3 in interpersonal communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 in logistics management, and 3 for a management internship. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in organizational management; if the rank of Commander has been attained, 3 additional semester hours in organizational management and 3 in financial management (10/96).

LDO-632X-001

Aviation Operations
632X

Exhibit Dates: 1/90–1/98.

Career Pattern

May have progressed to Aviation Operations Limited Duty Officer from Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter, or Aviation Operations Technician Warrant Officer (732X).

Description

Serves as an officer technical manager in either the field of air traffic control or air antisubmarine warfare. If serves in the field of air traffic control, organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, and air traffic control procedures and training program for qualification of air traffic controllers; coordinates operational procedures with FAA and US military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures, and planning; demonstrates knowledge of ground-to-air communications, radar operations, recording equipment, teletype and landline communications, navigational aids, and weather. If serves in the field of air antisubmarine warfare, assists in organization, supervision, and direction of tactical support center operations; briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of antisubmarine warfare equipment, collection, preparation, and transmission of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has broad knowledge of the characteristics and employment of US and foreign submarines, warships, small craft, merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/85).

LDO-632X-002

Aviation Operations
632X

Exhibit Dates: 2/98–Present.

Career Pattern

May have progressed to Aviation Operations Limited Duty Officer from Aviation Warfare Systems Operator (AW) Acoustic, Non-Acoustic, or Helicopter; or Aviation Operations Warrant Officer (732X).

Description

Serves as an officer technical manager in the tactical control of overall antisubmarine assets; responsible, under the ship's Tactical Action

Officer, for antisubmarine (ASW) search patterns, analysis of appropriate data and actual commitment of resources toward the prosecution of a suspected target; has overall responsibility for coordination of ASW operations within the battle group; is responsible for the safety of flight in the ASW sector, involving knowledge of air traffic control procedures and planning, and an in-depth knowledge of ground-to-air communications, radar operations, recording equipment, navigational aids, weather and oceanographic features; conducts both preflight briefs and postflight debriefs for operational flight crews; responsible for overall mission evaluation after the exercise; presents a formal briefing of the result of the analysis to superior officers.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 2 in flight safety procedures, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 6 for field experience in management, 3 in professional development, and 4 in computer applications. If the rank of Lieutenant Commander has been attained, 2 additional semester hours in each of the following areas: project management, human resource management, and budget administration; if the rank of Commander has been attained, 3 additional semester hours in each of the following areas: project management, human resource management, and budget administration (2/98).

LDO-633X-001

Aviation Maintenance
633X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Aviation Maintenance Limited Duty Officer from Aviation Machinist's Mate (AD); Master Chief Aircraft Maintenanceman (AFCM); Aviation Structural Mechanic (AM); Aviation Structural Mechanic, Safety Equipment (AME); Aviation Structural Mechanic, Hydraulics (AMH); Aviation Structural Mechanic, Structures (AMS); Aviation Support Equipment Technician (AS); Aviation Maintenance Administrationman (AZ); Aircrew Survival Equipmentman (PR); or Aviation Maintenance Technician Warrant Officer (734X).

Description

Serves as an officer technical manager in the field of aviation maintenance; plans and supervises the execution of aviation maintenance programs at the organizational, intermediate, and depot levels; develops quality assurance standards and procedures to ensure flight safety and proper material condition of aircraft; develops and administers programs for the development, testing, and evaluation of aircraft maintenance systems and methods; develops, reviews, and verifies aircraft maintenance logs, records, and reports; analyzes new developments and technological advances in aviation maintenance; administers aeronautical material procurement programs; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-633X-002

Aviation Maintenance
633X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Aviation Maintenance Limited Duty Officer from Aviation Machinist's Mate (AD); Master Chief Aircraft Maintenanceman (AFCM); Aviation Structural Mechanic (AM); Aviation Structural Mechanic, Safety Equipment (AME); Aviation Structural Mechanic, Hydraulics (AMH); Aviation Structural Mechanic, Structures (AMS); Aviation Support Equipment Technician (AS); Aviation Maintenance Administrationman (AZ); Aircrew Survival Equipmentman (PR); or Aviation Maintenance Technician Warrant Officer (734X).

Description

Serves as an officer technical manager in the field of aviation maintenance; plans and supervises the execution of aviation maintenance programs at the organizational, intermediate, and depot levels; develops quality assurance standards and procedures to ensure flight safety and proper material condition of aircraft; develops and administers programs for the development, testing, and evaluation of aircraft maintenance systems and methods; develops, reviews, and verifies aircraft maintenance logs, records, and reports; analyzes new developments and technological advances in aviation maintenance; administers aeronautical material procurement programs; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in personnel supervision, 3 in aviation maintenance systems, and 3 in computer applications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 3 in logistics management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in project management; if the rank of Commander has been attained, 3 additional semester hours in project management, and 3 in financial management (10/96).

LDO-636X-001

Aviation Ordnance
636X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Aviation Ordnance Limited Duty Officer from Aviation Ordnanceman (AO), Gunner's Mate Technician (GMT), or Aviation Ordnance Technician Warrant Officer (736X).

Description

Serves as an officer technical manager in the field of operations and maintenance of aviation ordnance and aircraft armament; manages and directs the activities of aviation ordnance personnel in the performance of aviation operational, test, research, and maintenance functions involving aviation ordnance and aircraft armament; establishes new aviation ordnance and armament maintenance procedures and methods; plans, organizes and directs the operation of aviation ordnance activities; provides technical assistance and advice pertaining to aviation ordnance and armament; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-636X-002

Aviation Ordnance
636X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Aviation Ordnance Limited Duty Officer from Aviation Ordnanceman (AO), Weapons Technician (WT), or Aviation Ordnance Technician Warrant Officer (736X).

Description

Serves as an officer technical manager in the field of operations and maintenance of aviation ordnance and aircraft armament; manages and directs the activities of aviation ordnance personnel in the performance of aviation operational, test, research, and maintenance functions involving aviation ordnance and aircraft armament; establishes new aviation ordnance and armament maintenance procedures and methods; plans, organizes and directs the operation of aviation ordnance activities; provides technical assistance and advice pertaining to aviation ordnance and armament; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; generates programs and uses computer programs and data to facilitate personnel and logistics management; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in personnel supervision, 3 in interpersonal communication, and 3 in computer applications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 in logistics management, and 3 for a management internship. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, organizational management, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, organizational management, or budget administration (10/96).

LDO-638X-001

Aviation Electronics
(Avionics)
638X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Avionics Limited Duty Officer from Aviation Electronics Technician (AT), Aviation Electrician's Mate (AE), Aviation Fire Control Technician (AQ), Aviation Antisubmarine Warfare Technician (AX), Tradevman (TD), or Aviation Electronics Technician Warrant Officer (738X).

Description

Serves as an officer technical manager in the field of avionics and aircraft systems operation and maintenance; organizes, manages, and directs all phases of installation, maintenance, repair, and operation of avionics equipment and other aircraft systems/components; participates in programs for the development, testing, and evaluation of equipment and systems; establishes new maintenance procedures and methods; directs the assignment of material, equipment, and systems; plans, develops, and administers training programs for systems and maintenance; writes reports and provides technical advice about aircraft systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in aviation maintenance management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (1/84).

LDO-638X-002

Avionics
(Aviation Electronics)
638X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Avionics Limited Duty Officer from Aviation Electronics Technician (AT), Aviation Electrician's Mate (AE), Avionics Technician (AV), or Aviation Electronics Technician Warrant Officer (738X).

Description

Serves as an officer technical manager in the field of avionics and aircraft systems operation and maintenance; organizes, manages, and directs all phases of installation, maintenance, repair, and operation of avionic equipment and other aircraft systems/components; participates in programs for the development, testing, and evaluation of equipment and systems; establishes new maintenance procedures and methods; directs the assignment of material, equipment, and systems; plans, develops, and administers training programs for systems and maintenance; writes reports and provides technical advice about aircraft systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in aviation maintenance systems, 3 in computer applications, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in aviation maintenance management, and 3 for a management internship. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in project management; if the rank of Commander has been attained, 3 additional semester hours in project management and 3 in financial management (10/96).

LDO-639X-001

Air Traffic Control
639X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Air Traffic Control Limited Duty Officer from Air Traffic Controller (AC) or Air Traffic Control Technician Warrant Officer (739X).

Description

Serves as an officer technical manager in the field of air traffic control; responsible for control tower operation, base operations, heliport operations, surveillance and precision approach radars, approach/departure control radars and airspace acquisition, training programs for qualification of air traffic controllers, and developing air traffic control procedures; coordinates operational procedures with FAA and US military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures, air traffic control planning, Navy procedural criteria, and international civil aviation organization procedures; demonstrates knowledge of ground-to-air communications, radar operations, recording equipment, teletype and land line communications, navigational aids, and weather; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 for field experience in management, and 3 for field experience in aviation administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration. In addition, see the credit recommendation in the exhibit for the enlisted rating Air Traffic Controller (AC); grant credit for the most recent enlisted rank the individual held before progressing to Limited Duty Officer (10/85).

LDO-639X-002

Air Traffic Control
639X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Air Traffic Control Limited Duty Officer from Air Traffic Controller (AC).

Description

Serves as an officer technical manager in the field of air traffic control; responsible for control tower operations, base operations, heliport operations, surveillance and precision approach radars, approach/departure control radars and airspace acquisition, training programs for qualification of air traffic controllers, and developing air traffic control procedures; coordinates operational procedures with FAA and US military and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures, air traffic control planning, Navy procedural criteria, and international civil aviation organization procedures; demonstrates knowledge of ground-to-air communications, radar operations, recording equipment, teletype and landline communications, navigational aids, and weather; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in personnel supervision, 3 in aviation maintenance, and 3 in computer applications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 in logistics management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in project management; if the rank of Commander has been attained, 3 additional semester hours in project management and 3 in financial management. In addition, use the credit recommendations in the exhibit for the enlisted rating Air Traffic Controller (AC) for the most recent enlisted rank the individual held before progressing to Limited Duty Officer that do not duplicate those in this exhibit (10/96).

LDO-640X-003

Nuclear Power
640X

Exhibit Dates: 1/90–2/96.

Career Pattern

This LDO designator was formerly 615X, Nuclear Power, Surface or 625X, Nuclear Power, Submarine. May have progressed to Nuclear Power Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), Machinist's Mate (MM), or Nuclear Power Technician Warrant Officer (740X, 715X, or 725X).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-640X-004

Nuclear Power
640X

Exhibit Dates: 3/96–Present.

Career Pattern

May have progressed to Nuclear Power Limited Duty Officer from Electrician's Mate (EM), Electronics Technician (ET), Machinist's Mate (MM), or Nuclear Power Technician Warrant Officer (740X).

Description

Serves as an officer technical manager in the repair, maintenance, and operation of naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis, and chemistry control practices and procedures as well as quality assurance of nuclear work; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, directs, and evaluates activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in management information systems, 3 in quality control systems, 3 in nuclear power systems, and 3 in regulatory compliance. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/96).

LDO-641X-001

Administration
641X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Administration Limited Duty Officer from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), Religious Program Specialist (RP), or Ship's Clerk Warrant Officer (741X).

Description

Serves as an officer technical manager in the fields of naval and personnel administration; directs administrative and personnel offices; demonstrates a broad knowledge of Navy department/fleet staff organization and regulations; personnel responsibilities include recruitment, selection, promotion, transfer, career development, training, job analysis, and discipline; administrative tasks include office organization and procedures, legal work, budget and fiscal control, space planning, work progress reporting, information dissemination, public relations activities, and liaison with other military services; responsible for the preparation, publication, and distribution of manuals, handbooks, reports, newspapers, and correspondence; duties vary depending on technical experience and the size of the organization; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in office management, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 6 for field experience in management, and 3 in principles of management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (11/83).

LDO-641X-002

Administration
641X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Administration LDO from Ship's Clerk Warrant Officer (741X), or one of the following enlisted ratings: Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), or Religious Program Specialist (RP).

Description

Serves as an officer technical manager and performs duties in the areas of administration, personnel relations, manpower planning, organization planning, public relations, personnel assignments, training, postal functions, and printed materials; has a broad knowledge of Navy personnel and administrative procedures, regulations, and directives; writes technical reports and personnel evaluations; participates in the Total Quality Leadership (TQM) program.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in records and information management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in public relations management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, add 3 semester hours for field experience in management. If the rank of Commander has been attained, add 3 semester hours in management problems (2/96).

LDO-642X-001

Data Processing
642X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Data Processing Limited Duty Officer from Data Processing Technician (DP), Data Systems Technician (DS), or Data Processing Technician Warrant Officer (742X).

Description

Serves as an officer technical specialist in the field of automatic data processing utilizing both electronic digital computer and electronic accounting machine equipment; administers the operation and maintenance of data processing installations; programs, debugs, and operates interactive and batch programs; advises in the selection of equipment; develops policy for job processing priorities; ensures data integrity and computer security; develops processing evaluation methods, work standards, and procedures manuals for programmers and analysts; conducts training for staff and for system users; analyzes costs and prepares budget estimates for computer operations; reviews equipment design and updates hardware in use; provides the leadership necessary to guide personnel and develop individual responsibility; duties vary depending on the size of the organization and the specific computer installation; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in college algebra, and 1 in statistics. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in principles of management, 3 for field experience in management, and 5 for field experience in data processing. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (11/83).

LDO-642X-002

Data Processing
642X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Data Processing Limited Duty Officer from Data Processing Technician (DP), Data Systems Technician (DS), or Data Processing Technician Warrant Officer (742X).

Description

Serves as an officer technical specialist in automatic data processing and digital communication technology; provides direct supervision of programmers and telecommunications personnel concerned with the installation, operation, and maintenance of data systems including hardware and software operating and application programs; develops local area network design specifications and connections to Wide Area Networks including system requirements, band width specifications, and technical requirements; provides system analysis and evaluation and system administration including beta testing, troubleshooting, traffic control, and systems training; develops policy for data processing and communication priorities, evaluation methods, work standards, and procedure manuals for technicians; provides leadership, professional counseling, and career guidance for team members; prepares technical reports and provides advice to the command on data processing and communication matters; prepares budgets and performs cost analysis for computer and communication operations; supervises data processing and communication and needs assessment for personnel, logistics, intelligence and operational requirements for tactical and non-tactical operations; ensures data integrity, system security, inventory control, and Total Quality Management; maintains records and documentation; prepares personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in computer programming in UNIX and C++, and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in computer systems and organization, 3 in local area networks, 3 in network management, 3 in digital telecommunications analysis, 3 in principles of supervision, 3 for field experience in management, and 3 in management problems; if the rank of Lieutenant or Lieutenant Commander has been attained, 3 additional semester hours for project management; if the rank of Commander or Captain has been attained, 3 additional semester hours for budget administration (2/96).

LDO-643X-001

Bandmaster
643X

Exhibit Dates: 1/90–Present.

Career Pattern

May have progressed to Bandmaster Limited Duty Officer from Musician (MU) or Bandmaster Warrant Officer (743X).

Description

Serves as a specialist in the fields of music and management; responsible for equipment, personnel, budgets, public relations, and operations; employs a broad knowledge of instrumental and vocal techniques, band administration, musical techniques, theory, and literature; may serve as program managers, leaders of Navy bands, or officers-in-charge of Navy bands, providing information, administration, and assistance in music matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of public relations and 3 in operational management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in financial and budget management, 3 in advanced conducting, and 3 in score reading and analysis. If the rank of Lieutenant Commander has been attained, add 3 semester hours in advanced management problems; if the rank of Commander has been attained, add 6 semester hours in advanced management problems (2/86).

LDO-644X-001

Cryptology
644X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Cryptology Limited Duty Officer from Cryptologic Technician, Administrative (CTA); Cryptologic Technician, Interpretive (CTI); Cryptologic Technician, Maintenance (CTM); Cryptologic Technician, Communications (CTO); Cryptologic Technician, Collection (CTR); Cryptologic Technician, Technical (CTT); or Cryptologic Technician Warrant Officer (744X).

Description

Serves as an officer technical specialist in all phases of operations conducted by the Naval Security Group Command, including signals intelligence, signals security, and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; plans and manages, in accordance with appropriate directives, the employment of equipment and manpower resources; has managerial responsibility for the installation and maintenance of electrical, electromechanical, and electronic equipment and the conduct of communications, administrative, or communications security functions.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (2/86).

LDO-644X-002

Cryptology
644X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Cryptology LDO from Cryptologic Technician Warrant Officer (744X), or Cryptologic Technician (CT).

Description

Serves as an officer technical manager in all phases of operations conducted by the Naval Security Group Command, including signals intelligence and signals security has responsibility for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; plans and manages, in accordance with appropriate directives, the employment of equipment and manpower resources; has managerial responsibility for the installation and maintenance of electrical, electromechanical, and electronic equipment and the conduct of communications, administrative, and communications security functions.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical writing and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in management problems. If the rank of Commander has been attained, 3 additional semester hours in systems management (2/96).

LDO-645X-001

Intelligence
645X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Intelligence Limited Duty Officer from Intelligence Specialist (IS) or Intelligence Technician Warrant Officer (745X).

Description

Serves as an officer technical manager responsible for the material readiness of intelligence collection equipment, publications, and supplies; supervises enlisted intelligence specialists in intelligence collection, processing, dissemination duties and in the preparation of intelligence materials for briefings.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and, based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (4/86).

LDO-645X-002

Intelligence
645X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Intelligence Limited Duty Officer from Intelligence Specialist (IS) or Intelligence Technician Warrant Officer (745X).

Description

Serves as an officer technical manager responsible for the material readiness of intelligence collection equipment, publications, and supplies; supervises enlisted intelligence specialists in intelligence collection, processing, dissemination duties and in the preparation of intelligence materials for briefings.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in compressed graphic communication and analysis, 3 in personnel supervision, and, based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, 3 for field experience in management, and 3 in any of the following areas: project management, leadership, or budget administration. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-646X-001

Meteorology/Oceanography
646X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Meteorology/Oceanography Limited Duty Officer from Aerographer's Mate (AG) or Aerographer Warrant Officer (746X).

Description

Serves as an officer technical manager, providing meteorological and oceanographic support for fleet operations and for planning and directing various activities within the Naval Oceanography Command; trains military and civilian meteorological/oceanographic personnel in the use and operational maintenance of meteorological and oceanographic equipment; trains and supervises Navy weather observers and forecasters; performs regional coordination for operational and administrative matters within regional areas of responsibility; manages the Meteorological and Oceanographic Equipment Program.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (2/86).

LDO-646X-002

Meteorology/Oceanography
646X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Meteorology/Oceanography Limited Duty Officer from Aerographer's Mate (AG) or Aerographer Warrant Officer (746X).

Description

Serves as an officer technical manager, providing meteorological and oceanographic support for fleet operations and for planning and directing various activities within the Naval Oceanography Command; trains military and civilian meteorological/oceanographic personnel in the use and operational maintenance of meteorological and oceanographic equipment; trains and supervises Navy weather observers and forecasters; performs regional coordination for operational and administrative matters within regional areas of responsibility; manages the Meteorological and Oceanographic Equipment Program.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, 3 in electronics/computer systems integration, and 6 for field experience in management. If the rank of Lieutenant has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Lieutenant Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 9 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-647X-001

Photography
647X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Photography Limited Duty Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), Photographer's Mate (PH), or Photography Warrant Officer (747X).

Description

Serves as an officer technical manager responsible for all photographic, optical, digital, electronic, and other imaging systems and equipment, including still, motion picture, and video systems used in aerial, surface, and subsurface imaging; plans and manages the operation of imaging commands and activities, combat camera groups, and aerial reconnaissance imaging systems; develops, reviews, and maintains support facilities which deal with photographic and image recording requirements; provides technical advice and assistance on all photographic and other imaging support matters to commanders and subordinate units; employs an extensive photographic background and technical knowledge in all phases of imaging theory and technology, equipment, support equipment, image recording, and processing and the application and employment of imaging systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 3 in budget management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-647X-002

Photography
647X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Photography LDO from Photography Warrant Officer (747X), or one of the following enlisted ratings: Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), or Photographer's Mate (PH).

Description

Serves as an officer technical manager responsible for all chemical, electronic and digital imaging systems and equipment, including still photography and video systems used in aerial, surface, and subsurface imaging; plans and manages the operation of imaging commands and activities, combat camera groups, and aerial reconnaissance imaging systems; develops, reviews, and maintains support facilities which deal with photographic and image recording requirements; provides technical advice and assistance on all photographic and other imaging support matters to commanders and subordinate units; employs an extensive photographic background and technical knowledge in all phases of imaging theory and technology, equipment, support equipment, image recording, and processing and the application and employment of imaging systems; has responsibility for long range planning and implementation of imaging detachments for routine public and command information functions, operational documentation support, intelligence analysis and special assignments; manages personnel staffing and assignments, budgeting, training and the obtaining supplies and equipment for all imaging support of the assigned command; supervises staff; writes evaluation reports; conducts personnel counseling.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 3 in budget management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: management problems, human resources management, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: strategic planning, systems management, business organization and management (2/96).

LDO-648X-001

Explosive Ordnance Disposal
648X

Exhibit Dates: 1/90–4/92.

Career Pattern

May have progressed to Explosive Ordnance Disposal Limited Duty Officer from any enlisted rating or from Warrant Officer Explosive Ordnance Disposal Technician (748X); must be qualified in Explosive Ordnance Disposal (EOD).

Description

Serves as an officer technical manager in the methods of detection, identification, field evaluation, rendering safe, recovery, and disposal of all types of US and foreign ordnance, explosives, and demolition materials; provides technical escort for transportation/movement, detoxification, and disposal of chemical, biological, toxicological, and etiological agents; conducts technical evaluations of ordnance for intelligence information through disassembly and stripping; may perform airborne techniques, and provide US Secret Service with explosive ordnance disposal support for presidential and other VIP protection as directed; provides fleet training services on emergency distract procedures and detection and monitoring of nuclear, biological, or chemical agents; provides technical guidance and training assistance in minor underwater repair, hull inspection, and propeller replacement; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations, involving all types of US and foreign munitions, conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment, and material; supervises the stowage, issue, procurement, security, and preservation of explosive ordnance disposal equipment, materials, and components; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (10/85).

LDO-648X-002

Explosive Ordnance Disposal
648X

Exhibit Dates: 5/92–Present.

Career Pattern

May have progressed to Explosive Ordnance Disposal Limited Duty Officer from any enlisted rating or from Warrant Officer Explosive Ordnance Disposal Technician (748X); must be qualified in Explosive Ordnance Disposal (EOD).

Description

Serves as an officer technical manager in the methods of detection, identification, field evaluation, rendering safe, recovery, and disposal of all types of US and foreign ordnance, explosives, and demolition materials; provides technical escort for transportation/movement, detoxification, and disposal of chemical, biological, toxicological, and etiological agents; conducts technical evaluations of ordnance for intelligence information through disassembly and stripping; may perform airborne techniques, and provide US Secret Service with explosive ordnance disposal support for presidential and other VIP protection as directed; provides fleet training services on emergency distract procedures and detection and monitoring of nuclear, biological, or chemical agents; provides technical guidance and training assistance in minor underwater repair, hull inspection, and propeller replacement; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations, involving all types of US and foreign munitions, conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment, and material; supervises the stowage, issue, procurement, security, and preservation of explosive ordnance disposal equipment, materials, and components; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates; performs all administrative functions using computer software.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in medical terminology and first aid, 3 in applied physics, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management information systems, 4 in management problems, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (5/96).

LDO-649X-001

Security
649X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Security Limited Duty Officer from Master-At-Arms (MA) or Security Technician Warrant Officer (749X).

Description

Serves as an officer technical manager in matters of law enforcement, physical security, and corrections; plans, organizes and supervises physical security programs and activities aboard ship; establishes and maintains access/egress system, providing for detection/prevention of sabotage and theft; plans and directs law enforcement programs including aggressive contraband control initiatives; supervises operation of brigs afloat; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of security organization and administration and 3 in personnel distribution and deployment. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in budget administration, and 6 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (12/85).

LDO-649X-002

Security
649X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Security Limited Duty Officer from Master-At-Arms (MA) or Security Technician Warrant Officer (749X).

Description

Serves as an officer technical manager and department head in all activities of law enforcement, physical security, and corrections; plans, organizes and supervises physical security programs and activities aboard ship; establishes and maintains access/egress system, providing for detection/prevention of sabotage, terrorism, and theft; plans and directs law enforcement programs including aggressive contraband control and general law enforcement duties; supervises operation of brigs afloat; formulates, directs, and evaluates training programs; writes reports and provides technical assistance and advice; plans, supervises, and directs activities of subordinates; inspects facilities; has responsibility for substance abuse screening; prepares computerized crime reports; holds fiscal responsibilities for entire security/enforcement requirements; establishes inventories and loss control procedures; maintains liaison with Naval Investigative Services and civilian law enforcement agencies.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in principles of management, 3 in security organization/administration (principles), and 3 in loss control and prevention. In the upper-division baccalaureate category, 3 semester hours in fiscal administration, 6 for field experience in management, and 3 in security/enforcement administration. If the rank of Lieutenant Commander or Commander has been attained, 6 additional semester hours for field experience in organizational management (2/96).

LDO-651X-001

Supply (SC)
(Supply Corps)
651X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Supply Corps Limited Duty Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK), Mess Management Specialist (MS), Ship's Serviceman (SH), Storekeeper (SK), Supply Corps Warrant Officer (751X), or Food Service Warrant Officer (752X).

Description

Serves as an officer technical manager in the field of supply, including fiscal accounting and disbursing, material distribution and control, food service, ships' exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds and the distribution of supplies; develops and maintains proper budgeting and fiscal policies; directs stock accounting system and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operations, inventory control techniques, and material management.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-651X-002

Supply Corps (SC)
651X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Supply Corps LDO from Supply Corps Warrant Officer (751X), or one of the following enlisted ratings: Aviation Storekeeper (AK), Disbursing Clerk (DK), Ship's Serviceman (SH), or Storekeeper (SK).

Description

Serves as supply officer or technical manager in the field of supply; directs and administers supply activities and determines policy and procedures. Duties include: fiscal accounting and control; food service facilities; and operation of Bachelor officer and enlisted quarters, ship's stores, and Navy exchanges. Responsibilities include: accounting and dispersing of funds; monitoring the distribution of supplies; developing and recommending supply budgets; training, supervising, counseling, and evaluating subordinates; writing technical reports; purchasing food, special clothing, and materials ranging from five to fifty million dollars per fiscal period; directing stock accounting systems; disposing of excess and obsolete stock; and managing the storage and distribution of material; has a broad knowledge of logistic procedures, transportation systems, retail operations, inventory methods and controls, and material management.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical writing and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or material management; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or material management (2/96).

LDO-653X-001

Civil Engineer Corps (CEC)
653X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Civil Engineer Corps Limited Duty Officer from Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Illustrator Draftsman (DM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), Utilitiesman (UT), Master Chief Equipmentman (EQCM), or Civil Engineer Corps Warrant Officer (753X).

Description

Serves as an officer technical manager in the field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; plans, coordinates, directs, and supervises the technical, operational, training, and administrative responsibilities of naval construction force units; assists in the planning, scheduling, and operational and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, in maintenance and repair of buildings, airfields, hardstands, waterfront structures, utility systems, and in the operation, testing, maintenance, and repair of allied plants and automotive and construction equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semesters hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget management, and 3 for field experience in management. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: leadership, project management, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (3/86).

LDO-653X-002

Civil Engineer Corps
653X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Civil Engineer Corps Limited Duty Officer from Builder (BU); Construction Electrician (CE); Construction Mechanic (CM); Illustrator Draftsman (DM); Engineering Aid (EA); Equipment Operator (EO); Steelworker (SW); Utilitiesman (UT); Master Chief Equipmentman (EQCM); or Civil Engineer Corps Warrant Officer (753X).

Description

Serves as an officer technical manager in the field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; plans, coordinates, directs, and supervises the technical, operational, training, and administrative responsibilities of naval construction force units; assists in the planning, scheduling, and operational and technical responsibilities of public works departments within the Navy shore establishment; supervises individuals engaged in horizontal and vertical construction, in maintenance and repair of buildings, airfields, waterfront structures, utility systems, and in the operation, testing, maintenance, and repair of public works plants and automotive and construction equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semesters hours in construction estimating, 2 in facility maintenance management, 3 in introduction to computers, 3 in construction scheduling, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in construction project management, 3 in management problems, 3 in budget management, and 6 for field experience in management (5/96).

LDO-655X-001

Law
655X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Limited Duty Officer Law from Legalman (LN).

Description

Serves as an officer technical manager in the legal field, specializing in the administration of legal services; advises and assists commanding officers in matters pertaining to military law and the administration of military justice;

directs or conducts investigations; drafts charges; makes recommendations concerning forum selection for the disposition of offenses; serves as trial counsel and conducts prosecutions of persons brought to trial by special court-martial; prepares records of proceedings and post trial actions; acts as summary courts-martial; conducts Article 32, Uniform Code of Military Justice investigations; acts as recorder for administrative discharge boards and supervises personnel performing legal duties; performs other nonlawyer paralegal functions, including claims, civilian personnel matters, and financial and budgetary matters; provides legal assistance; plans and manages the employment of equipment and manpower.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in case analysis and reasoning; 3 in law office management, 3 for field experience in management, 3 in trial and case preparation, and credit in legal research on the basis of institutional evaluation. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in any of the following areas: project management, leadership, or budget administration; if the rank of Commander has been attained, 6 additional semester hours in any of the following areas: project management, leadership, or budget administration (12/85).

LDO-655X-002

Law
655X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Law LDO from Legalman (LN).

Description

Serves as an officer technical manager in the legal field, specializing in the administration of legal services; advises and assists commanding officers in matters pertaining to military law and the administration of military justice; directs or conducts investigations; drafts charges; makes recommendations concerning forum selection for the disposition of offenses; serves as trial counsel and conducts prosecutions of persons brought to trial by special court-martial; prepares records of proceedings and post trial actions; acts as summary courts-martial; conducts Article 32, Uniform Code of Military Justice investigations; acts as recorder for administrative discharge boards and supervises personnel performing legal duties; performs other paralegal functions, including claims, civilian personnel matters, and financial and budgetary matters; provides legal research and legal assistance; plans and manages the employment of equipment and legal manpower.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in principles of law (introduction), 3 in basic investigations, and 6 in paralegal studies. In the upper-division baccalaureate category, 3 semester hours in case analysis and reasoning, 3 in law office management, 3 for legal case management, 3 in trial and case preparation, and 3 in legal research. If the rank of Lieutenant Commander has been attained, 3 additional semester hours in organizational management; if the rank of Commander has been attained, 6 additional semester hours in organizational management (2/96).

Navy Warrant Officer Exhibits

NWO-711X-001

BOATSWAIN (SURFACE)
711X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Boatswain (Surface) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (5/96).

NWO-711X-002

SURFACE BOATSWAIN
711X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Boatswain (Surface) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship and navigation; plans, supervises, and directs activities of deck and navigation personnel in performance of operational and maintenance functions; plans, develops, and administers deck navigation training programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns duties and coordinates activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management information systems, 3 in management problems, and 3 for field experience in management (5/96).

NWO-712X-001

OPERATIONS TECHNICIAN SURFACE OPERATIONS TECHNICIAN
(Operations Technician (Surface))
712X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Operations Technician (Surface) Warrant Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), Quartermaster (QM), Radioman (RM), Signalman (SM), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains personnel in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-712X-002

SURFACE OPERATIONS TECHNICIAN
712X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Surface Operations Technician Warrant Officer from Electronics Warfare Technician (EW), Operations Specialist (OS), Ocean Systems Technician (OT), or Sonar Technician, Surface (STG).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems, and procedures in operations and communications; supervises and trains staff in the operation and maintenance of operations and communications equipment and systems; plans, directs, and controls operations and communications activities; advises and assists commands in the above areas and in the employment and utilization of associated facilities and installations.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, and 3 for field experience in management (5/96).

NWO-713X-003

ENGINEERING TECHNICIAN (SURFACE)
713X

Exhibit Dates: 1/90–2/96.

Career Pattern

May have progressed to Engineering Technician (Surface) Warrant Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician, Electrical (GSE); Gas Turbine System Technician, Mechanical (GSM); Instrumentman (IM); Interior Communications Electrician (IC); Machinery Repairman (MR); Machinist's Mate (MM); Opticalman (OM); or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-713X-004

ENGINEERING TECHNICIAN (SURFACE)
713X

Exhibit Dates: 3/96–Present.

Career Pattern

May have progressed to Engineering Technician (Surface) Warrant Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician (GS); Interior Communications Electrician (IC); or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises, trains, and evaluates personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has exercised supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice; applies many elements of total quality management and quality assurance; uses computerized management information systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in management information systems, and 3 in quality control systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (3/96).

NWO-714X-003

Repair Technicians (Surface)
714X

Exhibit Dates: 1/90–10/97.

Career Pattern

May have progressed to Repair Technician (Surface) Warrant Officer from Hull Maintenance Technician (HT), Molder (MT), or Patternmaker (PM).

Description

Serves as officer technical specialist in ship repair and maintenance, damage control, and fire fighting procedures, techniques, and equipment; supervises and trains personnel whose duties include electric arc welding, oxyacetylene welding and cutting, woodworking, metalworking, boat repairs, foundry operations, patternmaking, piping and drainage, and nuclear, biological, and chemical warfare defense; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-714X-004

Surface Repair Technician
714X

Exhibit Dates: 11/97–Present.

Career Pattern

May have progressed to Surface Repair Technician Warrant Officer from the following ratings: ML (Molder), PM (Patternmaker), HT (Hull Maintenance Technician), DC (Damage Controlman), OM (Opticalman), IM (Instrumentman), MR (Machinery Repairman).

Description

Serves as officer technical specialist in ship repair and maintenance, damage control, and fire fighting procedures, techniques, and equipment; supervises and provides training in electric arc welding, oxyacetylene welding and cutting, woodworking, metalworking, boat repairs, piping and drainage, and biological, chemical, and radiological warfare defense; analyzes problems with equipment and operations, finds solutions, and takes corrective action; applies knowledge of supervision and training, computer skills, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget management, 3 in industrial management, and 3 for field experience in management (11/97).

NWO-715X-002

Special Warfare Technician
715X

Exhibit Dates: 3/90–Present.

Career Pattern

May have progressed to Special Warfare Technician Warrant Officer from any rating qualified in Naval Special Warfare.

Description

Serves as an officer technical specialist in the maintenance of equipment and the administration of ordnance, engineering, swimming, and diving divisions, and overall sea, air, and land (SEAL) operations. May serve as training officer, operations officer, and instructor in an operation or staff position.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in physical education, 3 in applied computer operation, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 for field experience in management (5/96).

NWO-716X-002

Surface Ordnance Technician
716X

Exhibit Dates: 1/90–1/98.

Career Pattern

May have progressed to Surface Ordnance Technician Warrant Officer from Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Gunner's Mate (GM); Gunner's Mate, Guns (GMG); Gunner's Mate, Missiles (GMM); Gunner's Mate Technician (GMT); Missile Technician (MT); or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems, including missile, missile launch, missile fire control and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operations, testing, maintenance and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-716X-003

Surface Ordnance Technician
716X

Exhibit Dates: 2/98–Present.

Career Pattern

May have progressed to Surface Ordnance Technician Warrant Officer from Fire Control Technician (FT); Fire Control Technician, Gun Fire Control (FTG); Gunner's Mate (GM); Gunner's Mate, Guns (GMG); Gunner's Mate, Missiles (GMM); Missile Technician (MT); Torpedoman's Mate (TM); or Mineman (MN).

Description

There are two main areas of focus under the surface ordnance technician warrant officer: weapons system control (electronics) and logistics. Under the weapons system control focus this warrant officer functions as the senior subject matter expert for the Aegis system; is responsible for the operational integration of the weapons system and the training of operational personnel (including shipboard tactical action officers). In the logistics focus, functions as an ordnance supply officer; is responsible for the administration, disposition and appropriate record keeping of hazardous material; functions as the ship's safety officer; is responsible for ship security on supply ships that operate to resupply other U.S. Navy vessels with naval ordnance.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for hazardous materials and safety. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems for curriculum design instruction, and 2 for U.S. Navy specific computer programming (2/98).

NWO-718X-001

Electronics Technician (Surface)
718X

Exhibit Dates: 1/90–2/96.

Career Pattern

May have progressed to Electronics Technician (Surface) Warrant Officer from Data Systems Technician (DS); Electronics Technician (ET); Electronics Warfare Technician (EW); Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control Technician (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Operations Specialist (OS); Ocean Systems Technician (OT); or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of non-nuclear electronics, including electronic theory and equipment and systems used in navigation; directs the detection, tracking, recognition, and identification of ship, aircraft, and missiles; supervises the installation, operation, and maintenance of all non-nuclear electronics systems installed in units of the surface force; supervises those persons involved in installing, modifying, testing, calibrating, maintaining, and repairing electronic equipment; serves as expert troubleshooter who analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice on electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 2 for field experience in electronics (1/84).

NWO-718X-002

Electronics Technician (Surface)
718X

Exhibit Dates: 3/96–Present.

Career Pattern

May have progressed to Electronics Technician (Surface) Warrant Officer from Data Systems Technician (DS); Electronics Technician (ET); Electronics Warfare Technician (EW); Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control Technician (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Controlman (FC)Fire Control Technician, Surface Missile Fire Control (FTM); Operations Specialist (OS); or Ocean Systems Technician (OT).

Description

Serves as an officer technical specialist in the field of non-nuclear electronics, including electronic theory and equipment and systems used in navigation; directs the detection, tracking, recognition, and identification of ship, aircraft, and missiles; supervises the installation, operation, and maintenance of all non-nuclear electronics systems installed in units of the surface force; supervises those persons involved in installing, modifying, testing, calibrating, maintaining, and repairing electronic equipment; serves as expert troubleshooter who analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice on electronic systems; uses current software, e.g., word processing, spread sheets, and military-specific application packages.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 2 for field experience in applications software (3/96).

NWO-719X-002

Communications Technician
719X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Communications Technician Warrant Officer from Radioman (RM).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems, and procedures in surface communications and has practical experience in these areas; assists and advises commands in communications planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communication personnel; assists in administration of onboard training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-719X-003

Surface Communications Technician
719X

Exhibit Dates: 5/96–Present.

Career Pattern

Progressed to Surface Communications Technician Warrant Officer from Radioman (RM).

Description

Serves as an officer technical specialist in the operation, employment, and application of techniques, equipment, systems, and procedures in surface communications and has practical experience in these areas; assists and advises commands in communications planning, direction and control, and in the employment and utilization of associated facilities and installations; organizes, supervises, and directs performance of communication personnel; assists in administration of onboard training programs, facilities, and services; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel; uses managerial information systems to perform job responsibilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, 3 in budget management, and 3 for field experience in management (5/96).

NWO-720X-001

Diving Officer
720X

Exhibit Dates: 3/90–Present.

Career Pattern

May have progressed to Diving Officer from any rating; must be qualified and designated a master, saturation, or first class diver.

Description

Serves as a technical specialist in the fields of underwater ship's husbandry, ship salvage, and undersea research and developments with practical experience in one or more of these areas; plans, supervises, and directs the activities of enlisted divers in the performance of diving duties; develops, coordinates, and administers diving training programs; assigns and coordinates the activities of all personnel, divers and non-divers, under their command; if assigned to auxiliary ships of the surface and submarine fleets, they may also perform collateral duty in the ship's repair department when assigned by the commanding officer; may serve as basic diving officers, mix-and-gas diving officers, salvage diving officers, and deep sea diving officers, and as diving instructors at diving training centers.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to computers, 3 in technical communications, 3 in personnel supervision, and 2 in physical education (diving). In the upper-division baccalaureate category, 2 semester hours in management information systems, 3 for field experience in diving, 3 in principles of management, 3 in management problems, 3 for field experience in management, and 3 in medical technology and first aid (5/96).

NWO-721X-002

Boatswain (Submarine)
721X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Boatswain (Submarine) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns and coordinates activities of personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-721X-003

SUBMARINE BOATSWAIN
721X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Boatswain (Submarine) Warrant Officer from Boatswain's Mate (BM), Quartermaster (QM), or Signalman (SM).

Description

Serves as an officer technical specialist in the field of seamanship, navigation, and deep sea diving; plans, supervises, and directs activities of deck, navigation, and deep sea diving personnel in performance of operational and maintenance functions; plans, develops, and administers deck, navigation, and diver programs; assists in organizing, scheduling, and supervising seamanship and navigation exercises and drills; assigns duties and coordinates activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in introduction to computers, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 4 for field experience in celestial navigation, and 3 for field experience in management (5/96).

NWO-723X-002

ENGINEERING TECHNICIAN (SUBMARINE)
723X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Engineering Technician (Submarine) Warrant Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician, Electrical (GSE); Gas Turbine System Technician, Mechanical (GSM); Instrumentman (IM); Interior Communications Electrician (IC); Machinery Repairman (MR); Machinist's Mate (MM); Opticalman (OM); or Precision Instrumentman, Master Chief (PICM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains personnel in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; has knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-723X-003

SUBMARINE ENGINEERING TECHNICIAN
723X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Submarine Engineering Technician Warrant Officer from Boiler Technician (BT); Electrician's Mate (EM); Engineman (EN); Gas Turbine System Technician (GS); Interior Communications Electrician (IC); or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in ship's machinery, electrical power, lighting, interior communications systems, maintenance of optical equipment, instruments, and office machinery; supervises and trains staff in the operation and maintenance of main propulsion systems (gas turbine, diesel, and steam), refrigeration systems, fuel systems, and shipboard electrical systems; analyzes problems with equipment and operations, finds solutions, and takes corrective action; initiates and monitors training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice; uses computer software.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, and 4 for field experience in management (5/96).

NWO-724X-003

REPAIR TECHNICIAN (SUBMARINE)
724X

Exhibit Dates: 1/90–10/97. Effective 10/97, Warrant Officer designator 724X was discontinued.

Career Pattern

Progressed to Repair Technician (Submarine) Warrant Officer from Hull Maintenance Technician (HT).

Description

Serves as an officer technical specialist in the maintenance and repair of submarine hull, structure, and associated fittings; supervises and trains personnel whose duties involve woodworking, metalworking, foundry operations, patternmaking, piping and drainage, plate welding, pressure hull welding, high-pressure pipe welding, nuclear power plant component welding, nondestructive test inspections, visual test, magnetic particle test, penetrant test, and ultrasonic test operations and radiography; analyzes problems with equipment and operations, finds solutions, and takes corrective action; applies knowledge of supervision and training, personnel policies, legal procedures, leadership and management techniques, and communication methods; writes reports and provides technical advice.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 4 for field experience in management (10/84).

NWO-726X-001

SUBMARINE ORDNANCE TECHNICIAN
726X

Exhibit Dates: 1/90–1/98.

Career Pattern

May have progressed to Submarine Ordnance Technician Warrant Officer from Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Gunner's Mate (GM); Gunner's Mate, Guns (GMG); Gunner's Mate Missiles (GMM); Gunner's Mate Technician (GMT); Missile Technician (MT); or Torpedoman's Mate (TM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems, including missile, missile launch, missile fire control, and warhead subsystems; trains and supervises personnel engaged in assembly, installation, operation, testing, maintenance, and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-726X-002

SUBMARINE ORDNANCE TECHNICIAN
726X

Exhibit Dates: 2/98–Present.

Career Pattern

May have progressed to Submarine Ordnance Technician Warrant Officer from Fire Control Technician (FT); Missile Technician (MT); or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in ballistic missile weapons systems, administers hazardous material safety and handling plans (nuclear); trains and supervises personnel engaged in assembly, installation, operation, testing, maintenance, and repair of ballistic missile systems; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 in hazardous materials safety. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for curriculum design and instruction (2/98).

NWO-728X-001

Electronics Technician (Submarine)
728X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Electronics Technician (Submarine) Warrant Officer from Data Systems Technician (DS); Electronics Technician (ET); Electronics Warfare Technician (EW); Fire Control Technician (FT); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Fire Control Technician, Surface Missile Fire Control (FTM); Operations Specialist (OS); Ocean Systems Technician (OT); or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of electronics; supervises those persons involved with the installation, operation, and maintenance of electronic systems; plans, organizes, and manages the activities of technical personnel; provides leadership necessary to guide personnel and develop individual responsibility; provides technical expertise to subordinates; writes reports; provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 for field experience in management, and 4 for field experience in electronics (1/84).

NWO-728X-002

Submarine Electronics Technician
728X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Submarine Electronics Technician Warrant Officer from Data Systems Technician (DS); Electronics Technician (ET); Fire Controlman (FC); Fire Control Technician, Ballistic Missile Fire Control (FTB); Fire Control Technician, Gun Fire Control (FTG); Ocean Systems Technician (OT); or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of electronics; supervises those persons involved with the installation, operation, and maintenance of electronic systems; plans, organizes, and manages the activities of technical personnel; provides leadership necessary to guide staff and develop individual responsibility; provides technical expertise to subordinates; writes reports; provides advice about electronic and computer systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in technical communication and 2 in introduction to computers. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 for field experience in management, and 4 for field experience in electronics (5/96).

NWO-731X-001

Aviation Boatswain
731X

Exhibit Dates: 1/90–10/97.

Career Pattern

May have progressed to Aviation Boatswain Warrant Officer from Aviation Boatswain's Mate (AB); Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE); Aviation Boatswain's Mate Fuels (ABF); or Aviation Boatswain's Mate, Aircraft Handling (ABH).

Description

Serves as an officer technical specialist in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-731X-002

Aviation Boatswain
731X

Exhibit Dates: 11/97–Present.

Career Pattern

May have progressed to Aviation Boatswain Warrant Officer from Aviation Boatswain's Mate (AB); Aviation Boatswain's Mate, Launching and Recovery Equipment (ABE); Aviation Boatswain's Mate Fuels (ABF); or Aviation Boatswain's Mate, Aircraft Handling (ABH).

Description

Serves as an officer technical specialist in aircraft handling and support operations aboard ship; plans and supervises loading, spotting, launching, recovering, and fueling aboard aircraft carriers and other aircraft-capable ships; supervises the maintenance and operation of aircraft catapults, arresting gear, aircraft fueling systems, and aircraft crash, fire, and salvage operations; writes technical reports and personnel evaluation reports; supervises fuel testing laboratory and quality assurance procedures; uses management information systems for systems analysis.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, 3 in budget management, and 3 in industrial management (11/97).

NWO-732X-001

Aviation Operations Technician
732X

Exhibit Dates: 1/90–1/98.

Career Pattern

May have progressed to Aviation Operations Technician Warrant Officer from Aviation Antisubmarine Warfare Operator (AW) Acoustic, Non-acoustic, or Helicopter.

Description

Serves as a officer technical specialist in either the field of air traffic control or air antisubmarine warfare. If serves in the field of air traffic control, organizes and supervises control tower operations, base operations, heliport operations, surveillance and approach radars, approach/departure control radars, planning airspace utilization, air traffic control procedures and training programs for qualification as air traffic controller; coordinates operational procedures with FAA, US military, and foreign air traffic control facilities; employs a broad knowledge of federal air regulations, terminal and enroute air traffic control procedures and planning, and must have a knowledge of ground-to-air communications, radar operations, recording equipment, teletype and landline communications, navigational aids, and weather. If serves in the field of air antisubmarine warfare, briefs and debriefs operational flight crews; evaluates and determines inflight operational efficiency of sensor system components and sensor operations; supervises preflight, inflight, and postflight inspections of antisubmarine warfare equipment and collection, preparation and transmission of data to appropriate analysis agencies; flies in support of mission of unit to which assigned; has broad knowledge of the characteristics and employment of US and foreign submarines, warships, small craft, and merchant ships and principles of radar, magnetic detection, electronic countermeasures, and underwater acoustics; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in aviation management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/85).

NWO-732X-002

Aviation Operations Technician
732X

Exhibit Dates: 2/98–Present.

Career Pattern

May have progressed to Aviation Operations Technician from Aviation Warfare Systems Operator (AW), Acoustic, Non-acoustic, or Helicopter.

Description

Serves as a officer technical specialist in the tactical control of overall antisubmarine assets; responsible, under the ship's Tactical Action Officer, for antisubmarine (ASW) search patterns, analysis of appropriate data, and actual commitment of resources toward the prosecution of a suspected target; has overall responsibility for coordination of ASW operations within the battle group; responsible for the safety of flight in the ASW sector, involving knowledge of air traffic control procedures and planning, and an in-depth knowledge of ground-to-air communications, radar operations, recording equipment, navigational aids, weather and oceanographic features; conducts both preflight briefs and postflight debriefs for operational flight crews; responsible for overall mission evaluation after the exercise; presents a formal briefing of the result of the analysis to superior officers.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in technical report writing, 2 in flight safety procedures, 3 in personnel supervision, and 3 in computer application. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 3 in staff development (2/98).

NWO-734X-001

Aviation Maintenance Technician
734X

Exhibit Dates: 1/90–10/97.

Career Pattern

May have progressed to Aviation Maintenance Technician Warrant Officer from Aviation Machinist's Mate (AD); Aviation Machinist's Mate, Jet Engine Mechanic (ADJ); Aviation Machinist's Mate, Reciprocating Engine Mechanic (ADR); Aviation Structural Mechanic (AM); Aviation Structural Mechanic, Safety Equipment (AME); Aviation Structural Mechanic, Hydraulics (AMH); Aviation Structural Mechanic, Structures (AMS); Aviation Support Equipment Technician (AS); Aviation Support Equipment Technician, Electrical (ASE); Aviation Support Equipment Technician, Hydraulics and Structures (ASH); Aviation Support Equipment Technician, Mechanical (ASM); Aviation Maintenance Administrationman (AZ); Aircraft Maintenanceman (AF); or Aircrew Survival Equipmentman (PR).

Description

Serves as an officer technical specialist in the field of aircraft maintenance aboard ship and ashore; plans, organizes, and manages the activities of aviation maintenance personnel; may serve as assistant to aircraft maintenance officer or as power plant division officer; may work as technical advisor on the capabilities, limitations, and reliability of aircraft engines, accessories, airframes, and ground support, safety, and survival equipment; has responsibility for the operation and upkeep of the aircraft shops and the coordination of shop activities; plans and directs schedules of maintenance of aircraft; conducts inspections and provides necessary training; writes technical reports and personnel evaluation reports; keeps equipment maintenance records; develops operating budgets and monitors expenditures; may supervise and evaluate from 30-200 persons.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in personnel supervision, 3 in human relations, 3 in technical report writing, and 3 in record keeping. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, and additional credit for field experience in management on the basis of institutional evaluation (5/83).

NWO-734X-002

Aviation Maintenance Technician
734X

Exhibit Dates: 11/97–Present.

Career Pattern

May have progressed to Aviation Maintenance Technician Warrant Officer from Aviation Machinist's Mate (AD); Aviation Structural Mechanic (AM); Aviation Structural Mechanic, Safety Equipment (AME); Aviation Structural Mechanic, Hydraulics (AMH); Aviation Structural Mechanic, Structures (AMS); Aviation Support Equipment Technician (AS); Aviation Support Equipment Technician, Electrical (ASE); Aviation Support Equipment Technician, Hydraulics and Structures (ASH); Aviation Support Equipment Technician, Mechanical (ASM); Aviation Maintenance Administrationman (AZ); Aircraft Maintenanceman Master Chief (AFCM); or Aircrew Survival Equipmentman (PR).

Description

Serves as an officer technical specialist in the field of aircraft maintenance aboard ship and ashore; plans, organizes, and manages the activities of aviation maintenance personnel; may serve as assistant to aircraft maintenance officer or as power plant division officer; may work as technical advisor on the capabilities, limitations, and reliability of aircraft engines, accessories, airframes, and ground support, safety, and survival equipment; has responsibility for the operation and upkeep of the aircraft shops and the coordination of shop activities; plans and directs schedules of maintenance of aircraft; conducts inspections and provides necessary training; writes technical reports and personnel evaluation reports; keeps equipment maintenance records; develops operating budgets and monitors expenditures; may supervise and evaluate from 30-200 persons; uses management information systems for systems analysis.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in personnel supervision, 3 in human relations, 3 in technical report writing, 3 in record keeping, 3 in business communication, and 2 in management information systems. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, 3 in principles of management, 3 in operations management, and 3 in business organization and management (11/97).

NWO-736X-001

Aviation Ordnance Technician
736X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Aviation Ordnance Technician Warrant Officer from Aviation Ordnanceman (AO) or Gunner's Mate Technician (GMT).

Description

Serves as an officer technical specialist in the uses, capabilities, limitations, and reliability of aviation ordnance, handling equipment, and aircraft armament; supervises and directs the arming/dearming of aircraft and the requisitioning, stowing, handling, testing, disassembling, assembling, installing, operating, maintaining, and repairing of aviation ordnance, handling equipment, and aircraft armament; supervises and directs the stowage, testing, and installation of aircraft missiles; interprets, disseminates, and ensures compliance with regulations and safety precautions governing the handling and stowing of aircraft ammunition, aircraft missiles, pyrotechnics, and explosives; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates the activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-736X-002

Aviation Ordnance Technician
736X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Aviation Ordnance Technician Warrant Officer from Aviation Ordnanceman (AO) or Weapons Technician (WT).

Description

Serves as an officer technical specialist in the uses, capabilities, limitations, and reliability of aviation ordnance, handling equipment, and aircraft armament; supervises and directs the arming/dearming of aircraft and the requisitioning, stowing, handling, testing, disassembling, assembling, installing, operating, maintaining, and repairing of aviation ordnance, handling equipment, and aircraft armament; supervises and directs the stowage, testing, and installation of aircraft missiles; interprets, disseminates, and ensures compliance with regulations and safety precautions governing the handling and stowing of aircraft ammunition, aircraft missiles, pyrotechnics, and explosives; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; generates and uses computer programs and data to facilitate personnel and logistics management; provides leadership and coordinates the activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in personnel supervision, 3 interpersonal communication, and 3 in computer applications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in organizational management, and 3 in logistics management (10/96).

NWO-738X-001

AVIATION ELECTRONICS TECHNICIAN
738X

Exhibit Dates: 1/90–8/96.

Career Pattern

May have progressed to Aviation Electronics Technician Warrant Officer from Aviation Electrician's Mate (AE), Aviation Electronic's Technician (AT), Aviation Fire Control Technician (AQ), Aviation Antisubmarine Warfare Technician (AX), or Tradevman (TD).

Description

Serves as an officer technical specialist in the field of aviation electronics (avionics) in supervisory positions on aircraft aboard ship and at shore facilities; serves as technical specialist/ advisor to higher authority; supervises and directs practices and procedures for servicing, testing, and maintaining aviation electrical, electronic, instrument, and test equipment; serves as avionic officer, support officer, electronics officer, and avionic/weapons division officer; organizes, supervises, and directs avionic/electronic maintenance facilities; conducts active maintenance and repair programs; coordinates avionic work with other aircraft maintenance work; trains others in the use of avionic equipment, their capabilities and limitations; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (1/84).

NWO-738X-002

AVIATION ELECTRONICS TECHNICIAN
738X

Exhibit Dates: 9/96–Present.

Career Pattern

May have progressed to Aviation Electronics Technician Warrant Officer from Aviation Electrician's Mate (AE), Aviation Electronic's Technician (AT), or Avionics Technician (AV).

Description

Serves as an officer technical specialist in the field of aviation electronics (avionics) in supervisory positions on aircraft aboard ship and at shore facilities; serves as technical specialist/ advisor to higher authority; supervises and directs practices and procedures for servicing, testing, and maintaining aviation electrical, electronic, instrument, and test equipment; serves as avionic officer, support officer, electronics officer, and avionic/weapons division officer; organizes, supervises, and directs avionic/electronic maintenance facilities; conducts maintenance and repair programs; coordinates avionic work with other aircraft maintenance work; trains others in the use of avionic equipment, their capabilities and limitations; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in computer applications, and 3 in aviation maintenance systems. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in aviation maintenance management, and 3 for a management internship (10/96).

NWO-740X-001

NUCLEAR POWER TECHNICIAN
740X

Exhibit Dates: 1/90–4/96.

Career Pattern

This LDO designator was formerly 715X, Nuclear Power Technician, Surface and 725X Nuclear Power Technician, Submarine. May have progressed to Nuclear Power Technician Warrant Officer from Electrician's Mate (EM), Electronics Technician (ET), Interior Communications Electrician (IC), or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in the repair, maintenance, and operation of Naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling, and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis and chemistry control practices and procedures, and quality assurance; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-740X-002

NUCLEAR POWER TECHNICIAN
740X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Nuclear Power Technician Warrant Officer from Electrician's Mate (EM), Electronics Technician (ET), or Machinist's Mate (MM).

Description

Serves as an officer technical specialist in the repair, maintenance, and operation of Naval nuclear propulsion plants, nuclear ship systems, and associated equipment; coordinates and supervises skilled craftsmen and administrative support personnel; provides technical assistance in the overhaul, refueling, and decontamination of nuclear propulsion plants; monitors and supervises nuclear propulsion plant, chemical analysis and chemistry control practices and procedures, and quality assurance; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, 3 in management information systems, 3 in quality control systems, 3 in nuclear power systems, and 3 in regulatory compliance. In the upper-division baccalaureate category, 3 semester hours in principles of management, 4 in management problems, and 6 for field experience in management (5/96).

NWO-741X-002

SHIP'S CLERK
741X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Ship's Clerk from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), or Religious Program Specialist (RP).

Description

Serves as an officer technical specialist in manpower arrangement or general administration; plans, organizes, and manages activities of personnel in one or more related management areas such as postal office, print shops, or mail department; develops management plans; reviews records and assigns personnel; prepares reports; writes directives and correspondence; serves as administrator of captain's office; reviews and edits regulations; may plan training programs and assist in career planning; analyzes data and makes recommendations; serves as specialist in Naval administration, personnel administration, and office organization.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in human relations, and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 for field experience in management, 3 in management problems, and 3 in principles of management (11/83).

NWO-741X-003

SHIP'S CLERK
741X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Ship's Clerk from Lithographer (LI), Journalist (JO), Postal Clerk (PC), Personnelman (PN), Yeoman (YN), Legalman (LN), or Religious Program Specialist (RP).

Description

Serves as an officer technical specialist and performs duties in administration, personnel management, postal affairs, printed publications, and personnel processing; possesses a broad knowledge of Navy procedures, organization, regulations, and directives.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in records and information management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in public relations management, and 3 for field experience in management. If the rank of CWO3 has been attained, add 3 semester hours for field experience in management. If rank of CWO4 has been attained, add 3 semester hours in management problems (2/96).

NWO-742X-001

Data Processing Technician
742X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Data Processing Technician from Data Processing Technician (DP) or Data Systems Technician (DS).

Description

Serves as an officer technical specialist in the field of automatic data processing utilizing both electronic digital computer and electronic accounting machine equipment; supervises personnel concerned with the preparation of data processing and operation of all automatic data processing equipment; programs, debugs, and operates interactive and batch programs; develops policy for job processing priorities; develops processing evaluation methods, work standards, and procedure manuals for programmers and analysts; prepares budgets and performs cost analysis for computer operations; provides leadership necessary to guide personnel and develop individual responsibility. Responsibilities include strategic and tactical, scientific, business, and logistics data; provides technical advice on equipment and processing techniques; prepares an automatic data processing site and monitors the installation of computer hardware; ensures data integrity and computer security; orders, issues, and inventories computer supplies and repair parts; handles cost control duties; writes reports on operations; conducts training for staff and system users in specific applications; duties vary depending on the size of the organization and the specific computer installation; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in college algebra, and 1 in statistics. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in principles of management, 3 for field experience in data processing, and 3 for field experience in management (11/83).

NWO-742X-002

Data Processing Technician
742X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Data Processing Technician from Data Processing Technician (DP) or Data Systems Technician (DS).

Description

Serves as an warrant officer technical specialist in automated data processing and digital telecommunication technology; provides direct supervision of programmers and telecommunication personnel concerned with the installation, operation and maintenance of data systems including hardware and software operating and application programs; develops local area network design specification and connections to Wide Area Networks including system requirements, band width specifications and technical requirements; provides system administration including beta testing, troubleshooting, traffic control, and systems training; develops policy for data processing and communication priorities, evaluation methods, work standards, and procedures manuals for technicians; provides leadership, professional counseling and career guidance for team members; provides technical reports and advice to the command on data processing and communication matters; prepares budgets and performs cost analysis for computer and communication operations; maintains appropriate records and documentation and prepares personnel evaluation reports. Responsibilities include: data processing and communication needs for administration, personnel, logistics, intelligence, and operational requirements for tactical and non-tactical operations; ensuring data integrity and systems security; inventory control; and Total Quality Management (TQM).

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in computer programming in UNIX and C++, and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in computer systems and organization, 3 in local area networking, 3 in network management, 3 in digital telecommunications analysis, 3 in principles of supervision, and 3 for field experience in management (2/96).

NWO-744X-001

Cryptologic Technician
744X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Cryptologic Technician Warrant Officer from Cryptologic Technician, Administrative (CTA); Cryptologic Technician, Interpretive (CTI); Cryptologic Technician, Maintenance (CTM); Cryptologic Technician, Communications (CTO); Cryptologic Technician, Collection (CTR); or Cryptologic Technician, Technical (CTT).

Description

Serves as an officer technical specialist in all phases of operations conducted by the Naval Security Group Command, including signals intelligence, signals security, and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; provides overall technical supervision, in accordance with appropriate directives required in employing equipment and manpower resources; supervises the installation and maintenance of electrical, electromechanical, and electronic equipment and the conduct of communications, administrative, or communications security functions; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (2/86).

NWO-744X-002

Cryptologic Technician
744X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Cryptologic Technician Warrant Officer from Cryptologic Technician, Administrative (CTA); Cryptologic Technician, Interpretive (CTI); Cryptologic Technician, Maintenance (CTM); Cryptologic Technician, Communications (CTO); Cryptologic Technician, Collection (CTR); or Cryptologic Technician, Technical (CTT).

Description

Serves as an officer technical specialist in all phases of operations conducted by the Naval Security Group Command, including signals intelligence, signals security, and electronic warfare; responsible for administration, personnel support, electronic maintenance, communications, and technical research in support of the operating forces and the national cryptologic effort; provides overall technical supervision, in accordance with appropriate directives required in employing equipment and manpower resources; supervises the installation and maintenance of electrical, electromechanical, and electronic equipment and the conduct of communications, administrative, or communications security functions; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical writing and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, and 3 for field experience in management (2/96).

NWO-745X-002

Intelligence Technician
745X

Exhibit Dates: 1/90–4/96.

Career Pattern

Progressed to Intelligence Technician Warrant Officer from Intelligence Specialist (IS).

Description

Supervises and directs personnel in assembling and analyzing data from a wide variety of sources and the application and employment of such data; supervises and directs personnel in preparation of material and its use in planning missions and preparation of graphics, including annotated photographs, plot sheets, mosaics, and overlays; plots and prepares imagery and intelligence reports; provides input to and receives data from computerized intelligence systems; maintains files including photographs, maps and charts, and photographic interpretation keys; maintains and updates intelligence libraries.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and, based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (4/86).

NWO-745X-003

INTELLIGENCE TECHNICIAN
745X

Exhibit Dates: 5/96–Present.

Career Pattern

Progressed to Intelligence Technician Warrant Officer from Intelligence Specialist (IS).

Description

Supervises and directs personnel in assembling and analyzing data from a wide variety of sources and the application and employment of such data; supervises and directs the preparation of material and its use in planning missions and preparation of graphics, including annotated photographs, plot sheets, mosaics, and overlays; plots, prepares, and presents imagery and intelligence reports; provides input to and receives data from computerized intelligence systems; maintains files including photographs, maps and charts, and photographic interpretation keys; maintains and updates intelligence libraries.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in computer-assisted graphic communication and analysis, 3 in personnel supervision, and, based on institutional evaluation of the student's experiences, an additional 3 semester hours in any of the following areas: computer science, cultural geography, political science, or principles of cartography. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, and 3 for field experience in management (5/96).

NWO-747X-001

PHOTOGRAPHY
747X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Photography Warrant Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), or Photographer's Mate (PH).

Description

Serves as an officer technical specialist in the field of photographic and other imaging systems and equipment; directs, supervises, and trains military personnel in the use of still, motion picture, and video systems in aerial, surface and subsurface imaging; supervises in the operation of imaging commands and activities, combat camera groups, and aerial reconnaissance imaging systems; provides technical advice and assistance on photographic, other imaging, and imaging support matters; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in photographic (or image) theory and technology. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (3/86).

NWO-747X-002

PHOTOGRAPHY
747X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Photography Warrant Officer from Illustrator Draftsman (DM), Intelligence Specialist (IS), Journalist (JO), or Photographer's Mate (PH).

Description

Serves as an officer technical specialist in the field of chemical, electronic, and digital photographic and other imaging systems and equipment; directs, supervises, and trains military personnel in the use of still, motion picture, and video systems in aerial, surface and subsurface imaging; supervises the operation of imaging support for commands and activities, combat camera groups, and aerial reconnaissance imaging systems; provides technical advice and assistance on photographic, other imaging, and imaging support matters; writes technical reports and personnel evaluation reports; responsible for providing routine public and command information support, operational documentation, intelligence analysis and special assignments; manages personnel staffing and assignments, budgeting, training and the supplies and equipment for all imaging support of assigned command; writes evaluation reports, conducts personnel counseling, and supervision.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in photographic (or image) theory and technology. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 3 for human resources management (2/96).

NWO-748X-001

EXPLOSIVE ORDNANCE DISPOSAL TECHNICIAN
748X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Explosive Ordnance Disposal Technician Warrant Officer from any rating; must be qualified in explosive ordnance disposal.

Description

Serves as an officer technical specialist in the methods of detection, identification, field evaluation, recovery, removal, disposal, and rendering safe of all types of US and foreign explosive ordnance, explosives, and demolition materials and in the technical escort of chemical and biological warfare agents; plans and supervises the activities of personnel engaged in diving and explosive ordnance disposal operations involving all types of US and foreign munitions— conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment, and material; supervises the procurement, storage, issue, security, and preservation of explosive ordnance disposal equipment, material, and components; inspects and evaluates unidentified explosive ordnance items and determines the proper method of recovery, removal, disposal, or rendering safe of such items; supervises technical escort missions; performs airborne techniques; provides Secret Service with explosive ordnance disposal support for presidential and other VIP protection; supervises the activities of personnel engaged in diving and/or underwater recovery operations; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, and 3 for field experience in management (10/85).

NWO-748X-002

EXPLOSIVE ORDNANCE DISPOSAL TECHNICIAN
748X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Explosive Ordnance Disposal Technician Warrant Officer from any rating; must be qualified in explosive ordnance disposal.

Description

Serves as an officer technical specialist in the methods of detection, identification, field evaluation, recovery, removal, disposal, and rendering safe of all types of US and foreign explosive ordnance, explosives, and demolition materials and in the technical escort of chemical and biological warfare agents; plans and supervises diving activities and explosive ordnance disposal operations involving all types of US and foreign munitions— conventional and improvised; supervises the repair and modification of explosive ordnance disposal tools, equipment, and material; supervises the procurement, storage, issue, security, and preservation of explosive ordnance disposal equipment, material, and components; inspects and evaluates unidentified explosive ordnance items and determines the proper method of recovery, removal, disposal, or rendering safe of such items; supervises technical escort missions; performs airborne techniques; provides Secret Service with explosive ordnance disposal support for presidential and other VIP protection; supervises diving activities and/or underwater recovery operations; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel; performs all administrative functions using computer software.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in applied physics, 3 in medical technology and first aid, 3 in technical communication, 3 in personnel supervision, and 3 for field experience in technical communication. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in management information systems, and 3 for field experience in management (5/96).

NWO-749X-001

Security Technician
749X

Exhibit Dates: 1/90–4/96.

Career Pattern

Progressed to Security Technician Warrant Officer from Master-At-Arms (MA).

Description

Serves as an officer technical specialist in matters of law enforcement, physical security, and corrections; plans, organizes, and supervises physical security programs aboard naval ships and activities; establishes and maintains access/egress systems providing for detection/prevention of sabotage and theft; plans and directs law enforcement programs including aggressive contraband control initiatives; supervises operation of brigs afloat; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of security organization and administration and 3 in personnel distribution and deployment. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in budget administration, and 6 for field experience in management (12/85).

NWO-749X-002

Security Technician
749X

Exhibit Dates: 5/96–Present.

Career Pattern

Progressed to Security Technician Warrant Officer from Master-At-Arms (MA).

Description

Serves as an officer technical specialist in matters of law enforcement, physical security, and corrections; plans, organizes, and supervises physical security programs aboard naval ships and activities; establishes and maintains access/egress systems providing for detection/prevention of sabotage and theft; plans and directs law enforcement programs including aggressive contraband control initiatives; supervises operation of brigs afloat; plans, develops, and administers training programs; writes technical reports and personnel evaluation reports; develops operating budgets and monitors expenditures; provides leadership and coordinates activities of technical personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of security organization and administration and 3 in personnel distribution and deployment. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in budget administration, 3 in total quality management, and 3 for field experience in management (5/96).

NWO-751X-001

Supply Corps
751X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Supply Corps Warrant Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK), Mess Management Specialist (MS), Ship's Serviceman (SH), or Storekeeper (SK).

Description

Serves as an officer technical specialist in the field of supply, including fiscal accounting and disbursing, material distribution and control, operation of ship's stores, Navy exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds and distribution of supplies; develops and maintains proper budgeting policies; directs stock accounting systems and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operation concepts, inventory control techniques, and material management; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in supply management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-751X-002

Supply Corps
751X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Supply Corps Warrant Officer from Aviation Storekeeper (AK), Disbursing Clerk (DK), Data Processing Technician (DP), Mess Management Specialist (MS), Ship's Serviceman (SH), or Storekeeper (SK).

Description

Serves as an officer technical specialist in the field of supply, including fiscal accounting and disbursing, material distribution and control, operation of ship's stores, Navy exchanges, and commissary stores; directs and administers supply activities; interprets department regulations and determines policies and procedures; responsible for the accounting and disbursing of funds, and purchasing and distribution of supplies; develops, recommends, and maintains proper budgeting policies; directs stock accounting systems and inventory control methods and systems; disposes of excess and obsolete stock; stores and distributes material; utilizes a broad knowledge of logistics procedures, transportation systems, distribution concepts, budgeting and accounting policies, retail operation concepts, inventory control techniques, and material management; writes technical reports; supervises and evaluates personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical writing, 3 in personnel supervision, and 3 for field experience in supply management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 in materiel management (2/96).

NWO-752X-001

Food Service
752X

Exhibit Dates: 1/90–1/96.

Career Pattern

May have progressed to Food Service Warrant Officer from Mess Management Specialist (MS).

Description

Serves as an officer technical specialist in the field of food service and the administration of messing activities afloat and ashore; directs and administers food service activities; interprets department regulations and determines policies and procedures; responsible for the receipt, issue, storage, and preservation of food items; administers financial and operational controls of food service operations; responsible for the auditing and rendering of financial returns; manages food service operations; utilizes a broad knowledge of proper budgeting and fiscal policies, management accounting, progress and statistical reporting, menu and nutritional planning, food handling and storage, and sanitation requirements and techniques.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in nutrition planning and menu planning and 3 for field experience in food service operations. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in food service management, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-752X-002

Food Service
752X

Exhibit Dates: 2/96–Present.

Career Pattern

May have progressed to Food Service Warrant Officer from Mess Management Specialist (MS).

Description

Serves as an officer technical specialist in the field of food service and the administration of messing activities afloat and ashore; directs and administers food service activities; interprets department regulations and determines policies and procedures; responsible for the purchasing, receipt, issue, storage, and preservation of food items; administers financial and operational controls of food service operations; responsible for the auditing and rendering of financial returns; manages food service operations; utilizes a broad knowledge of proper budgeting and fiscal policies, management accounting, progress and statistical reporting, menu and nutritional planning, food handling and storage, and sanitation requirements and techniques; writes technical report; supervises and evaluates personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in nutrition planning and menu planning, 3 for field experience in food service operations, and 3 in technical writing. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in food service management, 3 in budget administration, and 3 for field experience in management (2/96).

NWO-753X-001

Civil Engineer Corps
753X

Exhibit Dates: 1/90–4/96.

Career Pattern

May have progressed to Civil Engineer Corps Warrant Officer from Builder (BU), Construction Electrician (CE), Construction Mechanic (CM), Illustrator Draftsman (DM), Engineering Aid (EA), Equipment Operator (EO), Steelworker (SW), Utilitiesman (UT), Master Chief Constructionman (CUCM), or Master Chief Equipmentman (EQCM).

Description

Serves as an officer technical specialist in the field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; helps plan, coordinate, direct, and supervise the technical, operational, training, and administrative responsibilities of Naval construction force units; assists in the planning, scheduling, operational, and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, maintenance, and repair of buildings, airfields, hardstands, waterfront structures, and utility systems and in the operation, testing, maintenance, and repair of allied plants and automotive and construction equipment; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communication, 3 in personnel supervision, and 3 for field experience in civil engineering. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

NWO-753X-002

Civil Engineer Corps
753X

Exhibit Dates: 5/96–Present.

Career Pattern

May have progressed to Civil Engineer Corps Warrant Officer from Builder (BU); Construction Electrician (CE); Construction Mechanic (CM); Illustrator Draftsman (DM); Engineering Aid (EA); Equipment Operator (EO); Steelworker (SW); Utilitiesman (UT); Master Chief Constructionman (CUCM); or Master Chief Equipmentman (EQCM).

Description

Serves as an officer technical specialist in the field of horizontal and vertical construction, facilities maintenance, utilities, and automotive and construction equipment; helps plan, coordinate, direct, and supervise the technical, operational, training, and administrative responsibilities of Naval construction force units; assists in the planning, scheduling, operational, and technical responsibilities of public works departments within the Navy shore establishment; supervises personnel engaged in horizontal and vertical construction, maintenance, and repair of buildings, airfields, waterfront structures, and utility systems and in the operation, testing, maintenance, and repair of public works plants and automotive and construction equipment; writes technical reports and personnel evaluation reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in construction estimating, 3 in construction scheduling, 3 in personnel supervision, 3 in introduction to computers, and 2 in facility maintenance management. In the upper-division baccalaureate category, 3 semester hours in construction project management, 3 in management problems, and 6 for field experience in management (5/96).

Navy Enlisted Classification (NEC) Exhibits

NEC-1588-001

Electronics Standards Specialist

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals selected for this NEC are in paygrades E-4 through E-7. The NEC is awarded after successful completion of course A-198-0032 or Air Force course G3A2R32470 022. For those in the Aviation Electronics Technician (AT) rating, NEC 6673 is a prerequisite (see exhibit NEC-6673-001). To verify proficiency, refer either to NAVPERS 1070/604, NAVPERS 1616/24, or a Training Evaluation Report. This report rates the individual on knowledge, demonstrated level of skill, and hands-on maintenance.

Description

Performs intermediate-level calibration of electronic test equipment used in production and maintenance of naval weapon, command and control, and data processing systems to prescribed tolerances; repairs electrical/electronic test equipment incidental to the calibration process; calibrates equipment operating up to microwave frequency range.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic measurement techniques, 3 in electronic systems troubleshooting and maintenance, 3 in electronic communications, and 3 in introduction to radar systems (5/92).

NEC-2186-001

Career Recruiter—Recruiter

Exhibit Dates: 1/90–Present.

Career Pattern

NEC 2186 is awarded to proven successful recruiters (NEC 9585) who are selected for assignment to recruiting duty for the remainder of their naval career. Individuals with NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Four steps are necessary in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open book test; 4. A two-hour oral examination before the Qualification Board. Advancement within the NEC is achieved through a certification process. The four levels in the NEC are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before Advancing to the next level, the individual must meet the qualifications standards and pass an oral exam before the Qualifications Board.

Description

Provides qualified civilians for enlistment into the Navy; identifies target market populations; selects and uses appropriate support resources; prospects recruits; conducts interviews; enlists individuals; completes enlistment records; counsels rejected applicants; analyzes recruiting results; formulates plans for improving recruiting, marketing, and processing.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques and 3 in oral communication. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (2/88).

NEC-2186-002

Career Recruiter—Recruiter-In-Charge

Exhibit Dates: 1/90–Present.

Career Pattern

NEC 2186 is awarded to proven successful recruiters (NEC 9585) who are selected for assignment to recruiting duty for the remainder of their naval career. Individuals with NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Four steps are necessary in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open book test; 4. A two-hour oral examination before the Qualification Board. Advancement within the NEC is achieved through a certification process. The four levels in the NEC are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before Advancing to the next level, the individual must meet the qualifications standards and pass an oral exam before the Qualifications Board.

Description

Able to perform the duties required for recruiter; provides leadership and supervision of Navy Recruiters at a recruiting station; utilizes resources to provide sufficient numbers of qualified applicants for enlistment; supervises office routines; directs office personnel; manages resources; conducts training of recruiters; processes documents; supervises the use of government vehicles; ensures the orderly flow of qualified applicants into the Navy.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (2/88).

NEC-2186-003

Career Recruiter—Zone Supervisor

Exhibit Dates: 1/90–Present.

Career Pattern

NEC 2186 is awarded to proven successful recruiters (NEC 9585) who are selected for assignment to recruiting duty for the remainder of their naval career. Individuals with NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Four steps are necessary in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open book test; 4. A two-hour oral examination before the Qualification Board. Advancement within the NEC is achieved through a certification process. The four levels in the NEC are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before Advancing to the next level, the individual must meet the qualifications standards and pass an oral exam before the Qualifications Board.

Description

Able to perform the duties required for Recruiter-In-Charge; manages and supervises use of resources in assigned recruiting zone; performs administrative and management functions; supervises subordinates at recruiting stations within a geographic region; develops and conducts training programs; provides input for budget; manages procurement effort within the region; evaluates functions of recruiting stations and their personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in vocational counseling, 3 in operations management, 3 in personnel management, and 4 for field experience in marketing (2/88).

NEC-2186-004

Career Recruiter—Chief Recruiter

Exhibit Dates: 1/90–Present.

Career Pattern

NEC 2186 is awarded to proven successful recruiters (NEC 9585) who are selected for assignment to recruiting duty for the remainder of their naval career. Individuals with NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Four steps are necessary in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open book test; 4. A two-hour oral examination before the Qualification Board. Advancement within the NEC is achieved through a certification process. The four levels in the NEC are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before Advancing to the next level, the individual must meet the qualifications standards and pass an oral exam before the Qualifications Board.

Description

Able to perform the duties required for Zone Supervisor; manages, supervises, and coordinates the use of all resources in a recruiting district which may include portions of several states; performs administrative and management functions of planning, organizing, coordinating, training, and evaluating; writes reports; manages budget and submits proposed budget; counsels zone and regional personnel; inspects recruiting stations; manages regional office.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours in vocational counseling, 3 in sales management, 3 in operations management, 3 in personnel management, and 6 for field experience in marketing (2/88).

NEC-2612-001

CLASSIFICATION INTERVIEWER—CLASSIFIER

Exhibit Dates: 1/90–Present.

Career Pattern

Classification Interviewers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Classification Interviewer course; 2. A minimum of six months of supervised on-the-job training; during this time the Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion on an open book test; 4. A two-hour oral examination before the Qualification Board. Serves as a member of a staff of a Navy Recruiting District which comprises parts of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include Classifier, Enlisted Processing Division Supervisor, and Military Entrance Processing System Liaison Petty Officer.

Description

Interviews potential enlistees to determine aptitudes and interests for military assignments; determines educational and occupational background, hobbies, abilities, and interests of personnel; administers and scores basic battery and other classification tests; screens personnel training assignments; makes reservations for training programs.

Recommendation

In the upper-division baccalaureate category, 2 semester hours in vocational counseling and 2 for field experience in sales techniques (6/89).

NEC-2612-002

CLASSIFICATION INTERVIEWER—ENLISTED PROCESSING DIVISION SUPERVISOR

Exhibit Dates: 1/90–Present.

Career Pattern

Classification Interviewers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Classification Interviewer course; 2. A minimum of six months of supervised on-the-job training; during this time the Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion on an open book test; 4. A two-hour oral examination before the Qualification Board. Serves as a member of a staff of a Navy Recruiting District which comprises parts of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include Classifier, Enlisted Processing Division Supervisor, and Military Entrance Processing System Liaison Petty Officer.

Description

Manages and supervises the processing of qualified applicants for enlistment within a district; interprets and submits reports; supervises and counsels assigned personnel; submits input to annual training plans including an evaluation of training effectiveness; monitors production and statistical evaluation; prepares work load schedule for processing applicants.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision. In the upper-division baccalaureate category, 1 semester hour in training and development (6/89).

NEC-2612-003

CLASSIFICATION INTERVIEWER—MILITARY ENTRANCE PROCESSING STATION (MEPS) LIAISON PETTY OFFICER

Exhibit Dates: 1/90–Present.

Career Pattern

Classification Interviewers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Classification Interviewer course; 2. A minimum of six months of supervised on-the-job training; during this time the Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion on an open book test; 4. A two-hour oral examination before the Qualification Board. Serves as a member of a staff of a Navy Recruiting District which comprises parts of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include Classifier, Enlisted Processing Division Supervisor, and Military Entrance Processing System Liaison Petty Officer.

Description

Coordinates prequalification processing of potential recruits; serves as quality control checkpoint prior to actual enlistment or reenlistment; performs liaison functions between Military Entrance Processing Station (MEPS) and the recruiting district; verifies accuracy and completeness of applicant paperwork; identifies enlistment requirements, waiver requirements, and specific program eligibility requirements; explains enlistment obligations to applicants.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in office administration (6/89).

NEC-6673-001

FIELD CALIBRATION ACTIVITY TECHNICIAN (ELECTRICAL/ELECTRONICS)

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals selected for this NEC are in paygrades E-1 through E-7. The NEC is awarded after successful completion of course D-198-6670 or E-198-6670. To verify proficiency, refer either to NAVPERS 1070/604, NAVPERS 1616/24, or a Training Evaluation Report. This report rates the individual on knowledge, demonstrated level of skill, and hands-on maintenance.

Description

Calibrates general purpose and specialized ground support electronic test equipment and ancillary equipment in intermediate-level field calibration activities and aircraft intermediate maintenance activities, ashore and afloat, using appropriate calibration standards; repairs electronic test equipment incidental to the calibration process; calibrates mechanical measuring instruments and a wide variety of transducer-equipped instruments for measurement of temperature, pressure, and torque.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic measurement techniques, 3 in electronic systems troubleshooting and maintenance, and 3 in electronic communications (5/92).

NEC-9502-001

INSTRUCTOR

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals holding NEC 9502 generally volunteer for instructor duty. Persons selected must be mature, stable, outgoing individuals who communicate effectively and are strongly motivated. The regular tour is three or four years. A screening process for suitability is followed by an interview with and recommendation by the commanding officer. Five steps are part of the certification process for award of the NEC:1. Successful completion of Basic Instructor Training course (A-012-0011)2. Successful completion of a curriculum development course3. Favorable interview by a Qualification Board4. Attendance at instructor workshops with accompanying classroom observations5. Six months of successful supervised teaching.

Description

Knows lesson planning, instructional strategies, selection of visual aids, and teaching skills; designs lessons from a body of content; develops behavioral objectives; prepares test items; evaluates instructional materials and the results of instruction; presents material clearly and possesses platform (teaching) skills.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in learning theory, 3 in interpersonal communications, 3 in principles of speech, and 3 in instructional media. In the upper-division baccalaureate category, 1 semester hour in curriculum design and 2 in instructional strategy (3/90).

NEC-9506-001

CURRICULUM AND INSTRUCTIONAL STANDARDS SPECIALIST

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals holding NEC 9506 are in paygrades E-5 to E-9 and may hold any rating. The NEC may be awarded either by formal training or on-the-job training. Six months are usually required to attain a wide range of competency in all areas of the NEC. May have taken the Training Materials Development System (TMDS) Curriculum Developer course (A-012-0015).

Description

Develops group-paced instructional materials in accordance with Navy curriculum development standards and guidelines; advises subject-matter experts on development procedures and formatting; evaluates curriculum documents and instructional delivery procedures; performs instructional assessment, test construction, review and validation of course competencies, and consistency of format for review of existing courses or the design of new courses.

Recommendation

In the upper-division baccalaureate category, 2 semester hours for a practicum/field experience in curriculum design or development (3/92).

NEC-9513-001

MANPOWER ANALYST

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals holding NEC 9513 are in paygrades E-5 through E-9. They may enter this field from any other rating but generally progress from the Yeoman (YN) or Personnelman (PN) rating. This is a logical career progression for new Manpower Analysts, blending classroom training with practical field experience. The training track is designed in three phases which are strengthened by on-the-job training: Phase I, Entry Level: Focuses on learning basic language/terminology used in manpower management and basic analyst skills. Courses taken: Introduction to Navy Manpower, Efficiency Review for Analysis, and Methods and Improvement. Phase II, Intermediate (Journeyman) Level: Designed to provide a solid foundation in the tools and techniques of work measurement and methods improvement applied to the Navy's Total Forces Management System. Courses taken: Total Force Manpower Management Systems, and Micro-Manpower Change Applications. Phase III, Advanced Level: Includes advanced training designed to fully develop a manpower manager, and provides a broad base of advanced analytical techniques and manpower systems knowledge. Course taken: Manpower Systems Management. A "Manpower Analyst" certificate is awarded at the completion of Phase I and II training, accompanied by two or more years of field experience in manpower analysis/management work.A "Senior Manpower Analyst" certificate is awarded at the completion of all three phases plus the equivalent of three years of field experience.

Description

Performs manpower management functions including manpower planning, budgeting, and analysis; uses proper software applications, and quality control for manpower planning and programming purposes; performs technical analysis for use by decision-makers; identifies and develops additive workloads which justify manpower requirements not included or documented in staffing standards; prepares routine and special reports as required; coordinates staffing standards development with functional representatives throughout the command.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding, 3 in records management, 3 in basic management information systems, and 2 in report writing for entry-level (Phase I); add 3 semester hours in personnel supervision for intermediate level (Phase II). In the upper-division baccalaureate category, 2 semester hours in management information systems program management for intermediate level (Phase II); add 1 semester hour in management information systems program management, 3 in human resource management, 3 in management problems, and 3 in strategic planning/forecasting for senior level (Phase III) (2/96).

NEC-9515-001

EQUAL OPPORTUNITY PROGRAM SPECIALIST

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals holding NEC 9515 must complete either the resident or nonresident program of the Defense Equal Opportunity Management Institute and an Instructor Training course. They are selected from any rating in paygrades E-5 through E-9. Individuals must have at least six years prior service, be recommended by a commanding officer, and be screened by Equal Opportunity Management Specialists. They must exhibit stability in personal affairs and demonstrate effective speaking and writing skills. A minimum of one year is needed to effectively perform the wide range of competencies required for this NEC. A normal tour is 2—3 years; however, it is not unusual for the tour to be 5 years or longer.

Description

Individual possesses communication skills necessary to perform duties as an equal opportunity advisor to commanding officers or as equal opportunity trainers and facilitators at training centers; determines the elements of prejudice and discrimination and raises awareness of command to equal opportunity issues and policies; assists commanding officer in planning appropriate corrective actions; recognizes the cultural differences of personnel and analyzes how values and attitudes influence interpersonal behavior skills; trains facilitators, manages classrooms, and develops curricula; provides briefings on all aspects of equal opportunity training; facilitates formal training team and assessment team indoctrination courses, seminars, and workshops; uses techniques of group dynamics to persuade and motivate; formulates and revises equal opportunity directives; writes, edits, and publishes documents on equal opportunity matters; interviews, collects data, monitors progress, and prepares reports; conducts community relations activities.

Recommendation

In the upper-division baccalaureate category, 3 semester hours in instructional methods, 3 in equal opportunity resources and assessment, and 3 in applied communication skills (5/92).

NEC-9518-001

NAVLEAD INSTRUCTOR

Exhibit Dates: 3/90–Present.

Career Pattern

Individuals holding NEC 9518 are in paygrade E-6 and above. They request NEC 9518 and must be recommended by their commanding officer and screened by a review board of master training specialists and lead instructors in the areas of physical fitness, value systems, speaking and writing skills, brainstorming, and critical analysis. They must have successfully completed the NAVLEAD Instructor course (A-012-0045), observed the one-week NAVLEAD course, and participated in the NAVLEAD team building process with NAVLEAD facilitators for conducting initial lessons. They are evaluated using a Navy-wide NAVLEAD Instructors Staff Evaluation form.

Description

Serves as a facilitator in a group process in which Navy personnel acquire motivation skills, leadership competencies, value clarification, change agency, and adult learning techniques; the facilitator will exhibit skills in team teaching, group learning, and acquisition of new learning and resource information that will enhance instruction.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in speech communication. In the upper-division baccalaureate category, 3 semester hours in student teaching or for a practicum/internship in classroom or business training environments, 1 in interpersonal communication, 1 in group dynamics, and 1 in adult learning theory (3/92).

NEC-9519-001

CERTIFIED NAVY DRUG AND ALCOHOLISM COUNSELOR

Exhibit Dates: 1/90–Present.

Career Pattern

May have been selected for NEC 9519 from paygrades E-4 through E-9 in any rating. Will have completed all the requirements of the Navy Drug and Alcoholism Certification Program, including successful completion of the Navy Drug and Alcohol Counselor school, a minimum one-year internship as a Drug and Alcoholism Counselor Intern (NEC 9522), and successful completion of comprehensive oral and written certification examinations.

Description

Serves as a drug and alcoholism counselor; conducts assessment and intake interviews; conducts group counseling; prepares aftercare planning and referrals; conducts prevention, outreach, and other educational services related to alcohol and drug abuse and eating disorders; conducts program management and referral activities as required; must maintain the highest code of standards as required by the Counselor Code of Ethics; must maintain a current knowledge about alcohol abuse, alcoholism, drug abuse and addiction, and eating disorders.

Recommendation

In the upper-division baccalaureate category, 6 semester hours in a counseling or social work practicum (7/87).

NEC-9585-001

Recruiter Canvasser—Recruiter

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Provides qualified civilians for enlistment into the Navy; identifies target market populations; selects and uses appropriate supporting resources; prospects recruits; conducts interviews; enlists individuals; completes enlistments records; counsels rejected applicants; analyzes recruiting results; and formulates plans for improving recruiting, marketing, and processing.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques and 3 in oral communication. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (6/89).

NEC-9585-002

Recruiter Canvasser—Recruiter-In-Charge

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Able to perform the duties required for recruiter; provides leadership and supervision of Navy Recruiters at a recruiting station; uses resources to provide sufficient numbers of qualified applicants for enlistment; supervises office routines; directs office personnel; manages resources; conducts training of recruiters; processes documents; supervises the use of government vehicles; ensures the orderly flow of qualified applicants into the Navy.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing (6/89).

NEC-9585-003

Recruiter Canvasser—Zone Supervisor

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3) Completion of an open-book test; 4) A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Able to perform the duties required for recruiter-in-charge; manages and supervises the use of resources in assigned recruiting zone; performs administrative and management functions; supervises subordinates at recruiting stations within a geographic region; develops and conducts training programs; provides input for budget; manages procurement effort within the region; evaluates functions of recruiting stations and their personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 4 semester hours for field experience in marketing, 2 in vocational counseling, 3 in operations management, and 3 in personnel management (6/89).

NEC-9585-004

Recruiter Canvasser—Chief Recruiter

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Able to perform the duties required for zone supervisor; manages, supervises, and coordinates the use of all resources in a recruiting district, which may include portions of several states; performs administrative and management functions of planning, organizing, coordinating, training, and evaluating; writes reports; manages current budget and submits proposed budget; plans recruiting program; counsels zone and regional personnel; inspects recruiting stations; manages regional office.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, 3 in office administration, and 3 in personnel supervision. In the upper-division baccalaureate category, 6 semester hours for field experience in marketing, 2 in vocational counseling, 3 in operations management, 3 in sales management, and 3 in personnel management (6/89).

NEC-9585-005

RECRUITER CANVASSER—6-YEAR OBLIGOR/
NUCLEAR FIELD RECRUITER

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Manages and coordinates the use of Navy recruiting resources to provide sufficient numbers of qualified applicants for enlistment in all six-year advanced programs including nuclear programs; submits input to annual training plan; uses sales skills from preapproach to recruitment; submits funding requests; directs activities to enhance recruiting efforts, including local advertising, planning and implementing promotional activities, and conducting market analysis; manages the processing of waivers and qualifies applicants for selected programs.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques and 3 in oral communication. In the upper-division baccalaureate category, 4 semester hours for field experience in marketing and 3 for field experience in sales techniques (6/89).

NEC-9585-006

RECRUITER CANVASSER—NF/PRIOR SERVICE
(RZ) RECRUITER

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Manages the processing of qualified prior-service applicants for reenlistment; submits input to annual training plans; conducts market analysis and provides input to district marketing plans; verifies accuracy and completeness of applicants' paperwork; processes waiver requirements.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, and 2 in office administration. In the upper-division baccalaureate category, 5 semester hours for field experience in marketing (6/89).

NEC-9585-007

RECRUITER CANVASSER—LEADS SUPERVISOR

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC 9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Supervises the processing and tracking of all national and local leads forwarded to the field as prospects for enlistment/selection; compiles and submits reports; supervises personnel and operations in the tracking center; submits input to annual training plan including determining level of on-the-job training required; schedules and implements training and determines training effectiveness; manages resources including budget and personnel; monitors accuracy and completeness of advertising and direct mail compaigns.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing, 1 in advertising, and 1 in training and development (6/89).

NEC-9585-008

RECRUITER CANVASSER—DELAYED ENTRY
PROGRAM (DEP) COORDINATOR

Exhibit Dates: 1/90–Present.

Career Pattern

Recruiter Canvassers are selected from the top 10 percent of any rating (paygrades E-4 through E-9). Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of the Navy Recruiter Orientation course; 2. A minimum of six months of supervised on-the-job training; during this time the Recruiter Qualification Standards must be completed and verified by the immediate supervisor; 3. Completion of an open-book test; 4. A two-hour oral examination before the Qualification Board. The regular tour is three years. Individuals in paygrade E-6 and above wishing to continue working in NEC

9585 may apply to the Career Recruiting Force and are chosen by a selection board. Advancement is achieved through a certification process. The four levels are Recruiter, Recruiter-In-Charge, Zone Supervisor, and Chief Recruiter. Before advancing to the next level, the individual must meet the qualification standards and pass an oral examination before the Qualification Board.May also have served as a member of a staff of a Navy Recruiting District which comprises part of one or more states, based on population centers. The district staff may have responsibility for assisting from 30 to 100 recruiting centers in matters of training, analyzing, processing, and managing resources. Specific staff assignments include 6-year Obligor/Nuclear Field Recruiter, Prior Service (RZ) Recruiter, Leads Supervisor, and Delayed Entry Program (DEP) Coordinator.

Description

Acts as liaison with recruiters handling persons who will have delayed entry into the Navy; establishes and maintains positive relationships on behalf of the recruiting district with members of the DEP; identifies potential problems with individuals in the DEP in order to retain enlisted personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in sales techniques, 3 in oral communication, and 2 in office administration. In the upper-division baccalaureate category, 3 semester hours for field experience in marketing and 1 in vocational counseling (6/89).

NEC-9588-001

Collateral Duty Career Information Coordinator

Exhibit Dates: 1/90–Present.

Description

Counsels individuals and presents information concerning career opportunities, incentives, rights, benefits, and advantages of a Navy career; processes forms, documents, and records; advises and assists commands in organizing and implementing an aggressive enlisted retention program.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in record keeping and 1 in sales techniques. In the upper-division baccalaureate category, 3 semester hours for field experience in vocational counseling (6/89).

NEC-9589-001

Command Career Information Retention Counselor/Coordinator

Exhibit Dates: 1/90–Present.

Career Pattern

Individuals holding NEC 9589 are selected from the top 10 percent of any rating (paygrades E-4 through E-9). The regular tour is three years. Four steps are involved in the certification process toward the award of the NEC: 1. Successful completion of course A-501-00112. A minimum of six months of supervised on-the-job training; during this time the Qualifications Standards must be completed and verified by the immediate supervisor3. Completion of an open-book test4. A two-hour oral examination before the Qualification Board.

Description

Performs career retention duties afloat and ashore and coordinates the Navy-wide career retention program; explains reenlistment options, benefits, and obligations; discusses individual goals, job satisfaction, and military life with enlisted personnel; supervises and instructs career counselors; maintains a tickler file system to ensure that all personnel are counseled; processes forms, documents, and records for reenlistment; maintains command retention statistics; maintains publications and materials; coordinates and arranges group interviews; serves as the command's principal advisor on policies and regulations related to Navy career planning matters.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in instructional methods. In the upper-division baccalaureate category, 3 semester hours for field experience in counseling and 3 for field experience in management (6/89).

Appendix A

The Evaluation Systems

BACKGROUND

Early editions of the *Guide to the Evaluation of Educational Experiences in the Armed Services* were prepared in response to specific needs. Immediately after World War II, the consensus in the educational community was that the practice of granting blanket credit to World War I veterans as a reward for length of service was educationally unsound. Educators concluded that military learning experiences applicable to civilian curricula should be assessed by faculty for potential credit. Therefore, in December 1945, at the request of civilian educational institutions and the regional accrediting associations, the American Council on Education (ACE), established the Commission on Accreditation of Service Experiences, renamed the Commission on Educational Credit and Credentials in 1979, to evaluate military educational programs and to assist institutions in granting credit for such experiences. The first edition of the *Guide* was published in 1946.

The extension of the World War II G.I. Bill to include veterans of the Korean conflict, and the subsequent enrollment of many veterans in colleges and universities, created a need for the second edition, published in 1954.

The 1968 edition was prepared in anticipation of the increased enrollment of veterans resulting from the educational assistance provided under the Veterans Readjustment Benefits Act of 1966, and with the expectation that many would apply for educational credit for their learning experiences in the armed services. In addition, technological advances had necessitated major changes in service training, with a resulting need for new or revised educational credit recommendations.

The 1974 edition was prepared primarily to respond to three emerging considerations. First, because of the growth in vocational and technical programs and the emergence of the concept of postsecondary education, there was a need to evaluate courses for possible credit in the vocational and technical categories in addition to the baccalaureate and graduate categories of previous editions. Second, active-duty servicemembers were enrolling in increasing numbers in civilian educational programs and were seeking credit for military formal courses soon after completing their service school training. Third, credit recommendations were needed for the many courses initiated or revised by the military since 1968.

The 1974 edition marked the beginning of a new approach to reporting evaluations of formal military training. At its fall 1973 meeting, the Commission approved the concept of an ongoing *Guide* system. Elements of that system included the publication of biennial editions of the *Guide* through computerized composition, continual staff review of courses, and the computerized storage of course information for a more rapid updating of credit recommendation. In 1994, the computerized *Guide* system came in-house, and all data are managed by the Military Evaluations Program staff.

Over the years the recommendations contained in the *Guide* have assisted education institutions in granting credit to hundreds of thousands of servicemembers. Surveys showed that most of the nation's colleges and universities use the formal course recommendations in awarding credit to veterans and active-duty service personnel. The recommendations have been widely accepted because military formal courses share certain key elements with traditional postsecondary programs. They are formally approved and administered, are designed for the purpose of achieving learning outcomes, are conducted by qualified persons with specific subject-matter expertise, and are structured to provide for the reliable and valid assessment of student learning.

The recommendations reflect the Commission's belief that it is sound educational practice to give recognition for learning, no matter how or where that learning has been attained, provided that the learning is at the appropriate level, is in the appropriate area, and is applicable to an individual's postsecondary program of study.

Until 1975, however, no mechanism existed for providing recognition for the learning a servicemember attained through such learning experiences as self-instruction, on-the-job training, and work experience. In 1975, the Commission implemented a program for the evaluation of learning represented by demonstrated proficiency in Army enlisted military occupational specialties (MOS's). The MOS evaluation procedures were developed, tested, and refined during a feasibility study conducted by ACE and sponsored by the Department of the Army. Evaluators made recommendations for educational credit and advanced standing in apprentice training programs. Subsequently, the occupational assessment program of the Commission was expanded to include Navy general rates, ratings, warrant officers and limited duty officers, Army warrant officer MOS's, Navy warrant officer and limited duty officer specialties, Coast Guard enlisted ratings and warrant officers, and selected Marine Corps MOS's. A small number of Naval Enlisted Classifications (NECs) have also been evaluated.

In 1994, ACE published the *1954–1989 Guide to the Evaluation of Educational Experiences in the Armed Services.* It contains all courses and occupations with exhibit dates of 1954 to December 1989. **Please retain the *1954–1989 Guide* as a permanent reference and use it with the current *Guide to the Evaluation of Educational Experiences in the Armed Services.***

Beginning with the 1994 edition, the *Guide* contains all course and occupation exhibits with start dates of 1/90 and later. This is also true for the 1998 *Guide*.

THE COURSE EVALUATION SYSTEM

Courses listed in the *Guide* are service school courses conducted on a formal basis, i.e., approved by a central authority within each service and listed by the service in its catalog. These courses are conducted for a specified period of time with a prescribed course of instruction, in a structured learning situation, and with qualified instructors.

Most courses are given on a full-time basis. After 1981, ACE began evaluation of courses that are 45 academic hours in length. Prior to that time courses evaluated were at least of two weeks duration, or, if less than two weeks in length, the course had to include a minimum of 60 contact hours of instruction. Before 1973, the minimum length requirement was three weeks or 90 contact hours.

In the fall of 1973, the Commission approved the following procedures and guidelines for the evaluation of military formal courses.

The Evaluation Process

Courses are evaluated by teams of at least three subject-matter specialists (college and university professors, deans, and other academicians). Through discussion and the application of evaluation procedures and guidelines, team members reach a consensus on the amount and category of credit to be recommended.

Evaluation materials include the course syllabus, training materials, tests, textbooks, technical manuals, and examinations. Additional information may be obtained from discussions with instructors and program administrators, classroom observations, and examination of instructional equipment and laboratory facilities.

Evaluators have two major tasks for each course: the formulation of a credit recommendation and the preparation of the course's description. The credit recommendation consists of the category of credit, the number of semester hours recommended, and the appropriate subject area. Evaluators phrase the course description (which appears in the *Guide* exhibits under the headings Learning Outcomes or Objectives and Instruction) in terms meaningful to civilian educators. The course description supplements the credit recommendations by summarizing the nature of a given course.

Selection of Evaluators

Nominations for course evaluators are requested from postsecondary institutions, professional and disciplinary societies, education associations, other evaluators, and regional accrediting associations.

The criteria for the selection of formal course evaluators are as follows:

1. The area of an evaluator's competence will closely approximate the area of the training to be evaluated.
2. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.
3. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

An evaluator candidate is interviewed by a staff member to determine whether the individual meets the selection criteria.

An effort is also made to obtain a diverse geographic representation on the team. Subject-matter specialists represent a variety of postsecondary institutional types.

THE NAVY ENLISTED OCCUPATION CLASSIFICATION SYSTEM

The Navy Enlisted Rating Structure is used for classifying enlisted personnel, identifying personnel qualifications, and reporting personnel requirements and resources. It also provides the framework for enlisted career development through paths of advancement from paygrades E–1 (recruit) through E–9 (master chief petty officer). For ACE purposes, there are two main types of occupational classifications in the Enlisted Rating Structure:

1. *General Rates (Apprenticeships)*—Identifications assigned to personnel at paygrades E–1, E–2, and E–3. There are six general rates: Airman, Constructionman, Dentalman, Fireman, Hospitalman, and Seaman. Each general rate involves the performance of entry-level tasks and leads to one or more ratings.
2. *Ratings*—Broad enlisted occupations that encompass similar duties and functions and that, in most instances, provide paths of advancement and career development for personnel from paygrades E–4 (petty officer third class) to E–9 (master chief petty officer). **Figure 1** shows the relationships between petty officer designations and paygrades. A complete list of ratings and the occupational fields to which they belong is included as Appendix B. Ratings require performance of routine tasks at the lower paygrades and more difficult tasks at progressively higher paygrades.

General rates and ratings are organized in career patterns. A career pattern provides the normal path of advancement from recruit (paygrade E–1) to master chief petty officer (paygrade E–9). An example of a career pattern is shown in **Figure 2**.

Figure 1: *Relationships between petty officer designations and paygrades*

Petty officer classifications:	Paygrade
Petty Officer Third Class (PO3)	E–4
Petty Officer Second Class (PO2)	E–5
Petty Officer First Class (PO1)	E–6
Chief Petty Officer (CPO)	E–7
Senior Chief Petty Officer (SCPO)	E–8
Master Chief Petty Officer (MCPO)	E–9

Figure 2: *Example of a Navy enlisted career pattern*

		Paygrade
General rate:		
Airman (AN)	Airman Recruit	E–1
	Airman Apprentice	E–2
	Airman	E–3
Rating:		
Air Controlman (AC)	Air Controlman Third Class (AC3)	E–4
	Air Controlman Second Class (AC2)	E–5
	Air Controlman First Class (AC1)	E–6
	Chief Air Controlman (ACC)	E–7
	Senior Chief Air Controlman (ACCS)	E–8
	Master Chief Air Controlman (ACCM)	E–9

To supplement occupational information contained in the Navy Enlisted Rating Structure and to provide the necessary requirements for general rates and ratings, the Navy applies naval standards and occupational standards. Naval standards are tasks essential to the overall effectiveness of enlisted personnel in the performance of their duties. They include standards pertaining to military requirements, professional development, and naval tradition. Occupational standards identify the minimum tasks required for proficiency in general rates and ratings and provide the basis for the development of training and advancement requirements and of personnel policies and procedures. For both naval standards and occupational standards, each higher paygrade represents more complex duties, increased skills, and greater responsibility. Proficiency in a higher paygrade includes the ability to perform the tasks and meet the standards required for the preceding paygrades, as well as those required for the higher paygrade.

In addition to the Enlisted Rating Structure, the Navy Enlisted Occupational Classification System includes two other subsystems: The Navy Enlisted Classification (NEC) Structure and Special Qualifications. The NEC Structure supplements the Enlisted Rating Structure by identifying skills requiring more specific identification than that provided by general rates and ratings and that are not rating-wide requirements. Special Qualifications identify highly specialized occupational entities that cross several occupational areas and define the requirements of these areas. Selected NECs have been evaluated by ACE.

The Navy Enlisted Evaluation and Advancement System

The Navy regularly evaluates the occupational proficiency of its men and women. In fact, the demonstration of occupational proficiency is directly linked to the advancement system. Only those individuals who have (1) demonstrated that they can perform the tasks required for the next higher paygrade, (2) completed the appropriate correspondence and/or residence courses for the next higher paygrade, (3) served a minimum length of time in their paygrade and in the service, and (4) been recommended by their commanding officer are allowed to take the advancement examination.

One of the primary advancement processes is the Navy-wide written examination for paygrades E–4 through E–7 of each rating. It is a 150-item multiple-choice test that is based on the occupational standards and tasks for each paygrade of a given rating. In addition, the applicable military/leadership examination must also be passed by the candidates. Personnel are not advanced in their rating until they have demonstrated that they are proficient in the next higher paygrade of the rating.

Examinations for Petty Officer Third Class, Petty Officer Second Class, and Petty Officer First Class (paygrades E–4, E–5, and E–6) are administered semiannually. For Chief Petty Officer (E–7), the examination is administered annually and determines whether the person's military record will be screened by the Chief Petty Officer Selection Board. This selection board, which meets annually, ultimately determines a person's advancement to paygrade E–7. Promotion to Senior Chief Petty Officer (E–8) and Master Chief Petty Officer (E–9) is through the Senior/Master Chief Petty Officer Selection Board, which meets annually. Examinations for paygrade E–3 are administered by unit commanding officers when the individual has demonstrated readiness to take it. Written examinations are not used for paygrade E–2. Make-up tests are made available for personnel who cannot take the test on the specified date because of extenuating circumstances.

A final multiple score is computed for each individual who takes the Navy-wide advancement examination. The final multiple score is composed of the following factors:

Factor	*E–4/5*	*E–6*	*E–7*
Written Examination Score	80	80	80
Performance Examination Score	70	92	52
Number of Years in Service	30	34	—
Number of Years in Paygrade	30	34	—
Medals and Awards	10	12	—
Passed-but-not advanced (PNA) Points	10	12	—
TOTAL	230	264	132

The last factor included above, PNA points, applies to those individuals who passed the previous written examination and demonstrated they were qualified for advancement but were not advanced. This situation occurs when there is a scarcity of openings for advancement in a paygrade of a given rating and a person's final multiple score is not high enough for him or her to compete successfully with others in that paygrade, or an opening is not available.

Subject-matter specialists confirm the content validity of the tests in the course of conducting evaluations.

THE NAVY WARRANT OFFICER AND LIMITED DUTY OFFICER CLASSIFICATION SYSTEM

Warrant officers are technical officer specialists who perform duties that are technically oriented and acquired through experience and training and that are limited in scope in relation to other officer categories.

Limited duty officers (LDOs) are technically oriented officers who perform duties that are limited to specific occupational fields, that require authority greater than that normally expected of a warrant officer, and that require strong managerial skills.

Warrant officer and LDO specialties are normally identified by four digits, with each successively providing more precise identification of the individual holder.

A warrant officer can be identified by a "7" in the first digit, and an LDO by a "6".

Only the first three characters are evaluated by ACE; the fourth digit, representing naval status, appears in the exhibits as an "X".

There are four grades of warrant officers: Warrant Officer, W–1 (WO1) (discontinued in 1975); Chief Warrant Officer, W–2 (CWO–2); Chief Warrant Officer, W–3 (CWO–3); and Chief Warrant Officer, W–4 (CWO–4). The grades reflect salary increases and are normally indicative of the length of time a person has served as a warrant officer. *The grades do not signify differences in job duties.* A position requiring a warrant officer may be filled by any qualified warrant from CWO–2 to CWO–4.

LDOs are commissioned officers in the ranks of ensign (O–1) through captain (O–6).

Selection and Evaluation

The warrant officer program provides an opportunity for appointment to commissioned warrant officer status for select senior enlisted personnel. The LDO program provides an opportunity for appointment to regular commissioned status for selected male warrant officers and senior male enlisted personnel. Potential candidates normally improve their skills through on-the-job training and specialized training through schools and correspondence courses.

Selection boards, composed of senior officers of experience, maturity, and varied backgrounds, are convened by the Secretary of the Navy annually. Each candidate's qualifications are evaluated, and the board recommends those deemed best qualified.

Selection boards also meet annually to recommend those qualified for promotion. Performance is the major key to promotion. The Navy's selection procedure for promotion has always recognized the outstanding performer; mediocre performers are judged not to be competitive enough. Evaluations are recorded on Fitness Reports, an objective appraisal of performance by the senior reporting officer.

Time-in-grade is another criterion for promotion. Until 1975, the time-in-grade requirements were:

Promotion to W–2: 1 year in grade W–1
Promotion to W–3: 4 years in grade W–2
Promotion to W–4: 4 years in grade W–3.

After 1975, grade W–1 was discontinued; time-in-grade requirements are now:

Promotion to CWO–3 (temporary):
3 years in grade CWO–2
Promotion to CWO–3 (permanent):
6 years in grade CWO–2
Promotion to CWO–4 (temporary):
3 years in grade CWO–3
Promotion to CWO–4 (permanent):
6 years in grade CWO–3.

ACE OCCUPATION EVALUATION SYSTEM

The ACE evaluation system for occupations has three major components: the selection of evaluators, the materials required for evaluation, and the procedures and guidelines evaluators use in reaching decisions and making recommendations.

Selection of Evaluators

Nominations for evaluators are requested from postsecondary institutions, professional and disciplinary societies; education associations, and regional accrediting associations.

The criteria for selection of evaluators are as follows:

1. The area of an evaluator's competence will closely approximate the area of the occupation to be evaluated.
2. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.
3. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

An evaluator candidate is interviewed by a staff member to determine whether the individual meets the selection criteria.

An effort is also made to obtain a diverse geographic representation on the team. Subject-matter specialists represent a variety of postsecondary institutional types.

Materials Required for Evaluation

In order to make a recommendation, evaluators first identify the skills, competencies, and knowledge associated with a given occupational specialty. The materials relevant for each evaluation are made available to staff members and evaluators by the Navy. Materials include the official Navy manuals that describe the duties and qualifications for each occupation, the *Bibliography for Advancement Study*, rate training manuals, and other publications used by Navy enlisted men and women in the day-to-day performance of their duties and to prepare for their advancement examinations; and the advancement examination. Additional information is obtained by observing and interviewing Navy servicemembers on-the-job during site visits to Navy installations.

The Evaluation Process

Evaluators identify the skills, competencies, and knowledge required of Navy servicemembers who are qualified in a given occupational specialty and relate that demonstrated learning to the same attributes acquired by students who have completed a comparable postsecondary course or curriculum. Because the evaluations are based on a comparison of learning outcomes, the amount of time a given enlisted individual may have spent acquiring occupational proficiency is not taken into consideration. The emphasis is on translating the learning demonstrated through occupational proficiency into terms used in formal civilian postsecondary education systems to recognize the same learning. This reflects the belief of the Commission that the value of learning is not dependent on where or how the learning occurs.

Evaluation teams are assigned three tasks in the evaluation process: to identify the learning represented by occupational proficiency by reviewing the written materials and by observing servicemembers performing their occupation and interviewing them and their supervisors; to prepare a description of the duties, skills, competencies, and knowledge required for each specialty; and to make recommendations for each specialty based on discussion and consensus.

Throughout the evaluation process, evaluators exercise professional judgment in applying the evaluative criteria and procedures. This position reflects the Commission's belief that sound educational evaluation is more dependent on professional judgment and expertise than on rigid application of criteria.

The Commission continually reviews its criteria and procedures. Evaluators are encouraged to provide feedback and recommendations for consideration by the Commission.

CREDIT CATEGORIES

Educational credit is a concept used by postsecondary institutions to quantify and record a student's successful completion of a unit of study. Postsecondary education consists of courses and programs of instruction for persons who are high school graduates or the equivalent, or who are beyond compulsory school age. ACE evaluators utilize the following categories of educational credit when formulating credit recommendations:

Vocational Certificate. This category describes course work of the type normally found in certificate or diploma (nondegree) programs that are usually a year or less in length and designed to provide students with occupational skills. Course content is specialized, and the accompanying shop, laboratory, or similar practical components emphasize procedural more than analytical skills.

Lower-Division Baccalaureate/Associate Degree. This category describes course work of the type normally found in the first two years of a baccalaureate program and in programs leading to the associate degree. The instruction stresses development of analytical abilities at the introductory level. Verbal, mathematical, and scientific concepts associated with an academic discipline are introduced, as are basic principles. Occupationally oriented courses in this category are normally designed to prepare a student to function as a technician in a particular field.

Upper-Division Baccalaureate. This category describes courses of the type found in the last two years of a baccalaureate program. The courses involve specialization of a theoretical or analytical nature beyond the introductory level. Successful performance by students normally requires prior study in the area.

Graduate Degree. This category describes courses with content of the type found in graduate programs. These courses often require independent study, original research, critical analysis, and the scholarly and professional application of the specialized knowledge or discipline. Students enrolled in such courses normally have completed a baccalaureate program.

Semester Hours

Credit recommendations for courses are not derived by simple arithmetic conversion. Evaluators exercise professional judgment and consider only those competencies that can be equated with civilian postsecondary curricula. Intensive courses offered by the military do not necessarily require as much outside preparation as many regular college courses. Evaluators consider the factors of pre- and post-course assignments, prior work-related experience, the concentrated nature of the learning experience, and the reinforcement of the course material gained in the subsequent work setting.

The recommendations for Navy ratings are based on the skills, competencies, and knowledge gained, as demonstrated through proficiency in the rating, without reference to how much time elapsed during the learning process. The semester hour is used as a standard to express how many semester hours of appropriate course work a student would normally complete to attain the same learning outcomes or attest to the same level of competency.

Credit recommendations are expressed in semester credit hours. In determining semester hour recommendations, evaluators will be guided by, but not restricted to, the following standard definitions:

1. One semester credit hour for the equivalent of 15 hours of classroom contact plus 30 hours of outside preparation; or
2. One semester credit hour for the equivalent of 30 hours of laboratory work plus necessary outside preparation, normally expected to be 15 hours; or
3. One semester credit hour for the equivalent of not less than 45 hours (contact hours) of shop instruction.

Other Resources

The Defense Activity for Non-Traditional Education Support (DANTES) maintains the educational records of the servicemembers who have completed DANTES Subject Standardized Tests (DSST's), CLEP examinations, USAFI (United States Armed Forces Institute), and GED tests.

Before July 1, 1974, the results of courses and tests taken under the auspices of USAFI (United States Armed Forces Institute, disestablished 1974) are available from the DANTES Program:

DANTES Program
The Chauncey Group International
P.O. Box 6605
Princeton, NJ 08541-6605

There is a $10.00 fee charged for *each* transcript requested. There is no charge for transcripts sent to military Test Control Officers (TCOs) for counseling purposes.

For GED tests taken overseas after July 1, 1974 write to:

GED Testing Service
One Dupont Circle
Washington, DC 2036-1193

For GED tests taken within the United States after July 1, 1974, write to the Department of Education in the state where the test was taken.

The results of DANTES Subject Standardized Tests (DSSTs) and CLEP tests taken under the auspices of the DANTES Program after July 1, 1974, are available from:

DANTES Program
The Chauncey Group International
P.O. Box 6604
Princeton, NJ 08541-6604
Telephone: 609-720-6740

A fee of $8.00 is charged for *each* transcript requested. A transcript may include any or all DSST and CLEP examinations taken while in the military. There is no charge for transcripts sent to military Test Control Officers (TCOs) for counseling purposes.

You may call the DANTES Progra at 609-720-6740 to order a transcript request form. Or you may request a transcript if you include all of the following information along with the appropriate fee:

Name (include all names tests will be registered under)

Your current address and phone number

Your Social Security Number

The address to which you would like your transcript mailed

Which test you would like included on the transcript; i.e. passing scores only, certain tests, etc.

Your signature is required -- this authorizes the DANTES Program to release the information

Transcript request fees may be paid by check or money order payable to the DANTES program. Payment may also be made with a Master Card or Visa (please include the expiration date). If paying by credit card, you may fax your request to 609-720-6800.

Records of individuals tested by the Veteran's Administration after October 1, 1989, may be obtained from:

Manager
Military Testing
GED Testing Service
American Council on Education
One Dupont Circle, Suite 250
Washington, DC 20036-1163

APPLICATION FOR THE EVALUATION OF LEARNING EXPERIENCES DURING MILITARY SERVICE

____
(Date)

TO: (Name and address of educational institution, agency, or employer)

EVALUATION REQUEST FOR:

____
(Name of Applicant)

____
(Social Security Number)

ATTENTION:

Dear Official:

The applicant named above has requested that the attached summary of educational achievements, accomplished while in the Armed Forces of the United States, be forwarded to you for review and evaluation.

The American Council on Education publishes the *Guide to the Evaluation of Educational Experiences in the Armed Services* which includes postsecondary credit evaluations of military learning experiences. The 1954 edition of the *Guide* contains recommendations for formal courses offered by the Armed Services during the period 1941 to 1954. The current edition contains credit recommendations for (1) military training courses offered after 1954; (2) Army military occupational specialties (MOS's) for enlisted personnel and warrant officers; (3) ratings held by Navy and Coast Guard enlisted personnel; and (4) occupational designators held by Navy and Coast Guard warrant officers and Navy limited duty officers. In addition to recommendations for semester hour credits, some Army enlisted MOS's and Navy ratings also have recommendations for advanced standing in apprentice training programs.

The American Council on Education maintains an advisory service to provide credit recommendations for courses and tests, MOS's, ratings, and other occupations evaluated after the publication date of the current *Guide*. Credit recommendations are provided to officials of schools, state departments of education or other educational institutions, employers, apprenticeship training directors, labor union and trade association officials, military education officers and applicants. *Credit recommendations are not provided to officials at the applicant's request.* Authorized persons may write directly to the Military Evaluations Program Office, American Council on Education, One Dupont Circle, N.W., Washington, D.C. 20036-1193.

The evaluation of this applicant's learning experiences, as well as any guidance which you may provide, should be sent directly to the applicant at the address shown in block 6 on page 3. Your interest is genuinely appreciated.

Sincerely,

____
(Education Officer)

DD Form 295, NOV 86 *Previous editions are obsolete.* Page 1 of 4 Pages
[illegible]

Privacy Act Statement

AUTHORITY: 5 USC 301 and EO 9397, November 1943 (SSN).

PRINCIPAL PURPOSE: To permit authorized agencies to evaluate military experience for academic placement and/or employment.

ROUTINE USES: Used at the request of the individual for the evaluation of military training.

DISCLOSURE: Voluntary; however, failure to provide requested information impedes the evaluation process by educational institutions or potential employers.

INSTRUCTIONS TO APPLICANT

DD Form 295 is for your convenience in applying for evaluation of your educational experiences during military service. Give as much detailed information as possible. Include additional information on separate sheets, if necessary.

You are encouraged to write a preliminary letter to the school or agency concerned, explaining your interest in its evaluation of your records for the continuance of your education. Training, correspondence study, or special experiences not described on this form, which you believe would be of interest to those reviewing your case, should be included in this letter.

The applicant should:

a. Complete items 1 through 15.

b. If you have attended college or completed any college correspondence courses, ask that college to send a transcript to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY COLLEGE OR UNIVERSITY COURSES ON THIS FORM.

c. If you have completed any college-level standardized examinations for credit, such as USAFI or DANTES Subject Standardized Tests, or CLEP, ask the appropriate agency to send a score report to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY EXAMINATIONS ON THIS FORM.

d. After completion, submit this DD Form 295 to the Certifying Officer.

INSTRUCTIONS TO CERTIFYING OFFICER

(Custodian of Personnel Records)

DD Form 295 is intended to provide factual information that schools and other evaluating agencies require for evaluation of the applicant's educational achievement. CERTIFYING OFFICERS WILL NOT MAKE RECOMMENDATIONS REGARDING CREDIT TO BE AWARDED.

The certifying officer should:

a. Complete items 16 through 18.

b. Insure that the information provided in Section II is documented in the applicant's Service Record. Names of schools or courses should not be abbreviated.

c. Send this DD Form 295 to the Education Officer.

INSTRUCTIONS TO EDUCATION OFFICER

The education officer should:

a. Complete item 19.

b. Counsel the service member.

c. Complete page 1. The name and address of the evaluating agency should be the same as that listed at the top of page 3 of this form.

PAGE 1 IS IN ADDITION TO, AND NOT A SUBSTITUTE FOR, THE LETTER TO BE WRITTEN TO THE EVALUATING AGENCY BY THE APPLICANT.

d. Mail DD Form 295 directly to the designated evaluating agency.

DEPARTMENT OF THE NAVY
NAVAL RESERVE CENTER
PENSACOLA, FLORIDA 32509

IN REPLY REFER TO

1100
Ser 08/17
3 May 90

From: Commanding Officer, Naval Reserve Center Pensacola
To:

Subj: DESIGNATION AS RECRUITER IN CHARGE (RINC)

Ref: (a) COMNAVRESFORINST 1130.11
(b) COMNAVRESFORINST 1133.1A

1. In accordance with reference (a), you are designated as the Recruiter in Charge (RINC) for the Naval Reserve Center, Pensacola, Florida. You will report directly to the Commanding Officer in all matters concerning recruiting and other recruiters assigned to this command. Additionally, you will be responsible for the following:

a. Thoroughly familiarize yourself with references (a) and (b) and information pertaining to the qualifications for enlistments, reenlistments, and affiliations.

b. Be familiar with all aspects of the recruiting mission.

2. As Recruiter in Charge, it is your primary responsibility to provide the best quality of applicants for an enlistment in the U. S. Navy while accomplishing your assigned yearly goals.

REQUEST PERTAINING TO MILITARY RECORDS

Please read instructions on the reverse. If more space is needed, use plain paper.

PRIVACY ACT OF 1974 COMPLIANCE INFORMATION. The following information is provided in accordance with 5 U.S.C. 552a(e)(3) and applies to this form. Authority for collection of the information is 44 U.S.C. 2907, 3101, and 3103, and E.O. 9397 of November 22, 1943. Disclosure of the information is voluntary. The principal purpose of the information is to assist the facility servicing the records in locating and verifying the correctness of the requested records or information to answer your inquiry. Routine uses of the information as established and published in accordance with 5 U.S.C.a(e)(4)(D) include the transfer of relevant information to appropriate Federal, State, local, or foreign agencies for use in civil, criminal, or regulatory investigations or prosecution. In addition, this form will be filed with the appropriate military records and may be transferred along with the record to another agency in accordance with the routine uses established by the agency which maintains the record. If the requested information is not provided, it may not be possible to service your inquiry.

SECTION I—INFORMATION NEEDED TO LOCATE RECORDS (Furnish as much as possible)

1. NAME USED DURING SERVICE *(Last, first, and middle)*	2. SOCIAL SECURITY NO.	3. DATE OF BIRTH	4. PLACE OF BIRTH

5. ACTIVE SERVICE, PAST AND PRESENT (For an effective records search, it is important that ALL service be shown below)

BRANCH OF SERVICE *(Also, show last organization, if known)*	DATES OF ACTIVE SERVICE		Check one		SERVICE NUMBER DURING THIS PERIOD
	DATE ENTERED	DATE RELEASED	OFFICER	ENLISTED	

6. RESERVE SERVICE, PAST OR PRESENT *If "none," check here* ▶ ☐

a. BRANCH OF SERVICE	b. DATES OF MEMBERSHIP		c. Check one		d. SERVICE NUMBER DURING THIS PERIOD
	FROM	TO	OFFICER ☐	ENLISTED ☐	

7. NATIONAL GUARD MEMBERSHIP *(Check one):* ☐ a. ARMY ☐ b. AIR FORCE ☐ c. NONE

d. STATE	e. ORGANIZATION	f. DATES OF MEMBERSHIP		g. Check one		h. SERVICE NUMBER DURING THIS PERIOD
		FROM	TO	OFFICER ☐	ENLISTED ☐	

8. IS SERVICE PERSON DECEASED ☐ YES ☐ NO *If "yes," enter date of death.*

9. IS (WAS) INDIVIDUAL A MILITARY RETIREE OR FLEET RESERVIST ☐ YES ☐ NO

SECTION II—REQUEST

1. EXPLAIN WHAT INFORMATION OR DOCUMENTS YOU NEED; OR, CHECK ITEM 2; OR, COMPLETE ITEM 3

2. IF YOU ONLY NEED A STATEMENT OF SERVICE *check here* ☐

3. LOST SEPARATION DOCUMENT REPLACEMENT REQUEST *(Complete a or b and c.)*

☐ a. REPORT OF SEPARATION *(DD Form 214 or equivalent)*	YEAR ISSUED	*This contains information normally needed to determine eligibility for benefits. It may be furnished only to the veteran, the surviving next of kin, or to a representative with veteran's signed release (item 5 of this form).*
☐ b. DISCHARGE CERTIFICATE	YEAR ISSUED	*This shows only the date and character at discharge. It is of little value in determining eligibility for benefits. It may be issued only to veterans discharged honorably or under honorable conditions; or, if deceased, to the surviving spouse.*

c. EXPLAIN HOW SEPARATION DOCUMENT WAS LOST

4. EXPLAIN PURPOSE FOR WHICH INFORMATION OR DOCUMENTS ARE NEEDED

5. RELEASE AUTHORIZATION, IF REQUIRED *(Read instruction 3 on reverse side)*

I hereby authorize release of the requested information/documents to the person indicated at right (item 7).

VETERAN SIGN HERE ▶ ____________________

(If signed by other than veteran show relationship to veteran.)

6. REQUESTER

a. IDENTIFICATION *(check appropriate box)*

☐ Same person identified in Section I ☐ Surviving spouse

☐ Next of kin (relationship) ____________

☐ Other (specify)

b. SIGNATURE *(see instruction 3 on reverse side)* DATE OF REQUEST

7. *Please type or print clearly —* COMPLETE RETURN ADDRESS

Name, number and street, city, State and ZIP code

TELEPHONE NO. *(include area code)* ▶

INSTRUCTIONS

1. **Information needed to locate records.** Certain identifying information is necessary to determine the location of an individual's record of military service. Please give careful consideration to and answer each item on this form. If you do not have and cannot obtain the information for an item, show "NA," meaning the information is "not available." Include as much of the requested information as you can. This will help us to give you the best possible service.

2. **Charges for service.** A nominal fee is charged for certain types of service. In most instances service fees cannot be determined in advance. If your request involves a service fee you will be notified as soon as that determination is made.

3. **Restrictions on release of information.** Information from records of military personnel is released subject to restrictions imposed by the military departments consistent with the provisions of the Freedom of Information Act of 1967 (as amended in 1974) and the Privacy Act of 1974. A service person has access to almost any information contained in his own record. The next of kin, if the veteran is deceased, and Federal officers for official purposes, are authorized to receive information from a military service or medical record only as specified in the above cited Acts. Other requesters must have the release authorization, in item 5 of the form, signed by the veteran or, if deceased, by the next of kin. Employers and others needing proof of military service are expected to accept the information shown on documents issued by the Armed Forces at the time a service person is separated.

4. **Location of military personnel records.** The various categories of military personnel records are described in the chart below. For each category there is a code number which indicates the address at the bottom of the page to which this request should be sent. For each military service there is a note explaining approximately how long the records are held by the military service before they are transferred to the National Personnel Records Center, St. Louis. Please read these notes carefully and make sure you send your inquiry to the right address. Please note especially that the record is not sent to the National Personnel Records Center as long as the person retains any sort of reserve obligation, whether drilling or non-drilling.

(If the person has two or more periods of service within the same branch, send your request to the office having the record for the last period of service.)

5. **Definitions for abbreviations used below:**

NPRC—National Personnel Records Center
TDRL—Temporary Disability Retirement List
PERS—Personnel Records
MED—Medical Records

SERVICE	NOTE: (See paragraph 4 above.)	CATEGORY OF RECORDS —	WHERE TO WRITE	ADDRESS CODE ▼
AIR FORCE (USAF)	*Except for TDRL and general officers retired with pay, Air Force records are transferred to NPRC from Code 1, 90 days after separation and from Code 2, 150 days after separation.*	Active members (includes National Guard on active duty in the Air Force), TDRL, and general officers retired with pay		1
		Reserve, retired reservist in nonpay status, current National Guard officers not on active duty in Air Force, and National Guard released from active duty in Air Force.		2
		Current National Guard enlisted not on active duty in Air Force.		13
		Discharged, deceased, and retired with pay.		14
COAST GUARD (USCG)	*Coast Guard officer and enlisted records are transferred to NPRC 7 months after separation.*	Active, reserve, and TDRL members.		3
		Discharged, deceased, and retired members *(see next item).*		14
		Officers separated before 1/1/29 and enlisted personnel separated before 1/1/15.		6
MARINE CORPS (USMC)	*Marine Corps records are transferred to NPRC between 6 and 9 months after separation.*	Active, TDRL, and Selected Marine Corps Reserve members.		4
		Individual Ready Reserve and Fleet Marine Corps Reserve members.		5
		Discharged, deceased, and retired members *(see next item).*		14
		Members separated before 1/1/1905.		6
ARMY (USA)	*Army records are transferred to NPRC as follows: Active Army and Individual Ready Reserve Control Groups: About 60 days after separation. U.S. Army Reserve Troop Unit personnel: About 120 to 180 days after separation.*	Reserve, living retired members, retired general officers, and active duty records of current National Guard members who performed service in the U.S. Army before 7/1/72.*		7
		Active officers (including National Guard on active duty in the U.S. Army).		8
		Active enlisted (including National Guard on active duty in the U.S. Army) and enlisted TDRL.		9
		Current National Guard officers not on active duty in the U.S. Army.		12
		Current National Guard enlisted not on active duty in the U.S. Army.		13
		Discharged and deceased members *(see next item).*		14
		Officers separated before 7/1/17 and enlisted separated before 11/1/12.		6
		Officers and warrant officers TDRL.		8
NAVY (USN)	*Navy records are transferred to NPRC 6 months after retirement or complete separation.*	Active members (including reservists on duty)—PERS and MED		10
		Discharged, deceased, retired (with and without pay) less than six months, TDRL, drilling and nondrilling reservists	PERS ONLY	10
			MED ONLY	11
		Discharged, deceased, retired (with and without pay) more than six months *(see next item)*—PERS & MED		14
		Officers separated before 1/1/03 and enlisted separated before 1/1/1886—PERS and MED		6

**Code 12 applies to active duty records of current National Guard officers who performed service in the U.S. Army after 6/30/72.*
Code 13 applies to active duty records of current National Guard enlisted members who performed service in the U.S. Army after 6/30/72.

Keyword Index

This index is designed to provide access to the courses listed in the course exhibit sections of this volume. Course titles are arranged alphabetically under keywords extracted directly from the titles. For example, the keyword *Dental* is followed by all course titles containing that word.

To use this index:

- Identify a word (or group of words) that appears to be unique or descriptive.
- Locate the keyword(s) in this index.
- If the keyword or the course title cannot be found, identify another descriptive word in the title and try again.
- When the course title is found, note the exhibit ID number to the right of the title. Locate that number in the course exhibit section.

Course exhibits are grouped by military service, using the following prefixes: **AF:** Air Force; **AR:** Army; **CG:** Coast Guard; **DD:** Department of Defense; **MC:** Marine Corps; and **NV:** Navy.

110 Ton
110 Ton R11 Centrifugal Air Conditioning Unit (York) NV-1701-0004
R-11 Centrifugal 110 Ton Air Conditioning Combined Maintenance NV-1701-0004

1200 PSI
Boiler Technician (1200 PSI), Class A1 NV-1710-0084
Boiler Technician, Class A (1200 PSI) NV-1710-0129
Machinist's Mate, Class A (1200 PSI) NV-1710-0128

150 Ton
R-114 Air Conditioning System York 150 Ton NV-1701-0009

15G20
15G20 Simulator Maintenance, Class C1 NV-1715-1186

15G21
15G21 Carrier Air Traffic Control Simulator Maintenance, Class C1 NV-1715-1187
15G21 Simulator Maintenance, Class C1 NV-1715-1187

16"/50
16"/50 Caliber Gun System NV-1715-1293

200 Ton
R-114 York 200 Ton Air Conditioning Technician NV-1701-0012

3"/50
3"/50 Caliber Rapid Fire Twin Mount Gun Maintenance (Mk 35) NV-1715-0655
3"/50 Rapid Fire Twin Mount Power Drive and Gun Maintenance NV-1715-0655
3"/50 Rapid Gun Fire Twin Mount Power Drive and Gun NV-1715-1535

3000 PSI
Submarine 3000 PSI Hydraulics Combined Maintenance NV-1704-0247

400 Hertz
400 Hertz Maintenance NV-1714-0049
400 Hertz Motor Generator Electrical System Maintenance, Class C1 NV-1714-0049

490T-1/1A/9
490T-1/1A/9 Antenna Coupler Intermediate Maintenance NV-1715-1721

5"/38
5"/38 Caliber Gun Operation and Maintenance, Class C NV-2202-0158
5"/38 Caliber Gun System NV-1715-1292

5"/54
5"/54 Mk 45 Mod 0 Gun Mount, Class C1 NV-1715-1543
Gun 5"/54 Mk 45 Mod 0 Operational Maintenance NV-1715-1178
Gun Maintenance 5"/54 Caliber Rapid Fire Mk 42 NV-1715-0179
Gun Mount 5"/54 Mk 42 Mod 9 and 10, Class C1 NV-2202-0104
Gun Mount 5"/54 Mk 45 Maintenance, Class C1 NV-1715-1080
Gun Mount 5"/54 Mk 45 Mod 1 Operation and Maintenance NV-1715-1297

500 kW
500 kW 60 Hertz Motor Generator Set Electrical Maintenance NV-1714-0046
500 kW 60 Hertz Motor Generator Set Mechanical Maintenance NV-1714-0047

54H60-77
54H60-77 Propeller Intermediate Maintenance NV-1704-0248

60 Hertz
500 kW 60 Hertz Motor Generator Set Electrical Maintenance NV-1714-0046
500 kW 60 Hertz Motor Generator Set Mechanical Maintenance NV-1714-0047

60/40 Hertz
FFG-7/DD-963 60/40 Hertz Static Frequency Converter Maintenance NV-1714-0029

60/400 Hertz
DD-963 60/400 Hertz Frequency Converter (Air Cooled) Maintenance NV-1715-1710
DD-963 60/400 Hertz Frequency Converter (Air Cooled) System Maintenance NV-1715-1710
FFG-7/DDG-993 60/400 Hertz Frequency Converter (Water-Cooled) System Maintenance NV-1714-0086

6L16
6L16 Oxygen Generator Electrical Technician NV-1715-0918
Oxygen Generator 6L16 Operator NV-1601-0018
Oxygen Generator Operator 6L16 NV-1601-0018
Oxygen Generator Technician 6L16 NV-1715-0918
Treadwell Oxygen Generator Operation/Maintenance 6L16 NV-1601-0018

6YO
Boiler Technician 6 Year Option (6YO) Advanced Maintenance Phase 3, Class C1 NV-1710-0081
Boiler Technician Six Year Obligator (BT 6YO) Advanced Operator NV-1710-0104
Boiler Technician Six-Year Obligator (BT-6YO) Advanced Maintenance NV-1710-0124
Machinist's Mate Six-Year Obligator (6YO) NV-1710-0105
Machinist's Mate Six-Year Obligator (MM 6YO) Advanced Maintenance NV-1710-0125
Machinist's Mate Six-Year Obligator (MM 6YO) Advanced Operations NV-1710-0126

76mm/62
76mm/62 Caliber Mk 75 Mods 0/1 Gun Operation and Maintenance NV-1715-1179
76mm/62 Caliber Mod 0/1 Gun Operation and Maintenance NV-1715-1179

A-6
A-6 Airframes and Hydraulic Organizational Maintenance NV-1704-0356
A-6 and Hydraulic Organizational Maintenance NV-1704-0343
A-6 Structural Systems Organizational Maintenance NV-1704-0341

A-6/EA-6
A-6/EA-6 Electrical/Wire Bundle Repair NV-1714-0065

A-6/EA-6A
A-6/EA-6A Electronic Systems Integrated Organizational Maintenance NV-1715-1735

A-6A
A-6A Environmental, Escape, and Survival Systems Organizational Maintenance NV-1704-0085

A-6E
A-6E (M1-M120 and 158041-1595079) and KA-6D Aircraft Communication, Navigation, Identification (CNI) and Intercommunication and Related Systems Organizational Maintenance NV-1715-0937
A-6E TRAM Weapons System Technician Organizational Maintenance NV-1715-0942
A-6E, EA-6A, and KA-6D Environmental, Escape, and Survival Systems Organizational Maintenance NV-1704-0085

A-7
A-7 AN/APN-190 Doppler Radar Navigation System Intermediate Maintenance NV-1715-0200
A-7 AN/APQ-116 Radar Set Intermediate Maintenance NV-1715-0408
A-7 AN/ASN-90 Inertial Measurement Set Intermediate Maintenance NV-1715-0388
A-7 AN/ASW-26/30 Automatic Flight Control System Intermediate Maintenance NV-1715-0617
A-7 Electrical and Instrument Systems Organizational Maintenance NV-1704-0079

A-7A/B
A-7A/B AN/APQ-116 Radar Set Organizational Maintenance NV-1704-0251
A-7A/B Attitude Heading and Reference System Intermediate Maintenance NV-1721-0006
A-7A/B Electrical and Instrument Systems Organizational Maintenance NV-1704-0079
A-7A/B Hydraulic and Pneumatic Systems Organizational Maintenance NV-1704-0190
A-7A/B Integrated Avionics Weapons System Technician Organizational Maintenance NV-1715-0450
A-7A/B Power Plant and Related Systems Organizational Maintenance NV-1704-0135
A-7A/B Structures, Hydraulics, and Pneumatic Systems Maintenance NV-1704-0190
A-7A/B TF30-P-6/408 Power Plants and Related Systems Organizational Maintenance NV-1704-0135

A-7B/TA-7C
A-7B/TA-7C Power Plant and Related Systems Organizational Maintenance NV-1704-0135

A-7E
A-7E AN/APQ-126 Radar Set Intermediate Maintenance NV-1715-0260
A-7E AN/ASM-375 Inertial Measurement System Test Set Intermediate Maintenance NV-1715-0146
A-7E Armament System Organizational Maintenance NV-1704-0173
A-7E Communication, Navigation, Identification, and Countermeasures Organizational Maintenance NV-1704-0250
A-7E Electrical and Instrument Systems Organizational Maintenance NV-1704-0080
A-7E Hydraulic and Pneumatic Systems Organizational Maintenance NV-1704-0013
A-7E Hydraulic, Pneumatic and Airframe Systems Organizational Maintenance NV-1704-0013
A-7E Integrated Weapons Systems Technician Organizational Level Maintenance NV-1704-0252
A-7E Power Plant and Related Systems Organizational Maintenance NV-1704-0140
A-7E Weapons System Specialist Organizational Maintenance NV-1704-0254
AN/AVM-11 (V) Head Up Display Test Set Intermediate Maintenance (A-7E) NV-1704-0229

A/M26U
A/M26U 16000 Hour Maintenance NV-1720-0004
A/M26U-5 Expeditionary Oxygen/Nitrogen System (EONS) Intermediate Maintenance Activity NV-1720-0005

Abuse
Navy Substance Abuse Prevention Program NV-0799-0007

Access
Advanced Access and Disablement NV-2202-0153
Ultra High Frequency-Demand Assigned Multiple Access (DAMA) NV-1715-1347

Acoustic
Advanced Acoustic Analysis, Class C NV-1715-1505
AN/BSY-1 Acoustic Advanced Maintenance NV-1715-1546
AN/BSY-1 Acoustic Advanced Maintenance Conversion NV-1715-1545
AN/BSY-1 Acoustic Combined Basic Maintenance NV-1715-1544
AN/BSY-1 Acoustic Combined Basic Maintenance Conversion NV-1715-1548
Antisubmarine Warfare (ASW) Module Acoustic Systems NV-1715-1174
Antisubmarine Warfare (ASW) Operations Center (ASWOC) Acoustic System NV-1402-0092
Antisubmarine Warfare (ASW) Operations Center Acoustic Systems Maintenance Technician NV-1402-0158
Basic Acoustic Analysis NV-1715-1852
Basic Acoustic Analysis Refresher NV-1715-1847
Carrier Based Tactical Support Center Acoustic System Maintenance NV-1715-1537
CV Antisubmarine Warfare (ASW) M Acoustic Systems Maintenance Technician NV-1715-1537
Intermediate Surface Acoustic Analysis NV-2202-0146
P-3C Sensor Station One and Two (Acoustic Systems Technician) Organizational Maintenance NV-1715-0256
SG-791/ARR-72(V) Acoustic Sensor Signal Generator Intermediate Maintenance NV-1715-1565
Surface Acoustic Analysis Specialist NV-2202-0145
Time Series Acoustic Recall System Maintenance NV-1715-1113

Acoustics
Ocean Systems Advanced Acoustics NV-1304-0010

Acquisition
Mk 23 Mod 0/1 Target Acquisition System (TAS) Maintenance NV-1715-1037
Mk 23 Target Acquisition System NV-1715-1738
Outboard Maintenance Acquisition Technician NV-1715-1246
Wideband Acquisition and Analysis Maintenance NV-1402-0197 NV-1402-0250
Wideband Acquisition and Analysis Systems Maintenance NV-1402-0197

Administration
Aviation Maintenance Administration, Class A1 NV-1409-0011

Marine Air Traffic Control and Landing System Advanced Operator NV-1704-0422
Marine Air Traffic Control and Landing System Advanced Operator, Class M3 NV-1704-0422
Marine Air Traffic Control and Landing Systems (MATCALS) Radio Maintenance NV-1715-1762
Marine Air Traffic Control and Landing Systems (MATCALS) Radio Maintenance, Class M3 NV-1715-1762
Marine Air Traffic Control and Landing Systems Maintenance Management, Class M3 NV-1405-0034
Marine Air Traffic Control and Landing Systems Systems Analysis, Class M3 NV-1715-1821
Marine Air Traffic Control Basic Technician, Class A1 NV-1715-1818

Marine Air Traffic Control Communications Technician NV-1715-1773
Marine Air Traffic Control Communications Technician, Class C1 NV-1715-1441
Marine Air Traffic Control Navigational Aids Technician NV-1715-1774
Marine Air Traffic Control Navigational Aids Technician, Class C1 NV-1715-1442
Marine Air Traffic Control Radar Technician NV-1715-1772
Marine Air Traffic Control Radar Technician, Class C1 NV-1715-1443
Marine Air Traffic Control Technician Common Core NV-1714-0075
Marine Air Traffic Control Technician Common Core, Class M3 NV-1714-0075
Radar Air Traffic Control Facility Operations, Class C1 NV-1704-0244

Airborne

AN/SRQ-4 Light Airborne Multipurpose System (LAMPS) Mk 3 Maintenance NV-1715-1328
E-2C Airborne Early Warning (AEW) Systems Analyst Organizational Maintenance NV-1715-1521
E-2C Basic Airborne Early Warning (AEW) Systems Analyst Organizational Maintenance NV-1715-1517
E-6A Airborne Communications Officer NV-1715-1822
Introduction to the Airborne Loran AN/ARN-81 Maintenance NV-1715-0247
SH-2F Light Airborne Multipurpose Systems (LAMPS) Avionics Equipment Organizational Maintenance NV-1715-1515
SH-60B Light Airborne Multipurpose System (LAMPS) Mk 3 Weapons System Technician Organizational Maintenance NV-1715-1198

Aircraft

A-6E (M1-M120 and 158041-1595079) and KA-6D Aircraft Communication, Navigation, Identification (CNI) and Intercommunication and Related Systems Organizational Maintenance NV-1715-0937
Aircraft Carrier Inertial Navigation System Operation and Maintenance NV-1402-0225
Aircraft Firefighting and Rescue, Class A1 NV-1728-0006
Aircraft Hydraulic and Pneumatic Component Test Stand (HCT-10) and Limited Aircraft Component Intermediate Maintenance NV-1704-0361
Aircraft Inertial Alignment System NV-1715-1714
Aircraft Launch and Recovery Equipment Arresting Gear NV-1704-0423
Aircraft Launch and Recovery Equipment C13 Mod 1/2 Catapult NV-1704-0307
Aircraft Launch and Recovery Equipment C13 Mod O Catapult, Class C1 NV-1704-0305
Aircraft Launch and Recovery Equipment C7/11 Catapult, Class C1 NV-1704-0424
Aircraft Launch and Recovery Equipment Maintenance Officer, Class 2 NV-1704-0308
Aircraft Launch and Recovery Equipment Maintenance Officers NV-1704-0308
Aircraft Launch and Recovery Equipment Maintenance Technician, Class C1 NV-1704-0425
Aircraft Launch and Recovery Equipment Officer NV-1704-0300
Aircraft Launch and Recovery Equipment Officer, Class C2 NV-1704-0300
Aircraft Launch and Recovery Equipment, Class C1, C13 Mod O Track NV-1704-0305
Aircraft Nondestructive Inspection Technician NV-1704-0412
Aircraft Sealed Instrument Repair Intermediate Maintenance NV-1704-0352
Amphibious Assault Ship Aircraft Inertial Alignment System NV-1715-1714
AN/USM-470(V)1 Aircraft Test Set Advanced Intermediate Maintenance Activity (IMA) Technician Intermediate Maintenance NV-1715-1695
AV-8B Aircraft Communication/Navigation/Identification Electronic Countermeasures/Weapons System Specialist Integrated Organizational Maintenance NV-1704-0399
AV-8B Aircraft Communication/Navigation/Weapons System Specialist Organizational Maintenance NV-1704-0407
AV-8B Aircraft Electrical Systems Technician Integrated Organizational Maintenance NV-1704-0404
AV-8B Aircraft Hydraulic/Pneumatic Mechanic Integrated Organizational Maintenance NV-1704-0402
AV-8B Aircraft Mechanic Integrated Organizational NV-1704-0398
AV-8B Aircraft Ordnance Technician Integrated Organizational Maintenance NV-1704-0403
AV-8B Aircraft Safety Equipment Mechanic Integrated Organizational Maintenance NV-1704-0401
AV-8B Aircraft Structures Mechanic Integrated Organizational Maintenance NV-1704-0400
AV-8B Aircraft Wire/Connector and Fiber Optics Repair/Assembly Organizational Maintenance NV-1715-1728
Aviation Boatswain's Mate Aircraft Handling Advanced, Class C1 NV-1704-0416
Aviation Boatswain's Mate Aircraft Handling, Class A1 NV-1704-0417 NV-1728-0020
Aviation Support Equipment A/S32A-33 Aircraft Towing Tractor Intermediate Maintenance NV-1703-0015
E-2/C-2 Aircraft Familiarization (Flight Crew) NV-1704-0359
E-2/C-2 Aircraft Rigging Organizational Maintenance NV-1704-0362
E-6A Aircraft Wiring and Connector Repair Organizational/Maintenance NV-1714-0082
F-14 Aircraft Electrical Connector/Wire Repair Organizational Maintenance NV-1714-0067
H-46 Aircraft Communication, Navigation, and Identification Systems Organizational Maintenance NV-1715-1719
Mk 3 Mod 7 Ship's Navigation and Aircraft Inertial Alignment Systems (SNAIAS) Operation and Maintenance NV-1715-1061
Ship's Navigation and Aircraft Inertial Alignment Systems Maintenance NV-1715-1061
Tactical Aircraft Mission Planning System (TAMPS) System Administrator NV-1402-0207

Aircrew

Aircrew Survival Equipmentman Common Core, Class A1 NV-1704-0434
Aircrew Survival Equipmentman Intermediate Level Strand, Class A1 NV-1704-0435
Aircrew Survival Equipmentman Intermediate Maintenance, Class F1 NV-1702-0003
Aircrew Survival Equipmentman, Class A1 NV-1704-0304
Aircrew Survival Equipmentman, Class C1 NV-1704-0303

Aircrewman

Aircrewman Candidate Instructor NV-1406-0027
Aircrewman Candidate, Class A NV-0803-0012

Airfield

Marine Expeditionary Airfield Equipment NV-1710-0019
Marine Expeditionary Airfield Equipment, Class M1 NV-1710-0019

Airframe

A-7E Hydraulic, Pneumatic and Airframe Systems Organizational Maintenance NV-1704-0013
E-2/C-2 Airframe and Hydraulics Systems Integrated Organizational Maintenance NV-1704-0369
E-6A Airframe and Hydraulics Systems Organizational Maintenance NV-1704-0451
EC-130 Airframe and Hydraulic Systems Maintenance NV-1704-0278

Airframes

A-6 Airframes and Hydraulic Organizational Maintenance NV-1704-0356

E-6A Airframes and Hydraulic Systems (Initial) Organizational Maintenance NV-1704-0450
SH-2F Airframes, Hydraulics, and Flight Control Organizational Maintenance NV-1704-0290
SH-3 Airframes and Hydraulic Systems Organizational Maintenance NV-1704-0047
SH-60B Airframes and Related Systems Organizational Maintenance NV-1704-0292

Airman
Airman Apprentice NV-2202-0173

Airwing
Aviation Ordnanceman Airwing Strand, Class A1 NV-1714-0078

Alarm
Common Alarm, Temperature Monitoring and Salinity Systems Equipment Maintenance NV-1715-1306
Propulsion Alarm and Indicating Systems Maintenance, Class C-1 NV-1710-0137
Strategic Weapons System Support Indication Control Alarm System NV-1715-1832

Alcohol
Navy Alcohol/Drug Safety Action Program (NASAP/NDSAP) NV-0799-0007
Navy Drug and Alcohol Counselor NV-0801-0011

Alignment
Aircraft Inertial Alignment System NV-1715-1714
Amphibious Assault Ship Aircraft Inertial Alignment System NV-1715-1714
Dynamics Alignment Test Set (DATS) Intermediate Maintenance NV-1715-1199
Dynamics Alignment Test Set (DATS) Operator NV-1715-1200
Mk 3 Mod 7 Ship's Navigation and Aircraft Inertial Alignment Systems (SNAIAS) Operation and Maintenance NV-1715-1061
Ship's Navigation and Aircraft Inertial Alignment Systems Maintenance NV-1715-1061

Allison
Ship's Service Gas Turbine Generator Module (Allison 501) Maintenance, Class C1 NV-1703-0009

Altimeter
AN/APN-141(V) Radar Altimeter Intermediate Maintenance NV-1715-1031
AN/APN-171(V) Radar Altimeter (Low Level) and AN/APQ-107 Radar Altimeter Warning Set Intermediate Maintenance NV-1715-0493
AN/APN-171(V) Radar Altimeter (Low Level) Intermediate Maintenance NV-1715-0493
AN/APN-171B(V) Radar Altimeter High and Low Level Intermediate Maintenance NV-1715-1720

Altitude
AN/TPX-42A Basic Direct Altitude Identity Readout (DAIR) Maintenance, Class C1 NV-1715-1432
AN/TPX-42A(V)10 Radar Air Traffic Control Facility (RATCF) Direct Altitude Identity Readout (DAIR) Maintenance, Class G1 NV-1715-1435
AN/TPX-42A(V)5 Direct Altitude Identity Readout (DAIR) Maintenance, Class C1 NV-1715-1433

Marine Air Traffic Control and Landing Systems (MATCALS) Radio Maintenance, Class M3 NV-1715-1762
Marine Air Traffic Control and Landing Systems Maintenance Management, Class M3 NV-1405-0034
Marine Air Traffic Control and Landing Systems Systems Analysis, Class M3 NV-1715-1821
Marine Air Traffic Control Basic Technician, Class A1 NV-1715-1818
Marine Air Traffic Control Communications Technician NV-1715-1773
Marine Air Traffic Control Communications Technician, Class C1 NV-1715-1441
Marine Air Traffic Control Navigational Aids Technician NV-1715-1774
Marine Air Traffic Control Navigational Aids Technician, Class C1 NV-1715-1442
Marine Air Traffic Control Radar Technician NV-1715-1772
Marine Air Traffic Control Radar Technician, Class C1 NV-1715-1443
Marine Air Traffic Control Technician Common Core NV-1714-0075
Marine Air Traffic Control Technician Common Core, Class M3 NV-1714-0075
Marine Air-Ground Task Force Advanced Counterintelligence NV-1606-0088
Marine Air-Ground Task Force Counterintelligence NV-1511-0028
Marine Air-Ground Task Force Counterintelligence, Reserve, Phase 1 NV-1728-0039
Marine Air-Ground Task Force Counterintelligence, Reserve, Phase 2 NV-1728-0040
Marine Air-Ground Task Force Counterintelligence, Reserve, Phase 3 NV-1728-0041
Marine Air-Ground Task Force Intelligence (Intermediate) Chief NV-1511-0036
Marine Air-Ground Task Force Intelligence Officer NV-1511-0018
Marine Air-Ground Task Force Intelligence Officer Reserve, Phases 1 and 2 NV-1511-0029
Marine Air-Ground Task Force Intelligence Specialist Entry NV-1511-0019
Marine Air-Ground Task Force Intelligence Specialist Intermediate NV-1511-0020
Marine Air-Ground Task Force Intelligence Specialist Reserve (Phases 1 and 2) NV-1511-0030
Marine Air-Ground Task Force Interrogation of Prisoners of War NV-1728-0036
Marine Aviation Operations Specialist NV-1409-0010
Marine Aviation Supply (Mechanized), Class C NV-1405-0007
Marine Aviation Supply Mechanized, Class C1 NV-1405-0030
Marine Aviation Supply Senior Enlisted NV-1405-0026
Marine Corps Aviation Supply Officer Qualification NV-1408-0024
Marine Corps Surveillance Radar, Class C1 NV-1715-0964
Marine Expeditionary Airfield Equipment NV-1710-0019
Marine Expeditionary Airfield Equipment, Class M1 NV-1710-0019
Marine Gas Turbine Inspector Training and Certification NV-1710-0161
Master Marine Diesel Mechanic Maintenance NV-1712-0026
Naval and Marine Aviation Electronic Warfare Officer NV-2202-0166
Naval and Marine Electronic Warfare Officer NV-2202-0108

US Marine Corps Remote Sensor Operator NV-1715-1300
US Marine Corps Remote Sensor Operator Reserve (Phases 1 and 2) NV-1715-1299

Maritime
Joint Maritime Command Information System NV-1402-0243
Maritime Operations Employment of Naval Forces Nonresident Seminar NV-2202-0134
Maritime Operations for College of Naval Command and Staff NV-2202-0133
Naval War Correspondence Course in Maritime Operations (Employment of Naval Forces) NV-2202-0135

Masonry
Masonry Unit Construction 2 NV-1710-0166

Master
Master at Arms, Class C NV-1728-0034
Master Cryptologic Systems Technician NV-1715-1257
Master Diver Evaluation NV-1606-0016
Master Diver Qualification NV-1606-0016
Master Marine Diesel Mechanic Maintenance NV-1712-0026
Navy Master at Arms NV-1728-0031
Navy Master at Arms, Class A NV-1728-0033

Material
Joint Aviation Supply and Maintenance Material Management NV-1405-0009
Prospective Electronics Material Officer Pacific NV-1715-1603

Materials
Advanced Composite Materials Maintenance NV-1710-0140
Training Materials Development System (TMDS) Curriculum Developer NV-1406-0022

Mathematics
Strategic Weapons System (SWS) Electronic Mathematics NV-1107-0001

Matrix
Radio Frequency Switch Matrix System Maintenance, Class C1 NV-1402-0111

Maxillofacial
Dental Laboratory Technician, Maxillofacial, Class C NV-0701-0008

Measurement
A-7 AN/ASN-90 Inertial Measurement Set Intermediate Maintenance NV-1715-0388
A-7E AN/ASM-375 Inertial Measurement System Test Set Intermediate Maintenance NV-1715-0146
AN/ASN-90 Inertial Measurement Set Intermediate Maintenance NV-1715-0388
AN/USM-402(V) Swept Frequency Measurement (SWFT Cart) Test Set Intermediate Maintenance NV-1715-1208
AN/USM-608(V) Inertial Measurement Unit Test Set Operator/Maintainer Intermediate Maintenance NV-1715-1627
Noise and Vibration Measurement NV-1721-0003
Physical Dimensional Measurement and Calibration NV-1606-0082
Precision Optical Measurement NV-1606-0081
Precision Physical and Dimensional Measurement NV-1606-0082

Measuring
AN/SRN-15 TACAN Distance Azimuth Measuring Equipment (DAME) Maintenance NV-1715-0175
Intermediate Level Calibration of Physical/Dimensional Test and Measuring Systems Phases B/D NV-1715-1495

Mechanic
Aviation Structural Mechanic H (Hydraulics) Common Core, Class A1 NV-1704-0440
Aviation Structural Mechanic H (Hydraulics) Intermediate Level, Class A1 NV-1704-0442
Aviation Structural Mechanic H (Hydraulics) Organizational Level, Class A1 NV-1704-0441
Construction Mechanic Repair Parts Storeman NV-1405-0024

Mechanical
500 kW 60 Hertz Motor Generator Set Mechanical Maintenance NV-1714-0047
Advanced Training Phase II Mechanical Maintenance NV-1710-0147
Engineering Mechanical Core NV-1704-0420
FFG-7 Auxiliary Mechanical Subsystem Technician NV-1704-0270
FFG-7 Auxiliary Mechanical Subsystem Technician, Class C1 NV-1715-1073
FFG-7 Auxiliary Mechanical System Technician NV-1704-0271 NV-1704-0391
FFG-7 Auxiliary Mechanical Systems Maintenance NV-1732-0023
FFG-7 Electrical Plant Control Console Operator Mechanical Maintenance NV-1714-0040
FFG-7 Engineering System Maintenance Management, Mechanical, Class C1 NV-1704-0260
FFG-7 Fuel Systems, Mechanical, Class C1 NV-1704-0261
Gas Turbine Mechanical, Class A NV-1710-0103
Gas Turbine Systems (Mechanical), Class C NV-1710-0143 NV-1710-0147
General Mechanical Maintenance Skills NV-1704-0332
Job Oriented Basic Skills (JOBS), Class AP-1, Mechanical Ratings, Strand 7 NV-0501-0004
Mechanical Gyro Maintenance and Repair, Class C1 NV-1715-1090
Missile Tube Support Equipment (Mechanical) NV-1710-0107
Oxygen Generator Operator/Mechanical Technician NV-1601-0019
Underway Replenishment Mechanical and Hydraulic Component Maintenance NV-1710-0113

Mechanics
H-46E Mechanics Organizational Maintenance Course, Class C1 NV-1704-0394

Medical
Aerospace Medical Technician, Class C NV-0709-0003
Medical Deep Sea Diving Technician NV-0803-0010 NV-1606-0014
Medical Department Diving Officers NV-1606-0017
Medical Laboratory Technician Advanced, Class C NV-0702-0012
Medical Laboratory Technician, Advanced NV-0702-0012
Medical Photography Technician, Class C NV-1709-0041

Medicine
Aerospace Medicine Technician NV-0709-0003
Aviation Medicine Technic NV-0709-0003
Aviation Medicine Technician, Class C NV-0709-0003
Clinical Nuclear Medicine Technician NV-0705-0008
Nuclear Submarine Medicine Technician NV-0709-0001
Preventive Medicine Technician, Class C NV-0707-0002

Memory
AN/ASM-607(V) (Series) Computer Memory Loader-Verifier Test Set Intermediate Maintenance NV-1402-0202
ASM-144 On Board Memory Tester Digital Volt Ohmmeter Intermediate Maintenance NV-1715-1210

MEP-105A/009A
MEP-105A/009A Generator Set Intermediate Maintenance NV-1704-0354

Mess
General Mess Operations NV-1729-0015
Mess Management Specialist, Class A NV-1729-0011
Private Mess Operations NV-1729-0016

Metal
Heavy Machinery/Metal Build-Up NV-1736-0006

Shielded Metal Arc Welding
NV-1710-0115
Turret Lathes and Metal Build-Up, Class C1
NV-1736-0006
Turret Lathes and Metal Build-up, Class C1
NV-1736-0003

Metals
Heat Treatment of Metals
NV-1724-0014
Heat Treatment of Metals, Class C
NV-1724-0001
Nondestructive Testing of Metals Eddy Current Inspection, Class C1
NV-1724-0008
Nondestructive Testing of Metals Radiographic Inspector
NV-1724-0012
Nondestructive Testing of Metals Radiographic Operator
NV-1724-0009
Nondestructive Testing of Metals Ultrasonic Shearwave Inspection, Class C1
NV-1724-0005
Nondestructive Testing of Metals Ultrasonic Silver Braze Inspection, Class C1
NV-1724-0004
Nondestructive Testing of Metals Ultrasonic Thickness Inspection, Class C1
NV-1724-0003
Nondestructive Testing of Metals Visual, Magnetic Particle and Liquid Penetrants Operator/Inspector
NV-1724-0006
Nondestructive Testing of Metals, Magnetic Particles, and Liquid Penetrants Operator/Inspector
NV-1724-0011

Meteorological
Meteorological and Oceanographic Analyst/Forecaster
NV-1304-0013
Meteorological Equipment Maintenance, Class C1

NV-1710-0044
Fuel Gas Welding, Brazing, and Cutting
NV-1710-0116
General Maintenance Welding, Class C1
NV-1710-0151
Non-Nuclear Component Welding
NV-1710-0051
Nuclear Propulsion Plant Operators Welding
NV-1710-0114
Shielded Metal Arc Welding
NV-1710-0115

Well
Equipment Operator Water Well Drilling and Development
NV-1601-0032

Wideband
Cryptologic Technician M Universal Cryptologic Processor Wideband Subsystem Maintenance, Class C
NV-1402-0070
Cryptologic Technician M, Universal Cryptologic Processor Wideband Subsystem Maintenance, Class C
NV-1402-0198
Cryptologic Technician M, Wideband System Maintenance
NV-1402-0068
Wideband Acquisition and Analysis Maintenance
NV-1402-0197
NV-1402-0250
Wideband Acquisition and Analysis Systems Maintenance
NV-1402-0197

Wing
F-14A/A+ Wing Surface Control System Rigging Organizational Maintenance
NV-1704-0367
Fixed Wing Electrical/Instrument Systems Intermediate Maintenance
NV-1704-0405

Wire
A-6/EA Electrical Connector/Wire Bundle Repair
NV-1714-0065
A-6/EA-6 Electrical/Wire Bundle Repair
NV-1714-0065
AV-8B Aircraft Wire/Connector and Fiber Optics Repair/Assembly Organizational Maintenance
NV-1715-1728
F-14 Aircraft Electrical Connector/Wire Repair Organizational Maintenance
NV-1714-0067
P-3C Connector and Wire Repair Organizational Maintenance
NV-1714-0061

Wiring
E-6A Aircraft Wiring and Connector Repair Organizational/Maintenance
NV-1714-0082

WLR-1H
Electronic Warfare Technician WLR-1H Maintenance
NV-1715-1250

WR-27
WR-27 Auxiliary Power Unit Intermediate Maintenance
NV-1704-0296

X-Ray
Advanced X-Ray Technician
NV-0705-0007
Advanced X-Ray Technician, Class C
NV-0705-0007
Basic X-Ray Technician
NV-0705-0006
NV-0705-0010
Basic X-Ray Technician, Class C
NV-0705-0010

Yeoman
Submarine Yeoman/Personnelman Advanced Administration
NV-1406-0021
Yeoman Flagwriter, Class C
NV-1407-0004
NV-1408-0028
Yeoman, Class A
NV-1409-0002
NV-1409-0012

York
R-114 Air Conditioning System York 150 Ton
NV-1701-0009
R-114 York 200 Ton Air Conditioning Technician
NV-1701-0012

Course Number Index

This index is designed to provide access to courses listed in the course exhibit section of this volume. Military course numbers are listed in alphanumeric order. When the official military course number is found, note the exhibit ID number to its right. Locate that number in the proper course exhibit section.

Course exhibits are grouped by military service, using the following prefixes: **AF:** Air Force; **AR:** Army; **CG:** Coast Guard; **DD:** Department of Defense; **MC:** Marine Corps; and **NV:** Navy.
